The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1921 (June, July, August and September) was 76·7°. In winter the mean temperature was 55·6°. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. The principal occupation of the people is in connexion with shipping, about 8,000 females being occupied in making lace.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 500, but its suburb, Rabato, had about 10,000 inhabitants in 1921–22. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum; 112 elementary and infant schools, 2 secondary schools, and 55 night schools, maintained at a total cost to the Government of £78,761 in 1925–26; in addition there are garrison schools, a Dockyard school, and 59 private schools of which 9 receive no grants-in-aid from the Government.

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly. The Senate is composed of 17 members, 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the other 7 being elected by a special electorate. The Legislative Assembly consists of 32, returned by 8 electoral districts, each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote. The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects and a Nominated Council consisting of the Lieutenant-Governor, the Legal Adviser and three officers chosen from the Navy, Army and Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta. When any legislative or administrative act is done which, in the Governor's opinion, affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry.

In 1925 the Port of Valletta was entered by 2,903 vessels (tonnage, 3,517,440).

CAPITAL, Valletta. Population (1921), 22,392.

Malta is 2,280 miles by sea, and *viâ* Naples about 1,995; transit, 3½ days.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17′–57° 46′ E. long. and S. lat. 19° 58′—20° 33′, and comprising an area of 720 square miles. The permanent population at the Census of 1921 was 376,474, of whom 265,455 were Indians, the majority born in the Colony, and the remainder mainly of French or mixed descent. The estimated population (Dec. 31, 1925) was 393,708.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 200,447 acres, 163,497 are under sugar, 20,000 under fibre, and 16,968 under other crops; the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. The shipping entered and cleared, in 1925, amounted to 1,252,172 tons, of which 64 per cent. was British. In 1925 there were 144 miles of railway (120 of 4 ft. 8½ in. gauge and 24 of 2 ft. 6 in.), 64 post-offices and 54 telegraph offices in the island, with 820 miles of telegraph, including block telegraph for the railway, and 83 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex-officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1924–25 amounted to Rs.1,396,368. Of the pupils in the Government and aided schools, 59 per cent. are Roman Catholics, 2 per cent. Church of England, 1 per cent. other Christian denominations, 11 per cent. Muhammadans, and 27 per cent. Hindus and others.

CAPITAL, Port Louis. Population (1921), 50,308.

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1921), 6,584. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from

Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, J. B. Colin..... Rs.9,000 to 12,000

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important is Diego Garcia (pop. 1921, 445), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and possesses a good harbour. The total population of the "Other Dependencies" (1921) is 1,365.

Transit from London to Mauritius, 28 to 30 days.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Kameruns on the east. The Protectorate (Headquarters, Lagos) is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The area of the whole territory is about 336,000 sq. miles, and the population is 18,365,634.

By Order in Council of Nov. 1922 there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as President, 26 official members, 3 elected members representing the municipal area of Lagos (Eric C. Moore, Dr. C. C. Adeniyi Jones and Dr. J. A. Caulcrick), 1 elected member representing Calabar (Ata Amonu) and 14 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The natural products exported are palm oil and kernels, gum copal, rubber, mahogany, shea-nuts, hides and skins, and the export of ground-nuts is steadily increasing. A considerable industry has arisen in connexion with tin-mining in the Northern Provinces. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation between Lagos and Kano (705 miles). Branch lines run from Minna to Baro (on the Niger), and from Zaria to Bukuru (143 miles). Another railway line runs from Port Harcourt, at the head of the Bonny estuary, to the coal fields at Udi (150 miles) and on to Makurdi, on the River Benue (291 miles). The Eastern line was linked up with the Western line in July, 1926, and further railway extensions are in progress. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Illorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, and haberdashery.

Surveyor-General, T. J. Waters 1,200

Director of Forests, H. N. Thompson, C.M.G. 1,400

Auditor, A. G. Biden 1,200

Postmaster-General, G. I. Righton 1,200

Transit to Lagos from Liverpool, 15 days. Cable communication to Lagos and Bonny. Inland telegraphs to all important places.

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi.

The population of the Protectorate is 1,207,983, including 1,458 Europeans and 724 Asiatics, and it has a total land area of 37,800 square miles.

The principal exports are tobacco, cotton, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of cotton and tobacco are considerable. Ivory and rubber are also exported in small quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are eight steamers. A railway from Port Herald (the "inland port" of the Protectorate) to Blantyre (113 miles) is open for traffic. An extension from Port Herald to Chindio (the terminus of the Central Africa Railway) on the Zambesi (61 miles) was opened in 1915. The Trans-Zambesia Railway, from Beira to Muraça (on the southern bank of the Zambesi River) was opened in April, 1922; the terminus is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre. A further extension to Fort Johnston, on Lake Nyasa, is projected. Main roads and "carrier" roads are open all

over the Protectorate, the total mileage being 3,500.

Mails to and from England are despatched every week *vid* Cape Town and Beira. Between Beira and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's Line *vid* Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape *vid* Salisbury, and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

The chief towns are Blantyre (population about 300 Europeans and 7,000 natives), Limbe (near Blantyre), and Zomba, the headquarters of the Government.

	1924–25.	1925 26.
Revenue	£293,056	£322,160

PACIFIC ISLANDS.

High Commissioner, His Excellency Sir Eyre Hutson, K.C.M.G. £1,200
(In addition to £3,000 as Governor of Fiji, and allowance of £150 as Consul-General for Western Pacific.)

Secretary to High Commission and Registrar of the Court, Henry Guy Pilling, M.A. £750

Chief Judicial Commissioner, Sir A. K. Young, K.C. 350
(In addition to £1,000 as C.J. of Fiji.)

(1) *The British Solomon Islands*, protected since 1893, consist of Guadalcanal, Malaita, San Cristoval, New Georgia, Choiseul, Ysabel, and other islands situated east of New Guinea, with a total area of about 11,000 square miles, and a population, 1919, of 675 Europeans, 75 Asiatics, and about 150,000 natives. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899: and in 1900 Choiseul and Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1924–25 was £64,091, and the expenditure £65,409; exports, 1924–25, £331,211; imports, £231,040. The seat of government is Tulagi.

Resident Commissioner, R. R. Kane, M.C. (and £150 allowances) £800 to £1,000

(2) *The Gilbert and Ellice Islands*, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179 58° W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52′ S. and long. 169° 35′ E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1921), 264 Europeans, 348 Asiatics, and 29,285 Pacific Islanders. Revenue (1923–24), £53,792; expenditure, £40,820; imports (1922–23), £137,128; exports, £291,086. The Union or Tokelau Group, Fakaafo, Nukunono and Atafu, were included in the Protectorate in 1909, and annexed to H.M. Dominions in Feb. 1916 as part of the Gilbert and Ellice Islands colony, including Christmas Island.

Fanning Island, in lat. 3° 30′ N., long. 159° 13′ W., and Washington Island, 66 miles N.W. by W. of Fanning Island. Pop., 21 Europeans in connexion with Pacific cable station, and about 400 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1916.

Resident Commissioner, A. F. Grimble (and £100 allowance) £700 to £800

(3) *The Tonga or Friendly Islands.*—A protectorate over the Tonga Islands Kingdom was proclaimed May 19, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and a population (1921) of 571 Europeans, 235 half-castes, 23,759 Tongans, and 370 others—total 24,935. The limits of the group are between 15° and 23° 30′ S. and 173° and 177° W. Nukualofa, on the Island of Tongatabu, is the seat of government. The present Queen Salote succeeded the late King George Tubou II. in 1918. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared owing to a tidal wave, in June, 1919. Revenue, 1924–25, £74,345; expenditure, £63,585; imports (1924), £232,600; exports, £306,658. The total shipping entered and cleared in 1924 was 171,012 tons, of which 116,504 tons were British.

Agent and Consul, J. S. Neill ..... £800 (and duty allowance £200)

(4) *The Phœnix Islands* (McKean, Gardner Birnie, Hull, Enderbury, Phœnix, Canton, and Sidney), between 2° 30′ and 4° 30′ S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. 25° 3′ 30″ S.,

long. 130° 8′ 30″ W. Pop. (1914), 140, descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported.

Deputy Commissioner, Dr. W. J. Williams (*H.M. acting Consul for the Society Islands*).
Chief Magistrate, Richard Edgar Christian.

(6) *The New Hebrides Group*, about 500 miles west of Fiji and 250 miles north-east of New Caledonia, is under the administration of British and French officials as provided for by an Anglo-French Convention of 1906 and a protocol of 1914. Native pop. about 60,000. Principal products, copra, coffee, cotton, cocoa, maize, wool, sandalwood and shell. Joint revenue, 1924, 944,725 *francs*; expenditure, 686,742 *francs*. Total imports, 1924, 7,929,327 *francs*; total exports, 23,400,000 *francs*. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia; there is a two-monthly service with France, *vid* Panama.

British High Commissioner, Sir Eyre Hutson, K.C.M.G.
French High Commissioner, M. Guyon.
British Resident Commissioner, G. B. Smith-Rewse £940
French Resident Commissioner, M. E. Gayon (*acting*).
President of Joint Court, Count de Buena Esperanza.
British Judge, Capt. C. C. Francis.
French Judge, M. G. Sachon.

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE.

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes in addition, a large area E. of the Jordan and S. of the Yarmuk.

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923. The country consists of a W. maritime lowland, the mountain region of Judah (which forms the backbone of the district) and, on the E., the depression through which the Jordan wends its way from the Sea of Galilee (Tiberias) to the Dead Sea. The *Dead Sea*, 1,292 feet *below* the level of the Mediterranean, is 46 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet *above* mean sea level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (Oct. 3, 1922), of 757,182, of whom 590,890 are Muhammadans, 73,024 Christians, 83,794 Jews, and 9,474 members of other faiths. Since 1919 about 38,000 immigrants (mostly Jews) have settled in the country; in 1923 the Jewish immigrants came principally from Poland (28 per cent.), Ukraine (13 per cent.), Rumania (4 per cent.), and Russia (23 per cent.). In 1925, 33,801 Jews (14,034 men, 11,649 women, and 8,118 children) entered Palestine as emigrants; in the same period, 2,141 emigrated from Palestine, the net increase thus being 31,660.

Palestine is divided into 2 administrative districts, under District Commissioners. English, Arabic and Hebrew are the official languages of the country. The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it surrendered to General Allenby on Dec. 9, 1917, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct., 1922, of 62,578. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham. *Bethlehem*, the scene of Christ's Nativity, is 5 miles S. of Jerusalem. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 in 1922. Other large towns are Jaffa (47,709), Gaza (17,480), Acre (6,420), and Haifa (24,634).

The railway system of Palestine consists of five sections: *Rafa-Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara; *Haifa-Acre-Samakh*, continuing beyond Samakh to Damascus in the French mandatory territory of Syria; *Jaffa-Lydda-Jerusalem*; *Rafa-Beersheba*; and *Nablus-Afule-Tulkeram*. The main junction of the Government Railways is at Lydda, the general offices being at Haifa.

The chief ports are Jaffa, Haifa and Acre. There are branches of the Anglo-Egyptian, Anglo-Palestine, Banco di Roma, Crédit Lyonnais, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. In 1923 there were 312 government schools and 2 training colleges, with a total of 668 teachers and 19,195 pupils.

	1923-1924.
Estimated revenue	£E1,787,200

District Commissioners.

Jerusalem and Southern District, (vacant).
Northern District (Haifa), A. Abramson, O.B.E.

TRANSJORDANIA.

Emir, H.H. Abdullah, second son of King Hussein of Hejaz, *appointed* April, **1921**.

Transjordania consists of the 3 Districts of *Kerak, Gilead*, and *The Adjlun*, and is under the same mandate as Palestine. It is bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Hejaz and Nejd, and has access to the Red Sea a few miles south of Akaba. The Emirate has an Arab population of about 240,000, of whom almost all are Muhammadans. The area is unknown as the boundaries are not definitely determined. The extreme west of the country is fertile, and agricultural and pastural industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception of the first few miles) through Transjordan territory from Deraa to Kalaat el Mudurwara, where it enters Hejaz territory and continues to Medina.

CAPITAL, Amman.

Chief British Representative, Lt.-Col. C. H. F. Cox, D.S.O.
Inspector-General of Gendarmerie, Lt.-Col. F. G. Peake, C.B.E.

RHODESIA.

The total area of Rhodesia is about 440,000 square miles and the total population is 1,882,726 (1921). The territory is named after *Cecil Rhodes*, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north, to the Limpopo River in the south.

SOUTHERN RHODESIA.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, the political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 149,000 square miles, and the population (1926) 878,259, of whom 39,174 are Europeans. The native population is 834,473, with 4,612 Asiatics and other coloured persons, including those of mixed race. Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor, appointed by the Crown, with an Executive responsible to the Legislature, which consists of a Legislative Assembly, but that body may pass a law constituting a Legislative Council, in addition.

The laws in force in the Cape Colony up to June 10, 1891, were adopted for Southern Rhodesia, so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways. The former is a continuation of the line from Cape Town to Vryburg, *vid* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury (301 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 374 miles. The section from Bulawayo *vid* the Wankie coalfields to the Victoria Falls (282 miles) was completed in June, 1904. A branch line of standard gauge (3 ft. 6 in.) runs from Salisbury to the Eldorado mine (78 miles), and has been extended to Sinoia (4 miles). A standard-gauge line leaves the Eldorado branch at Mt. Hampden Junction (13 miles from Salisbury) for the Shamva mines (73 miles). A line connects Gwelo with Selukwe (24 miles); another runs from Bulawayo *vid* Gwanda to West Nicholson (104 miles), opening up the mining district to the south-east; another connects Bulawayo with the Matopo Hills, where the founder of Rhodesia and Sir Starr Jameson are buried, and a branch line from Gwelo to Umvuma has been extended to Fort Victoria (123 miles). *The African Transcontinental Telegraph Line* ("Cape to Cairo") has been constructed as far as Ujiji in East Africa, about 3,250 miles from the Cape.

Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient goldworkers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1925, was of the value of £63,001,347. The output for the year ended December 31, 1925, was valued at £2,539,542. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, platinum, corundum, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit-trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crop is maize, and tobacco, cotton and citrus fruits are largely exported. Cattle (2,101,927 on Dec. 31, 1925) thrive well, and the annual show at Bulawayo is regarded as the premier show of beef cattle in South Africa. Land is cheap and may be had on favourable terms.

Complete courses of primary and secondary

education up to the standard of matriculation of the South African Universities are provided, in 18 public and 57 farm schools and in 92 aided private schools, and in 7 Government high schools and 5 aided secondary schools. The European pupils in 1926 numbered 6,929, of whom 1,941 were boarders. There is an agricultural and technical school in the Matopos district, with a farm attached (3,000 acres). There are six schools for children of mixed race, with 370 pupils, and native education conducted by mission agencies with Government aid is provided in 1,297 schools, with 87,306 pupils. Grants in aid of native education in 1925 amounted to £26,609, the total educational expenditure being £243,791 in 1925.

Chief Native Commissioner, Sir Herbert Taylor.
Asst. do., H. M. G. Jackson, O.B.E.

High Commissioner for Southern Rhodesia in London, Sir Francis Newton, K.C.M.G., C.V.O. ..... *(and allowance* £500) £2,000

SALISBURY, the seat of government, is situated on the Mashonaland plateau, 4,880 ft. above sea-level (white population, census 1926, 7,324). BULAWAYO, the largest town in Matabeleland, 4,460 ft. above the sea-level, had a white population of 8,251 (1926). Other centres are Victoria, Umtali, Gwelo, Enkeldoorn, Melsetter, Hartley, Selukwe, Gwanda and Gatooma.

NORTHERN RHODESIA.

Northern Rhodesia lies to the North of the Zambesi, its political neighbours being Tanganyika and the Belgian Congo on the north, Nyasaland on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west. The country comprises an area of 287,950 square miles, and with the exception of the Luangwa, Zambesi and Kafue Valleys the altitude exceeds 4,000 feet. The permanent European population in Dec. 1925 was 4,624; the native population is estimated at 1,140,642. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 2,000,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco, cotton, fibre, wheat, oil seeds, and citrus. Stock raising is carried on by many farmers. The native-owned cattle in the territory is estimated at 891,781, and European-owned 89,732. Extensive mineral deposits have been discovered, lead, copper and zinc predominating. Gold, vanadium, and coal are also present. Many species of game are to be found, and good sport at a moderate cost is available for the big-game hunter. The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border. The Zambesi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses. There are 39 post offices, 10 of which are money order offices. A telegraph line exists alongside the railway line throughout its whole length in the territory. The administration of the territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 13 members, with a majority of official members. The seat of Government is at Livingstone on the Zambesi. The country is divided into nine magisterial districts for fiscal and administrative purposes. The most important centres are Livingstone, Broken Hill, Fort Jameson, Lusaka, Mazabuka, Abercorn, Kasama, Fort Rosebery, Ndola and Mongu-Lealui.

ST. HELENA.

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55′ S. lat. and 5° 42′ W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1911) of 3,520. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it *circ.* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry have been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension, an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55′ 55″ S. lat., and 14° 25′ 5″ W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it. The island was administered by the Board of Admiralty until Oct. 27, 1922, when by Royal Letters Patent it became a Dependency of St. Helena and was transferred to the Colonial Office. Georgstown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month. *Resident Magistrate*, R. Lee Lander.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of 400 miles, an area of about 42,000 square miles, and a population of about 600,000, composed of

various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelingkang, and Batang-Lupar mountains; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (20 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 70, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1904. The country produces sago, gutta-percha, india-rubber, beeswax, illipe nuts, birds'-nests, oil, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. The large petroleum field at Miri and Bakong, in the Baram district is now a valuable asset; oil exports (1925), 549,500 tons.

CHIEF TOWN, Kuching. Population (1911), 30,000. Distance from London, 8,700 miles; transit, 25 to 30 days. There are 15 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore about every 5 days. There is also direct communication with Sibu and Miri.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 156 square miles, of which Mahé occupies nearly 56 square miles; the most important of the dependencies are the Amirantes, Farquhar Islds., Coetivy, Aslove and the Aldabra Group. The population was estimated (Dec. 31, 1925) at 26,185, an increase of 1,662 since the Census of 1921, when the total was 24,523 (Mahé 19,426, Praslin 1,999, La Digue 1,303, other islands 1,795). Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour and the lighthouses in the vicinity have been fitted up with modern automatic lights. Although only 4° S. of the Equator, the islands are healthy, the death-rate in 1925 being 14·96 per 1,000, the lowest yet recorded in the islands. There are 27 Roman Catholic and Church of England primary schools; there are also 2 secondary schools.

The principal exports are copra, vanilla, cocoanuts, cocoanut oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 members (2 *ex-officio* and 1 nominated), and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 miles, with an estimated area of 4,000 square miles. In 1921 its population was 85,163, of whom 1,161 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 180 miles, between 10° 40′ and 13° 21′ of W. long. Its estimated area is 27,000 sq. miles, and its population about 1,456,148. For administrative

purposes it is divided into 3 Provinces, under Provincial Commissioners, assisted by 15 District (and 13 Assistant District) Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, palm oil, and ginger; piassava, hides, and rice are also exported. The value of the palm kernels exported in 1925 reached £1,152,467. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 104 miles in length extends in a north-easterly direction from Boia to Kamabai. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the railway. There are 1,242 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND.

(The Somaliland Protectorate.)

Somaliland occupies the "North-Eastern Horn" of the African continent, jutting out into the Indian Ocean along the south of the Gulf of Aden, and is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia. The British Protectorate, declared in 1884, contains about 68,000 sq. miles, its boundaries being defined by treaties with Abyssinia, France and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 344,700. The Protectorate garrison is now confined to a Camel Corps, 400 strong, and a Police force of 500, the Dervish power having been finally broken in 1920. The chief products of British Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

SOUTH AFRICAN HIGH COMMISSION.

High Commissioner for South Africa, The Earl of Athlone, G.C.B., G.C.M.G., G.C.V.O., D.S.O., A.D.C. (also receives £10,000 as Governor-General of the Union of South Africa) £3,000
Imperial Secretary and Accountant, Capt. Hon. B. E. H. Clifford, C.M.G., M.V.O. 1,800
Asst. Imperial Secretary and Chief Clerk, Shirley Eales, O.B.E. 1,090
Auditor, A. Warren 1,100

The High Commission.—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner; by a similar Commission issued in 1905 in Lord Selborne; since 1910 it has been vested by a separate commission in the successive

* Exclusive of allowances.

Governors-General of the Union of South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland. He exercises in the Colony of Southern Rhodesia certain powers and functions in regard to native administration which were granted or reserved to him by the Southern Rhodesia Constitution Letters Patent, 1923; and under the Letters Patent, the Southern Rhodesia Order in Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect.

BASUTOLAND.

(*The Territory of Basutoland.*)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The Census of 1921 showed 495,937 natives and 1,603 whites, 1,069 coloured and 172 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue is derived from Customs, native tax, income tax on Europeans, Post-office, and licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek. There are 532 native schools, with 42,505 native scholars on the roll, a large proportion being in the schools of the French Protestant Mission; there are also 8 white schools, with 124 pupils. The amount spent on education in 1924–25 was £35,836. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware, and groceries.

BECHUANALAND.

(*The Bechuanaland Protectorate.*)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Rhodesia, Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles; the *Caprivi Zipfel* was attached to the Protectorate for administrative purposes by Proclamation (1922). The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 Coloured and 150,185 Natives.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kaffir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 426,344 at the Census of 1921. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Sekgoma (Bamangwato), of Isang (Bakgatla), of Sebele II. (Bakwena), of Ntebogan (Bangwaketsi), of Seboko Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, *vid* Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaberones, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in 1901 from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

	1924-25	1925-26.

SWAZILAND.

(*The Swaziland Protectorate.*)

Swaziland (called by the natives *Kwa Ngwane*) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and the Portuguese province of Mozambique (Delagoa Bay). The total area is 6,678 square miles, and the population (1921) 112,951, of whom 2,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. Except in the Low Veld the country is well watered and healthy.

A Special Court having the full jurisdiction of a Supreme Court, and Courts of Assistant Commissioners having a restricted jurisdiction, have been established. Native chiefs continue to exercise jurisdiction according to native law and custom in civil disputes between natives, subject to a final appeal to the Resident Commissioner. The *Paramount Chief* is Sobhuza, son of the late Paramount Chief Bunu.

The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were about 300,000 head of cattle in the Territory at the end of March, 1926. In the winter season between 250,000 and 300,000 sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal. The agricultural products are tobacco, maize (the staple product), millet, pumpkins, ground-nuts, beans, and sweet potatoes, grown in insufficient quantities to meet local requirements. Most of the subtropical fruits can be grown with success. Large areas of land are suitable for growing cotton, coffee, and tea. The country possesses considerable mineral wealth, including gold, tin, coal, and copper. During the year ended Dec. 31, 1925, 278 tons of cassiterite tin, valued at £67,722, were exported; and 1,308 ounces of gold (valued at £5,561) from Pigg's Peak Mine.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. At each of the district headquarters—Hlatikulu, Stegi, and Pigg's Peak—there is a small number of Europeans in the vicinity of the station, likewise at Bremersdorp, the old headquarters of the Territory. There are schools for Europeans at various centres, and the Government has established a school for natives at Zombode. There are two schools for coloured children. Grants are also made to the various native missions for educational purposes.

There is bi-weekly communication by motor-car between Mbabane and Breyten (82 miles) and between Mbabane and Bremersdorp (23 miles) and between Piet Retief and Hlatikulu (50 miles). Elsewhere the communication is by cart or runners. There are 17 post offices, and telegraph and telephone offices at Mbabane, Stegi, Pigg's Peak, Bremersdorp, Ezulweni, Hlatikulu, Mahamba, and Geodgegun.

	1924–25.	1925–26.
Revenue	£89,710	£110,108
Expenditure	87,597	97,047

Deputy Resident Commissioner and Government Secretary, B. Nicholson, C.B.E., D.S.O., M.C.

STRAITS SETTLEMENTS

(*See* MALAYA).

THE SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36′ N. lat., and reaches from the French Sahara about 15° 10′ E. (at 22° N.) to the north-west boundary of Eritrea (Italian) in 38° 30′ E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 1,200 miles. The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa. The total area is about 1,007,500 sq. miles, with a population of about 6,000,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. The *Gambela enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The *Nile* enters the plains of Lado, in the Mongalla Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,600 miles, and from its sources to the confluence its length may be reckoned at 2,400 miles, giving a total waterway of 4,000 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*, the remaining (first) cataract being in Egypt at Assuan.

Government.—The Sudan is administered by a Governor-General, aided, since 1910, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports *vid* the Red Sea ports may not exceed those levied in Egypt. The import and export of slaves is prohibited. The Sudan is divided into 15 provinces (*mudirias*) under governors (*mudirs*), under whom are British District Commissioners in charge of two or more districts (*mamurias*); a Sudanese official is in charge of each *mamuria*. *Civil Justice* is administered by a Chief Justice and four puisne judges, one of whom is also Registrar-General of Lands. There are also Province and District Judges who are usually the Governors and Dis-

trict Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals lie from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consists of three judges of the High Court. The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment. There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadis, and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. *Criminal Justice* is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to them also appeals lie. Certain Nomad Chiefs have petty Civil and Criminal jurisdiction, and courts of Native Chiefs have been instituted in the Southern Provinces. The Sudan is garrisoned by native troops, forming the Sudan Defence Force. A small garrison of British troops is quartered at Khartoum. The *Police* are locally enlisted, and are under Provincial administration.

Education.—In addition to *kuttabs* (vernacular schools) there are 10 *primary schools*, where instruction is given in English as well as Arabic, attended by about 1,200 pupils; a *secondary school* at Khartoum (Gordon College), and a *training college* (and at Gordon College); and *technical* or *trade schools* at Khartoum, Omdurman, and Atbara.

Production.—The Sudan is the chief source of the world's supply of gum and ivory. Egyptian cotton has been successfully established, and increasing quantities are being produced annually. The Gezira Irrigation Scheme (by means of the Sennar Dam on the Blue Nile at Makwar, about 170 miles south of Khartoum) will enable 100,000 acres to be put under cotton every year. High grade long staple American cotton is also produced under irrigation in Berber and Dongola, and as a rain crop in other provinces. The total cotton area in 1925 was approximately 230,400 acres, and the 1925-26 crop is estimated at 513,700 *kantars*. The opening up of the Eastern Sudan by the new Kassala Railway is an event of much importance to the cotton cultivation of the Sudan. Other products include sesame, senna leaves and pods, ground-nuts, dates, hides and skins, salt, and gold. The principal grain crops are dura (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bulrush millet). Large quantities of ivory are exported, and the cattle and sheep trade of the Sudan is capable of great development. For some years Egypt has depended to a great extent on the Sudan for its meat supply. The forests which line the Blue Nile River banks, rich in fibres and tanning material, extend to the frontier of Abyssinia. On the White Nile the forests contain valuable trees—the ebony tree, the gum acacia, the bamboo, the rubber creeper, and the sudds in the upper reaches are composed of an inexhaustible quantity of papyrus. The finest gum forests are in Kordofan, and the best rubber in the Bahr-el-Ghazal. Gold is being successfully exploited in the Sudan, a mine being worked at Gabait in the Red Sea Province. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country, and considerable quantities are exported annually to Abyssinia. The output of these salt fields is capable of great expansion.

Transport.—In 1926 there were 1,706 miles of railways open for traffic. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. The new line to Kassala, 217 miles in length, connects with the Red Sea line at Haia Junction, 126 miles W. of Port Sudan. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal, and inland chiefly by camels and donkeys. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 4,353 miles in 1920. There are 65 stationary and 11 travelling Post and Telegraph offices, and 11 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

O.C. Cavalry and Mounted Rifles, Maj. N. W. Eastwood.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town has been rebuilt and now contains a large mosque for Muhammadans, a cathedral, and the Gordon College, with extensive Government buildings. Population 30,797. Opposite Khartoum, on the Blue Nile, is Khartoum North (14,319), and on the White Nile is Omdurman (78,624), the former Mahdist capital.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY, formerly "German East Africa," was attacked by British and South African forces and conquered in 1918, the German forces surrendering near Abercorn in North-east Rhodesia on Nov. 23, 1918. Civil Administration was established *pari passu* with the conquest of the territory, and the whole Colony passed under the effective control of the present Administration at the beginning of 1919. Two battalions of the King's African Rifles are now stationed in the Territory, and there is a Police Force of about 2,300 all ranks.

Tanganyika Territory has a coast-line of about 500 miles and an estimated area of 365,000 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (Jan. 1, 1913) at 7,659,898, the coloured population (other than native) being 14,898. The thickly populated provinces of *Ruanda* and *Urundi* are now under Belgian administration, so that the native population of Tanganyika Territory is about 4,107,000. The total white population is about 3,500. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Education is not compulsory, but considerable progress has been made with the reorganization of a system suitable to the needs of the natives. In 1925 there were 78 Government schools, 1,703 Roman Catholic schools, and 865 Protestant schools, with a total roll exceeding 160,814 pupils. There are also three schools for the children of Dutch settlers in the Arusha district, but no other schools for European children have yet been established.

The total area under forests is about 2,700,000 acres, of which about 2,170,000 are included in the Government Forest Reserves. There are a number of plantations of coco-palms, coffee (on the higher lands), ground-nuts, caoutchouc, sugar, cotton, cardamom and cinchona, while fibre plants (especially sisal) are successfully cultivated. In 1925 there were 4,471,729 cattle, and 4,332,686 sheep and goats in the Territory. Minerals known to exist are coal, iron, lead, copper, mica, and salt. Agates, topaz, moonstones, tourmalin, and quartz crystals are found, and garnets in large quantities. Gold is being mined in the Mwanza and Rungwa districts, and a diamond pipe has been discovered in Mwanza.

The chief exports are sisal, cotton, hides, skins, copra, coffee, ground-nuts, ghee and grain; the chief imports being cotton piece goods, foodstuffs, kerosene, cigarettes, tobacco, spirits, wines and beer, and iron and steel manufactures.

	1923-24.	1924-25.
Revenue	£1,315,188	£1,558,982
Expenditure	1,901,158	1,747,578
	1924.	1925.
Imports	£2,062,646	£2,863,917
Exports	2,611,303	2,901,315

The chief seaports are Dar-es-Salaam, Tanga, Bagamoyo, Pangani, Kilwa, Lindi and Mikindani, but few of these are accessible to ocean-going vessels, though gradual improvements are being introduced. There are three railway lines in the Territory—the Tanga Railway from Tanga to Moshi (219 miles), and now extended to the Sanya river, towards Arusha; the Central Railway (772 miles), from Dar-es-Salaam to Kigoma, and now extended to Kizumbi, towards Mwanza; and the Voi-Kake Railway from Moshi to Voi (92 miles) on the Uganda Railway. Dar-es-Salaam is in telegraphic communication with the coast towns, Zanzibar, Mombasa, and many inland centres. There are 75 post offices and telegraph stations.

In 1925, 538 steamers (exclusive of coastal boats) of 918,923 tons and 2,269 vessels (dhows) of 46,882 tons entered the various coast ports from places beyond the Territory.

CAPITAL, Dar-es-Salaam.

TOGOLAND.

(*Joint Franco-British Administration.*)

The former German colony of *Togoland* was conquered by Franco-British forces during the Great War, and its administration has been entrusted to France and Great Britain jointly by the Supreme Council of the Allied Powers.

Togoland is situated on the Gulf of Guinea between the Gold Coast (British) and Dahomey (French), and is bounded on the south by the Atlantic and on the north by (French) Upper Senegal-Niger, and lies between 0° 15′ W.–2° E. long. and 6°–11° N. lat. at its extreme limits, the coast line being only 28 miles in extent (1° 14′–1° 38′ E. long.).

In 1920 the whole territory was divided into a *British Sphere* and a *French Sphere*.

The total area is about 43,040 square miles, with an estimated population of 920,000. The British Sphere consists of an area of about 13,040 sq. miles with an estimated population of 187,940. No portion of the coast is included in the British area. The mandated sphere is administered by the Government of the Gold Coast, and the revenue and expenditure are included in the totals for the Gold Coast. A trade school has been established by the administration at Yendi.

TRINIDAD and TOBAGO.

(*See* British West Indies.)

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6′ S. and long. 12° 2′ W., discovered in 1506 by a Portuguese admiral (Trisão da Cunha), after whom they are named. The population numbers 127, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

Inaccessible Island is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

The Nightingale Islands are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

Gough Island (or Diego Alvarez), in 40° 20′ S. and 9° 44′ W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

TURKS AND CAICOS ISLANDS.

(*See* British West Indies.)

UGANDA.

(*The Uganda Protectorate.*)

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn from Mt. Zulia, on the Sudan boundary, along the Turkana escarpement over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area, 98,776 square miles, including 15,017 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) *Eastern Province*, comprising the districts of Busoga, Bugwere, Bugishu, Budama, Teso, Lango, and Karamoja.

(2) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, and West Nile.

(3) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(4) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts; but the work of repopulating these islands has now been completed, and natives and their cattle have been repatriated.

The whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of *Buganda* is recognised as a native kingdom under a *Kabaka* (H.H. Daudi Chwa, grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or

native assembly. In Buganda (and in *Bunyoro, Ankole* and *Toro*, also ruled over by native "kings."), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to higher courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor who (with the assistance of the Executive and Legislative Councils), makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland and Zanzibar. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a volunteer reserve of Europeans.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan. 1921. The former consists of 6 appointed members and the latter includes the former, with 3 unofficial members, and is presided over by the Governor.

The total population of Uganda (December, 1925) is given as 3,148,481, composed as follows: Natives, 3,137,602; Asiatics, 9,176; Europeans, 1,703 (including 500 females). Among the natives approximately 780,000 belong to the intelligent, civilised Baganda, a race converted to Christianity by British and French missionaries. Until recently educational work has been in the hands of the various Missionary Societies, who receive grants amounting (1925) to £10,800 towards scholarships, &c., for students and teachers; their efforts are now being supplemented by a Government scheme. About 2,000,000 natives speak Bantu languages; there are a few Congo pygmies living near the Semliki river; the rest of the natives belong to the Masai, Nilotic, and Sudanese groups.

In 1925 total exports, £5,096,717; the import figures are now merged in those of Kenya (*q.v.*). The export trade is mainly in cotton (£4,685,992), coffee, chillies, oil-seeds, rubber, ivory, and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

	1924.	1925.
Revenue	£1,239,790	£1,479,284
Expenditure (excl. loans)	918,662	1,108,396

Poll-tax (1925), £419,000; Customs (1925), £513,600.

The headquarters of the British administration is at ENTEBBE; the native capital of Buganda is at MENGO (Kampala). Nile steamers ply to Rejaf, which is about eight days' march from Nimule, the Sudan port of the Lake Albert Marine Service. A regular steamer service is maintained by the *Uganda Railway Administration* between Kisumu, the railway terminus, and Entebbe, Port Bell, and Jinja, the principal Uganda ports on Lake Victoria. The *Busoga Railway Marine*, which, with the Busoga Railway, is controlled by the Uganda Railway, deals with the traffic on Lake Kioga. There are two steamers and a large number of lighters on that waterway. An additional steamer and subsidiary craft ply on Lake Albert and the Nile between Butiaba, Nimule and Belgian port of Kasenye at the south of Lake Albert. The *Busoga Railway*, of the same gauge as the Uganda Railway, 62 miles in length, runs from Jinga (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, and deals with the cotton output in the regions round Lake Kioga, connecting that lake with Lake Victoria. A railway is under construction from Mbulamuti (on the Jinja-Namasagali Railway) to join up with the Uganda Railway *vid* Tororo, Turbo and Eldoret. There is a railway from Port Bell to Kampala, 7¾ miles in length. There is a fleet of Government motor vans.

Governor and Commander-in-Chief, His Excellency Sir William Frederick Gowers, K.C.M.G. (1925) (and £1,000 *duty*)	£3,000
Private Sec., Maj. F. W. Cavendish-Bentinck.	
A.D.C., Capt. C. A. J. Nicholson.	
Chief Secretary, *E. B. Jarvis, C.M.G.	1,800
Provincial Commrs., C. W. G. Eden; P. W. Cooper, O.B.E.; E. B. Haddon; (and a vacancy)	£1,200 to 1,350
Chief Justice, Sir Charles James Griffin, K.C.	1,800
Puisne Judge, F. Guthrie Smith	1,350
Attorney-General, *S. S. Abrahams	1,400
Director of Medical and Sanitary Services, *J. H. Reford	1,500
Deputy Chief Secretary, P. W. Perryman, O.B.E.	1,350
Assistant Chief Secretary, E. L. Scott, O.B.E., M.C.	1,050
Treasurer, *C. K. Dain	1,400
Dir. of Public Works, A. McClure	1,350

Auditor, W. H. Smith	1,100

CAPITAL (Administrative Hdqrs.), Entebbe.

WEIHAIWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1, 1898, and lies in latitude 37° 30 N., longitude 122° 10 E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and a population in 1921 of 154,416, in which are included about 300 resident on the island of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian 121° 40'—an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communica-

WINDWARD ISLANDS.

(*See* BRITISH WEST INDIES.)

ZANZIBAR.

(*The Zanzibar Protectorate.*)

Sultan, H.H. Seyyid Khalifa bin Harub, K.C.M.G., K.B.E., *succeeded* his brother-in-law, Dec. 9, 1911.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north as Warsheikh; but since the cession of the coast-line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (*q.v.*). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at £935,000 in 1925) and produce quantities of copra (exports in 1925, £377,000). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed.

Of late years the importance of Zanzibar as a port of transhipment and distributing centre has largely decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island, in spite of losing the main transhipment trade, will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, hardware, petroleum and piece-goods; the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1921) was 216,790, the area of the former 640 square miles, and of the latter 380 square miles.

Tonnage of ocean-going steamers which entered the port in 1925, 1,778,724; and 5,049 dhows (89,024 tons).

	1924.	1925.

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40·5 per cent. of the total population, and in 1923 87·6 per cent. The birth registration area was established in 1915; it included at that time 31·1 per cent. of the total population, and in 1923, 72·2 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1915 to 1924:—

Calendar Year.	Births.* Number.	Rate per 1,000.	Deaths.* Number.	Rate per 1,000.
1915	776,304	25·1	909,155	13·6
1916	818,983	25·0	1,001,921	14·0
1917	1,353,792	24·7	1,068,932	14·3

1923	1,792,646	22·4	1,193,017	12·3
1924	1,930,614	22·6	1,173,990	11·8

* Exclusive of still-births.

IMMIGRATION AND EMIGRATION.

From 1820 to 1920, 33,654,803 alien immigrants landed in the United States, the arrivals in 1913 being 1,197,892, and those for 1925 and 1926 being (1925) 294,314 and (1926) 304,488. In 1925 the admissions also included 164,121 non-immigrant aliens, making a total of admissions 458,435 for that year; and in 1926 were also included 191,618, making a total of 496,106. The departures in 1925 were 92,728 emigrant aliens and 132,762 non-emigrant aliens, a total of 225,490, making an increase of population on balance of 232,945. In 1926 the departures were 76,992 emigrant aliens and 150,763 non-emigrant aliens, a total of 227,755, making an increase of population on balance of 268,351.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual drunkenness, and imprisonment on conviction of felony, are legal causes of divorce.

Year.	Marriages. Total.	Divorces Granted. To Wife.	To Husband.	° Total.
1906	853,290	48,607	23,455	72,062
1916	1,040,684	74,893	33,809	112,036
1923	1,223,924	111,480	52,999	165,096
1924	1,178,318	115,328	52,984	170,952

° The totals include divorces for which no detailed statistics were obtained.

PHYSIOGRAPHY.

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30′ West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron, copper, lead, zinc, and aluminium; the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver); while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the *second Monday of the January* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *second Wednesday of February* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of $75,000, with a travelling allowance of $25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States, Calvin Coolidge, of Massachusetts, *born* at Plymouth, Vermont, July 4, 1872; graduated from Amherst College in 1895; practised law at Northampton, Mass.; councilman; city solicitor; clerk of courts; chairman Republican City Committee; member General Court of Massachusetts; Mayor of Northampton; member Massachusetts Senate; Lieutenant-Governor of Massachusetts 1916–18; Governor of Massachusetts 1919–20; elected Vice-President Nov. 2, 1920; became President (on the death of Warren G. Harding) Aug. 3, 1923; *re-elected for further term*, Nov. 4, 1924. *Republican.*

1. *Vice-President*, Charles Gates Dawes, of Ohio (*born* Aug. 27, 1865), *elected Vice-President* Nov. 4, 1924. *Republican.*

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

2. *Secretary of State*, Frank B. Kellogg, of Minnesota (*born* 1856), *appointed* Feb. 16, 1925.
3. *Secretary of the Treasury*, Andrew W. Mellon, of Pennsylvania (*born* 1855), *appointed* March 4, 1921.
4. *Secretary of War*, Dwight Filley Davis, of Missouri (*born* 1879), *appointed* Oct. 14, 1925.
5. *Attorney-General*, John G. Sargent, of Vermont (*born* 1860), *appointed* March 17, 1925.
6. *Postmaster-General*, Harry S. New, of Indiana (*born* 1858), *appointed* March 5, 1923.
7. *Secretary of the Navy*, Curtis D. Wilbur, of California (*born* 1867), *appointed* March 18, 1924.
8. *Secretary of the Interior*, Hubert Work, of Colorado (*born* 1860), *appointed* March 5, 1923.

Secretary of Agriculture, William M. Jardine, of Kansas (*born* 1879), *appointed* March 5, 1925.
Secretary of Commerce, Herbert Clark Hoover, of California (*born* 1874), *appointed* March 5, 1921.
Secretary of Labour, James J. Davis, of Pennsylvania (*born* 1873), *appointed* March 5, 1921.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 211,877. The *Senate* consists of 96 members. The salary of a Senator is $10,000 per annum, with mileage at 20 cents per mile, each session. The *House of Representatives* consists of 435 representatives and territorial delegates. The salary of a Representative is $10,000 per annum, with mileage as for Senators.

THE SIXTY-NINTH CONGRESS.

President of the Senate, Charles Gates Dawes, *Illinois* $15,000
Speaker of the House of Representatives, Nicholas Longworth, *Ohio*..... $15,000

LIBRARY OF CONGRESS.

(National Library),
Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851–2. Since that date increased (1) by regular annual appropriations by Congress (now $110,500); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers. The Library of Congress now contains 3,420,345 volumes (gain in 1925–26, 134,580). The floor space of the building (erected at the cost of $6,347,000, and first occupied in 1897) is 583,755 square feet, or nearly 13¼ acres. The book stacks, including the new stack built over the south-east and north-east interior courts, contain about 130 miles of shelving, affording space for 5,140,000 octavo volumes, 48,000 folios, and 84,000 volumes of newspapers. The library is maintained by Congress, the appropriation in 1925–26 being $1,398,996. An auditorium for chamber music (the gift of Mrs. F. S. Coolidge) was opened in 1925, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service.

Librarian of Congress, Herbert Putnam, LL.D..... $7,500
Executive Assistant, Allen R. Boyd 3,800
Secretary, Jessica L. Farnum 3,000

THE SMITHSONIAN INSTITUTION.

Director, C. G. Abbot.

Regional Bureau for the United States International Catalogue of Scientific Literature.
Assistant in Charge, Leonard C. Gunnell.

NATIONAL COMMISSION OF FINE ARTS.

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding $10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, *Detroit, Mich.*
Vice-Chairman, James L. Greenleaf, *N.Y.*
Members, H. Siddons Mowbray, *Conn.*; Milton B. Medary, jr., *Pa.*; Wm. Adams Delano, *N.Y.*; Lorado Taft, *Ill.*; Abram Garfield, *Ohio.*
Secretary and Executive Officer, H. P. Caemmerer.

THE JUDICATURE.

The *Federal Judiciary* consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts. (2) The *Circuit Courts of Appeal*, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The *District Courts*, eighty-seven in number, each served by a District Court Judge.

THE SUPREME COURT

(The Capitol, Washington, D.C.).

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S.

The present authorised commissioned strength of the Regular Army is 12,000. Although the Act of Congress approved April 15, 1926, making appropriations for the military and non-military activities of the War Department for the fiscal year ending June 30, 1927, stipulates that the total authorised number of enlisted men, not including the Philippine Scouts, shall be 125,000, the funds appropriated for pay are sufficient to maintain an average enlisted strength of only 110,940 men in the Regular Army and 7,100 in the Philippine Scouts. The actual strength of the entire active Army of the United States on June 30, 1926, including retired and reserve personnel on active duty at the time, was 133,443, of whom 12,143 were commissioned officers, 1,327 warrant officers, and 119,973 were enlisted men. These figures include the 7,072 enlisted men of the Philippine Scouts. The Army is made up entirely of volunteers.

PRINCIPAL WARS OF THE U.S.

Name of War.	Troops Engaged.
War of Independence, 1775–1784	300,000
North Western Indian, 1790–1795	8,983

World War, 1917–1918	4,051,606

U.S. WAR PENSIONS.

(*Exclusive of World War Pensions.*)

Year.	Number of Pensioners on Roll.			Total Payments.
	Invalids.	Widows, &c.	Total.	
				$
1900	752,510	241,019	993,529	138,462,130
1921	267,629	298,424	566,053	258,715,843
1922	256,918	290,098	547,016	253,807,583
1923	253,686	286,070	539,756	263,012,500
1924	248,049	277,490	525,539	229,994,777
1925	244,657	267,880	512,537	217,150,612
1926	245,879	255,844	501,723	207,844,348

The total disbursement in pensions since the War of Independence is $7,261,346,359, of which $6,784,920,604 has been paid on account of the Civil War. The cost of maintenance and expenses of administration in the fiscal year 1926, including the cost of medical examinations and special field examinations, amounted to $1,993,156.

World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals, as claims of this nature are adjudicated in the U.S. Veterans' Bureau, which has jurisdiction over such matters. (*See* "Ordinary Expenditures" under "Finance," *post.*)

THE NAVY OF THE U.S.

The new construction authorised for the U.S. Navy since 1918 is 8 light cruisers, 6 river gunboats and 2 aircraft carriers (under conversion from battle cruisers). These were all under construction in Oct. 1926 (except 6 of the light cruisers, which have not yet been started). In addition, 3 fleet submarines, authorised by Act of Aug. 29, 1916, are now under construction. The three-year building programme initiated in the Act of Aug. 29, 1916, provided for the following construction:—

	1916.	1917.	1918.	Totals.
Battleships	4	3	3	10
Battle Cruisers	4	1	1	6
Scout Cruisers	4	3	3	10
Destroyers	20	15	15	50
Fleet Submarines	—	—	9	9
Coast Submarines	30	18	10	58
Fuel ships	1	—	2	3
Repair ship	—	—	1	1
Transport	—	—	1	1
Hospital ship	1	—	—	1
Destroyer Tenders	—	1	1	2
Submarine Tender	—	1	—	1
Ammunition ships	1	—	1	2
Gunboats	1	—	1	2

Of the "all big gun" battleships the *Maryland*, *Colorado* and *West Virginia* have been completed for sea. These ships carry eight 16-in. guns (with secondary batteries of twelve 5-in. and eight 3-in. anti-aircraft guns), and are 624 ft. long, 97 ft. wide, and displace 32,600 tons; they are driven by four electric-drive turbines of 28,900 h.p. On Dec. 18, 1924, Congress authorised the Navy Department to effect important alterations to the six oldest battleships retained

in service. The other battleships will be disposed of in accordance with the terms of the *Washington Treaty* of Aug. 17, 1923, limiting naval armaments.

Of the vessels which were authorised in the 3-year programme, the following have not been started :—12 destroyers, 3 fleet submarines, 1 transport, and 1 submarine (Neff).

Information as to characteristics, costs, &c., available for publication concerning naval vessels, may be found in the *Ships' Data Book.*

EDUCATION.

State School Systems, 1923-1924.

In 1923–24 the total number of children in the United States 5 to 17 years of age was 29,345,911, of whom 24,288,808 (12,174,432 boys and 12,114,376 girls) were enrolled in public elementary and secondary schools, and 1,927,264 were estimated to be enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 19,132,451, the average length of school term was 168·3 days, and the average number of days attended by each pupil enrolled was 132·5 days. In 1923–24, 761,308 teachers (128,731 men and 632,577 women) were employed. The average annual salary of all teachers was $1,227. The total number of buildings used as school houses was 263,280, and the estimated value of all public school property was $3,744,780,714.

The total money received for school purposes, excluding balances on hand, was $1,618,427,845. Of this amount, $24,666,275 was received from permanent school funds and from the rent of school lands, $237,659,875 from State taxes or State appropriation, $1,280,722,813 from local tax or appropriation, and $75,388,862 from all other sources, State and local. The total payments, excluding payments of bonds, were $1,820,243,936. This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, $388,469,143 ; for salaries of superintendents, supervisors, principals and teachers, $978,064,705 ; and for all other purposes, $454,210,088.

Compulsory Attendance Laws, 1922.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1923–24.

Of the 913 universities, colleges, and professional schools, 144 are public institutions and 769 under private control or management. The total number of instructors in both private and public institutions was 56,279 (44,345 men and 11,934 women). The public institutions enrolled 255,630 undergraduate and graduate students (166,860 men and 88,770 women). The private institutions enrolled 470,394 undergraduate and graduate students (290,741 men and 179,653 women). In general engineering, 12,630 students were enrolled ; in chemical engineering, 4,141 ; in civil engineering, 10,024 ; in electrical engineering, 14,002 ; in mechanical engineering, 10,637 ; and in mining engineering, 2,771.

The total number of baccalaureate degrees conferred in 1923–24 was 61,285 (36,258 men and 25,027 women) ; altogether 11,261 graduate degrees were conferred (6,447 men and 2,814 women) ; 1,096 honorary degrees were conferred.

The schools of theology enrolled 12,358 students and reported 1,319 graduates ; law schools, 35,732 students and 6,848 graduates ; schools of medicine, 18,900 students and 3,642 graduates ; schools of dentistry, 12,947 students and 3,356 graduates ; schools of pharmacy, 9,951 students and 2,839 graduates ; and schools of veterinary medicine, 511 students and 95 graduates.

Teachers' Colleges and Normal Schools, 1923–24.

In 1923–24, 382 teachers' colleges and normal schools reported to the United States Bureau of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 108 are State institutions ; 88 are teachers' colleges (schools granting a degree after four years' work beyond high school) ; 29 are city normal schools ; 90 are county normal schools ; and 67 are private normal schools. The total number of instructors in all teachers' colleges and normal schools was 12,517. The total number of students enrolled was 273,107 (53,351 men and 219,756 women). Of this total enrolment, 245,669 students are in normal training courses. The number of graduates from the normal training courses was 51,749 men and 34,735 women, making a total of 40,484. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 85,585. The total receipts for normal schools were $48,948,518. The total number of volumes in the libraries was 2,926,023.

Nurse Training Schools, 1919–20.

(*No later statistics available.*)

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Education. In 1920 the number of such schools reporting was 1,775. The number of pupils enrolled in these schools in 1920 was 54,953, and the number graduated 14,980. Of the schools reporting, 88 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 321,619 beds, and the average daily number of patients is 252,823. In 1920 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals 539 schools required 8 hours of duty daily, 474 schools required 9 hours of duty, and 439 schools required 10 hours of duty. In hospitals for the insane, the number of hours of duty required was usually 10 or more. Twenty-two schools required 12 hours of duty, and 9 required more than 12 hours.

The remuneration granted the pupils in general hospitals is usually less than $200. In the first year 54 per cent. of the schools pay under $100, and 41 per cent. pay from $100 to $199 ; in the second year 35 per cent. of the schools pay under $100, and 56 per cent. pay from $100 to $199 ; in the third year of the course 29 per cent. pay under $100, and 60 per cent. pay from

$100 to $199. In the schools in hospitals for the insane the remuneration usually exceeds $400. In the first year of the course 76 per cent. of the schools pay $400 or more; in the second year of the course 79 per cent. of the schools pay $400 or over; in the third year of the course 81 per cent. of the schools pay $400 or more.

More than 85 per cent. of all the nurse training schools in general hospitals offer a three-year course. About 10 per cent. offer a two-year or two-and-one-half year course. In hospitals for the insane, more than 70 per cent. of the schools offer a three-year course, and the remaining schools offer a two-year course. Almost 43 per cent. of the general nurse training schools require one year of high school work for admission, 21 per cent. require two years of high school work for admission, 26 per cent. require a full high school course, and 10 per cent. require only the completion of the elementary grades for admission.

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1923-24.

In 1923-24, 14,827 public high schools reported to the Bureau. The total number of teachers in these secondary schools was 133,395 (48,359 men and 85,036 women). The total number of pupils enrolled in these schools was 2,538,381 (1,183,067 boys and 1,355,314 girls). The total number of coloured pupils included in the preceding figures is 51,745. In the first year of the course 934,192 pupils were enrolled, in the second year 692,558, in the third year 506,286, and in the fourth year 396,853 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools, 412,027 pupils were enrolled. The number of graduates reported was 362,236 (155,698 boys and 206,538 girls).

There were 12,416 high schools that reported a four-year curriculum. In these four-year high schools there are 2,022,752 pupils enrolled (945,629 boys and 1,077,123 girls). In addition, there are 688 junior high schools, with 373,806 pupils (184,772 boys and 189,028 girls); 1,273 junior-senior high schools, with 359,443 pupils (170,520 boys and 188,923 girls), and 179 three-year senior high schools, with 131,008 pupils (61,806 boys and 69,202 girls).

Private High Schools and Academies, 1923-24.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. In 1900 the number of students enrolled in these schools was 110,797. In 1923-24 the number enrolled was 216,522. The number of schools reporting in 1900 was 1,978, and the number reporting in 1924 was 2,124. The total number of instructors in these private high schools in 1924 was 15,703 (6,192 men and 9,511 women). In this group of schools more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the 2,124 schools reporting in 1924, 403 were for boys only, 739 were for girls only, and 982 were co-educational. Altogether, 127 of the schools had military drill in 1924, enrolling 15,100 students.

The lowest American percentage was 19 in 1880, 1881 and 1882; the highest was 91 in 1825.

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding Island possessions and Alaska, is 1,903,215,360* acres, of which in 1920 955,883,715 were farms (503,073,007 acres improved). The total number of farms in 1920 was 6,448,343, of which 2,456,107 are between 100 and 500 acres, 1,474,745 between 50 and 100 acres, and 1,503,732 between 20 and 50 acres. The gross value of farm products of the United States in 1919 was $21,425,623,614, as compared with $8,494,230,307 in 1909. Crops in 1919 were valued at $14,755,364,894, live-stock products (including animals sold or slaughtered) at $6,178,122,273, and miscellaneous products at $492,136,447.

Wool.—The total number of animals shorn in 1919 was 26,438,145, producing 228,795,354 lb.

Minerals.—The total value of metallic minerals produced in 1925 was estimated at $1,380,100,000 (pig iron, $739,316,333; copper, $237,832,000; gold, $49,860,200, and silver, $45,911,864), and of non-metallic minerals the total value was $4,309,900,000 (bituminous coal, $1,046,000,000; Pennsylvania anthracite, $327,664,512; petroleum, 755,852,000 barrels of 42 gallons, value $1,270,000,000); clay products, $415,779,378 (1924); stone, $171,420,000; natural gas, $255,000,000; cement, $285,732,000.

Manufactures.—The manufacturing establishments enumerated at the biennial Census of 1923 numbered 196,309, the value of their products being $60,555,998,200, as compared with a value in 1921 of $43,653,282,833. Data for establishments having products under $5,000 in value were not tabulated for 1923. The leading manufacturing States, ranked according to value of products, are New York, Pennsylvania, Ohio, Illinois, Michigan, and Massachusetts. The principal industrial centres are *New York* (clothing, printing and publishing, bread and other bakery products, millinery and lace goods, fur goods, tobacco, slaughtering and meat packing, sugar refining); *Chicago* (slaughtering and meat packing, printing and publishing, clothing); *Philadelphia* (textiles, printing and publishing, clothing, sugar refining, petroleum refining); *Boston* (printing and publishing, sugar refining, clothing, confectionery and ice-cream, foundry and machine-shop products, boots and shoes); *Pittsburg* (iron and steel, foundry and machine-shop products); *Detroit* (automobiles, automobile bodies and parts, foundry and machine-shop products); *St. Louis* (slaughtering and meat packing, boots and shoes, motor vehicles, clothing); *Cleveland* (automobiles, iron and steel, foundry and machine-shop products); *Baltimore* (clothing, smelting and refining copper, slaughtering and meat packing, printing and publishing, tinware, foundry and machine-shop products); *Cincinnati* (slaughtering and meat packing, clothing, printing and publishing); *Buffalo* (flour-mill and grain-mill products, automobiles, slaughtering and meat packing); *Minneapolis* (flour-mill and grain-mill products, automobiles, printing and publishing); *San Francisco* (printing and publishing, automobiles, coffee and spice).

* Decrease in land area due to building of Pathfinder and Shoshone Reservoirs in Wyoming and several reservoirs in connexion with irrigation projects in Montana.

Acreage and Crop Production, 1926.

Automobile Industry.—The value of the cars and lorries manufactured in 1925 was $3,383,600,000. of parts and accessories, $1,501,445,000, and of tyres and tubes, $818,596,778. The number of cars produced was 3,655,000, of lorries, 488,000, while 59,819,299 tyres and 77,387,836 inner tubes were also manufactured in 1925. The automobile factories gave employment to 502,000 persons, who received $868,200,000 in 1925. The number of motor vehicles registered in 1925 in the U.S.A. was 19,954,347. The gasoline produced in 1925 amounted to 10,886,127,000 gallons, and that consumed to 9,362,094,000 gallons. The taxes levied on motor vehicles by the Federal, State, and Municipal Governments in 1925 amounted to $666,944,345. The number of motor vehicles (including chassis) exported in 1925 was 302,931.

(The Junior offices are conducted in co-operation with local agencies, usually public schools. The number of co-operating offices sending in reports has varied from 12 in 1922 to 23 in 1926. Most of them serve limited groups of boys and girls. Only a few attempt centralised placement. These facts should be borne in mind in interpreting the figures.)

Public Roads.—On Dec. 31, 1924, the total length of public roads was 2,985,000 miles, approximately 460,000 miles of which were surfaced roads. In 1924 the total expenditures for construction and maintenance were approximately $1,070,000,000.

Shipping.—On June 30, 1925, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 711 sailing vessels of 913,447 gross tons; 2,432 steam vessels of 11,142,764 gross tons, a total of 3,143 vessels of 12,056,211 gross tons. In the year ended June 30, 1925, sailing and steam vessels of 68,890,000 tons entered at the various ports of the U.S.; of this total 28,685,000 tons were American and 40,205,000 tons foreign. The tonnage cleared from the various seaports was 69,978,000, of which 29,048,000 tons were American and 40,930,000 tons foreign.

Posts and Telegraphs.—On June 30, 1924, there were 51,266 post offices in the U.S. handling 24,358,121,912 "pieces" of mail matter, of which amount 24,109,381,469 were domestic and 248,740,443 foreign. The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES, AND CURRENCY.

The *Weights and Measures* in common use are shown on page 436. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the *dollar* of 100 *cents*. The rate of exchange on certain dates in 1924 will be found on p. 433.

INDIAN POPULATION.

In 1926 the Indian population of the United States, exclusive of Alaska, was 349,953 by blood (Oklahoma containing 120,487, Arizona 44,728, New Mexico 22,527, S. Dakota 24,676, California 18,913, Montana 13,273, North Carolina 12,191, Washington 11,703, Wisconsin 8,089, and Minnesota 14,819, and the 38 remaining States less than 10,000 each). Total disbursements authorised for the fiscal year ended June 30, 1927, for Indian Service were $12,901,160. In addition to this the sum of $19,696,900 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1925, amounted to $1,656,046,550, of which $193,322,867 was tribal, and $528,776,459 individual.

RECLAMATION.

Commissioner, Elwood Mead, Interior Dept. Building, 19th and F, N.W., Washington, D.C. Employees: Washington Office, 50; Field, 3,000 to 5,000. Expenditure per year about $10,000,000.

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in the 17 arid and semi-arid States of the far West. Twenty-four primary projects, comprising about 3,000,000 acres, are under construction or operation, and the major works aid in serving an additional 1,100,000 acres under private canals that generally get stored water from the government reservoirs. The funds for this work have come chiefly from the sale of public lands, from repayments by the water users, and more recently from royalties from oil and gas-leasing and other mineral operations and Federal power permits, and the money expended is returned to the fund by graduated payments of settlers.

The Bureau has built about 16,000 miles of canals, ditches and drains (including 144,000 canal structures), involving the excavation of 252,000,000 cubic yards of materials. In connexion with this work there have been constructed more than 100 storage and diversion dams with an aggregate volume of 19,221,000 cubic yards, including the *Arrowrock Dam* (349 feet high), Idaho, on the Boise River, and the *Elephant Butte Dam* (306 feet high), New Mexico, on the Rio Grande. The Bureau has built 106 tunnels, 1,075 miles of road, 83 miles of railroad, 3,350 miles of telephone line, 34 power plants, and 1,675 miles of transmission lines. It is mining coal, and has manufactured over 1½ million

barrels of cement and sand cement. The construction cost to June 30, 1926, was $167,000,000.

Nearly 500,000 persons are living on the 37,000 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, water was furnished in 1925 to 1,320,300 acres, and of this area 1,242,750 acres were harvested in 1925, producing crops worth $77,608,880, or an average of about $62·45 per acre. The additional lands using stored water yielded crops worth $53,655,850 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers of the World War have a preference right to enter these farms.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "New Reclamation Era," an illustrated monthly publication, containing articles of interest to irrigation farmers and engineers. An annual report is also issued.

An engineering library of about 5,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested.

GOVERNMENT PRINTING OFFICE,
North Capitol Street, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The present buildings, having a floor space of 17 acres, together with the machinery and equipment which they contain, represent an expenditure of approximately $8,000,000. The annual cost of operation and maintenance is about $12,000,000. There are about 4,100 persons annually employed in the various divisions of the office at a total yearly compensation of $8,250,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 147 linotype machines, 120 monotype key-boards and 128 monotype casting machines, which produced about 2,120,000,000 ems of type in fiscal year 1926. The 179 presses of the office are credited with 2,050,000,000 chargeable impressions, not including 220,000,000 on money order forms and 1,600,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 10,948,000 square inches of electrotypes and stereotypes, and manufactured its own printing and writing inks, rollers, glue, type and type metal. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

THE PHILIPPINE ISLANDS

are situated between 4° 40′–21° 10′ N. lat. and 116° 40′–126° 34′ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 115,026 square miles, of which total 94,946 square miles are contained in the eight largest islands, the 3,730 other islands having a combined area of 14,572 square miles. At the Census of 1918 the population was ascertained to be 10,314,310, almost all of Malayan stock, of whom 7,790,937 are Roman Catholic, 1,417,448 are Aglipayan, 124,575 are Protestant, 443,037 are Muhammadan, 508,596 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1542 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

Sept. 1, 1923, the Philippine Scouts, which form a part of the United States regular Army, consisted of 104 officers (28 being citizens of the Philippine Islands), and 7,010 enlisted men. On the same date the regular Army in the Philippines (other than the scouts) consisted of 500 officers and 4,071 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Sept., 1923, consisted of 376 officers and 5,642 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

In 1921 the income of the Philippine Government was $34,001,101 and the bonded indebtedness $34,750,000. The expenditure on education in 1921 amounted to $7,058,502.64; the University had an enrolment of 4,718 students, and there were 943,364 pupils enrolled in the public schools. The principal exports are hemp, cocoanut oil, sugar and tobacco; the imports being cotton manufactures, and iron and steel manufactures. During 1922 the trade was valued at $95,583,298 for exports, and at $80,197,645 for imports, 56 per cent. of the imports being from U.S. and 67 per cent. of the exports being taken by the U.S. Sugar was the principal article of export in 1921, being valued at $25,013,310, Manila hemp $19,540,915, cocoanut oil $15,734,186, and leaf tobacco $2,273,117.

Towns.—Capital, Manila, in the island of Luzon; population (Dec. 31, 1918), 283,613. The next largest towns are Cebú (63,500), Albay (53,105), and Iloilo (49,808); there are several others with populations from 25,000 to 40,000.

GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26′ N. lat. and 144° 39′ E. long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population on July 1, 1926, of 16,938, of whom 15,615 are classed as native, 779 of the naval station, and 544 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

PORTO RICO.

Porto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50′–18° 30′ N. lat. and 65° 30′–67° 15′ W. long., with a total area of 3,435 square miles and a population of 1,299,809 at the census of 1920. Almost all the inhabitants are Roman Catholics. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 982 miles from Key West. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 460 miles of railroad were in operation in June, 1922, and there are good harbours at San Juan and Ponce. The capital, San Juan, had 71,443 inhabitants in 1920, other towns being Ponce (41,912), Mayaguez (19,124), Arecibo (10,039), Bayamon (10,411), and Caguas (12,149). The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years.

TUTUILA, AMERICAN SAMOA.

Under an agreement between Great Britain, the United States and Germany* (proclaimed Feb. 19, 1900), the first-named Power abandoned all claims to the islands of the Samoan Archipelago, which were then divided between the United States and Germany, the islands east of 171° W. long. being taken over by the U.S. The territory thus acquired consists of the island of Tutuila, Aimuu, Ofu, Olosega, Tau, and Rose

* Under the *Treaty of Versailles*, 1919, the German Samoan Islands were allocated to New Zealand.

Islands, with a total area of about 56 square miles and a population of 8,763 in 1926, distributed as follows:—Tutuila and Aunu'u, 6,616; Ta'u, 1,202; Olosega, 427; Ofu, 432; Rose Island, uninhabited; and Swain's Island (annexed May 13, 1925), 87.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles. Copra is the only export of importance.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of $25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1917 of 26,051. *St. Thomas* (28 sq. miles) has a population of 10,191; *St. Croix* (84 sq. miles) has a population of 14,901, the capital being Christianstad (or Bassin); *St. John* (30 sq. miles) has a population of 960, the capital being Cruz Bay. St. Croix exports sugar and cotton.

The revenue is derived from customs, income tax, ground and building tax, trade tax, &c. The estimated revenue for year ending June 30, 1927, Francs 1,270,200. There is a regular weekly service from New York to St. Thomas, and from Porto Rico to St. Thomas and St. Croix. The islands of St. Thomas and St. Croix possess wireless installations.

CAPITAL, St. Thomas, contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station.

Governor, Capt. Martin Edward Trench, U.S.N. (ret.).

Government Sec., Comdr. Cecil Sherman Baker, U.S.N.

THE PANAMA CANAL.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. After two years of preparatory work, the first excavation was made on January 20, 1882. The amount of work to be accomplished proved to be greater than was estimated, and the conditions under which it was carried on more embarrassing. Sickness, interference of local officials, and mismanagement by the administration in Paris, resulted in the failure of the company, and a receiver was appointed in 1889. Under direction of the French courts a new company was formed to carry on the work, and, after a period of surveys, excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for $40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of $10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of $25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Two years were spent by the United States Government in sanitation, the assembling of plant, and organisation and housing of a labour force; after which operations on a large scale were begun on all parts of the canal.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1926, were $479,911,681. Tolls and other revenues, from its opening until June 30, 1926, amounted to $149,546,174.

The canal is fifty statute miles long (44·08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

The administrative organisation for the canal is known as "The Panama Canal, Balboa Heights, Canal Zone," with the Governor of the Panama Canal (Col. Meriwether L. Walker, U.S.A.) at its head.

Five major trades accounted for over 80 per cent. of the total cargo in transit through the Panama Canal during the fiscal year 1926 as follows:—

United States Intercoastal	38·7 per cent.
Europe and west coast of North America	14·3 ,,
East coast of United States and west coast of South America	12·4 ,,
Europe and west coast of South America	9·2 ,,
East coast of United States and Far East	6·0 ,,

The fiscal year 1924 was the heaviest year the Panama Canal has known, with 5,230 commercial transits and 26,994,710 long tons of cargo, of which 10,800,583 tons were mineral oils mostly from the oil-fields of southern California. The fiscal year 1926, with 5,197 commercial transits and 26,037,448 long tons of cargo, comes near to equalling 1924. During 1926 mineral oil shipments aggregated but 6,652,533 long tons, indicating a considerable increase in other classes of cargo as compared with 1924. This increase is thought to be normal and is expected to continue.

The following table shows the number and tonnage of commercial vessels which have passed through the Panama Canal to June 30, 1926. The Canal was opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 15, 1916.

Fiscal Year.	No. of Transits.	Canal Net Tons.	Cargo Tons.
1915	1,075	3,792,572	4,888,454
1916	758	2,396,162	3,094,114

Wellington — Consul-General, Will L. Lowrie..... 7,000
" *Vice-Consul*, Joel C. Hudson 3,000

THE LEAGUE OF NATIONS.

THE League of Nations came into being when the Treaty of Peace with Germany was ratified on January 10, 1920. Its Charter, containing 26 Articles, is known as the *Covenant*, which begins with the following words:—

"The High Contracting Parties, in order to promote international co-operation and to achieve international peace and security by the acceptance of obligations not to resort to war, by the prescription of open, just and honourable relations between nations, by the firm establishment of the understanding of international law as the actual rule of conduct among Governments, and by the maintenance of justice and a scrupulous respect for all treaty obligations in the dealings of organised peoples with one another, agree to this Covenant of the League of Nations."

The Covenant of the League contains fundamental clauses on the prevention and settlement of disputes. These clauses bind nations who are members of the League not to employ force for the settlement of a dispute until they have first submitted it to the League of Nations (or to arbitrators or to judges), waited at least six months for the award or decision, and then allowed at least three more months to elapse. "They are debarred," said the Right Hon. Herbert Fisher, "from the tiger's spring."

The *Membership* of the League comprises at present 56 nations, or three-quarters of the whole World, the British Empire and the Dominions (including the Irish Free State, together with India) being each an independent member, with separate voting power and representation. The only two great countries which hold aloof are America and Russia; and they, particularly America, are co-operating with the League in a number of beneficent activities.

ORGANISATION OF THE LEAGUE.

The Assembly meets annually at Geneva on the first Monday in September, and consists of 3 representatives from every Member State, each State having one vote.

The Council meets at least four times a year. Great Britain, France, Italy, Germany and Japan are permanent members, and at present 9 other States are annually elected as temporary members. In September, 1926, Poland, Rumania, Chile, Netherlands, Colombia, China, Belgium, Salvador, Czechoslovakia were elected.

The Secretariat is the permanent Civil Service of the League, at Geneva, and is composed of nationals of nearly all Member States.

Secretary-General, Hon. Sir Eric Drummond, K.C.M.G., C.B. (*British*).

Under Secretaries-General, J. Avenol (*French*), B. D. Attolico (*Italian*), Inazo Nitobé (*Japanese*).

Political Section, D. Joseph Mantoux (*French*), *Director*.

Information Section, Pierre Comert (*French*), *Director*; Arthur Sweetzer (*American*), *Assistant Director*.

The Technical Organisations and Commissions, which act as expert advisers to the Council and Assembly, are continually handling questions concerning International Communication and Transit, Economics and Finance, Health, Mandates, and the Reduction of Armaments. No week passes without these bodies discussing international questions of wide interest.

The Permanent Court of International Justice, consisting of eleven Judges and four Deputy Judges, chosen for their high legal and moral authority, sits at the Hague and deals by means of opinions and judgments with all disputes regarding International Law, breaches of International obligations, and the interpretation of treaties. It has already dealt with 20 disputes, some of which might have led to an open breach between the States concerned. The usual annual session begins on June 15.

The International Labour Office is closely connected with the League, but has a parallel organisation of its own at Geneva, which was also set up by the Peace Treaty. The International Labour Organisation contains delegates from employers and workers as well as from Governments. The Governing body represents twelve States, of which eight (including Great Britain, Canada and India) are chosen as being of chief industrial importance in the world. The main object in view is to bring up the standard of labour in the less advanced States to the level of the standard in countries where greater progress has been made. It is being attained by means of Conventions and Recommendations. There have already been over 180 ratifications by Governments of these labour Conventions. The Director of the International Labour Office is Albert Thomas (*French*), the Deputy-Director H. B. Butler (*British*). There is a London office at 26 Buckingham Gate, S.W.1.

Cost.—The cost of the League, 1926–7, will be some £980,000, to which Great Britain contributes £101,000.

WHAT THE LEAGUE HAS DONE.

The work of the League is many-sided, and is constantly growing. It includes the prevention of a number of wars, the creation of the Permanent Court at the Hague as an alternative for war, positive reconstruction as in the case of the financial restoration of Austria, Hungary, and Northern Greece, improvements in international traffic and health, progress in real control of the traffic in drugs and in women, and child welfare. After six years' continuous study of the problem of the Reduction of Armaments the League has reduced it to three bed-rock principles—Arbitration, Security and Disarmament. The purely technical study of Disarmament is now sufficiently advanced for a general World Conference to be held, it is hoped, before September, 1927.

LEAGUE OF NATIONS UNION.

LEAGUE OF NATIONS UNION, 15, Grosvenor Crescent, S.W. 1.*—*Joint Presidents*, Viscount Grey of Fallodon, K.G., and Viscount Cecil of Chelwood, K.C.; *Chairman of Executive Committee*, Prof. Gilbert Murray, LL.D.; *General Sec.*, J. C. Maxwell Garnett, C.B.E., Sc.D.

* Any information about the League and its work can be obtained by application at this address.

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

The Salaries and Allowances of Officers of H.M. Diplomatic, Commercial and Consular Services are fixed in accordance with the scale shown below:—

Salaries and Allowances.

Rank.	Salary.	Representation Allowances.	House Rent Allowances.
Diplomatic Service.	£	£	£
Counsellors	1,200–1,500	300–1,100	300–525
1st Secretaries	800–1,000	250–700	250–437
2nd Secretaries	500–600	150–550	250–437
3rd Secretaries			
Commercial Diplomatic and Consular Services.			
Commercial Counsellors	1,700	300	250
Commercial Secs., Grade I.	1,200–1,500	300	250
Insp.-Gen. of Consulates		300	250
Consuls-General		300	250
Commercial Secs., Grade II.	800–1,000	250	200
Inspectors and Consuls	600–800	100	100–200
Commercial Secs., Grade III.	350–600	50–150	100–200
Vice-Consuls			

ABYSSINIA or ETHIOPIA.

Empress, Waizeru Zauditu (daughter of late Emperor Menelek), *born* 1876; *acceded* Sept. 27th, 1916.

Heir, H.H. Ras Taffari Makonnen, G.C.M.G. (Cousin of the Empress), *born* 1891.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of 10 to 11 millions, of whom about one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Massowah (Eritrea), the French colony of Djibuti, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. It contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Domestic slavery is general and has legal recognition.

The Abyssinians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelek, the son of Solomon by the Queen of Sheba. The form of government is a feudal despotism. There is no popular literature, and little education. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture and cattle breeding. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £2,000,000 for imports and exports, but it continues to suffer severely from the prevalent depression. The import duty on all goods at Gambela is 10 per cent. *ad valorem*, and at Dire-Dawa and Harrar 8 per cent. *ad valorem*; in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. A railway (495 miles) has been built under French auspices from Jibuti to the capital, *viâ* Dire Dawa. The posts and telegraphs are under French management. The principal towns besides Addis Ababa, are Adwa (the capital of Tigré), Gondar, Debra-Markos, Ssiyu, Aksum, Antalo, Ankober, Goré, Dembecha, Ijube, Jimma, and Harrar. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

CAPITAL, Addis Ababa (population fluctuates, but is ordinarily about 50,000). Harrar, in Eastern Abyssinia, has a population of about 45,000.

Imports from U.K. (1924) £11,600
Exports to U.K. (1924) 28,000

FLAG: Green, red, yellow.

BRITISH LEGATION.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General, C. H. Bentinck, C.M.G. (1925) £3,000
Oriental Secretary, Ph. P. C. Zaphiro, C.M.G.
Secretary to Minister, E. W. Thomas.

BRITISH CONSULAR OFFICERS.

Addis Ababa—Consul, G. H. Bullock.
Harar—Consul, G. T. Maclean.
N.W. Abyssinia (Dangila)—Consul, Maj. R. E. Cheeseman, O.B.E.
Southern Ethiopia (Mega)—Consul, Maj. A. T. Miles, D.S.O., M.C.
Western Ethiopia (Gore)—Consul, Craven H. Walker, O.B.E.
S.W. Ethiopia (Magi)—Consul, Capt. Arnold W. Hodson, C.M.G.

Adis Ababa is 500 miles from Zaila, *viâ* Harar; letters from London are from 20 to 24 days in transit if the mail connects with steamer service from Aden; train from Djibouti takes 3 days; caravans take from 35 to 45 days.

AFGHANISTAN (*see* pp. 608-9).

ALBANIA.

(Shkiperia.)

President, Ahmed Bey Zogu, *elected President* Feb. 1, 1925.

Minister of Foreign Affairs, Hussin Bey Vrioni.

Minister in London, Ilias Bey Vrioni, 137, Beaufort Street, S.W. 3.

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic; total area about 20,000 sq. miles; total population estimated (1922) at 1,000,000. The political neighbours are, on the north and east Yugo-Slavia, and on the south-east and south Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, and during the Great War the country was invaded by troops of the Central Powers and of the Allies. After the Armistice (Nov. 11, 1918) a National Council at Durazzo established a provisional government. The independence of the country was guaranteed by the Supreme Council of the Allies. The government is exercised by Regents, representative of the various religious bodies, the executive being entrusted to a council of Ministers, responsible to the elected diet. Cattle rearing and agriculture (grain and tobacco) are the principal industries, and there is some mineral wealth.

	1923.
Estimated Revenue	£866,560
Estimated Expenditure	806,560
Estimated Debt	40,000
Value of Imports	283,300

CAPITAL, Tirana (pop. 12,000); other centres are Scutari (pop. 32,000); Elbasan (pop. 13,000); Berat (pop. 8,500); Korytza (pop. 18,000); Durazzo (pop. 5,000); and Valona (pop. 7,000).

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, W. Seeds (1926), Durazzo £2,500

Durazzo—3rd Secretary and Vice-Consul, Robert Parr.

Naval Attaché, Capt. C. D. Burke, R.N.

Clerk, H. V. Ballandas.

Korytza—Vice-Consul, J. Pursell.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30′—60° E. long. and 12° 45′—34° 50′ N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000. The various Arab States are shown below:—

THE EMPIRE OF NAJD.

Sultan of Najd (1908) *and King of the Hejaz* (Jan. 11, 1926), H.H. Abd-el-Aziz al Saud, G.C.I.E., *born* 1882.

In the 18th century Najd was an independent State and the stronghold of the Wahabite sect. It subsequently fell under the Turkish yoke, but in 1913 the present Sultan threw off Turkish rule and captured from the Turks the Province of Hassa. In 1921 he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and accepted the surrender of the greater part of Asir.

Najd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahna Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at 1,275,000 Arabs, negroes and half-breeds, the majority being Muhammadans of the Wahabite movement. There is little agriculture, but wheat and barley are grown; the principal industry is camel and sheep raising. The exports are woven cloaks, dates, live stock, hides and skins. The capital is Riyadh, and the principal trading centres are Hufuf, on the Persian Gulf littoral (30,000), Shaqra, Anaisah, Buraida, Hail and Hauta (Central), which have populations of 8,000 to 10,000. The only ports (Persian Gulf) are Qatif and Ojair, which are suitable only for sailing craft. Riyadh is a station on the Pilgrims' trans-Arabian caravan route from Hassa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabites.

The *Hejaz* extends from Asir in S. to Palestine and Syria in N., and from the Red Sea, the Gulf of Akaba, and Palestine in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes. On the coast are the small ports of Muwela, Damgha el Wijh, Yambo, Rabigu and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the Hejaz Railway. The *Oasis of Khaibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a Jewish centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina* (*Al Medina*, "The City"), 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad.

Mecca, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. *Jeddah*, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets. The *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo.

CAPITAL, Riyadh (pop. 20,000).

Jeddah—British Agent and Consul, R. W. Bullard.

YEMEN.

Yemen occupies the S.W. corner of the Arabian peninsula, between the Imamate of Asir and the British dependency of Aden, with an estimated area of 74,000 sq. miles and a population of 600,000 to 700,000. It was formerly divided into the vilayets of Sana'a, Tais, Asir and Hodeida, and it extends inland to the Dahna Desert and to the tribal territories of Hadramut. Part of Yemen is now included in the territories of the Idrisi Imam, and of the remainder the greater part is under the rule of the Imam of Sana'a.

THE IDRISI IMAMITE.

Imam, Seyyid Hassan ibn Ali ben Muhammad, *succeeded* 1924.

The territory of the Idrisi Imam (who claims the Imamate of Asir and part of Yemen) extends along the Red Sea littoral, approximately from Hali Point to the port of Hodeida. It includes part of Asir, part of Yemen and the Farsan Islands, and extends inland to the Dahna Desert. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

THE IMAMATE OF SANA'A.

Imam of Sana'a, Yahya Muhammad Hamid ed-Din, *born* 1876.

Heir Apparent (*Saif al Islam*), Ahmed.

The Imamite of Sana'a occupies part of the south-western corner of the Arabian peninsula, extending westward to Red Sea littoral and eastward to the desert. Part of the littoral, including the port of Hodeida, has been captured by the Idris Imam. On the plateau between the coast and the desert are the most fertile parts of Arabia, where wheat, barley, millet and coffee are extensively grown. The seaport of *Mocha* has become associated with the coffee export trade, but in this trade (and in all others) it is of secondary importance to Hodeida; the imports are principally cereals and cotton goods. The capital is the walled city of Sana'a (pop. 20,000), and about 70 miles to the S. of the capital is Dhamar, an ancient seat of learning, and the headquarters of the Zaidi sect of the Muhammadans.

THE PRINCIPALITY OF KUWEIT.

Ruler, Sheikh Ahmad al-Jabir as-Subah, C.I.E., *acceded* March, 1921.

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Najd (El Hasa). The important harbour and gulf port of Kuweit, the capital (pop. 50,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin–Constantinople–Baghdad railway as originally projected in 1903.

British Political Agent, Major J. C. More, D.S.O.

THE SULTANATE OF OMÂN.

Sultan, Seyyid Taimur bin Faisal bin Turki, C.S.I., *born* 1886, *suc.* Oct. 5, 1913.

Omân (area 82,000 sq. miles, estimated pop. 550,000) is a Muhammadan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omân, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Omân proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1923–24 to £559,855. Dates are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat (with the sister town of Matrah), has an estimated population of 22,000.

Muscat—British Consul and Political Agent, Maj. C. C. J. Barrett, C.S.I., C.I.E.
per mensem Rs. 2,250

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Omân on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadarim, an ancient people of Arabian stock (Hadorami was the son of Joktan, *Genesis* x., 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Kabr Hud) and Shibâm (Kabr Sâlih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the *Sultan of Shakr and Mokalla*, K.C.I.E., who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Sey yem and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Ka'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the

Ka'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

TRUCIAL COAST.

The independent tribes on the *Pirate Coast*, which partly encloses the Persian Gulf from Ras-el-Kheima to Odeid, are bound under treaties with the Government of British India to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the coast ports largely consists in exports of pearls to India *viâ* Lingah and Bahrein (a British island off the coast of Hassa).

ARGENTINE REPUBLIC.

(República Argentina.)

President (1922–28), Dr. Marcelo T. de Alvear, *assumed office*, Oct. 12, 1922.....$96,000
Vice-Pres. (1922–28), Dr. Elpidio Gonzalez 36,000

Minister of the Interior, Dr. José P. Tamboriui.
Foreign Affairs, Dr. Angel Gallardo.
Finance, Dr. Victor M. Molina.
Justice and Public Instruc., Dr. Antonio Sagarna.
Agriculture, Señor Emilio Mihura.
War, General Agustin P. Justo.
Marine, Adm. M. Domecq-García.
Public Works, Dr. Roberto M. Ortiz.

Minister in London, Señor Dr. J. Evaristo Uriburu, 30 Grosvenor Gardens, S.W. 1.
Counsellor of Embassy, Señor Don Paulino Llambi Campbell.
First Secretary, Señor Don Carlos Miguens.
Financial 1st Secretary, Señor Don Carlos M. Dominguez.
Naval Attaché, Capt. Don Luis Pillado Ford.
Commercial Attaché, Señor Don Julián Duggan.
Civil Attachés, Señor Don R. C. Quesada; Señor Don R. Q. Blamey Lafone.
Consul-Attaché, Señor Don. H. Fernandez-Beschtedt.
Attaché, Señor Don A. Scilingo.
Special Attaché, Señor Dr. Don Juan E. Richelet.
Consul-General, Señor Don Ernesto C. Perez, 7 Gower Street, W.C.1.

There is a Consulate-General at *Dublin*, and there are also Consulates at *Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport*, and *Glasgow*; and Vice-Consulates at *Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough*, and *Swansea*.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 10,087,118 in 1925. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1925 the immigrants numbered 293,176, and the emigrants in 1923 numbered 217,899. The climate is moderate. Spanish is the language of the country.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive $18,000 (paper) *per annum*.

Production.—Of the total area about one-third is suitable for agriculture and cattle raising, and vast tracts are held by the Federal Government for sale or lease to colonists. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were 37,064,850 cattle (1922), 36,208,981 sheep (1925), 9,432,421 horses (1925), 523,416 mules (1925), 4,879,835 goats (1925), and 1,436,638 pigs, (1924). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1925 the exports of wheat were 2,993,423 metric tons, oats 433,010, linseed 960,707, maize 2,935,956 metric tons, butter 26,850 tons, wool 111,400 tons, sheep skins 9,487 tons, dried oxhides

27,102 tons, salted oxhides 140,984 tons, frozen beef 3,959,166 quarters, chilled beef 4,939,362 quarters, frozen lamb and mutton 4,557,885 carcases. In 1925 there were 5,139 registered wine presses, handling 8,846,874 cwt. of grapes, the output being 6,504,176 hectolitres. The export of wine to neighbouring South American States is increasing annually, and the importation of wine has almost ceased. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, in the Department of Escalante. The Argentine State Oilfields at Comodoro Rivadavia produced 603,386 cubic metres in 1925; the output of private companies was approximately 322,000 cubic metres.

Communications.—There were (1924) 22,225 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 43,153 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are several aeroplane services between Argentine centres. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. In 1925 2,419 ships of a total tonnage of 8,385,388 (44 per cent. British) entered the port of Buenos Aires.

Defence.—The Navy consists of 2 super-Dreadnought battleships (reconstructed in 1925), 2 modern, light cruisers, 2 destroyers, 3 submarines, and 2 sloops are being obtained in Europe. Strength about 800 officers and 12,000 men. The principal naval base is at Puerto Belgrano, near Bahia Blanca, and there are minor bases at La Plata and Buenos Aires, while a new submarine and air base is being built at Mar del Plata, near the mouth of the La Plata. The naval aviation base is at Puerto Belgrano, with an airship base at Punta Indio. The Army is organised in 5 divisions, and numbers about 1,500 officers and 25,000 men on a peace footing. The divisions should consist of about 40,000 men on a war footing.

Education.—*Primary* Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. *Secondary* Education is controlled by the National Government in National Colleges, numbering 45 in 1923, with 15,500 students, average annual fees $45 (paper); in Normal Schools, numbering 86 in 1923, with 14,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are *National Universities* at Cordoba, Buenos Aires, La Plata, and Tucuman, and Faculties at Santa Fé, Rosario and Paraná.

	1926.
Revenue (Budget Estimate)	$675,596,116
Expenditure (Budget Estimate)	674,916,358

The Argentine Debt.

According to official figures the Public Debt at Dec. 31, 1925, stood as follows:—

Federal (*Paper Pesos*)	$2,237,612,323
Provincial (*Paper Pesos*)	596,000,000
Municipal (*Paper Pesos*)	288,000,000
Total	$3,121,612,323

The total was divided as follows:—

Federal—		
Unconsolidated		$493,945,471
Consolidated:		
Internal	$910,215,225	
External	833,441,627	
		1,743,666,852
		$2,237,612,323

The balance is Provincial and Municipal, the details of which in 1922 (latest available) were:—

Provincial (*Consolidated*)—	
Internal	323,459,000
External	159,924,000
	$483,383,000
Municipal (*Consolidated*)—	
Internal	85,284,000
External	86,639,000
	$171,923,000

The Unconsolidated Debts of the Provinces and Municipalities are estimated at $150,000,000.

	1924.	1925.
Total Imports (gold $) ...	$828,709,993	$876,847,666

AUSTRIA.
(Oesterreich.)

President of the Federation (Nov. 20, 1924), Dr. Michael T. Hainisch.
Federal Chancellor, Minister of Foreign Affairs, and Minister of the Interior (Oct. 20, 1926), Dr. Seipel.
Vice-Chancellor and Justice, Dr. Franz Dinghofer.
Education, Richard Schmitze.
Finance, Dr. Viktor Kienböck.
Agriculture and Forestry, Andreas Thaler.
Social Welfare, Dr. Josef Resch.
Commerce and Communications, Dr. Hans Schürff.
War, Karl Vaugoin.

Minister in London, Baron George Franckenstein, 18 Belgrave Square, S.W. 1.
Counsellor, Baron William Engerth.
Secretary, Karl von Zeileissen.
For Debt Clearing, Dr. Felix Weiser.
Consul-General (Vacant).

Prior to the War the Austrian Empire, joined to the Kingdom of Hungary, was the largest Empire, next to Russia, on the continent of Europe, situated between 42°–51° N. lat. and 9° 30'—26° 20' E. long. It embraced an area of 240,456 sq. miles, and a population (1914) of nearly 53,000,000, and included Upper and Lower Austria; Bohemia; Bukovina; Carinthia, Carniola, Dalmatia, Görz and Gradiska; Istria, Moravia, Salzburg, Silesia, Styria, Trieste, Tyrol and Vorarlberg; with Bosnia and Herzegovina as administered territories. At the conclusion of the War, the territories of the Austrian Republic comprised an area of 31,756 square miles, with a population (1920) of 6,067,000.

On June 28, 1914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914–18. Before the armistice of Nov 11, 1918, Hungary had seceded from the "Dual Monarchy," and a Republic was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28, 1918).

Under the *Treaty of St. Germain* (Sept. 10, 1919) the political neighbours of the Austrian Republic are the Republics of Germany and Czechoslovakia on the N.; the Kingdom of Italy, and the Yugo-Slav Kingdom on the S.; Switzerland on the W., and Hungary on the E.

Under the new Constitution (Nov., 1920), Austria became a Republican Federation of eight Provinces:—Lower Austria and Vienna, Upper Austria, Carinthia, Styria, Salzburg, Tyrol, Vorarlberg and Burgenland (West Hungary); the Bundesrat and Nationairat were constituted; a government formed, and a President elected; Vienna was later formed into a separate Province. The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan-Germans* coming next in order. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German Coalition Government under Doctor Seipel (a priest). Elections were held again in October, 1923, and the same Government was returned.

Complete religious liberty is one of the fundamental laws of the new Republic. The prevailing religion is Roman Catholic.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation. The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct., 1922, the exchange value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £1 being equal to 325,000 crowns (in place of 24·22). The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about £25,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated, nearly one-half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923. The High Commissioner, Dr. Zimmerman, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec., 1922. Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus about 79,000 superfluous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr. Zimmermann left Vienna in July, 1926. The issue of uncovered bank-notes was stopped on Nov. 18, 1922, and the Austrian crown was stabilised at about Crs. 320,000 = £1. In 1925 a new currency was introduced, the unit being the Austrian *schilling* (=10,000 paper Crowns). Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic.

The following apportionment of the pre-War Debts of the Austro-Hungarian Monarchy has been suggested (1924):—

To	Austrian Debt.	Hungarian Debt.
Austria	38·827	1·581
Czechoslovakia	41·7	35·945
Fiume	...	0·748
Hungary	...	45·733
Italy	4·087	...
Poland	13·733	0·075
Rumania	1·61	11·802
Yugo-Slavia	2·043	14·116
Total	100·0	100·0

Industries.—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most

important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery.

Communications.—In Sept., 1919, there were about 3,800 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1914, but the new Republic is land-locked.

Defence.—During the War of 1914-18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the *Treaty of St. Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Republican Army is by voluntary enlistment for twelve years.

A Kingdom of Central Europe, with a total area (1920) of 11,302 square miles and a population (Census of 1919) of 7,577,027. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately overcame the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £100,000,000, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 25, 1918, at the great turn of the tide, Antwerp was reoccupied by the victorious Belgian army, and Brussels and the remainder of Belgian soil a few days later. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut)

and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

GOVERNMENT.—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 120 senators (with the exception of 27 elected by the provincial councils) and 186 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; *i.e.*, to revise article 47 of the Constitution. This was done (Feb. 7, 1921) and a new Chamber was elected in 1925. Deputies receive 12,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Under Annex IV. of the *Treaty of Versailles* Germany undertook to deliver to Belgium certain live-stock to replace the animals seized or destroyed during the War of 1914–1918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

DEFENCE.—In 1914 the *Army* on a peace footing consisted of about 50,000, all ranks. In the War of 1914–1918 over 500,000 passed into the armies, which were reorganised on French territory during the defensive period of the campaigns. An organised force of 200,000 co-operated with the Allies during the decisive offensive of the autumn of 1918. Those returned as dead or missing, during the War, numbered 102,382. In 1923 a new Recruiting Law was passed, entailing compulsory service for 12 months, with certain exceptions. The yearly intake of recruits is fixed at 49,500, and the Army consists of a First Army of 4 Corps and 8 Divisions, a Second (Reserve) Army of 8 Divisions, and 1 Cavalry Division. Belgium has a small force of torpedo boats.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control. Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. Louvain University is to be rebuilt. After considerable opposition, and by way of a compromise, Ghent University, which had hitherto transacted its business and given its teaching in French, was in 1923 made bi-lingual, many Flemish lectures being substituted for French, and Flemish becoming the official language of the University.

	1925.
Revenue	*Francs* 7,724,000,000
Expenditure	8,827,000,000
Debt (Sept. 30, 1924)	40,684,000,000
Imports (1924).....	17,581,108,000
Exports (1924).....	13,932,504,000
Imports from U.K. (1924) ...	£23,643,769
Exports to U.K. (1924).....	36,421,052

The imports in 1924 were: manufactured articles (4,515,892,000 francs), raw materials (8,531,155,000), foodstuffs and beverages (63,687,000), and live animals (4,456,820,000); the exports were: raw materials (4,701,005,000 francs), manufactured articles (7,877,358,000), and foodstuffs and beverages (1,334,797,000).

COMMUNICATIONS.—In 1924 there were 4,770 kilometres of State railways (normal gauge) and 4,383 kilometres of narrow gauge. In 1924 there were 46,187 kilometres of telegraph wire and 2,259 offices. The navigable rivers and canals have a length of 1,231 miles (1919), and there are 6,177 miles of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1924) of 183 vessels (381,650 tons), in addition to which there were 453 fishing boats. In 1924, 14,373 vessels entered at Belgian ports (tonnage 22,316,522). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since re-opened for traffic). The vexed question of the Scheldt, of which the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. The navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population (Dec. 31, 1923) of 807,962 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (300,677); Ghent (163,877), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (165,096) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

THE BELGIAN CONGO.

Governor-General, His Excellency Martin Rutten, G.C.V.O.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated (1924) at 12,000,000. The total European population (Jan., 1923) was 10,037, of whom 5,853 were Belgians, 704 were British, 365 Americans, 527 Italians, 724 Portuguese, 110 Swedes, 66 Russians, 267 French, 235 Dutch, 115 Swiss, 381 Greeks, 40 Luxemburgers, 33 Danes, 26 Norwegians, 22 Spaniards, and 569 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Boma to Lukula, the cocoa planting district of Mayumbe. Above Leopoldville the river and its numerous affluents are navigable by steamer for about 5,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (125 kilometres), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (273 kilometres) was completed in 1916, connecting the West Coast of Africa with Belgian East Africa and the East Coast. The Katanga Railway reached Bukama in May, 1928, thus linking up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. Within eight years, 450 miles of railway have been constructed, 200 of which were laid during the War. It is now possible to travel by train direct from Cape Town to the river Congo, a distance of 2,650 miles. Work has been started on the Stanleyville-Lake Albert Railway, which will run between the Congo River and the Nile, providing the last link to direct river and rail communication between the Cape and Cairo. Two new lines will run from the copper mining district of Katanga towards the West Coast, one of them reaching Lobito Bay (Portuguese Angola), the other linking the Katanga Railway with the Matadi-Leopoldville Railway, a portion of the latter, between Bukama and the Kasai river, being now under construction; at Bukama a temporary bridge over the Lualaba was opened for traffic in 1924 and considerable progress has been made. In addition, there are many carriage and motor roads. The most important motor road is the *Route Royale Congo-Nil*, 900 kilometres in length, from Djamba, on the Rubi, to Redjaf, on the Nile, 500 kilometres of this road being now in use. Another runs from Bukama (*viâ* Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasai, a distance of 1,000 kilometres, which can be covered in 5 days by touring car as against 40 days by porter. A telegraph line connects Banana to Coquilhatville (895 miles); Boma with Tshela (85 miles); Stanleyville with Ponthierville (79 miles); Kasongo with Uvira (265 miles); Kindu with Kongolo (219 miles); Kabolo with Albertville (169 miles); Sakania with Bukama (448 miles), and Buta with Bambili (138 miles), a total length of 2,298 miles. There is telegraphic communication with Europe. Fifteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. A great inter-Continental wireless station is being erected at Kanga to communicate direct with Brussels. The West Coast District has a rather scanty rainfall (40 inches), but on the Maiumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Wild rubber and wild coffee are common; coffee, cocoa, Pará and Ceara rubber and cotton are successfully planted. Mines are very extensive. Extensive radium deposits have been discovered in the Katanga. The copper district of Katanga has enormous deposits of copper ore, and the smelters at the Lubumbashi produce about 6,000 tons of copper monthly (1924); plant has also been erected at Panda for the extraction of nickel. A rich tin-belt extends from Bukama towards Lake Tanganyika. The gold-bearing districts of North-eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond-bearing gravels are worked in the south. The exports are mostly palm-kernels and palm-oil, ivory, rubber, gum-copal, cocoa, copper, gold, and diamonds. Capital, Leopoldville (Leopoldsville-Kinshasa) (pop. 1,100 whites, 17,000 natives). Principal towns, Boma (pop. 400 whites, 2,300 natives); Elisabethville (Katanga) (pop. 2,100 whites, 12,500 natives); Stanleyville, Eastern Province (270 whites, 7,500 natives); Coquilhatville (300 whites, 10,000 natives).

Revenue (1924)	*Francs*	142,603,040
Expenditure (1924)		167,949,290
Debt (1923)		542,410,235
Imports (1922)		268,719,988
Exports (1922)		294,579,815
Imports from U.K. (1924)		47,203,013
Exports to U.K. (1924)		30,527,221

By the *Anglo-Belgian Agreement* of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa (*see* "Tanganyika Territory"), which adjoin the Belgian Congo on the E., were assigned by Great Britain to Belgium. *Ruanda* and *Urundi* formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They

lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Niansa (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

Boma (Congo)—Consul, John P. MacGregor.
" Vice-Consul, G. V. Richardson.
" Elisabethville—Vice-Con., J. C. C. Coxhead.
Leopoldville—Vice-Consul, R. Dovey.
Stanleyville—Vice-Consul, D. L. Kidson.

BOLIVIA.

(República Boliviana.)

President (1926–1930), Dr. Hernando Siles, *assumed office* Jan. 1, 1926.

MINISTRY.

Foreign Affairs and Worship, Alberto Gutierrez.
Interior and Justice, Enrique Velasco Galvarro.
Finance and Industry, José R. Estenfforo.
War and Colonization, Dr. Pedro Gutierrez.
Education and Agriculture, Tomas Monje Gutierrez.
Public Works and Communications, Zacharias Benavides.

Envoy Extraordinary, Minister Plenipotentiary in London, Señor Don Carlos Victor Aramayo. 16 Grosvenor Place, W. 1.
1st Secretary, Señor Don Mamerto Urriolagoitia.
Financial Counsellor, Señor Don Alfredo Delgado.
Attaché, Señor Don A. Ballivian del Castillo.
Consulate-General, 5 Fenchurch Street, E.C. 2.

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30′ and 73° W., and its area is about 597,460 square miles*, with an estimated population of 2,825,439. The Republic was formerly comprised in the Spanish Vice-Royalty of *Alto-Peru*, and derives its present name from its liberator, Simon Bolivar, (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are about 1,175 miles of trunk lines of railways in operation, and 205 miles under construction; and 4,000 miles of telegraph wire. There are wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also (with a gap of 125 miles) to Buenos Aires (5 days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia), which, when completed, will allow through railway communication with Buenos Aires, is, after many delays, now being pushed forward by an American corporation. The gap between Tupiza and La Quiaca is crossed by an automobile service, taking six hours. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (719 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosi to Sucre, the legal capital, is under construction, and trains run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879–1882 (*see* Chile). The Peace Army amounts to about 5,000, all ranks, the War Effective being about 105,000.

Estimated revenue (1925)	Bs.39,003,257
Estimated expenditure (1925)	43,873,742

Consul-General in Liverpool, Senhor M. P. de Souza Dantas.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean; and extends between lat. 5° 10′ N. and 33° 45′ S. and long. 34° 40′ and 73° 15′ W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. The Republic comprises an area of 3,298,870 square miles, with a population (Census 1920) of 30,635,605.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are *Serra do Mar* in São Paulo; the *Serra do Mantiqueira* (Itatiaiassu, 9,000), and the *Serra do Espinhaço* (Itacolumi, 6,000 feet), in the south-east of Minas Geraes; the *Serra do Paranán*, between Goyaz and Minas Geraes, the *Serra dos Aymores*, which divide Espirito Santo from Minas Geraes; and the *Serra da Gurgueia, Branca* and *Araripe*, which envelop Piauhý.

Brazil is unequalled for the number and extent of its rivers. The *Amazon*, the largest river in the world, has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its northern tributaries are the *Rio Branco, Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá, Purus, Madeira* and *Tapajos*, while the *Xingu* meets it within 100 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goyaz to the Gulf of Pará. The *Parnahyba* flows from the encircling mountains of Piauhý into the Atlantic. The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguassu, which unites with the Uruguay at the Argentine boundary, are the majestic *Falls of the Iguassu*, and on the São Francisco are the no less famous falls of *Paulo Affonso*.

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. The constitution rests on the fundamental law of Feb. 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil*. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write; they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 212 members; members of both houses are paid. The language of the country is Portuguese, foreign languages being read and spoken in the following order:—French, Italian, English, German and Spanish.

PRODUCTION.—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being 34,270,324 (Census of 1920). The chief products of the country are coffee, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *herva-maté*, rubber and tobacco: the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manáos; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and *herva-maté* (tea). The imports consist principally of every description of manufactured articles, but the annual production of home industries is estimated at £45,000,000, of which about half were textiles (1922). Foreign capital to the amount of £200,000,000 has been invested in Brazilian undertakings in the ten years 1908-1917. The protective duties were again increased in 1887, 1893, 1896, 1906, and 1916. In 1922 the exported merchandise was classified: (1) animals and their products, £5,398,269; (2) minerals and

their products, £1,060,076; (3) vegetables and their products, £62,119,265.

In 1922 the foreign trade of Brazil was shared as under:

Exports to:		Exports to:	
Europe—		*America*—	
France	£9,084,397	U.S.A.	£30,292,732
U.K.	5,120,797	Uruguay	2,402,039
Italy	4,743,477	Argentina	3,942,986
Germany	4,139,051		
Netherlands	4,125,379	All countries	£73,283,948

DEFENCE.—The peace effective of the Army is about 50,000 all ranks. The Navy consists of 2 Dreadnoughts, 2 old battleships, 5 protected cruisers, 2 scouts, torpedo boats, and some small vessels and aircraft.

EDUCATION.—*Primary* education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were over 1,000,000 pupils in 1920. *Secondary and Technical* education is carried out by Federal, State and Municipal authorities, with 42,000 pupils in Federal schools and 40,000 in State and Municipal institutions in 1920. Higher education (12,000 students in 1920) is carried out by Federal and State governments at the State *University* of Rio de Janeiro, and at the University colleges at Manáos (Amazones) and Curityba (Paraná) and other private colleges.

COMMUNICATIONS.—In December, 1923, there were 18,703 miles of railway open. Length of telegraph wires, 55,000 miles. In 1922 steam and sailing vessels of 27,459,975 tons (of which 6,344,712 were under the British flag) entered Brazilian ports, the principal harbours being Manáos, Pará, Maranhão, Pernambuco, Maceio, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

2nd Sec., M. Dimitri Naoumoff.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece. The total area is stated at 39,824 square miles, with a population (1926) of 5,081,700. The prevailing religion of the Bulgarians is the Orthodox Greek Church, with a Gregorian (Western) Calendar (since 1916).

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878), and in 1885

Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded the S. Dobrudj to Rumania and E. and W. Thrace to Greece.

GOVERNMENT.—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or *Sobranye* of 246 representatives, elected for a maximum term of four years by adult manhood suffrage. Members receive 400 *leva* a day and travelling expenses.

PRODUCTION.—Agriculture is the principal industry of the people and employs over half the population, the principal crops being wheat, rye, barley, oats, tobacco and fruit. The live-stock includes sheep, goats, cattle, pigs, horses, asses and mules. Coal of good quality is mined at Pernik and Trevna, and stone, iron, gold, silver, lead, manganese, copper and oil shales are worked, but the mineral development is in its infancy. The chief manufactures are woollens, cottons and cigarettes. The exports consist principally of tobacco, eggs, maize, wheat, flour, silk cocoons, sheep, cattle, barley, lamb skins, rose oil, haricots, kid skins and charcoal; the principal imports being textiles, metal goods, machinery, cereal products, hides and skins, wood, oils, colonial produce, mineral oils, gums, paper, tannery materials, stone glass, and earthenware, chemical products, and rolling stock.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 58,000, all ranks. During the War (Oct. 1915-Sept. 1918) about 560,000 passed into the ranks of the Army, and of those over 250,000 became casualties. By the *Treaty of Neuilly* the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good; the number of illiterates in Bulgaria is very small. There are few technical schools. Sofia has 2 Universities.

COMMUNICATIONS.—In 1925 there were 4,423 miles of state, and 3,504 miles of communal roads; in 1923-24 there were 1,655 miles of railway open. In 1924 there were 621 post and telegraph offices. The principal Black Sea ports are Varna and Bourgas; and Rustchuk, Sistov, Vidin and Lom on the Danube. In 1924 the vessels entered at Black Sea ports numbered 2,792 (1,639,937 tons), and at the Danube ports 5,829 (1,435,000 tons).

CAPITAL, Sofia, at the foot of the Vitosha Range, on the River Isker, about 340 miles from the Black Sea port of Varna, and 125 miles from Lom-Palanka, on the Danube. Sofia is the most modern city in the Balkan Peninsula, and an important station on the Vienna-Constantinople railway, with a population (1920) of 154,431, estimated in 1926 at 200,000 to 250,000; other towns are Philippopolis (63,418), Varna (50,819), Rustchuk (41,574), Slivno (28,695), Plevna (27,779), Shumla (23,975), Stara Zagora (25,491), Burgas (22,272), Jambol (19,921), Hascovo (19,458), and Pazardjik (19,452).

A State of South America, of Spanish origin, lying between the Andes and the shores of the

† This figure is composed of the outstanding liabilities of Bulgaria on account of Reparations (Tranche A) and Costs of Allied Occupation. It does not include the balance of the Reparations Debt amounting to 1,700,000,000 gold francs which, according to a protocol concluded in 1923 between the Government of M. Stambouliski and the Inter Allied Commission for Bulgaria, will not be demanded from that country before April 1, 1953, and will bear no interest.

* President Allessandri (elected 1920) resigned Sept. 10, 1924, and the Vice-President (General Luis Altamirano) became President of the *Junta de Gobierno*. As the dissolution of the *Junta*, President Alessandri returned to Chile on March 21, 1925, formed a new Cabinet in supersession of the *Junta*, and, on Oct. 3, 1925, handed over the Presidency to Don Luis Barros Borgoño, who remained in office until the election of his successor on Oct. 24, 1925.

South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 15′ and 55° 59′ S., and long. 66° 30′ and 75° 48′ W. Extreme length of coast-line about 2,800 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest being, in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 23 provinces and 1 territory, the aggregate area of which is estimated at 289,798 square miles.

The population (Aug. 1, 1926) was 3,959,998. Included in the population are four distinct racial divisions; (*a*) the Spanish settlers and their descendants; (*b*) the indigenous Araucanian Indians, Fuegians, and Changos; (*c*) mixed Spanish-Indians; and (*d*) European immigrants, who were represented in 1920 by 25,962 Spaniards, 12,360 Italians, 7,200 British and Irish, 8,950 Germans, 7,200 French and 5,000 Syrians. In 1925, the births numbered 159,017 (40·32 per 1000); marriages, 28,862 (7·32 per 1000); and deaths, 116,943 (29·65 per 1000).

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maypu* (April 5, 1818), achieved the independence of the nation. The present constitution was voted by an overwhelming majority at the plebiscite held on Aug. 30, 1925, and superseded that of May 25, 1833. It was drafted by a Committee appointed *ad hoc* by the *Junta de Gobierno* after the return of President Alessandri. In accordance with the new Constitution, the President is to be elected by direct vote of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of a number of Deputies to be fixed by a new electoral law in 1925. There is universal adult male suffrage. From 1879–1882 Chile was at war with Peru and Bolivia, and Peru renewed her application for the return of the provinces of Tacna and Arica which were taken from her by Chile in the "Pacific War." Bolivia also demands an outlet to the Pacific. In 1922 Chile and Peru signed a Treaty to submit the Tacna-Arica question to the arbitration of the President of the United States, in accordance with whose decision a plebiscite Commission, composed of representatives from both nations, met at Arica in Aug. 1925 (under the Presidency of Gen. Pershing, U.S.A.) to organize the plebiscite for the final settlement of the matter at issue.

PRODUCTION, &c.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is still in the experimental stage. The live stock includes (1922) 1,995,538 cattle, 4,569,166 sheep, 329,454 horses, 525,106 goats, and 263,336 pigs. The mineral wealth is considerable, the country being extremely rich in copper-ore and iron-ore; the production of copper in 1923 was 182,384 metric tons. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal (1,440,425 metric tons of coal were mined in 1925, and 172,652 tons of foreign coal were imported). In 1925 the production of nitrate was 2,519,965 metric tons. There are smelting-works for copper and silver, tanneries, corn and saw-mills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage and paper factories, breweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, oats, borax, frozen meat, wheat, copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery.

No. of industrial establishments (1923) 3,196, employing 82,118 persons, wage bill $163,001,360, capital invested $1,273,392,710, industrial production $1,172,601,971, consumption of raw materials $652,708,473 (including fuel).

COMMUNICATIONS.—There were (1924) 5,472 miles of railway, of which 1,383 miles are British controlled. In April, 1922, a convention was signed by Chile and the Argentine for the construction of two more Trans-Andine lines. In 1924 there were 26,062 kilometres of telegraph, 979 post-offices, and 86,609 kilometres of telephone, some worked by English companies, with 4 public wireless stations. The commercial marine numbers (1924) 121 steamers (88,226 tons) and 15 sailing vessels (17,624 tons). In 1924, 4,143 vessels (14,595,190 tons) entered Chilean ports from abroad, and 16,921 coasting vessels (22,625,515 tons); legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DEFENCE.—All able-bodied male citizens from 20th to 45th year must serve in the militia. The peace effective of the active army is 24,962. The Air Force has a peace strength of 2 squadrons, with 60 pilots and 200 mechanics. The navy consists of 1 battleship, 1 ironclad, 6 cruisers, 12 destroyers, 5 torpedo-boats, and 6 submarines, with a complement of 6,560, all ranks.

EDUCATION is free, and in July, 1920, elementary education was made compulsory, and 79·4 per cent. of the children attended the 3,367 schools in 1925 of a total on the registers of 387,020. There is a State University at Santiago. The National Library contains 293,085 volumes. The language of the country is Spanish and the religion is Roman Catholic. (The State subsidy to the Church is to be discontinued at the expiration of 5 years from the date of the new Constitution.)

FINANCE.—The estimates for the financial year 1925 (given below) show a *gold* surplus of $66,916,917 and a *paper* deficit of $244,534,000, a net deficit of $50,474,942 (with the *gold* $ converted at 190); but revised estimates have

since been published in which a balance is struck and the deficit is wiped out.

AREA AND POPULATION.

Territory.	Square miles.	Population.
China Proper	1,532,800	414,011,519
Manchuria	363,700	22,083,434
Tibet	463,320	6,500,000
Chinese Turkestan	550,580	2,491,000
Total...	2,890,400	445,085,953

The estimated foreign population of China was as follows in 1923: British, 14,775; Japanese, 201,704; Russian, 85,856; American, 9,356; Portuguese, 3,424; German, 2,233; French, 3,361; the total being 324,947. Out of a total of 7,921 foreign firms in China, 725 were British, 1,141 Russian, 3,940 Japanese, 284 German, 377 American, and 229 French.

China became a Republic on Feb. 12, 1912, with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (*Tuchun*) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The *Treaty of Kiakhta*, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. *Mongolia* has since developed into an independent self-governing republic, and is in alliance with the *Soviet* Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. The exact status of Tibet is still unsettled.

Chinese politics are not easy to understand, as they seem to consist in personal struggles between two or more armed parties, the admitted aim of the victors being personal gain. The revolution of 1911 brought out a victorious general in the person of Yuan Shih-kai, and since his death in 1916 his subordinates and their successors have been fighting for supreme power. Presidential elections have been held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect. In 1924 the military struggle between Chang Tsao-lin (the military dictator in Manchuria) and Wu Pei-fu which had turned in favour of the former since the spring of 1922, ended in the defection of the "Christian General," Feng Yu-hsiang, who occupied Peking and declared his intention to put an end to the Civil War; but Wu Pei-fu, who had fled to the south, announced his intention to resist any such attempts, and to make a coalition of the Provinces against the Central Government. The Peking Provisional Government under Feng Yu-hsiang have accepted the resignation of President Tsao-Kun, and the Emperor (who had lived in the Imperial Palace since his enforced abdication) has been stripped of his title and driven out of the Capital. In November, 1925, the Great Powers were in conference with the Peking Government on the tariff question, but the authority of the Peking Government is not very extensive, as Sun Chang-fan (the Tu Chün, or Military Governor, of Chekiang) is in opposition and has driven northwards Chang Tso-lin (the Tu Chün of Manchuria), who remains the champion of the Peking Government. General Wu Pei-fu appeared to be collaborating with Sun Chang-fan in opposition to Peking. In December, 1925, Chang Tso-lin captured Mukden after heavy fighting. In the following spring Peking was evacuated by "Red" troops and the central government appeared for a time to be in the ascendant. In October, however, Wu-chang was captured by "Red" Cantonese forces after a siege of six weeks, and there was a recrudescence of the Anti-Foreign policy of former days, with many outrages against British shipping, which the central government appears unable to repress.

EDUCATION.—Many changes in administration and development are under discussion, including a proposal to establish universal compulsory primary education. In 1918–19 there were 134,000 schools in operation, with 4,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers.

COMMERCE.—The net trade of the open ports is stated as follows in *Haikwan taels*.

Year.	Imports.	Exports.	Total.
1914	569,241,382	356,226,629	925,468,011
1921	906,122,439	641,255,537	1,507,377,976
1922	945,049,650	654,891,933	1,599,941,583
1923	963,801,762	785,957,554	1,649,759,316
1924	1,118,440,788	847,757,004	1,966,197,792

The import of Indian opium is now prohibited.

External Trade, 1924.

COMMUNICATIONS. — *Railways.* — About 7,000 miles were open in Jan. 1922, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping.—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1922 the total tonnage of the 186,428 vessels and junks entered and cleared at Chinese ports was 124,131,361 tons. Of these ships 40,075 (47,698,739 tons) were British, 111,119 (32,857,745 tons) Chinese, 25,281 (32,961,333 tons) Japanese, and 4,670 (4,846,437 tons) U.S A. In June, 1918, a vessel of 14,750 tons, constructed at the Kiangnan Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1922 there were about 50,000 miles of land lines and several high-power wireless installations.

CUSTOMS AND POSTS.—The Chinese Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General*. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a Foreign Co-Director General, with a considerable foreign staff, was appointed; letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices (1921) was 2,429, and of postal agencies 8,877. In 1922, 426,363,616 postal packets and 4,791,420 parcels were handled.

BUDGET (July 1919–June 1920).

Ordinary Revenue	*Taels* 400,838,001
Extraordinary Revenue	80,581,785
Total	420,419,786
Ordinary Expenditure	*Taels* 271,289,205
Extraordinary Expenditure	224,473,681
Total	495,762,888

Chinese Debt (Jan., 1920).

War Loans outstanding	£30,000,000
Boxer Indemnity do.	48,000,000
Railway Loans do.	40,000,000
General Loans do.	50,000,000
Japanese Loans do.	30,000,000
Short term Loans do.	17,000,000
	£215,000,000

About 10*s.* 2*d.* per head of the population.

At the end of September, 1922, according to the official statement of the Ministry of Finance, the total debt was *taels* 1,906,000,000, or less than 5 *taels* (11*s.*) per head of the Chinese population. Included in the expenditure of 1919–20 is the sum of 214,000,000 *taels* towards repayment of debt.

MANCHURIA lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

MONGOLIA was formerly a part of the Chinese Empire, but by the Treaty of Kiakhta of 1915 it was recognized as an autonomous republic.

TIBET (area, 750,000 square miles; pop. 3,000,000) borders on British India, *see* p. 610.

CHINESE TURKESTAN (or *Sinkiang*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi.

CAPITAL OF THE CHINESE REPUBLIC, Peking. Population (1921), 1,300,000. The population of the principal ports in 1919 is estimated as follows:—Amoy, 400,000; Canton, 1,370,000; Changsha, 1,272,000; Chingkiang, 500,000; Chungking, 1,011,600; Foochow, 1,500,000; Hangchow, 729,950; Hankow, 290,000; Harbin, 365,000; Ichang, 450,000; Kiukiang, 380,000; Kiungchow, 500,000; Nanking, 900,000; Ningpo, 2,200,000; Shanghai, 1,600,000; Soochow, 1,100,000; Tientsin, 838,000; Tsingtau, 310,000; Wanhsien, 752,000; Wenchow, 1,750,000; Wuchow, 350,000.

FLAG: Five horizontal bands, red, yellow, blue, white, black.

Envoy Extraordinary and Minister Plenipotentiary in England, Señor Dr. Don Luis Cuervo-Marquez, 17 De Vere Gardens, Kensington, W. 8.
Secretary, Don Alfredo Michelsen.
Consul-General, Señor Don Joaquin Orrantia, 7 Sicilian Avenue, Southampton Row, W.C. 1.
Cons.-Gen. in Liverpool, Señor Don Genaro Payan, 41 North John Street.

The Republic of Colombia lies in the extreme north-west of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40′ S. to 12° 25′ N. lat. and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population (Census 1918) of 5,855,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caquetá and Putumayo. The Patia flows through the famous *Mínima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guiatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Funza is the Great *Fall of Tequendama*, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher *Columbus*, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811–1824. In 1819 *Simon Bolivar* (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829–1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in large quantities, and in Aug. 1926 the Tropical Oil Co. (at Infantas) produced 908,775 barrels of crude oil, of which 840,971 were delivered by pipe line (350 miles) to Cartagena, for export. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, india-rubber, and bananas. All religions are tolerated.

The standing army consists of 6,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 1,150 miles being open in 1926, with 15,650 (1926) miles of telegraph. There is a bi-weekly passenger and mail aeroplane service (German) between Barranquilla and Girardot, the transit to the coast from Bogotá being thus reduced to two and a half days; a similar service, by same company, is in operation between Cartagena and Barranquilla. There are wireless stations at Barranquilla, Bogotá, Medellin, Cali and Cúcuta.

Spanish is the language of the country.

COSTA RICA.

(República de Costa Rica.)
President (1924–8), Ricardo Jimenez, *assumed office* May 8, 1924.
Minister of Foreign Affairs, Juan Rafael Arguello de Vars.
Treasury, Tomas Soley Guell.
Interior, Rafael Castro Quesada.
Education, Luis Dobles.
Works, Carlos Volio.
Public Safety, Pompilio Ruiz.

Minister in London (vacant).
Consul-General, Percy G. Harrison, 7 Crosby Square, E.C. 3.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 27′ and 11° 10′ N. lat. and from 82° 30′ to 85° 45′ W. long., contains an area of about 23,000 English square miles, and a population (1925) of 520,766.

For nearly three centuries (1530–1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824–1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1925) are coffee (£1,738,495), bananas (£1,295,418), cacao, gold and silver bullion, skins and hides, fresh fruit, timber and sugar.

The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1925, 54 per cent. from United States, 16 from United Kingdom, 10 per cent. from Germany, 4 from Central America, and 7 from Hispano-America).

The chief ports are Limon, on the Atlantic coast, through which passes the whole of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1925, 671 foreign vessels (1,199,385 tons) entered at Costa Rican ports. About 415 miles of railroad were open in 1924. In 1924 there were 276 post offices, dealing with 5,110,363 packets, and 150 telegraph offices (one wireless), with 2,279 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

Consul, Señor Dr. Don Raul Mejer, 46 Kingsway, W.C. 2.

* In process of redemption.

The island of Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 2,889,004 (Nov. 1919).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880-1886. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent. of these being under sugar cane and 30 per cent. under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pine apples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar (sugar crop in 1924-5, 5,070,347 tons; 1923-4, 4,066,642 tons); the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line; there are about 1,500 miles of roads.

Spanish is the language of the island.

	1924-25.	1925-26.

Military Attaché, Lt.-Col. Frantisek Nemec.
Secretary on Special Mission, Dr. Jaroslav Cisar.
Consul, Dr. Frantisek Pavlasek, 28 Bedford Square, W.C. 1.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 28, 1918, as the Czechoslovak Republic, and ten days later the Czechoslovak Republic, and ten days later the *Národní Výbor* (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the S., the German and Polish Republics on the N., the German Republic on the W., and the Polish Republic and the Kingdom of Rumania on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Bratislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Vereczka) —a total area of about 54,877 sq. miles, with a population (Census of 1921) as under:—

Bohemia	6,781,936
Moravia	2,633,027
Slovakia	2,926,824
Silesia	650,442
Ruthenia	596,601
Total	13,588,830

(The estimated increase since the last census brings the total to 14,244,000 on Jan. 1, 1926.) Of the total population 8,760,957 (65·5 per cent.) are Czechoslovaks, 3,123,448 (23·3 per cent.) Germans, 747,096 (5·5 per cent) Magyars, 461,466 (3·4 per cent.) Ruthenians, and 75,852 (0·5 per cent.) Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. The coalition of Czech parliamentary parties (which with short intervals had monopolised the executive from the foundation of the Republic) broke up in the Spring of 1926, and gave way, after an interval during which the Government was carried on by a non-parliamentary cabinet, to a new coalition of the Czech and German "bourgeois" parties. In the present Ministry two portfolios (those of Justice and Public Works) are, for the first time, held by representatives of the German minority. The Constitution guarantees religious and political freedom. About 80 per cent. of the people are Roman Catholics.

By the Peace Treaty Czechoslavakia acquired about 80 per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead are all mined, while the whole country is rich in mineral and thermal springs. Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of ten millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Except in Slovakia and Ruthenia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czechoslovakia is in a far more flourishing state than most of its neighbours.

Czechoslovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, *viâ* the Danube, to the Black Sea.

According to the Law instituting the Czechoslovak Bank of Issue, the Bank is obliged to maintain the foreign exchange value of the Czech Crown at the average level of the two years before the formation of the Bank. This level is officially understood to be between 290 and 303 United States gold cents to 100 Kc. The rate of exchange has in point of fact for a long time been practically stable at about 164 Kc. = £1.

The Bank of Issue commenced operations on the 1st April, 1926.

CAPITAL, Prague (Praha), on the Ultava (Moldau), the former capital of Bohemia, with a population estimated in 1923 at 676,657; other large towns are Brno (Brünn) in Moravia (pop. 221,758); Pizen (Pilsen), the brewing centre in Bohemia (pop. 88,419); Bratislava (Pressburg), where the Danube forms the S. boundary of the Republic (pop. 93,189); and Kosice (Kaschau) in Eastern Slovakia (pop. 52,898).

DANUBE COMMISSIONS.

The *International Danube Commission*, with its present headquarters at Bratislava (Pressburg), Czechoslovakia, was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria, Bavaria, Bulgaria, Czechoslovakia, France, Great Britain, Hungary, Italy, Rumania, Württemburg, and Yugo-Slavia. The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Württemburg) to Braila (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the *European Commission of the Danube*, created by the Treaty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal); this canal will be deepened to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Braila, where transshipment into river barges is necessary. A pilotage and river-improvement service is maintained by the International Commission at the Iron Gates (headquarters, Orsova), the expenses being met by shipping dues.

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin and Orsova (Iron Gates), in *Rumania*; Russchuk, Vidin and Lom Palanka, in *Bulgaria*; Belgrade, the capital of *Yugo-Slavia*; Buda-Pest, the capital of *Hungary*; Bratislava (the present seat of the Commission), in *Czechoslovakia*; Vienna, the capital, and Linz, in *Austria*; Passau and Regensberg, in *Bavaria*; and Ulm, in *Württemburg*.

THE INTERNATIONAL DANUBE COMMISSION.

British Delegation, Col. J. G. Baldwin, C.B., Min. Plen. (*Delegate*); H. C. Dick, M.B.E., H.B.M. Consul, Bratislava (*Asst. Delegate*).

EUROPEAN DANUBE COMMISSION.

British Delegate, Col. J. G. Baldwin, C.B., Minister Plenipotentiary.

DANZIG.

(Freie Stadt Danzig.)

Under Articles 100 and 102 of the *Treaty of Versailles*, the City of Danzig with the surrounding territory (constituting a total area of about 726 sq. miles, with a population estimated at 356,000) was set up as a Free City, under the protection of the League of Nations, Poland undertaking to conduct her Foreign Affairs. The Free City was constituted Nov. 15, 1920, with an executive Senate and an elected Legislature of 120 members. The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. In Jan., 1922, the Free City entered the Polish Customs Union. The principal exports are timber, coal, cereals, cement, bacon, eggs, mineral oils and sugar, and the imports herrings, iron ore, machinery, artificial manures, fats, foodstuffs and textiles. The tonnage of ships entered in 1925 was 1,869,973 tons, and of those cleared 1,864,182 tons; these figures were almost doubled in 1926.

Danzig — High Commissioner of League of Nations, Professor T. A. van Hamel.

* The National Currency is the Czechoslovak *Crown* or *Koruna* (Kč.), replacing the former *Austrian* crown.

DENMARK.

(Kongeriget Danmark.)

King, Christian X., *born* Sept. 26, 1870; *suc.* May 14, 1912; *married*, April 26, 1898, Princess Alexandrine of Mecklenburg-Schwerin, and has issue 2 sons.
Heir Apparent, H.R.H. Prince Frederik (Crown Prince), *b.* March 11, 1899.

CABINET (April, 1924).

Premier and Minister of Industry, Navigation and Commerce, Th. A. M. Stauning.
Foreign Affairs, Count Carl Moltke
Agriculture, K. M. Bording.
Interior, C. N. Hauge.
Defence, L. Rasmussen.
Worship, N. P. L. Dahl.
Education, Madame Nina Bang.
Justice, K. K. Steincke.
Finance, C. V. Bramsnaes.
Public Works, I. F. N. Friis-Skotte.
Social Affairs, F. H. J. Borgbjerg.

Envoy Extraordinary and Min. Plen. in London, Count Preben F. Ahlefeldt-Laurvig, 1, Cadogan Square, S.W. 1.
Legation, 29 Pont Street, S.W. 1.
Counsellor, W. Borberg.
Secretary of Legation, M. M. A. Wassard.
Agricultural Adviser, M. Harald Faber.
Attaché, Baron P. J. Bertouch-Lehn.
Naval Attaché, C. V. Evers.
Press Attaché, M. C. E. Aagaard.
Consul-Gen. in London, M. Ch. M. Rottböll, 7, Norfolk Street, Strand, W.C. 2.
Vice-Consul, M. J. A. Vestbirk.
Consulates at Hull, Liverpool, Manchester, Belfast, Falmouth, Newcastle-on-Tyne, and Leith.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zeeland, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34′—57° 44′ N. lat. and 8° 5′—12° 40′ E. long., with an area of 15,042 square miles, and a population (Nov. 5, 1925) of 3,420,000. Nearly one-half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1925, 1,275,398 hectares were under corn crops, 482,254 sugar and other beets, and 866,417 hay crop. In July, 1925, the live stock numbered 536,335 horses, 2,758,194 cattle, 260,672 sheep, and 2,517,087 swine. The crops in 1925 included 9,556,290 hkg. (hkg. = 100 kilogrammes) of oats, 7,963,250 of barley, 3,491,550 rye, 5,976,680 mixed corn, and 2,652,930 qrs. of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. There is a seagoing mercantile marine of 644 steamers, with a tonnage of 483,916. There are (1925) 5,062 kilometres of railway and 14,732 miles of telegraph line.

DEFENCE.—The Army consists of about 12,000 trained men, the vote for 1924–25 amounting to Kr. 34,000,000 (including supplementary estimates of Kr. 4,000,000). The Navy consists of 4 coast-defence ironclads and 1 completing, 2 small cruisers, 23 torpedo-boats (built and building), 14 submarines (built or building). Vote, 1924–25, Kr. 16,000,000.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

The outlying possessions and colonies of Denmark have an area of about 50,000 square miles, with close on 35,000 inhabitants. They include the FARÖE, or Sheep Islands (515 sq. m., pop., 1925, 22,835); GREENLAND (ice-free portion about 50,000 sq. m., total area about 830,000 sq. m., population, 1921, 14,400), the trade of which is a Government monopoly.

Copenhagen, distant 728 miles; transit, 36 hours.

DOMINICAN REPUBLIC.

(República Dominicana.)

President (1924–1928), Horacio Vasquez, *elected* July 12, 1924.
Foreign Affairs, Lic. Rafael Augusto Sanchez.

Consul-General in London, C. H. Lamarche, 19 St. Dunstan's Hill, E.C. 3.
Consul, Octavio Ventura.
Vice-Consul, A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus, who named it Hispaniola. The island was peopled by the Spaniards with imported African slaves, who soon exterminated the "Indian" tribes. In 1821 an independent republic was proclaimed and the Spaniards abandoned the country. The present republic of San Domingo broke away from Haiti in 1844 and its independence is secured under a law of Nov. 6, 1844. The Dominican Republic comprises an area of 19,322 square miles, with a population of 897,405.

On Nov. 29, 1916, American Military Forces landed in Santo Domingo and a military Government was proclaimed. From Oct. 22, 1922, a provisional Dominican government was in office until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of the Foreign obligations, which continue to be administered by an American official.

Sugar and cocoa are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, cotton, wax, honey, logwood, tortle-shell, hides, maize, lignum vitae and divi-divi. There are about 150 miles of public railroad, and telegraphic (2 wireless stations) and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America, New York, Curaçao, Porto Rico and Cuba. The programme of highway construction is being actively pursued, and in addition to the highway across the Island, there is a direct road from Santo Domingo to Port au Prince, the capital of Haiti, which enables the journey from capital to capital to be completed by motor car in one day. Up to Oct. 31, 1924, there were 343 miles of first-class road constructed and opened.

Of the import trade in 1925, 65 per cent. came from U.S. and 5 per cent. from Great Britain. British trade is hampered by distance (as compared with U.S.), by lack of resident British merchants, lack of British industrial undertakings in the Republic, and by indifferent and slow steamship services from Europe.

	1924. (U.S. $)	1925. (U.S. $)
Receipts	$11,201,731	$13,120,160
Payments	10,979,222	14,011,431
Imports	21,580,571	25,339,052
Exports	30,262,896	26,770,511
Debt (Dec. 31)	13,534,276	11,174,545
Imports from U.K.	1,128,523	1,346,530
Exports to U.K.	11,990,838	8,626,320

CAPITAL, Santo Domingo, on the Ozama, founded in 1496 by Bartolomeo (brother of Christopher) Columbus; population (1921) 31,000; other centres are Santiago (17,000) and San Pedro (14,000).

FLAG: Red and blue, with white cross.

ECUADOR.

(República del Ecuador.)

Prime Minister and Provisional Head of the Republic, Señor Dr. Isidro Ayora; *assumed office*, April 1, 1926.
Foreign Affairs, Señor Dr. Homero Viteri Lafronte.
Interior, Señor Julio Moreno.
Finance, Señor Dr. Pedro L. Nuñez.
Public Instruction, Señor Carlos Ordeñana.
Social Welfare and Labour, Señor Dr. Pedro Pablo Egnez.
War and Marine, Señor Leonardo Palacios.

Minister in London, Senor Don Gonzalo Zaldumbide.
Consul-General in London, Señor Don Ernesto Chacon, 23 College Hill, Cannon St., E.C. 4.
Consuls at *Liverpool, Birmingham, Hull, Glasgow*, and *Cardiff*.

An equatorial State of South America, extending from lat. 1° 38′ N. to 5° 5′ S., and between 80° 20′ and 81° W. long. (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq. miles.

The former *Kingdom of Quito* was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century *Pizarro's* conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft.), Iliniza (17,405 ft.), Carihuairazo (16,515 ft.), Cotocachi (16,302 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.),

Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textiles and other manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The *Galápagos* (Tortoise) *Islands* (2,870 square miles) belong to Ecuador.

The language of the country is Spanish.

	1925. *Sucres.*
Revenue	37,466,000
Expenditure	38,733,000

3rd Sec., Aly Badawy.

Egypt lies between 22° and 32° N. lat. and 24°-37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with the Sudan. The western boundary runs from a point on the east, N. of Sollûm (long. 25° E.), inland in a south-westerly direction for some distance and then turns S. along a meridian line approximately in long. 24° E. until it meets the parallel of 22° N. lat., which forms the N. boundary of the Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15′ E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. Within these boundaries is enclosed an area of about 363,181 sq. miles, with a population (Census of 1917) of 12,718,255, estimated (1923) at 13,885,000.

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouths. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 23 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from S.E. to N.W. are known as Kharga, Dahkla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great back-bone of high and rugged mountains extends north-westward

* The External Debt has been calculated at 4 *Sucres* = $1 U.S.

from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tîh. South of El Tîh the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the *wadis*, and running water (mostly brackish) is found at a few points.

Native Population.—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as *Fellahîn* (*felläh*=ploughman, or tiller of the soil). The *fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,942 in the total of the Census of 1917 (including 126,432 local subjects of foreign origin). A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and 107,364 Sudanese and Berbarin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the foreign residents were 205,998, of whom 30,797 were Turks, 56,731 Greeks, 40,198 Italians, 24,354 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4,225 Russians, 157 Germans, 23,932 other Europeans and Americans, and 1,496 Persians.

Religions.—At the Census of 1917 there were 12,623,753 Muhammadans, 1,026,107 Christians, 59,582 Jews and 8,814 other religions.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Alî*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841. *Ismail* (1863-1879), was granted (by *firman* of May 14, 1867) the title of KHEDIVE, the previous rulers having held the title of *Vali*,[1] or Governor. The wild extravagance of Ismail drove him to raise enormous loans in Europe, which plunged the country into such financial embarrassment that the Governments of France and Great Britain intervened and forced Ismail to abdicate, appointing his son *Tewfik* (1879–1892) to succeed him. A series of reforms was initiated, but further progress was interrupted by a military revolt, headed by an officer of the Egyptian Army (Ahmed Arâbi *Pasha*). The revolt assumed alarming proportions, but the French Government declined to intervene, and a British expedition was despatched to re-establish the authority of the Khedive. The British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam. In 1892 Tewfik was succeeded by his elder son *Abbâs II.*, who declared himself an adherent of the Central Powers and was deposed in 1914, Hussein Kamil *Pasha* being appointed in his stead. On November 28, 1914, a British Protectorate was declared over Egypt, which was therefore taken from the suzerainty of the Sultan of Turkey, and the Khedive assumed the title of Sultan. Sultan Hussein Kamil died October 9, 1917, and was succeeded by his brother, the present King. In March, 1922, Egypt was declared to be an independent kingdom. The Constitutional *régime* was elaborated on April 19, 1923, by Royal rescript and general elections took place for a Parliament, consisting of two houses, which assembled March 15, 1924.

Local Government.—The chief towns constitute governorships (*muhâfzas*), and the remainder of the occupied country is divided into provinces (*mudirias*), which are subdivided into districts (*markaz*), each under a *mamûr*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganized in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—The defence of Egypt is reserved by the Constitution and remains under British control, the British garrison (under the command of a British general officer) amounting to 2 cavalry regiments, 9 batteries of artillery, 2 companies of engineers, 7 battalions of infantry and 1 armoured car company. Service in the *Egyptian Army* is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot; but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £E20, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which consisted of 992 officers and 20,762 men in 1923.

There is no *Navy* in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The *Egyptian Police* (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 369 officers and 6,162 men. There are also 50,859 *ghafirs*, or native night-watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1922–3 there were 151 *Elementary Schools (Maktabs)* under Government supervision, with 23,996 pupils and 3,710 *Maktabs* under inspection for grants-in-aid with 279,409 pupils; there were also 54,528 pupils in other elementary schools. The government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There were also 1,148 Egyptian institutions with 111,935 pupils and 569 foreign institutions with 56,916 pupils. There are *Colleges* of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University was founded in 1908 at Cairo.

Agriculture.—The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile—this portion amounts at present to 5,400,000 acres (1919), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. By these works, and by the construction of a vast network of canals with controlling masonry works, a small part of the excess waters of the river have been stored and distributed at all seasons of the year, and perennial irrigation has been extended throughout Middle and Lower Egypt. The increase in the value of the land has been enormous, and some 2 million acres have been added to the cultivable land of Egypt. Although nearly the whole population is directly or indirectly connected with agriculture, the total given in the census return of 1917, under the headings of proprietors, tenants and labourers, &c., amounts to 4,008,900 persons, representing only 30·5 per cent. of the population. In 1921 the land was held as to 5,029,919 *feddâns* by 1,923,396 native owners, and as to 565,788 *feddâns* by 8,021 Europeans. The agricultural land is of two kinds. The first is that which is under the basin irrigation system, by which the land receives one watering only. This watering consists of a flooding at high Nile: as the flood decreases, the seeds of the various crops are sown, and the basin fields are left without further watering. Harvests of wheat, barley, beans, clover, vetches and lentils are gathered in due course. The second kind of land is that which is perennially irrigated by means of canals, and receives waterings according to rotations laid down by the Irrigation Department. In these lands, which are for the most part in Lower Egypt, cotton, maize, wheat, rice, beans, barley, sugar cane, clover, vegetables and fruit are the chief crops. The agricultural year is divided into three seasons or periods. *Saifi* (summer) commences about March and ends about October, the exact dates of sowing and harvesting varying according to the crops and to the localities. The principal crops grown during this period are cotton, rice, sugar cane, and Sorgho (a variety of maize). *Nili* (flood), part of the preceding one, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and rice. *Chitwi* (winter) commences in November and ends in June. The principal crops are cereals, bersim (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba. In 1923 there were 1,583,000 feddans under cotton, the crop being estimated at 6,532,000 kantars. In 1923 the cotton exports were 7,472,611 kantars, valued at £E49,516,369.

Live Stock.—In 1923 the cattle numbered 634,459, buffaloes 656,288, horses 36,573, mules 22,235, donkeys 603,389, and pigs 15,768.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufactures are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery, and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollûm, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1924, was 1,923 miles. 27,585,000 passengers and 5,780,491 metric tons of merchandise were carried during 1923–4, the net receipts being £E1,810,487. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 818 miles of light railways exploited by public companies.

Caravan Routes.—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena

to Qoseir being probably the most frequently used.

Shipping.—For the SUEZ CANAL *see* pages 799–800.—Apart from the three great seaport of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenîma, Zeitîa, Jemsa and Hurghada in the Gulf of Suez, and Safaga, Qosseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depot at Suez. The principal port is Alexandria, where 1,766 vessels (3,729,445 tons) entered and 1,772 vessels (3,734,332 tons) cleared in 1923. The traffic through Port Said amounted in 1922 to 565 vessels entered and 584 cleared.

Posts and Telegraphs.—There were in 1923 3,030 post offices and stations, dealing with 57,166,000 letters and post-cards, and 22,742,000 newspapers, &c., and a total foreign correspondence of 38,000,000. There were on March 31, 1923, 125,080 miles of telegraph and telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarráf* (village tax-collector).

	1925–26.	1926–27.
Revenue	£E36,870,000	£E38,163,000

Exports to U.K. ...	38,268,000	34,235,000

Debt.—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund (£E30,000,000 on March 31, 1926), the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1924 and 1925:—

Debt.	1924.	1925.
	£	£
Guaranteed Debt, 3 per cent.	5,271,200	5,072,300
Privileged Debt, 3½ per cent.	31,127,780	31,127,780
Unified Debt, 4 per cent.	55,971,960	55,971,960
Total	92,370,940	92,172,040

The *Cost* of the Debt (in the Budget for 1925–26) inclusive of £E664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899, which were guaranteed on the Egyptian Tribute, was stated at £E4,914,694.

CAIRO, the capital (population about 800,000), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalîli, the Hamzâwi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population about 480,000), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World" (*see* p. 85). It now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1917 the towns of Tanta (74,195), Port Said (75,192) and Assiut (51,432) also exceeded 50,000 inhabitants.

CAPITAL, Cairo.

FLAG: Green, with a white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

British Diplomatic and Consular Officers.

(Eesti Wabariik.)

Head of the State, M. Jaan Teemant (1926).
Foreign Affairs, Dr. Fr. Akel.

Minister in London, Dr. Oskar Kallas, 167 Queen's Gate, S.W. 7.
1st Secretary and Consul-Gen., R. A. Möllerson.
2nd Sec., W. Ojanson.

The most northerly of the Baltic provinces, is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea and on the E. by Lake Peipus and *Soviet* Russia (along a line roughly parallel with the eastern shore of the lake). The islands of Dago, Osel and other smaller islands in the Baltic form part of the Republic. It has an area of about 17,953 sq. miles (within the boundary settled by agreement with *Soviet* Russia), with a population (1920) of about 1,200,000 (91 per cent. Estonians, 5·3 per cent. Russians, 1·3 per cent. Germans, and 2·4 per cent. Jews and others). A large portion of the surface consists of forests, moors, and small lakes. Agriculture is the chief industry, rye, oats, barley, and flax being the chief crops, and dairy farming is carried on. There are important manufactures, including distilling, oil pressing, woollen, cotton, tobacco, cork, soap, and petroleum. There were (1925) 706 miles of broad gauge and 400 miles of narrow gauge railway in operation.

Legislature consists of a single-chamber Assembly (Riigikogu) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being the Head of the State.

Consul-General, L. Norrgren, 57 Gordon Square, W.C. 1.

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent, sovereign state (Dec. 6, 1917). The following year the country sustained severe disturbances on account of the aggression of Russian Bolshevism, but succeeded in restoring order, and the relations between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 149,989 square miles, with a population (1925) of 3,495,186, of whom (in 1920) 2,574,228 were Finnish speaking, 340,963 Swedish speaking, and 1,603 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. The *Aland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia (area 210 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 1 at Helsinki (Helsingfors) and 2 at Turku (Åbo); the university of Helsinki (founded 1640) has 3,000 students, of whom 900 are women. In addition, there are 1 technical and 2 commercial high schools. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (62,400,000 acres) are a great source of wealth; there is no European country so wealthy in forests except Russia, the exports of timber in 1925 being 1,039,000 standards; wood pulp, cardboard and paper, and dairy produce are also exported. There are (1925) 2,856 miles of railroad and about 3,550 miles of telegraph, with a well developed telephone system (22·8 per 1,000 inhabitants). There is railway connection with Sweden and Russia and telephone connection with Estonia, Russia, Sweden and Norway. The merchant fleet (1925) consists of 4,980 vessels (482,440), of which 575 are steamers.

Service in the Army is universal and compulsory, the peace effective being about 36,600 all ranks; there is also a volunteer organisation of

Civic Guards with an enrolled strength of about 100,000.

The country was formerly governed by the Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people, but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finnish and Swedish are the official languages.

Consulate General, 51, Bedford Square, W.C. 1.
Consul-General, M. Campana.
Consul at Liverpool, M. de Ledoulx.

There are also Consuls at Southampton, Newcastle-upon-Tyne, Cardiff, Glasgow, Dublin, and in Jersey.

The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N. lat., and from 7° 45′ E. to 4° 45′ W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfort* (May 10, 1871) amounted to 5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the present area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March 6, 1921) of 39,209,666 (inclusive of Alsace and Lorraine). In 1923 there were 761,261 births, 356,501 marriages, 23,600 divorces, and 666,990 deaths; in 1920 the excess of women over men was 2,500,000.

France has always been attractive to foreigners of whom (1921) 1,550,449 were resident there, including 470,873 Italians, 415,546 Belgians, 303,141 Spanish, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT. — The monarchical system of government was overthrown by the *French Revolution* (1789–1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 21, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20–June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the *Senate* of 314 members (elected by indirect vote for 9 years, one-third being renewable every 3 years)

[* *Finnish Mark.*—The *mark* is the same nominal value as the *franc*; for the average exchange, see p. 433.

and the *Chamber of Deputies* of 597 members (elected by direct vote for 4 years). Members of the legislature receive 27,000 francs a year and travelling facilities over the railways.

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple pear, citron, fig, plum, &c. The agricultural production in 1913, 1921 and 1923 is shown in the following table :—

	Production.		
Crop.	1921. Quintals.	1923. Quintals.	1924. Quintals.
Wheat.....	88,034,290	75,000,000	76,530,000
Rye	11,276,110	9,280,000	10,220,000
Barley.....	8,342,850	9,800,000	10,460,000
Oats	35,482,950	48,910,000	44,350,000
Potatoes...	83,096,550	99,190,000	153,500,000

The extent of land completely devastated by artillery fire in France was 3,306,350 hectares, comprising 4,329 communes. There were 794,000 dwellings destroyed or damaged, of which on Oct. 10, 1922, about 408,000 had been reconstructed. Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. The vine is cultivated to a very great extent (1,257,611,000 gallons of wine were produced in 1923), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1923 amounted to 353,782,000 gallons. The live stock (1923) included 13,749,290 cattle, 9,925,310 sheep, and 5,405,840 pigs. The mineral resources include coal, pig iron, copper, lead, silver, antimony, and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the *Saar Basin* are ceded to France for 15 years, at the end of which time the inhabitants are to decide by a *plébiscite* whether they will remain French, return to Germany, or become a self-governing community. The coalfields abut on Lorraine, and have an area of 217 square miles, with a population of 640,000, and they include the towns of Saarbrück (60,000), Saarlouis (16,000), and Merzig (10,000), on the River Saar. In 1911 the mines of France produced 30,000,000 tons, but in spite of the damage done to them it reached 37,682,000 metric tons in 1923. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk, and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—The *National Army* of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie, and Republican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. These forces have a total strength on a peace footing (in 1923) of 356,600 all ranks (exclusive of the Armies of Occupation in the Ruhr, the Sarre and in Syria, which absorbed 132,000 all ranks). In the War of 1914–1918 over 20 per cent. of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis, and Morocco). Of this total over 1,500,000 were returned as killed or missing. By law of 1919, the French Army consists of 350,000 all ranks on a peace footing, and of 1,300,000 on a war footing, with a reserve (including Territorials) of 2,000,000 all ranks. The *French Navy* was manned in 1920 by 56,000 officers and other ranks, and consisted in 1923 of 6 Dreadnought and 3 Pre-Dreadnought battleships 6 cruisers, 5 light cruisers, 51 destroyers, and 47 submarines, 20 airships and 98 aeroplanes.

ARMISTICE MONUMENT.—In the Forest of Compiègne is a *Carrefour de l'Armistice*, from which the *Clairière de la Victoire* leads to the Armistice Monument, unveiled Nov. 11, 1922. The monument marks the spot where the Germans signed the armistice terms presented by Maréchal Foch, and bears the inscription *Ici le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asservir.*

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (*a*) Ministry of Public Instruction ; (*b*) Superior Educational Council, charged with the actual administration ; (*c*) Consultative Committee (advisory) ; (*d*) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (*a*) Territorial Academies, with inspecting staffs for all grades, and (*b*) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary: Secular, comp.* and *free*. Age 6–13. Schools include (*a*) infants ; (*b*) lower primary ; (*c*) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary :* State lycées, communal colleges, and many private establishments, 7-yrs. course, either (*a*) purely classical ; (*b*) purely modern ; (*c*) Latin and sciences ; or (*d*) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5–6 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpelier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse.

COMMUNICATIONS. — The length of the *Routes Nationales* in 1921 was 23,838 miles in France, and 728 miles in Alsace-Lorraine. The principal rivers of France are the Seine, Loire, Garonne, and Rhône ; the navigable waterways having a length of (1922) 4,512 miles, with 3,031 miles of canals. The system of railroads in France is very extensive ; they are almost entirely *concédés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1924, was 25,808 miles, the total receipts from passenger and goods traffic, &c., being 86,521,574 francs. In 1922 there were 50 fatal accidents on French railways, with 96 killed and 544 injured ; in 1921, 72 accidents with 137 killed and 656 injured ; and in 1920, 142 accidents with 122 killed and 1,064 injured.

The length of telegraph wires is 118,129 miles, and of telephone lines 123,000 miles.

Shipping.—The gross tonnage of the French mercantile marine in 1922 was 3,560,000 gross tons, of which 366,000 gross tons were sailing vessels. Under the Armistice clause France has received 109 ex-German vessels (445,543 gross tons). During the year 1924 the tonnage of French and foreign vessels entering French ports amounted to 42,575,400 tons, of which 12,411,000 tons were French; while the total clearings amounted to 32,644,000 tons, of which 8,806,000 tons were French. The chief ports are Marseilles, Rouen, Bordeaux, Le Havre, Calais, Boulogne, Dunkirk, and Cherbourg. A bill was passed by the Chamber in 1921 for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the sea to Switzerland, and will also provide electric power and irrigation to the surrounding departments.

COMMERCE.—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

Alsace - Lorraine. — *High Commissioner*, M. Mirman (1920). Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the *Treaty of Frankfort* (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914–1918, the Provinces were regained by France under the *Treaty of Versailles* (June 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxemburg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The area is 5,605 square miles; the population in March, 1921, was 1,709,749. Principal towns, Strassburg (pop. 166,767), Mülhausen, and Metz.

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36′ W. to 6° 16′ E. longitude, 37° 6′ N. to an undetermined S. limit, about 30° N., covering an area estimated at 222,120 square miles, with a population (1921) of 5,806,090. of whom 829 were Europeans and 4,976,262 natives. The revenue in 1925 was estimated at *francs* 519,800 824, and the expenditure at *francs* 519,788,955. The bulk of the trade is with France, the exports to France amounting in 1924 to *francs* 1,475,130,000 (total exports *fr.* 1,990,494,000), and the imports from France to *fr.* 2,224,056,000 (total imports *fr.* 2,793,744,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1923 there were 2,480 miles of railroad open for traffic; and in 1924 the number of ships engaged in foreign trade entering Algerian ports was 3,848 of a net tonnage of 5,851,698 tons. The principal town is Algiers, the capital (population, 1921, 551,949), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemcen. *Governor-General*, M. Théodore Steeg (1921).

CAPITAL, Paris, on the Seine. Population (1921), 2,906,472; there are 82,127 houses and 1,149,366 families according to the census of March 1921. Fourteen other cities exceed 100,000 — Marseilles 586,342, Lyons 561,592, Bordeaux 267,409, Lille 200,952, Nantes 183,704, Toulouse 175,434, St. Etienne 167,967, Strasbourg 166,767, Nice 155,839, Le Havre 163,374, Rouen 123,712, Roubaix 123,265, Nancy 113,226, and

Toulon 106,331. Mulhouse, Amiens and Limoges exceed 90,000, and 30 others exceed 50,000.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

BRITISH EMBASSY.

Embassy, 39 Faubourg St. Honoré, Paris.

Ambassador Extraordinary and Plenipotentiary, His Excellency The Most Hon. Marquess of Crewe, K.G., P.C. (1922) £16,625
Minister Plenipotentiary, E. C. E. Phipps, C.M.G., C.V.O.
1st Secretary, R. F. Wigram.

BRITISH CHAMBER OF COMMERCE, 6 Rue Halevy, Paris, IXème. *President*, H. C. Welman.

There are also British Chambers of Commerce at 2, Rue Beauvau, Marseilles, and 4, Avenue Massena, Nice.

Paris is distant from London 267 miles; transit, 7 to 8 hours.

FRENCH COLONIES.

Colony, &c.	Area.	Population.
Indo-China	257,000	18,000,000
Asia Minor	150,000	4,500,000
Africa	4,100,200	43,550,000
America	33,200	500,000
Oceania	10,000	100,000
Total	4,550,400	66,650,000

In ASIA.—*French India* includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta; Yanaon, in the Godavery delta; and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of (1922) 268,000. *French Indo-China* comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898–9 the port of Kwang-Chow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1922) estimated at 19,983,203, including the civil European population of about 17,500.

In ASIA MINOR.—The French mandatory sphere of *Syria*, *Cilicia* and *Lebanon* has a total area of about 150,000 square miles, with an estimated population of 4,500,000 (*see* also pp. 802–3).

In AFRICA.—*Algeria* (*see* above) is an integral part of France. *Morocco* (*see* p. 774–5) is a French (and partly Spanish) protectorate.

Tunis (*Bey of Tunis*, Sidi Mohammed ed Habib, *acceded* 1922) has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and an estimated population of 2,000,000, of whom about 60,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. Tunis, the capital, has a population of 230,000; other towns are Sfax (84,000), Bizerta (30,000), Susa (30,000), Kairwan (22,000), Gabes (16,000), and Monastir (6,000). *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,976. It consists of *Senegal* (74,000 sq. miles, pop. 1,250,500), capital, St. Louis; *Upper Senegal Niger* (304,000 sq. miles), and the *Niger Military Territory* (533,000 sq. miles), which have a total population of about 6,036,200; *French Guinea* (92,600 sq. miles, pop. 1,737,350); *Ivory Coast* (126,200 sq. miles, pop. 1,216,300); and *Dahomey* (38,000 sq. miles, pop. 878,500); adjoining Dahomey is the French Sphere of the former German colony of *Togoland* (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,160 sq. miles and a population of about 450,000. *French Equatorial Africa* consists of the *French Congo* (513,000 sq. miles., pop. 9,000,000) and of the French Sphere in the former German territory of *Cameroon* (267,000 sq. miles, pop. 2,750,000). *French East Africa* consists of the *Somali Coast* (46,300 sq. miles, pop. 208,000) and of the large island of *Madagascar* (226,000 sq. miles, pop. 3,153,500) with its dependencies (Nossi Bé, Sainte Marie, Réunion, and the Mayotte-Comoro Islands, and St. Paul, Amsterdam, and Kerguelen Islands). Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75,000; other towns are Tamatave (the chief port), Majunga, Diego-Suarez, Mananjary, Tuléar, Andevoranto and Vohémar. Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadaloupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French Guiana. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,850.

In OCEANIA.—New Caledonia (7,200 sq. ms., pop. 50,500) is a large island with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Maré, Lifou, Uvéa, &c.), the Huon Islands, and Futuna and Alofi. The Society Islands (Tahiti, Moorea, &c.) have an area of about 650 square miles, and a population of about 14,000; the Marquesas (Nukahiva, Hivasa, &c.) 500 sq. miles, pop. 2,500. Leeward Isles (Huahiné, Raiatéa, Tahaa, Bora-Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Rurutu, Raivavae, Rimatava, &c.); Rapa Island; Makatea; and Maiao Island. The New Hebrides are under joint Franco-British administration.

GERMANY.

(Deutsches Reich.)

President of the German Reich, General Field-Marshal Paul von Hindenburg, *born* Oct. 2, 1847, *assumed office* May 12, 1925.

Posts, Dr. Stingl.
Economic Affairs, Dr. Curtius.

Ambassador in London, Dr. Friedrich Sthamer, 9 Carlton House Terrace, S.W. 1.
Consular Dept. of the Embassy, 9 Carlton House Terrace, S.W. 1.

The area of Germany is approximately 182,200 square miles, with a population on June 16, 1925 of 62,568,753 (without Saar district), of whom 30,186,563 were males and 32,382,190 were females. The population on Dec. 1, 1910 was 64,925,993. Births in 1924 numbered 1,313,625 and deaths 801,880, births being 21·1 per 1,000 of population, deaths 12·9 per thousand.

Religious confessions in the present area were in 1910:—Protestants 38,117,501, Roman Catholics 19,326,396, Jews 538,972, others 472,132.

There are 45 large towns with over 100,000 inhabitants, and of these 29 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 each in Baden and Hesse, 1 each in Württemburg and Brunswick, and three Hanse Towns.

At the outbreak of war, Aug. 1914, "Germany" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor."

By the *Treaty of Versailles* the "Reichsland" of Elsass-Lothringen and the Saar coal basin (temporarily) were ceded to France: parts of Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Denmark; and Moresnet and Malmédy to Belgium. Plebiscites held in June 1920 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia, which was held under the Peace treaty, resulted in division between Poland and Germany. Memel City with adjoining territory has been ceded to Lithuania.

The Colonial possessions of the German Empire extended over 1,035,086 sq. miles in Africa, 96,210 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of 1,134,239 sq. miles, with a population estimated in 1914 at 15,000,000. By the *Treaty of Versailles* Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions N. of the Equator to Japan; and those S. of the Equator to Australia and New Zealand.

On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov. 11, 1918, Germany was granted an armistice, and on June 28, 1919, peace was signed at Versailles. In Jan. 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female), and on Feb. 11, 1919, the first President of the German Versammlung was elected at Weimar. Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate States. The people possess the right of initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (*Reichswirtschafterat*).

PRODUCTION AND INDUSTRY.—Germany, up to the commencement of the War, was becoming more and more a manufacturing country. In 1907, 32·6 per cent. of the population were supported by agriculture, 37 per cent. by industry and mining, 11·5 per cent. by trade and communications. Of the total area in 1907, 78,632,140 acres were under cultivation, and 34,272,141 acres were woods and forests. The Live Stock (Dec. 1, 1925) included 3,916,914 horses, 17,202,336 cattle, and 16,199,573 pigs; Germany supported about nine-tenths of her population by her own produce in 1914. The mineral produce was valued in 1912 at £592,250,000, and included 190,109,440 tons of coal, 87,233,084 of lignite, and 28,607,903 of iron ore; potash, rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barmen, Chemnitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries. By lawsof 1919 and 1920, all coal, heavy iron and steel, potash and coal-tar producing concerns were compulsorily fused into All-German Syndicates, governed by assemblies representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

Under the stimulus of the falling mark exchange, which favoured competition abroad and induced the home public to convert its depreciating currency into solid goods, Industry flourished almost uninterruptedly between 1919 and late 1923, after which (in connection with currency stabilisation) business suffered temporary depression. As compared with 1919 production of all industrial goods has recovered, and in many cases it exceeds that of 1913. Bankruptcies for a time almost disappeared, increased again rapidly in 1924 and 1925, and in the summer of 1926 fell again to much below the pre-war average.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This National Insurance is based on mutual insurance and self-administration. The Infirmity Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses, including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made

other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of manual workers, became law in 1911. A Bill establishing Federal Unemployment Insurance for industrial workers and employees (not farm labourers or domestic servants) is before the Reichstag.

DEFENCE.—By Article 160 of the *Treaty of Versailles* the German *Military Forces*, as from March 31, 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100,000 all ranks. By Article 181 of the Treaty, the German *Naval Forces* must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers, and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov. 21, 1918) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by its crews in Scapa Flow, while in custody, on June 21, 1919. In consequence of this breach of the Armistice agreement by the German crews the Allies (Nov. 10, 1919) called upon the government to surrender 5 light cruisers, and certain floating docks, cranes, and dredgers, in addition to the previous naval surrenders. By Article 198 of the Treaty the armed forces of Germany must not include any military or naval *Air Forces*, and no dirigible balloons, aeroplanes, sea-planes or flying boats.

COMMUNICATIONS.—The total length of the *Railroads* at end of 1923 was 55,451 kilometres, of which all except 3,662 kilometres belonged to the Republic. Under the *Dawes Reparation Scheme* all state railways are transferred to a joint stock company. The number of registered automobiles (July 1, 1925) was 175,665, and motor cycles 161,508, and motor lorries 80,363. Length of *Telegraph and Telephone Lines* (1924) 382,000 kilometres (length of wires, 12,567,000 kilometres); telegrams transmitted, 45,600,000; post, telegraph, and telephone offices, 45,604; wireless stations, 609; telephone subscribers, 2,385,000; letters carried, 4,392,000,000; value of cash on delivery orders, 1,578 mill. m.; money orders, 2,575 mill. m. The number of employés in the service of posts, telegraphs, and telephones was 325,213. The postal services have been financially separated from the general administration. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. At the outbreak of the War of 1914–1918 Germany ranked second to Britain in the list of maritime countries. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17·65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register); number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 1919, 134,535 tons, 1920 241,985 tons, 1922 575,264 tons, 1923 358,000 tons, 1924 249,788 tons, 1925 280,937 tons. On Jan. 1, 1925, shipping had increased to 3,169,308 gross tons. Recovery was helped by the establishment of eleven new yards during the War. The chief ports of Germany are Hamburg, on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Königsberg, on the Pregel; Kiel, on the Baltic (connected with the Elbe by the Kaiser Wilhelm Canal); and Lübeck, on the Baltic. Kiel is being converted into a free port. Under the Peace Treaty Danzig became a Free State, subject in its foreign affairs to the Polish Republic. Traffic in the chief ports has increased since the War at a great rate, and now exceeds that of 1913. Arrivals at Hamburg were: 1923, 14,795,496 net tons; 1925, 15,439,000 net tons. Bremen shipping traffic also exceeded that of before the War.

FINANCE.—Under Articles 248–263 of the *Treaty of Versailles* the German Government undertook to pay the cost of the Armies of Occupation from Nov. 11, 1918, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank) from Eiten, on the Netherland's frontier, in the north, to the junction of the German–Lorraine frontiers, in the south. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of 2 milliard gold marks, together with a sum equivalent to 26 per cent. of German exports. Of the amounts thus payable the various shares from 1921–1929 were apportioned to France 52 ninety-second parts, Great Britain 22, Italy 10 and Belgium 8 ninety-seconds; from 1929–1932 the shares are varied to France 130 two hundred and thirtieth parts, Great Britain 55, Italy 25 and Belgium 20 two hundred and thirtieths; and for the succeeding 31 years France 756 two hundred and seventy-six parts, Great Britain 66, Italy 30 and Belgium 24 two hundred and seventy-six parts. A new *Reparations Scheme* was agreed to by Germany and the Allies in August, 1924, providing for standard annual payments of 2,500 million gold marks, liable to increase according to an index of prosperity, the money to be supplied from (1) taxation, (2) railway bonds, and (3) bonds imposed on private industry. The total capital Reparations liability was not refixed.

In November, 1923, was put through a *Currency Reform*, consisting in the creation of a *renten-mark*, nominally worth 1 gold mark, and in the stabilisation of the depreciated paper-mark at 1 billion paper-marks to 1 gold-mark. The stabilised paper mark notes have since been withdrawn from circulation, and the renten-marks are being gradually replaced by reichs-marks of pre-war gold value, issued by the Reichsbank as reconstituted under the Reparations settlement. Although the currency reform of 1923 was only provisional it reacted beneficially on the Finances, stopping the rise in the cost of administration and preventing depreciation in the value of the taxes received. For covering the deficits in the weeks intervening between stabilisation and complete balancing of the budget, the Republic obtained limited credits from the new Rentenbank. In the financial year 1924–25 a complete budget balance was attained, and surpluses remained for extinction of debts arising out of the Ruhr occupation. The *Budget Estimates* for 1926–27

(in which are not included the separately financed Railways and Posts) were :—

General Administration Budget :—

	1,000,000 Reichs-marks.
Ordinary revenue	7,326
" expenditure	7,326
Extraordinary revenue	300
" expenditure	300

Budget for War Burdens :—

Revenue	1,486
Expenditure	1,486

The German Debt.

The *Debt* of the Republic contracted in stable currencies since 1923, and including the Reparation Loan of 800,000,000 marks, totalled (on Aug. 31, 1926) 2,141,300,000 reichs-marks. The *Old Debt*, consisting of pre-War and War borrowings (and including Debts taken over from the States in connexion with the expropriation of the State railways) totals 70 milliard marks. All this Old Debt was regarded in law as a *paper-mark liability*, and had therefore no value, but under a law of July 16, 1925, this Debt is valorised in such way that bondholders who acquired before July 1, 1920, will ultimately receive 12½ per cent. in gold marks of the nominal value of their holdings with interest. Bondholders who acquired later will receive 2½ per cent., but this will bear no interest until Reparations are paid.

German Trade.

	1924.	1925.
Total Imports (mill. Rchmks.)	9,317	12,432
Total Exports (mill. Rchmks.)	6,568	8,798
Imports from U.K.	£42,587,000	£44,206,000
Exports to U.K.	36,888,000	48,156,000

GERMAN FEDERATED STATES.

PRUSSIA.

GOVERNMENT (April, 1925).

President, Herr Braun.
Interior, Herr Grzesinski.
Finance, Dr. Höpker-Aschoff.
Agriculture, Herr Steiger.
Trade and Commerce, Dr. Schreiber.
Instruction and Worship, Dr. Becker.
Minister of Justice, Dr. am Zehnhoff.
People's Welfare, Herr Hirtsiefer.

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1924 of 113,750 sq. miles and a population on June 16, 1925, of 38,188,304 (Saar district excluded).

The number of births in 1924 was 812,278, against 2,209,500 in 1913. The number of deaths in 1924 was 486,611 against 656,490 in 1913. Marriages were 273,054, against 323,709. The surplus of births over deaths in 1924 was 325,667.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Pregel, Oder, Elbe Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of 18,053,000 acres, chiefly consisting of fir. Minerals consist of coal, iron, copper, lead, potash, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant. Metallic ores, coal, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, sugar-beet, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

	Reichs-marks.
Revenue (Estimate) 1925–26	3,330,739,800
Expenditure do.	3,330,739,800

The whole of the old *Funded* Debt of Prussia was taken over by the Republic under the arrangement for transfer of the Prussian State Railways. It will be valorised on the same conditions as those laid down for the Federal Debt under the law of July 16, 1925.

CAPITAL, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Great Berlin with a population on June 16, 1925, of 4,013,588.

Other largest cities are Cologne, on the Rhine (698,064), Breslau, on the Oder (554,801), Essen, on the Ruhr (468,696), Frankfort, on the Main (461,849), Düsseldorf, on the Rhine (431,096), Hannover, on the Leine (422,435), and Dortmund on the Emscher (320,256).

BAVARIA.

Minister-President, Dr. Held.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16′—50° 34′ N. lat. and 9° 0′—13° 50′ E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 sq. miles, and the population on June 16, 1925, 7,411,589. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. The Bavarian forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. The Thüringian Duchy of Coburg was incorporated in Bavaria in 1921.

	Reichs-marks.
Budget, 1925–26	675,706,000

CAPITAL, Munich, on the Isar. Population (1925), 680,704. Other large towns are Nürnberg, N.W. of Munich (392,494), and Augsburg, on the Wertach-Lech (165,522).

SAXONY.

The Republic of Saxony has an area of 5,856 English square miles, with a population on June 16, 1925, of 4,980,689. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief town, after the capital, is Leipzig (pop. 679,322), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,925 matriculated students in 1912–13); Plauen (pop. 111,398), and Chemnitz (pop. 331,641), the Manchester of Saxony.

Reichs-marks.

Budget, 1925–26 579,951,600

CAPITAL, Dresden. Pop. (1925), 628,684.

WÜRTTEMBERG.

The Republic of Württemberg has an area of 7,534 English square miles, and a population (in 1925) of 2,595,114, of whom 30 per cent. are Roman Catholics. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pasture-land being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, stays, beer, wine, &c.

Reichs-marks.

Budget, 1925–26 215,535,200

CAPITAL, Stuttgart. Population (1925) 341,461.

MINOR STATES.

Baden, separated by the Rhine from France (Alsace) and Switzerland, has an area of 5,819 square miles, with a population (1925) of 2,336,498. A great part of the surface is mountainous and covered with forest trees, including the Schwarzwald (Black Forest) and the Odenwald, but more than three-fifths of the total area is under cultivation, corn, wine, fruit, potatoes, tobacco and hops being the chief agricultural products. The principal manufactures are cigars, cotton and silk stuffs, brushes, jewellery and trinkets, clocks, chemicals, paper and machinery. More than half the population are Roman Catholics. Capital, Karlsruhe, pop. (1925) 145,694. Other large towns are Mannheim (247,486), Friburg (91,559), Pforzheim (78,434), and Heidelberg (74,892).

Land Thüringen. The Thüringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz, Reuss-Gera, and Gotha, have been constituted into a single state under the title Land Thüringen, with an area of 4,541 square miles, a population of 1,628,398, and two seats in the Federal Reichsrat. In size Land Thüringen is sixth among German states. The new state is governed by a "Volksrat." Capital, Weimar (46,028).

Hesse, in the West Centre, consists of Northern and Southern portions, nearly equal in size, on either side of the Main River, with a total area of 2,968 square miles and a population (1925) of 1,358,445, of whom more than half are Protestants. The country is mountainous but fertile, and agriculture is flourishing. Capital, Darmstadt, pop. (1919) 89,095. Other large towns are Mayence (Mainz) at the confluence of the Main and the Rhine (109,285), Offenbach (78,780), Worms (47,006), and Giessen (33,527).

Mecklenburg-Schwerin, between the Elbe and the Baltic, has a total area of 5,068 square miles, with a population (1925) of 686,838. Agriculture and stock raising are the principal industries, the Mecklenburg breed of horses being famous. The chief manufactures are bricks and machinery. Capital, Schwerin, pop. (1919) 45,322.

Oldenburg, on the North Sea, between the estuary of the Weser (at Bremen) and the Prussian province of Hanover, has detached territories in Lübeck (between Holstein and Mecklenberg) and Birkenfeld (Rhine Province of Prussia). The total area is 2,479 square miles, with a population (1925) of 553,670. The chief industries are agriculture, bee-keeping and stock-raising; the principal manufactures are brewing and distilling, tanning, tobacco and corks. Capital, Oldenburg, pop. (1925) 52,187.

Brunswick, 1,418 square miles, pop. (1925) 508,660; in Northern Germany. Capital, Brunswick, pop. (1925) 146,654.

Anhalt, 906 square miles, pop. (1925) 351,692, is in Central Germany. Capital, Dessau, pop. (1925) 70,316.

Lippe, 470 square miles, pop. (1925) 166,023. Capital, Detmold (16,171).

Mecklenburg-Strelitz, between Mecklenburg-Schwerin, Pomerania and Brandenburg, has a total area of 1,130 square miles, with a population (1925) of 112,052. Chief industries are agriculture and wood products. Capital, Neustrelitz, pop. (1925) 12,338.

Waldeck, 438 square miles, pop. (1925) 59,281. Capital, Arolsen (2,793).

Schaumburg-Lippe, 130 square miles, pop. (1925) 48,660. Capital, Buckeburg (6,745).

The *Free Hanse Towns* comprise the three cities of *Lübeck*, on the Trave (area 115 square miles, pop. 127,540), *Bremen*, on the Weser (area 99 square miles, pop. 332,547), and *Hamburg*, on the Elbe (area 160 square miles, pop. 1,128,753). Each has a small rural territory and has full Federal independence, with a Council of State (under the Presidency of a Burgomaster).

TRADE FLAG: Black, red and gold.

Counsellor, (vacant)
Secretaries, M. G. V. Melas; M. Jean Romanos.
Consul-General, M. K. Collas.
Vice-Consul, M. B. Mostras, 36 Gordon Square, W.C. 1.

A maritime Republic in the south-east of Europe, bounded on the N. by Albania, Yugo-Slavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 49,036 sq. miles and an estimated population (1925) of 6,374,000, including refugees from Turkey.

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of *Macedonia* and *Epirus*, *Crete* (3,950 sq. miles, pop. 336,151), and certain *Aegean Islands* increasing the area to 43,522 sq. miles. During the War of 1914-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of *Thrace* (including the monastic republic of *Mount Athos*), and the islands of *Imbros* and *Tenedos*. Under an arrangement with Italy, to come into effect after the ratification of the *Treaty of Sèvres*, the *Dodecanese* (12 islands) were surrendered by Turkey, and these were to be handed over to Greece by Italy with the exception of *Rhodes*, for which a special arrangement was made: this arrangement was, however, repudiated by Italy. Greece also received under the Treaty a mandate for the occupation and administration of the town and district of *Smyrna*, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept. 1922, the Greek forces being annihilated, and Smyrna was evacuated on Sept. 8, 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the *Treaty of Lausanne* (1923) Greece lost Eastern Thrace (that part lying E. of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Ægean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Government.—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924. The legislature consists of a Senate of 130 members, and of a

Chamber of Deputies (or *boulé*) elected for 3 years by universal manhood suffrage.

Production.—Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, olives, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, sponges and carpets.

Defence.—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914–1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consisted (July, 1919) of 6 ironclads, 1 modern cruiser, 14 destroyers, 6 torpedo-boats, and 2 submarines.

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Finance.—The debt in 1912 was 1,040,900,000 *drachmæ*, and the Balkan Wars of 1912–13 added 354,960,000 *drachmæ*, the Great War added 1,028,000,000 *drachmæ*, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 *drachmæ*.

Communications.—There were (1920) 1,470 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons. The post offices (in Old Greece) number 1,150, dealing with 36,000,000 postal packets; telegraphs, 4,951 miles. The mercantile marine consists (1924) of 437 steamships (824,634 tons) and 1,018 sailing ships (113,707 tons). The principal harbours are the Pirœus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Kalamata, Laurium, Cavalla, and Canea (Crete).

Budget, 1924–25.	*Drachmæ.*
Ordinary revenue	3,458,757,000
Extraordinary do.	499,824,000
Ordinary expenditure	2,906,075,000
Extraordinary do.	1,569,223,000
Public Debt (March 31, 1924)	*9,288,000,000

	1923.
Total imports ..... *Dr.*	6,035,346,000
Total exports	2,545,110,000
Imports from U.K. (1924)	862,601,185
Exports to U.K. (1924)	703,315,512

CAPITAL, Athens. Population, 1926 (including the Pirœus), estimated at 700,000. Other large towns are Salonica (170,321), Patras (52,174), Corfu (28,000), Candia (25,000), Canea (25,000), Volo (30,000), Cavalla (23,000).

FLAG: 9 horizontal bands, alternately blue and white, with white cross, on blue ground, in corner.

* The War Expenditure on the disastrous Asia Minor Campaign from 1920-21 to 1923-24 amounted to 7,732,000,000 *drachmæ*.

Athens, transit, 6 days for letters; for parcels, several months.

GUATEMALA.

República de Guatemala.

President (1926–1928), General Lazaro Chacon, *assumed office* Sept. 26, 1926.
Minister of Foreign Affairs, Señor Don Roberto Lowenthal.
Minister in London, Dr. Francisco Sánchez Latour.
Consul in London, D. Bowman, 11 Queen Victoria Street, E.C. 4.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45′ to 17° 49′, and in W. Long. from 88° 12′ 40″ to 92° 13′, 43′ and comprises an area of 42,456 square miles, and a population in 1921 of 1,600,535. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital was destroyed by an upheaval in Jan., 1918. The country is well watered by numerous rivers; the climate is hot and somewhat malarious near the coast, but very temperate and healthy in the higher regions. About 620 miles of railway were open for traffic in 1917. There were 4,543 miles of telegraph working in 1921. The chief ports are San José de Guatemala and Champerico on

the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, sugar, timber, *chicle* (chewing gum), hides and beans. Spanish is the language of the country.

	1924–25.
Revenue (Budget)	*Pesos* 370,675,000
Expenditure (do.)	358,405,920
External Debt (Dec. 31, 1922)	£1,908,563

HAITI.

(République d'Haïti.)

President, M. Louis Borno, *assumed office* May 15, 1922; *re-elected* 1926 for 4 years £4,800
Foreign Affairs, Edmond Montas.

Minister in London, M. Auguste Magloire, 32 Queen Victoria Street, E.C.4.
Consul, J. G. Dalzell, 76 Victoria Street, S.W.1.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands.

The island was visited on Dec. 6, 1492, by Christopher Columbus, who named it *Espagniola*, the native name being *Haïti* (mountainous) or *Quisquica* (vast). The Spaniards explored the island and almost exterminated the 2,000,000 native Indians, whom they replaced with African negroes. By the Treaty of Ryswick (1697) the western portion of the island was ceded to France, and in 1803 the territory was abandoned by the French, and a republic was proclaimed under the aboriginal name of Haïti. In 1822 the rule of the Haitian President was extended over the whole of the island, the eastern portion having declared its independence of Spain in 1821. Since 1844 the eastern portion has formed a separate republic (see Dominican Republic).

The area of the republic is 10,200 square miles, with a population estimated at 2,500,000. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums and oilseeds, these being the chief exports. It is said to contain mines of gold silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. In November, 1915, both Houses of the Congress ratified a treaty with the U.S.A., establishing a virtual protectorate over the Republic, which came into effect in May, 1916. An armed Constabulary, rural and urban, under American officers, has been constituted, and a coastguard service is attached. On Nov. 17, 1920, some prominent Haytians met and formed the "Union Patriotique," an association for raising funds by public subscription all over the country for the purpose of sending delegates to plead the cause of the Haytian people. It was arranged to send a delegation of three members to New York and Washington, and on February 6, 1921, two of them left, the third following two months later. It appears that the Haytian cause has found supporters there, and as a result of the visit of this delegation a Senatorial Commission of enquiry visited the island (Nov.–Dec. 1921), and in their subsequent report advised the U.S. Government to maintain the occupation and to appoint a High Commissioner. The Constitution was amended in June 1918, and under its provisions the President is elected for four years, and governs with the advice of a Council of State of 21 members appointed by him. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany; the principal articles imported from Great Britain in 1921–22 were piece-goods, jute bags, hardware, and agricultural tools. French is the language of the country.

	1924–25.
Revenue, gold	*$8,111,504
Expenditure, gold	8,362,308
Total debt (Sept. 30, 1925)	21,772,682
Total imports	4,690,470
Total exports	2,123,503
Imports from U.K.	1,723,323
Exports to U.K.	555,895

CAPITAL, Port-au-Prince. Population, 125,000.

FLAG: Two horizontal bands, blue, red.

BRITISH CONSULAR OFFICES.

(133 Rue Vernet, Port-au-Prince.)

Port-au-Prince—Consul and Chargé d'Affaires, R. P. F. Edwards, D.S.O. (1925).
,, *Vice-Consuls*, Edmund D. Watt, M.B.E.; G. A. Payne.

Transit, 15 days.

HONDURAS.

(República de Honduras.)

President, Dr. M. Paz Baraona, *assumed office* Feb. 1, 1925.

Consul-General in London, Señor Don H. Blauco Fombona, Craven House, Kingsway. W.C.2.

The Middle State of Central America, stretching in N. lat. between 13° 10′ and 16°, and W. long. between 83° 10′ and 88° 40′; containing 44,275 English square miles, with a population estimated at 673,408 (1922).

Christopher Columbus landed at Cape Honduras in 1502, and in 1524 the country was settled by the Spaniards. In 1525 *Hernando Cortes* founded the city of Puerto Cortes, and from 1539 to 1821

* U.S. $. Gourde on gold basis = 5 gourdes $1.

the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Castilla, Puerto Cortes, Omoa, Roatan, Tela, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. (NOTE.—Amapala is on Tiger Island; port on mainland is San Lorenzo, 2 hours in gasoline launch from Amapala.) From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, good road, 5–6 hours. Road from Tegucigalpa to the Atlantic coast has now been completed as far as Lake Yojoa, and is in fair condition. The journey to the lake takes from 9 to 10 hours in automobile. The lake is crossed by gasoline launch in 1½ hours. From there to the head of the railway at Portrerillos the road is still in very poor condition, but cars travel thereon in the dry season, taking from 2 to 3 hours. Potrerillos is 2 hours by rail from San Pedro Sula, and 3 hours from Puerto Cortes. By taking express automobiles and an express car on the railway, it is now possible to make Puerto Cortes from Tegucigalpa in 24 hours, thus reaching New York in 5 or 6 days. There is also an aeroplane service from Tegucigalpa to Tela, connecting up with the direct steamers for Avonmouth from the latter. There are railway connections between San Pedro Sula, and Tela and La Ceiba. The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being bananas, mahogany, fruit, cattle, sugar, rice, tobacco, coffee, indigo, sarsaparilla, hides and skins, indiarubber, cedar, fustic, rose, and Lima wool (Kapok). There is an immense amount of uncultivated land. The number of cattle in 1920 was approximately 500,000. The forests are extensive, but there is a lack of communications and transport. Its mineral wealth is great. In 1925 there were 1,432 kilometres of railway open, all on the North Coast. The language of the country is Spanish.

	1923–24.	1924–25.
Revenue	£1,362,785	£820,557
Expenditure	1,355,872	1,032,079
*Foreign Debt	5,398,570	1,200,000
†Internal Debt		1,700,000

Hungary was declared a Republic on Nov. 27, 1918, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugo-Slav Kingdom (*q.v.*) and of Slovakia and Ruthenia to Czechoslovakia (*q.v.*). The area of Hungary is about 36,179 sq. miles, with a population (almost entirely Magyar) of 8,160,000 (Dec. 1924). The political neighbours are Czechoslovakia on the N., Yugo-Slavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918, Count Károlyi assumed office as Provisional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet" (Workmen's Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Peidel (Aug. 1, 1919). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris.

On March 21, 1920, Admiral Nicholaus von Horthy of Nagybánya was elected Governor of Hungary by vote of the National Assembly, which gave him sovereign rights, with certain restrictions.

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct. 21 until removed under escort. On each occasion the Hungarian Government was informed that a

* In 1925 the Government of Honduras ratified an agreement concluded with the Council of Foreign Bondholders providing for the liquidation of the Foreign Debt by annual payments of £40,000 over a period of 30 years.

† Bearing no interest. No reliable figures are available.

Hapsburg restoration would not be tolerated by the European Powers.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parcelling out of the great estates, which was forcibly attempted during the Karolyi régime, has been continued to a small extent, but on an economic basis and at the initiative of the owners; a land-reform bill aiming at the forced sale of the properties exceeding a given area is in process of execution.

A single chamber National Assembly (introduced Jan. 4, 1920, in place of the Upper and Lower Houses of the former Parliament) is elected by universal suffrage. The question of providing a Second Chamber from a reformed House of Magnates (which ceased to function after the revolution) is under discussion.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

Reconstruction.—During the period following the War the Hungarian currency rapidly depreciated and touched its lowest point in August, 1923, when it was quoted at 380,000 crowns to the £, as against 24 before the War. In 1924 an international loan of £10,000,000 sterling was granted to Hungary, its use being subject to a Reconstruction Plan elaborated by the League of Nations, under which State finances must be stabilised in 30 months. A Hungarian National Bank was also set up with the sole right of issuing banknotes. According to special arrangements made with the Bank of England, the Hungarian currency was stabilised upon the £, at 345,000 crowns = £1 sterling, and it now automatically follows the latter's fluctuations. The carrying out of the reconstruction scheme was supervised by a Commissioner-General on behalf of the League, and the latter, having recognised that the financial reconstruction of the country had been successfully terminated and the currency stabilised, recalled the Commissioner-General in July, 1926. Partial control still exists as to the pledged revenues of the State and the unused balance of the loan.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

	1924.	1925.
Total imports	£30,500,000	£30,800,000
Total exports	25,000,000	29,150,000
*Imports from U.K.	665,000	983,000
Exports to U.K.	400,000	365,000

CAPITAL: Budapest, on the Danube, has a population of 1,184,616 (1921). The other large towns are: Szeged (110,000), and Debreczen (103,000); there are 34 other towns with a population over 20,000.

* There is an increasing opening for British textiles and other British goods.

Hungarian and German are the languages of the country, but English is increasing in commercial use.

FLAG: Red, white, green (horizontally), arms (without supporters) in centre.

ICELAND.
(Island.)

King, Christian X. (*see* Denmark).
Presidents of Al-thing, H. Steinsen; Benedikt Sveinsson; Johannes Johamesson.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23′ to 66° 33′ N. lat., and from 13° 22′ to 24° 35′ W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was 94,866 in 1920.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1915 the assembly (Al-thing) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1924): estimated, £3,000,000; exports, £4,000,000. Iceland is in direct telegraphic communication with Great Britain.

CAPITAL, Reykjavik. Population, about 20,000. Other towns are Isafjörður, Akureyri, and Seydisfjord.

FLAG: Blue, with white-bordered red cross.

BRITISH CONSULAR OFFICES.

Seydisfjord—V.-Consul, Kristian Kristiansson.
Westmann Islands—V.-Con., Gisli J. Johnsen.

Transit, 5 days.

IRAQ.
(Mesopotamia.)

King of Iraq, Faisal, *born* 1887; elected King of Iraq, Aug. 10, 1921, *acceded* Aug. 23, 1921.
Prime Minister and Minister of Foreign Affairs (Nov. 1926), General Jafar Pasha el Askeri, C.M.G.

Diplomatic Agent in London, (vacant).
Office of Agency, 52, Queen's Gate Gardens, S.W. 7.

Iraq, or *Mesopotamia*, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914–18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Lausanne, ratified on Aug. 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set up by the High Commissioner in Nov. 1920 and in Aug. 1921 the Emir Faisal (son of the King of the Hedjaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. By Treaty between Great Britain and Iraq (Oct. 10, 1922) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations, and as soon as that admission has been accomplished all the responsibilities of Great Britain as the mandatory power will be terminated; by a protocol signed April 30, 1923, the duration of the treaty was cut down from 20 years to 4; but in a new treaty signed at Baghdad on Jan. 13, 1926, provision was made that the treaty of Oct. 1923 should remain in force for a period of 25 years from Dec. 16, 1925, unless before the expiration of that period Iraq shall have become a member of the League of Nations. In March, 1924, a Constituent Assembly met in Baghdad, ratified the treaty between Great Britain and Iraq, and passed an organic law and an electoral law for the election of a Chamber of Deputies. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King, and a Chamber of Deputies of 88 members elected by manhood suffrage. The first Parliament under this Constitution was opened by King Faisal on July 16, 1925.

The total area of the districts comprised within the British Mandatory Sphere is about 150,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. The sphere comprises the former Turkish vilayet of *Mosul*, *Baghdad* and *Basra*. At the Census of 1920 the population was ascertained to be 2,849,282, as under:—

Baghdad vilayet	1,360,304
Basra vilayet	785,600
Mosul vilayet	703,378
Total	2,849,282

The *Baghdad* vilayet include the Baghdad, Samarra, Diyala, Kut, Diwaniyah, Hillah and Dulaim Divisions; *Basra* vilayet include Basra, Amara and Muntafik; and *Mosul* include Mosul, Arbil, Kirkuk and Suleimani. (Mosul covers a great part of the ancient kingdom of *Assyria*, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1920 1,146,585 Sunni Muhammadans, 1,494,015 Shiite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,302 other religions.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and since the British occupation notable improvements have been effected; the Irrigation Department is at present confining itself to small and immediately remunerative schemes. The wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, peas and Indian corn; wheat averages 464lb. per acre, barley 612lb., and rice over 1,000lb. In 1918–19 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent. on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. The Iraq Government granted in July, 1924, an important agricultural and irrigation concession which includes a scheme for putting many thousands of acres under cultivation for cotton in the Diyala river valley. A concession for the exploitation of the oil in the Baghdad and Mosul vilayets was granted to the Turkish Petroleum Company in March, 1925. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British auspices. Basra was equipped with wharves, railway sidings, &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates and piece goods.

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (375 miles), the latter rising in the north-west of Erzeroum in the Dumlu Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bithiscon join.

The Baghdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, *vid* Baghdad, a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the Mesopotamian desert W. & S. of Mosul). The line crosses the Euphrates on a wooden bridge at Jerablus. At Aleppo there is a connexion with the Pilgrims' line from Medina (through Damascus and Homs to Aleppo) and, if it is completed, the railway will be served by

the port of Alexandretta (Iskanderun) in Cilicia. The first through train from Basra to Baghdad left Basra on Jan. 13, 1920. The total length of line open at that date was 945 miles compared with 1,113 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey; since that time lines have been laid from Baghdad to Kerbala and Baghdad to Kirkuk. The line to Kirkuk will be extended to Mosul.

The chief city is Baghdad, the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an estimated population of 170,000, other towns being Basra, 85,000, and Mosul (opposite the site of Nineveh), 90,000.

Total revenue	£3,844,769
Customs revenue	1,481,255
Total expenditure	3,354,263

CAPITAL, Baghdad.

Baghdad is 840 miles by air from Cairo, Egypt. Official Mails between London and Baghdad are sent by fortnightly Air Mail Service *vid* Cairo—Heliopolis—Ramleh—Amman—Kasr Asrak—Ramadi, with a saving of about 14 days in transit over the normal service. A motor service runs twice weekly between Damascus and Baghdad.

ITALY.

(Regno d'Italia.)

King, Victor Emmanuel, *born* November 11, 1869; *married*, Oct. 24, 1896, Princess Helen of Montenegro; *succeeded to the throne* July 29, 1900.
Heir Apparent, H.R.H. Humbert, Prince of Piedmont, *born* Sept. 15, 1904.

CABINET (June 30, 1924: reconstructed 1925).
Premier and Minister of Foreign Affairs, Interior, War, Marine, Air, and Corporations, *Signor Benito Mussolini.
Colonies, Dr. Luigi Federzoni.
Justice, Signor Alfredo Rocco.
Finance and Treasury, Count Volpi.
Education, Signor Pietro Fedele.
Public Works, Signor Giovanni Giuriati.
National Economy (Agriculture, Labour, Industry and Commerce), Signor Giuseppe Belluzzo.
Communications, Signor Costanzo Ciano.

Ambassador in London, His Excellency Marchese della Torretta, 20 Grosvenor Square, W. 1.
Counsellor, Signor Agusto Rosso.
1st Secretary, Signor Ugo Sola.
2nd Sec., Conte Vittorio di Rovasenda.
3rd Secs., Signor Guido Crolla; Carlo Alberto Straneo.
Hon. Attaché, Signor De Facci Negrati Gaetano.
Air Attaché, Generale Alessandro Guidoni.
Naval Attaché, Capt. Conte Raineri Biscia.
Military Attaché, Colonello Amerigo Coppi.
Commercial Attaché, Signor G. B. Ceccato.
Special Attaché, Signor G. Palliccia.
Chancellor, Signor Guiseppe de Grossi.
Archivist, Signor Ugo Catani.
Consul-General, Nob. Alessandro de Probizer, 68 Portland Place, W. 1.
Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 70 minor islands (with certain dependencies hereinafter noted). It is bounded on the N. by the Republics of Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Istria, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy in 1924 was 110,623 sq. miles, and by the *Treaty of Versailles* (June 28, 1919) Italy gained from Austria-Hungary the Trentino (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board).

By a treaty signed at Rome (Jan. 27, 1924), the *Free State of Fiume* came to an end. Yugo-Slavia's sovereignty over Port Baros and the Delta is established by the treaty, and Italy acquired the town and harbour works of Fiume, together with a narrow strip of hinterland. Italy agreed to lease to Yugo-Slavia the Thaon di Revel quay at a rental of one gold lira for 50 years, the railway station being established as an international frontier station. Fiume is now the capital of the newly created Italian Provincia del Carnaro, and has the status of an Italian provincial town.

The total area of the Kingdom of Italy was estimated (Jan. 1926) at 119,688 square miles, with a population (Dec. 31, 1925) of 42,113,606. There is a large settled and floating population of Americans and English.

The Italian peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugo Slavia. *Mont Blanc* (15,782 feet), the highest peak of the Alps, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet. The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848–1870, in which the great patriots *Mazzini* (*born* 1805, *died* 1872) and *Garibaldi* (*born* 1807, *died* 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital. The government is that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King), and the

* Signor Mussolini is the accredited leader of *Fascism*, the *Fascisti* representing a revolutionary movement against the alleged inactivity of post-War Italian statesmen. The uniform of the movement is a black shirt, and the name is derived from *fascio* or band (*cf.* the *fasces* of the Roman lictor) in which the movement was organised.

Chamber of Deputies of 536 members (elected by adult manhood suffrage). The maximum duration of Parliament is 5 years; Deputies receive 15,000 lire annually.

PRODUCTION. — Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly.

The principal exports are cotton, silk and woollen tissues, motor cars, olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, motor cars, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The *Army* consists on a peace footing of 310,000 all ranks. About 200,000 conscripts are called up for service in the spring of each year and serve for 18 months; thus about 400,000 men are normally with the colours during the summer months (training season) and 200,000 during the winter months. On May 23, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct. 31, 1918, amounted to 48 millards of lire (£1,920,000,000). During the War of 1914–1918, over 15 per cent. of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. The killed and missing amounted to 650,000. The *Navy* includes 5 modern and 1 pre-Dreadnought battleship, 16 cruisers, 1 aircraft carrier, 11 flotilla leaders, 60 destroyers, 47 torpedo boats, 42 submarines, 12 gunboats and despatch vessels, 2 river gunboats, and 46 minesweepers and minelayers. The peace *personnel* of the Italian Navy is about 45,000 all ranks. Spezia and Pola, the chief naval and military ports of the kingdom, are securely fortified. The *Air Force* consists of about 80 squadrons of aircraft and 4 airships. The official first-line strength of aircraft is 800 machines, with a further 800 in reserve. The *personnel* for 1926–27 includes 1,774 officers and 17,728 other ranks, the expenditure for 1926–27 being 700 million *lire*, of which 30 million is for *Civil Aviation*.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS.—On March 31, 1926, there were 10,257 miles of railway open for traffic, 587 being electrified and 569 in course of electrification; the post-offices (1925) numbered 10,978, and there were (1924) 34,518 miles of telegraph line. The sea-going commercial marine (1925) consisted of 1,365 steamers (2,901,078 gross tons) and 3,342 sailing vessels (220,971 tons). In 1925 225,547 ships (60,106,429 net tons) entered Italian ports, the weight of goods discharged being 25,177,001 metric tons; the clearances were 225,407 (59,938,406 net tons), and the weight of goods loaded 9,100,852 metric tons.

Rome, transit, 44 hours.

ITALIAN COLONIES, &c.

Libia.—The Turkish vilayet of Tripoli and the mutessarifat of Benghazi on the northern coast of Africa, were occupied by Italy in 1911–12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being retained by the Caliph. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces or Mutessarifilik of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 810,000 square miles, with a population of about 1,000,000. There are no rivers in the country, and, the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, *i.e.*, at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 50,000), and of Cyrenaica, Benghazi (population 35,000).

Governor of Cyrenaica, General Mombelli.
Governor of Tripolitana, General de Bono.

Eritrea is a Red Sea colony, and extends from Ras Kasar, 18° 2′ N., to Ras Demoira, 10° 42′ N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Abyssinia, and on S.E. by French Somaliland. It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of about 380,000, of whom about 3,000 are Europeans. The capital is Asmara, Massowa being the chief port, where there is a good harbour. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia.

Governor of Eritrea, Dr. Jacopo Gasparini.

Somaliland.—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 11° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of Kismayu) transferred from Kenya by Great Britain in 1925, is about 220,000 sq. miles, and the population is estimated at 500,000 to 700,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadisho, on the Indian Ocean.

Governor of Italian Somaliland, Cesare de Vecchi.

Tientsin.—Italy obtained in 1902 a concession of land fronting the Peiho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

The Dodecanese.—These 12 islands (occupied by Italy in 1912 during the war with Turkey) are Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Callimno, Liro, Patino, Cos, Simi, Calchi, and Lipso. The total population is about 100,000.

JAPAN.

(Nippon.)

Emperor, Yoshihito, K.G.; *born* Aug. 31, 1879; *succeeded* July 30, 1912; *accession ceremony*, Nov. 10, 1915; *mar.* Princess Sadako, May 10, 1900, and has issue 4 sons.

Heir Apparent (*and Regent* from Nov. 25, 1921), Prince Hirohito, G.C.B., G.C.V.O., *born* April 29, 1901; *married* (1924) Princess Nagako, daughter of Prince Kuniyoshi Kuni, and has issue a daughter.

CABINET (Sept. 1926).

Prime Minister, Reijiro Wakatsuki.
Minister of Foreign Affairs, Baron Kijuro Shidehara, K.B.E.
Minister for Home Affairs, Yuko Hamaguchi.
Minister of Finance, Chokuon Kataoka.
Marine, Admiral Hyo Tokarabe.
War, General Kazushige Ugaki.
Justice, Yoku Yegi.
Education, Ryohei Okada.
Commerce and Industry, Ikunosuke Fujisawa.
Agriculture and Forestry, Chuji Machida.
Communications, Kenzo Adachi.
Railways, Viscount Kyoshiro Inouye.

Ambassador in London, Baron Keishiro Matsui, G.C.V.O., 10 Grosvenor Square, W. 1.
Chancery of the Embassy, 37 Portman Square, W. 1.
Counsellor, Isaburo Yoshida, C.B., C.V.O.
1st Secretaries, Kensuche Horinouchi; Shu Tomii.
2nd Secretary, Kikuji Yonezawa.
Attachés, Shoichi Kanki; Katsumi Nihiro; Itsuo Goti; Nobuo Fujimura; Mizuo Narita; Nogao Kita; Ilchi Kishi; Tsuneo Hayama; Minoru Ishikawa.
Military Attaché, Maj.-Gen. Harushige Ninomiya.
Asst. Military Attaché, Capt. Tasuku Okada.
Naval Attaché, Capt. Teijiro Toyoda.
Asst. Naval Attaché, Comdr. Tadao Honda.
Financial Attaché, Kengo Mori.
Commercial Secretary, Shinjiro Matsuyama, 1 Broad Street Place, E.C. 2.
Chancellors (37 Portman Square, W. 1), Sokichi Sakurai; Kunikata Ishisuka; Tsuneo Hattori; Kuichi Yoshihara.
Consul-General (*London*), Mitsuo Sato (*acting*), 1, Broad Street Place, E.C. 2.
Consul (*Liverpool*), Yoshinari Sassa (*acting*).
" (*Glasgow*), A. Scott Younger.
" (*Middlesbrough*), Waynman Dixon.
" (*Cardiff*), E. H. Trimby.

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshu, Shikoku, Kiu-shu, Hokkaido or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo, but in diminishing numbers. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 260,783 square miles, with a population (June 1926) of 83,454,489. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-no-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, cornelian, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the Cryptomeria japonica, Pinus Massoniana, and Zelkowa Keaki; the Paulownia imperialis is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, teashrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, 346,000,000 bushels being consumed annually (in 1925 the home grown crop amounted to 296,163,000 bushels). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

Commerce and Industry.—The chief manufactures are silk and cotton woven goods, cotton yarn (197 cotton spinning mills were in operation in 1924), matches, paper, glass, lacquer ware, porcelain, earthenware, mats, matting, hemp-braids, knitted goods, vegetable oil, crude camphor, camphor oil, straw-plaits, and bronze, while shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa; indigo from Germany, British India and Dutch East Indies; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China, Kwantung Province, and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, knitted goods, copper, matches, coal, camphor, straw plaits, porcelain, earthenware, and marine products.

Communications.—There were 10,886 miles of railroad open in May, 1926, in addition to 1,690 miles open in Korea, 874 miles in Formosa and 136 in Saghalien, while the South Manchurian Railway in China (686 miles) is under Japanese control. The mercantile marine of Japan and her dependencies consisted in 1926 of steamers and motor vessels of 3,944,417 gross tons, in addition to small craft and wooden ships. The total tonnage entered and cleared at open ports in 1925 was 178,621,099 (93,605 vessels). The three great ports are Kobé, Yokohama and Osaka, the first named having a large transhipment trade, in addition to direct imports and

exports. In March, 1926, there were 8,705 post offices dealing with about 4,300,000,000 postal packets annually, and 165,034 miles of telegraph line carrying 67,912,895 messages outwards in the financial year 1925-26.

Defence.—Service in the *Army* is universal and compulsory between the ages of 20 and 40. The peace strength was reduced in 1925 to 200,000 all ranks, organized in 17 Divisions, of which 2 are stationed in Korea, and 1 in the Manchurian leased territory. The *Navy* includes 6 battleships, 4 battle cruisers, 2 large and 21 light cruisers, 3 aircraft carriers, 11 coast-defence ships, 94 destroyers and 64 submarines (Sept., 1926). Japan declared war against Germany on Aug. 23, 1914, and captured the German fortress of Tsingtau in November, 1914. Her fleet was active throughout the war, while her troops took part in the operations in Siberia.

Education is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokio (2), Kyoto, Tohoku (at Sendai), Hokkaido and Kyushu (at Fukuoka), and 5 medical universities.

Exports to U.K.	...	59,716,478

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with 3,994,236 inhabitants (1926). Imports, *Yen* 186,395,000; exports, *Yen* 263,215,000, in 1925. The colony has been self-supporting since 1906. Estimated rev. and exp. (1926-27), *Yen* 99,775,266. Capital, Taihoku; pop. (1922), 180,362.

Saghalin (Karafuto).—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of 9,824 sq. miles with a population (1925) of 203,504. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1926-27) *Yen* 18,791,079.

The *Kwantung Peninsula* (capital, Dairen, formerly Dalny), which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,220 sq. miles; population (1925) 944,254. Dairen provides Japan with a mainland port, ice-free all the year round, and the peninsula is fertile. Imports (1925), £13,608,000; exports, £22,543,000. Estimated revenue and expenditure (1926-27), *Yen* £14,997,515. Capital, Dairen; pop. (1923), 249,655.

The *Pescadores* (Bokoto) consists of about 63 islands, with a total area of 85 square miles, and a population of (1922) of 59,384.

Korea (Cho-sen).—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 85,156 square miles. Population estimated at 19,519,927 (Dec. 1925); there are 386,493 (Dec. 1922) Japanese in the country. The soil is fertile, but mountainous except in the river valleys. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, fish, livestock, cowhides, ginseng, wheat, barley, iron ores, and raw cotton. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is (1925) 1,690 miles. Estimated rev. and exp. (1926-27), *Yen* 192,825,754. Capital, Seoul (Keijo-fu); pop. (1922) 271,414.

Imports into Korea, 1925 ..... *Yen* 340,011,781
Exports from Korea, 1925 ..... „ 341,630,523

Pacific Islands.—Under the *Treaty of Versailles*, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German Pacific Islands N. of the Equator have been placed under Japanese mandate. These islands, in Micronesia, are the Pelew, Caroline, Marshall, and Ladrone groups, with a total area of about 800 sq. miles, and a population of 47,713 natives and 3,310 Japanese (1922).

CAPITAL OF THE JAPANESE EMPIRE, Tōkiō, formerly called Yedo, the residence of the Emperor; population estimated at 1,995,567 (Sept. 1925). On Sept. 1, 1923, a disastrous earthquake destroyed great portions of the cities of Tokio and Yokohama. The chief cities are—

Osaka	2,114,804	Kumamoto	147,174
Tokio	1,995,567	Fukuoka	146,000
Nagoya	768,548	Sapporo	145,065

KURDISTAN.

Sultan, Selim Effendi, *proclaimed* Feb. 1925.

Kurdistan is a mountainous district of Eastern Asia Minor, between Armenia (N.), Syria and Mesopotamia (S.), Persia (E.), and Turkish Anatolia (W.). The Kurds are a semi-nomadic tribe inhabiting the mountainous regions of Turkish Asia Minor and of N.W. Persia. They are believed to be the Karduchi of Xenophon's *Anabasis*, and for centuries they lived in quasi-independence, punctuated by raids and subsequent punitive expeditions. In 1920 the autonomy of Kurdistan was recognised by Turkey and Persia, and by the Supreme Council of the Allied Powers.

The area of the country is estimated at 65,000 to 70,000 square miles, with a population of 2 to 3 millions. The chief centres are Diarbekr, Bitlis, Van (to the east of Lake Van) in the former Turkish dominions, and Urmia (to the west of Lake Urmia) and Kermanshah, in the Persian dominions. *Lake Van* (2,000 sq. miles in extent) occupies the central portion of the former Vilayet of Van; *Lake Urmia* (1,600 sq. miles in extent), across the Persian border, is about 4,000 feet above sea level, and its waters are so salt that fish cannot live therein.

The climate is severe, with a short hot summer and long and severe winter; but cereals, vines and fruit are abundantly cultivated on the slopes of the mountains; rice is grown in the hot, well-watered plains, while the rich pasture-lands of the slopes and valleys support large herds of horses, mules and sheep. The mineral wealth of the country is almost entirely undeveloped, but it is believed to be very great, and there are numerous hot and cold mineral springs; salt is obtained in large quantities in the neighbourhood of Lake Van.

The Kurds are Muhammadans and fierce persecutors of the Christians in their districts and in the neighbouring territory of Armenia.

LATVIA.
(Republika Latvija.)

President, Jahnis Tschakste, *assumed office* Nov. 14, 1922.
Premier, Artur Alberings.
Minister of Foreign Affairs, Karlis Ulmanis.

Envoy Extraordinary and Minister Plenipotentiary in London, Monsieur F. Vesmans, 87 Eaton Place, S.W. 1.
Sec. of Legation, Karlis Students.
Consul-General, Ed. Birins, 329 High Holborn, W.C. 1.
Vice-Consul, Charles E. Jumutz.

A Baltic Republic at the eastern and southern shore of the Gulf of Riga, formerly part of the Russian Empire. Latvia was proclaimed an independent state on Nov. 18, 1918. Its frontiers are common with Esthonia, Russia, Poland and Lithuania. The constitution is that of a democratic republic, with universal suffrage and proportional representation. Parliament (*Saeima*) consists of a single chamber of 100 members. The area being about 41,000 sq. miles, with a population of about 2,000,000.

The surface of the country is generally flat with marshy areas, interspersed with many lakes. Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries. The fisheries are also of importance. The chief exports are flax, timber, butter, paper and glass; chief imports are agricultural machinery and implements and wood and metal machinery. The tonnage of ships entered in 1925 was 1,443,682 tons. The chief ports are Riga, Libau and Windau. In 1925 there were 1,602 miles of railway in operation.

Consul, Glasgow, John Dallas.
Consul, Cardiff, A J. Bovey.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S.E., and Mano, N.W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50′, a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,500,000 to 2,000,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, plassava, palm-oil, coffee, cocoa, ivory, kola nuts and rubber. The chief imports are rice, tobacco, Manchester goods, provisions, spirits, salt, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for six years, and the House of Representatives with fifteen members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under native officers. The control of the customs is in the hands of a General Receiver (who is also Financial Adviser) lent by the Government of the U.S.A. There are 10 ports of entry along the 350 miles of coast and 12 interior ports. In 1924, 734 vessels (1,642,941 net tons) entered and cleared at all ports; of these 217 (606,002 net tons) were British.

LIECHTENSTEIN.

(Fürstentum Liechtenstein.)

Prince, Johann II., *b.* Oct. 5, 1840; *suc.* Nov. 12, 1858.
Administrator, Gustav Schädler (*appointed* June 9, 1922).

A Principality on the Upper Rhine, between the Austrian province of Vorarlberg and Switzerland; area 59·61 square miles, pop. (1921) 11,500. The main industries are agriculture (chief products being corn, cattle, wine and turf) and textiles. Revenue (1925), 602,254 *Swiss francs*; expenditure 533,352 *Swiss francs*; debt 1,349,875 *Swiss francs*.

CAPITAL, Vaduz. Pop. 1,400.

LITHUANIA.

(Lietuva.)

President, Dr. K. Grinius, *assumed office* June 7, 1926.
Premier, M. Slezevicius.
Foreign Affairs, M. Slezevicius (*ad interim.*)

Minister in London, Dr. Ernest Galvanauskas.
Legation, 10 Palace Gate, W.8.
Secretary, V. K. Rackauskas.
Consul, K. Gineitis.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb. 16, 1918. The Republic consists of the former Russian Government of Kovno and portions of the Suvalki and Vilna Governments, and is bounded on the N. by Latvia, on the S. by the German district of Königsberg and Poland, on the E. by Poland, and on the W. by the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of 2,000,000 Memel Territory was occupied by Lithuania in Jan. 1923, and negotiations as to its final status took place between the Lithuanian Government and the Conference of Ambassadors. An agreement was not arrived at and the Conference referred the question to the League of Nations. A committee appointed by the League drew up a Convention which has been signed by the four Great Powers and by Lithuania. Lithuania ratified the Convention in Aug. 1924, and similar action by the other signatories is expected.

The legislature consists of a single chamber Assembly (*Seim*) of 85 members (5 from Memel Territory) elected by universal adult suffrage, the Executive being entrusted to a council of ministers. A new currency was issued in Oct. 1922 to supersede the depreciated German *mark*. 1 *Lit* of 100 *cents* = one tenth U.S. gold $. Rate of exchange (Aug. 1926) *lits* 49·20 = £1.

Memel.—Under the *Treaty of Versailles* Germany renounced the sovereignty over the town

and territory of Memel, and a French High Commissioner, with a small garrison, governed the Territory in the name of the Allies until Jan. 1923, when the Territory was invaded and occupied by the Lithuanians. The sovereignty of the Territory has been transferred to Lithuania, as set out in the Convention signed at Paris (May 8, 1924) and ratified Aug. 1925. The total area administered is 945 square miles, with a population of about 150,000, of whom about 42,000 inhabit the town of Memel.

	1925.
Revenue..... *Lits*	258,625,300
Expenditure	254,837,100
Imports	252,702,800
Exports	242,714,800
Imports from U.K.	20,917,400
Exports to U.K.	58,607,300

CAPITAL, Kovno (Kaunas), on the Niemen (pop. 57,000), other centres being Memel (Klaipeka) on the Baltic (50,000), and Shavli (15,000).

FLAG: Three horizontal bands, yellow, red, green.

BRITISH LEGATION.

British Envoy Extraordinary and Minister Plenipotentiary to Latvia, Lithuania and Estonia, Sir John Charles Tudor Vaughan, K.C.M.G., M.V.O., (1922).
1st Secretary, (vacant).
2nd do. E. H. Carr, C.B.E.
Naval Attaché, Capt. G. S. F. Nash, D.S.O., R.N.
Military Attaché, Major H.W. C. Lloyd, D.S.O.

BRITISH CONSULAR OFFICES.

Memel—Consul, Raleigh Le May.
Transit, 2 days.

LUXEMBURG.

(Grand-Duché de Luxembourg.)

Grand Duchess, H.R.H. Charlotte, *born* Jan. 23, 1896, *succeeded* (on the abdication of her sister) Jan. 9, 1919; *married*, Nov. 6, 1919, Prince Felix of Bourbon-Parma. *Heir Apparent*, Prince Jean, *born* Jan. 5, 1921.
Minister of State, Joseph Beck.
Chargé d'Affaires in London, M. A. B. Pescatore, 7 Tavistock Place, W.C. 1.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815–66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918, U.S troops entering the capital on Nov. 22. By the *Treaty of Versailles*, 1919, the country is declared to be free from all ties with Germany. The area is 999 square miles; the population (1916) 263,824, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1924 was estimated at 102,674,000 francs, expenditure 104,345,700 francs; debt (Jan. 1, 1921) 128,000,000 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 45,676), is a dismantled fortress.

FLAG: Red, white, blue.

British Envoy, Rt. Hon. Sir G. D. Grahame, G.C.V.O., K.C.M.G. (1922) (*Brussels*).
Consul-General, Arthur L. Rowley (*Antwerp*).
Luxemburg—Consul, N. le Gallais.
,, *Pro-Consul*, Victor Etienne.

MEXICO.

(Estados Unidos Mexicanos.)

President (1924–28), General Plutarco Elías Calles, *elected* July 6, 1924, *assumed office* Dec. 1, 1924.

CABINET.

Minister of the Interior, Adalberto Tejeda.
Foreign Affairs, Aaron Saenz.
Finance, Alberto J. Pani.
Communications, Ramon Ross.
Industry Commerce and Labour, Luis Morones.
Agriculture, Luis G. León.
War, General Joaquin Amaro.
Education, Dr. J. M. Puig Casauranc.

Minister in London, Señor Don Gilberto Valenzuela, 48 Belgrave Square, S.W. 1.
Consul-General in London, Señor Don E. A. Gonzalez, Bush House, Aldwych, W.C 2.
Liverpool—Consul, Señor Don M. de la Peña.
Glasgow—Consul, Señor Don R. Almanza.

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15 to 32° 30' N. lat. and 87 to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 768,883 square miles, with a population of (1910) 15,063,207.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepete on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 5,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala*, some 50 miles in length, and *Patzcuaro* and *Xochimilco*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or *Toltecs*, gave place in the 13th century to the *Aztecs*,

who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes.** Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810–1821. From 1837–1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1810 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the death of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents is *Porfirio Diaz*, who ruled (except during 1880–4) from 1876 to May 25, 1911. Since the fall of Diaz internal disturbances, in which eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On July 15, 1914, Venustiano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fall of Carranza the executive power was assumed by de la Huerta as provisional President, and on Dec. 1, 1920, General Obregon, whose *coup d'état* had caused the downfall of Carranza, became head of the Republic. The determination of the new government to uphold the Carranza constitution of 1917, which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the rights of foreigners, caused the British, American, French and Belgian governments to adopt a policy of non-recognition of the Obregon administration. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, has called forth strong protests from foreign Powers, but all the Powers except Great Britain eventually recognised the Obregon administration.

Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific; and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 15,804 miles of railroad open on Sept. 16, 1912, and 40,687 miles of telegraph. The railroads have in a large measure been built by American and English companies.

The principal agricultural crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent. consist of silver and gold; sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dyestuffs, sugar, and drugs ranking next in importance.

The monetary system has recently been placed on a gold basis, with a gold *peso*=50 cents U.S. currency. In Sept. 1922, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold *pesos* in 1923, rising by 5 million gold *pesos* annually to 50 million gold *pesos* in 1927. The total of the debt in Sept. 1922, was stated at 508,830,300 gold *pesos* (= $254,415,150 U.S.) of which about one-half was raised for railroad purposes.

The language of the country is Spanish.

Estimated revenue	(1922)	$216,000,000
Estimated expenditure		327,000,000
Total Exports	(1922–3)	$306,700,000

MOROCCO.

(Moghreb el aksa.)

French and Spanish Protectorates and International Zone of Tangier.

Sultan, Mulai Yusef, G.C.M.G., *born* 1882; *proclaimed* Aug. 18, 1912.

Morocco, the largest of the Barbary States, is situate in the north-west of the African Continent, between 27°-36° N. lat. and 1°-11° 40′ W. long, with a total area estimated at 314,000 square miles, and a population of about 7,000,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsular of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghir, which encloses a bay containing the port of Agadir formerly known as the "Gate of the Sudan."

The climate is generally good and undoubtedly healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from October to May. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.—France is the paramount power, and represents the Sultan of Morocco in all foreign relationships, but the country is divided into three zones—the *French Zone*, the *Spanish Zone*, and the *International Tangier Zone*. Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence." In this Spanish zone (which extended over the whole of Northern Morocco, with the exception of the International zone round Tangier) there were tribal risings in 1921, and during the operations to quell these risings the Spanish Expeditionary force met with serious reverses in the neighbourhood of Melilla. A Civil High Commissioner was appointed in 1922 over the Spanish zone to inaugurate a policy of pacification. In 1924 the military forces of Spain met with further reverses, and were withdrawn to a line running west from Rio Martin (on the Mediterranean) to within fifteen miles of the Atlantic Coast, and thence southwards to the French zone, near Alcazar el Kebir. In 1925 the French became embroiled and a considerable force was despatched from Algeria and France to strengthen the French Army in Morocco. In spite of the fact that he was fighting two European powers, however, Abd el Krim, the Riff leader, achieved such success as to be able to threaten the safety of Fez itself in July. But the danger was averted and after an anxious summer the autumn brought relief. The French and Spanish in conference in Madrid realised that their best chance of success lay in close co-operation, and the effect of this new policy soon made itself felt. In September the Spaniards landed at Alhucemas Bay and forced Abd el Krim to evacuate his headquarters at Ajdir. Simultaneously the French by pressure from the South were able to make progress which, if less spectacular, was of no less solid a nature, and by the time the rainy season forced a retirement to winter quarters the tide was definitely on the turn. In the Spring of 1926, following an abortive peace conference at Oujda, the French and Spaniards launched their final attack. By May 24 the Riff had been effectively crossed and Abd el Krim's headquarters at Targuist occupied, and on May 27 the Riff leader surrendered himself to the French. This was the signal for the general break away of the tribes. The French virtually

restored peace in their zone and the Spaniards commenced a general movement for enforcing submission and disarmament in theirs. On August 10 they reoccupied Sheshawen and the autumn found them still pursuing their arduous task. *Ceuta* (on the Mediterranean coast, opposite Gibraltar), in 35° 54′ N. lat. and 5° 18′ W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the adjacent Alhucema and Zaffarin islands are Spanish possessions. A special international *régime* was designed for *Tangier* before the War by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this *régime* from being put into operation. A new Convention instituting the *International Zone* of Tangier was, however, signed by the three governments at Paris on Dec. 18, 1923, and was brought into force on June 1, 1925. Belgium, The Netherlands, Portugal and Sweden subsequently adhered, but the United States and Italy have not yet (Oct. 1926) done so; these two powers therefore retain their Capitulatory rights in the New Zone. The New Convention provides for a complete international administration of the zone, except as regards native affairs, which are reserved to the Shereefian authority.

Production, Industry, etc.—Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenugreek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges and dates, the latter growing also on the southern slopes and in the plains. The live stock includes large quantities of horses, cattle, sheep and goats, while the poultry and egg industry is of increasing importance. Antimony, iron, coal, copper, lead and tin (the last three in considerable quantities) are known to exist, and gold and silver are also found. Rock salt, brine, and phosphates are exported in large quantities. The trade of Morocco is chiefly with France and Algeria, Great Britain, Italy and Spain, the chief imports being cottons, sugar and soft goods, the exports being grain, eggs, hides and skins, and wool. The unit of currency in the French protectorate is the franc, while in the Tangier zones the franc, the Spanish and the *Hassani peseta* are all current, and in the Spanish zone the two last of these currencies.

Communications.—The French Protectorate authorities are now engaged in the serious development of normal gauge railways in their zone, and by the end of 1926 it is expected that 1,167 kilometres of railway, connecting all the principal centres, will be in working order. The Franco-Spanish Treaty provides for the line between Tangier and Fez, and the portions of this line in the French and International zones are already laid, part (French) being open to traffic. In the Spanish zone the portion between Laraiche and Alcazar is open and it only remains for the concluding portion of the line in the Spanish zone to be completed for the whole journey from Tangier to Fez to be possible by rail. Telegraphic communication is established by submarine cables from Tangier to Cadiz, Gibraltar, Rio Martin, Melilla, Tarifa and Oran, and there are wireless stations at Tangier, Tetuan (military), Rabat, and Casablanca; inland lines have been built by the French to Fez and to some of the ports, as well as to the borders of the Spanish zone, and the latter line is to be extended to Tangier. The chief roads in the Tangier and Spanish zones are those linking Tangier to Ceuta *viâ* Tetuan in the North, and to Arzila, Laraiche, and the French zone in the South. The French zone is well equipped with good main roads radiating from Casablanca. *Air Services* are maintained between Casablanca and Toulouse (daily), Casablanca and Oran (twice weekly), and Casablanca and Dakar (weekly).

The principal *Harbours* are Casablanca, Rio Martin (for Tetuan), Tangier, Laraiche, Rabat, Mazagan, Saffi, Kenitra, and Mogador. In 1925, Casablanca, the chief port of Morocco, handled 297,910 tons of Imports and 837,774 tons of Exports, valued respectively at 725,969,652 francs and 302,298,825 francs. A considerable Import and Export trade for the French zone is also done *viâ* the Algerian frontier.

CAPITAL of French zone, Rabat, population 31,000 (Fez in the North, and Marrakesh in the South being the old capitals of the Sultans).

CAPITAL of Spanish zone, Tetuan, population 30,000 (principal ports, Laraiche and Rio Martin, for Tetuan).

CAPITAL of International zone, Tangier, population 45,000.

Other towns (with populations exclusive of French army of occupation) are Marrakesh or Morocco (139,874), Mequinez (36,662), Sallee (24,202), Casablanca (101,690), Mazagan (21,495), and Saffi (26,396).

Director of the Chancery, H. N. Brouwer, 3 Atney Road, Putney, S.W. 15.
Commercial Attaché, F. B. s' Jacob.
Consul-Gen., D. J. Steyn Parvé, 28 Langham Street, W. 1.
Consul, Dr. H. G. von Oven.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46′–53° 34′ N. and long. 3° 22′–7° 14′ E., consisting of 11 provinces, and containing a total area of 12,761 square miles, with a population in August, 1923, of 7,212,739. The majority, about three-fifths, belong to the several Reformed Churches; and the remainder are Roman Catholics, with about 107,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, chemical and pharmaceutical products, matches, perfumery, sugar, bicycles, boots and shoes, starch, potato flour, engines, metal substances, iron and steel, works of art in gold and silver, incandescent lamps, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—The total extent of canals is about 1,250 miles. There were 2,090 miles of railroad open in 1924, and 5,620 miles of telegraph line. The mercantile marine, on Jan. 1, 1925, consisted of 575 steam and motor vessels and 173 sailing vessels, &c. In 1924, 15,234 vessels (20 511,000 tons) entered, and 13,349 vessels (16,526,000 tons) cleared at the various ports. An Act for the damming and draining of the Zuyder Zee was passed in 1918, and work is now in progress.

Defence.—The Home Forces consist of a conscript army, with an annual levy of 19,500 men, producing a first-line army of 270,000, or (including reserves) 350,000 all ranks. The Royal Navy consisted, on July 1, 1925, of 84 ships (4 of them ironclads, and 2 protected cruisers).

Education.—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial, Wageningen (agriculture), and Utrecht (veterinary).

NETHERLANDS COLONIES.

TOTAL AREA, 832,473 square miles.
POPULATION (1920), 49,514,038.

The possessions of the Kingdom of the Netherlands in the EAST INDIES (Administrative Capital *Batavia*, pop., 1920, 253,818) are very considerable, comprising the whole of the SUNDA ISLANDS and MOLUCCAS: *Sumatra* (area, 162,000 sq. miles), *Java* and *Madura* (51,000 sq. miles), *Netherlands Borneo* (200,000 sq. miles), *Celebes Island* (72,000 sq. miles), *Moluccas* (44,000 sq. miles), *Timor Islands* (18,000 sq. miles); with the exception of a portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA. JAVA and MADURA have a population (1920) of 34,984,171, and furnish sugar, tobacco, tea, coffee, tin, and other products for exportation. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There was (1923) a colonial army of 1,260 officers and 32,129 men. The colonial revenue for 1927 was estimated at fl. 661,390,000 and the expenditure at fl. 713,555,000. The exports amounted in 1924 for Java, Madura, and the other outlying islands, to 1,557,308,000 florins, while the imports for the same year amounted to 706,466,000 florins.

In South America the colony of SURINAM, or Netherlands Guiana (imports, 1924, 7,496,453 guilders; exports, 7,409,442 guilders), embraces 49,845 square miles and contains (1924) 112,818 inhabitants; and in the West Indies, CURAÇAO (imports, 1924, 51,189,100 guilders; exports, 32,179,265 guilders; population, 35,083) and five other small islands belong to the Netherlands, having an area of 436 square miles, with a population of 21,288.

Trade of Java with U.K.

Exports to U.K.	£8,865,727	£9,440,969
Imports from U.K.	6,884,685	8,408,237

NICARAGUA.

(República de Nicaragua.)

President, Señor Dr. Adolfo Díaz, *assumed office* Nov. 14, 1926.

Minister in London, Señor Don Eduardo Perez-Triana, 90 Holland Park, W.11.

° President Solorzano was deposed by a pacific revolution on Oct. 25, 1925, headed by Gen. Chamorro, who then led a *de facto* government. This government was not recognised by the Central American Republics which signed a Treaty (Feb. 1923) violated by this revolution; nor was it recognised by the U.S. Government, a moral guarantor of the Treaty. Great Britain, likewise, did not recognise the government.

Consul in London, Señor Saturnino Gomez, 16 Wormwood Street, E.C. 2.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45′—15° N. lat. and 83° 40′—87° 38′ W. long., containing an area of 51,660 English square miles and a population (census of 1920) of 638,119, of whom about three-quarters are mixed blood and the rest Indians, including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution rests on the fundamental law of Nov. 10, 1911 (amended 1913) and is that of a centralised republic. The President is elected by direct suffrage for four years.

The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beans, cocoa, hides, gold and silver. Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports.

There are 146 miles of railway, 2,500 miles of telegraph and 1,240 miles of telephone, and a powerful wireless station was completed at Managua in 1924. Good roads are very few, and transportation, especially in the rainy season (May-Nov.), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 75 per cent. of the total trade. Bluefields is an important port on the Atlantic coast, whence considerable quantities of bananas and timber are shipped to New Orleans. Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population.

Education is backward, at least 50 per cent. of the population being illiterate.

The official language of the country is Spanish.

Commercial Counsellor, C. F. Smith.
Agricultural Adviser, A. Riple.
Consul-General, G. K. Conradi, 36 King St., E.C. 2.
Vice-Consul, Th. V. Aass.

Norway, an independent kingdom, founded in 872 (fundamental law of May 17, 1814), was united with Sweden under the same King from Nov. 4, 1814, to June 7, 1905, when the union was dissolved. The Parliament of 150 members is called the "Storthing," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or fylker, and comprises an area of 124,130 sq. miles with a population (1925) of 2,772,414. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country ; forests cover nearly one-fourth ; the rest consists of highland pastures or uninhabitable mountains.

Agriculture gives employment to a large part of the population but is unable to furnish sufficient produce for home consumption ; hence it has been necessary to import considerable quantities of corn, meat, and pork. Fishing and forestry are important industries and manufactures are aided by great resources of water power, calculated at 12 to 13 millions of horse power, of which about 10 to 11 per cent. are utilized. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of fish, oil, and other products of the fisheries, timber, matches, pulp, paper, skins and furs, nails, minerals, stone, ice, calcium carbide, condensed milk, butter, margarine, tinned goods, aluminium, zinc, ferro-alloys, saltpetre, &c.

Defence.—Service in the National Militia is universal and compulsory. The peace strength is about 20,000 all ranks, and the war effective is about 300,000 of all ranks. In time of war all males between the ages of 18 and 55 are liable for service. The Navy consists of 4 ironclads, 29 torpedo-boats, 1 gunboat, 3 destroyers, 8 submarines, and several minelayers.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo was attended in 1925 by 3,000 students.

Communications.—The total length of railways open in 1925 was 2,240 miles, of which 271 miles were private lines. The length of telegraphs and telephones belonging to the State in June, 1925, was 18,130 miles. The mercantile marine, Jan. 1, 1926, consisted of 3,698 vessels, of 1,661,000 net tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1924 to about 543,000,000 *kroner*.

Budget, 1925–26.	*Kroner.*

SVALBARD.

(*Spitsbergen and Bear Island.*)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen Archipelago was recognised by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway.

The Spitsbergen ("Pointed Mountain") Archipelago lies between 74°-81° N. lat. and between 10°-35° E. long., with an estimated area of 25,000 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the main land by Olga Strait; Barents and Edge Islands, separated from the main land by Stort Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group.

The principal mineral is coal. In 1924 the coal export was about 440,000 tons. The wintering force in 1923-24 was about 1,200 strong; the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 370 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harbour (the postal station, with a high-power Telefunken wireless station) 2½ to 3 days; from Aberdeen 5 to 6 days.

PANAMA.

(Republica de Panama.)

President (1924-1928), Rodolfo Chiari, *assumed office* Oct. 19, 1924.

MINISTRY (Oct. 1, 1924.)

Secretary of Government and Minister of Justice, Señor Carlos L. Lopez.
Foreign Affairs, Señor Horacio F. Alfaro.
Finance, Dr. Eusebio A. Morales.
Public Instruction, Señor Octavio Mendez Pereira.
Public Works (*Fomento*), Señor Tomas Gabriel Duque.

Minister in London, Señor Dr. Don Belisario Porras. *Legation*, 41 St. Mary Axe, E.C.3.
Consul in London, Don Demetrio Porras, 232 Finsbury Pavement House, E.C. 2.
Vice-Consul, Senor C. J. Dunbar MacConnell.
Consul-General, Liverpool, Señor J. Luis Hernández.
Consul in Birmingham, S. Sauri.

Panama, formerly one of the nine Departments of Colombia, revolted in Nov. 1903, and established a separate Government. The area of the Republic is 31,890 square miles, the population 442,486 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one half of the land is unoccupied. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the two oceans.

	1922-23.	1923-24.
Revenue	£1,100,783	£2,039,842
Expenditure	1,257,426	2,513,635
	1923.	1924.
Imports	£2,534,875	£2,497,384

PAPACY, The.

Sovereign Pontiff (260th), His Holiness Pope Pius XI. (Achille Ratti), *born* at Desio, March 31, 1857, *elected* Pope (in succession to Benedict XV.) Feb. 6, 1922.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the Sovereign Pontiff of the Western Church, and claims temporal power over the Papal States which were incorporated with Italy from 1860 to 1870, the territory of the Papacy now being confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, which are guaranteed to the Pope (with a yearly indemnity of 3,250,000 lire, which is neither claimed nor paid) by the Italian Government.

British Envoy Extraordinary & Minister Plenipotentiary, Hon. Sir Odo Russell, K.C.M.G., K.C.V.O., C.B. (1922). (Via San Nicola de Tolentino 67, Rome 5.)
2nd Secretary, A. W. G. Randall, O.B.E.
Attaché, R. Thynne.

PARAGUAY.

(República del Paraguay.)

President (1924–28), Dr. Eligio Ayala.
Foreign Affairs, Dr. Enrique Bordenave.
Finance, Dr. Manuel Benitez.
Justice and Instruction, Dr. Adolfo Aponte.
War and Marine, Dr. Luiz A. Riart.
Interior, Señor Belisario Rivarola.

Minister in London, (vacant).
Chargé d'Affaires and Consul-General in London, Dr. Venancio B. Galeano, 14 Chiswell House, Finsbury Pavement.

An inland State of South America, situate between 20°—6' 30' S. lat. and 54°—62° W. long. The area of Paraguay (exclusive of the Chaco) is computed at 61,600 square miles, and it contains a population of about 700,000.

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814–1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840–1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the *Battle of Cerro Corá*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men. The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in the case of the death, expulsion or absence of the President. There is a Cabinet of 5 members.

Paraguay proper consists of a series of plateaus, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asuncion; but is liable to shrink unduly with drought. The plateaus are covered with grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense and valuable forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless, is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Brazil, forms the subject of a long standing dispute with Bolivia; it is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

The chief agricultural products are tobacco, oranges and cassava (manioc), maize, rice, sugar-cane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, cotton and tobacco growing, and the gathering of *Yerba* (Paraguay tea), are the principal industries. The chief articles of export are hides, timber, yerba maté, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 2,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (985 miles) occupies 53 hours. Train ferries enable the run to be accomplished without break of bulk. The language is Spanish.

	1923-4.	1925-6.
Revenue (Estimate)	£665,426	£1,067,414
Expenditure (do.)	665,390	1,067,180

PERSIA.

(Mamâlik-i-mahrousseh-i-irân.)

Shah of Persia, H.H. Reza Shah Pahlevi, *appointed* Oct. 31, 1925; *crowned Shah*, April 25, 1926.

CABINET (July, 1926).

Prime Minister, Mirza Hassan Khan Mustofi.
Minister for Foreign Affairs, Mirza Ali Quli Khan Ansâri.
Finance, Mirza Hassan Khan Esfandiari
War, Mirza Mohamad Ali Khan Froughi
Interior, Mahmoud Khan Alamir.
Justice, Mirza Hassan Khan Wossough.
Education and Health, Mirza Ahmad Khan Bader.
Posts and Telegraphs, Mirza Ahmad Khan Atabegi.
Public Works, Mehdi Quli Khan Hidayat.

Envoy Extraordinary and Minister Plenipotentiary in London (vacant).
Legation, 47 Bramham Gardens, S.W. 5. [Kensington 3341.]
Chargé d'Affaires (*ad interim*), Prince Nader-Mirza Arasteh (*Counsellor of Legation*).
Secretary, Gholam Ali Khan Ardalani.
Financial Adviser, Mirza Essa Khan.
Consul-General in London (vacant).
Consul, Morteza Gazvini, 4 Broad Street Place, E.C. 2. [London Wall 4488.]

Persia—called by the natives Irân—comprises an area of 630,000 sq. miles, with a population estimated at 10,000,000.

* This does not include Paper Currency in circulation ($176,756,060—about £830,000), which is guaranteed by a gold backing of nearly 50 per cent.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. There are 98 miles of railway open, and travelling is mostly by caravans, and transport by pack-animals, but motor transport of passengers and goods on the road between Tehran-Khanikin, Tehran-Pahlevi (Enzeli), and to a lesser extent Tehran-Bushire, has made great progress during the past few years, while the German Junker Company has recently secured a contract for the carriage of mails and passengers by aeroplane between Tehran-Khanikin, Tehran-Pahlevi (Enzeli) and Tehran-Bushire. An option for the construction of a railway from Khanikin to Tehran *vid* Kermanshah and Hamadan (with a branch to Enzeli on the Caspian) was granted in 1920 to the Persian Railways Syndicate.

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The Persians are mostly Shiah Muhammadans; but there are many adherents of Babiism (an eclectic form of Deistic religions), and Armenian Christians. The laws and popular education are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. He was succeeded in 1907 by his son Muhammed Ali Shah who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nasr-ul-Mulk, until 1914). As a result of the energy of Prime Minister H.H. Reza Khan the authority of the Persian Government was re-established over almost the whole of Persia by means of a disciplined army of 8,000 cavalry and 22,000 infantry, with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars. On Oct. 31, 1925, the Shah Ahmed Mirza, who had been absent from the country for some time, was deposed by the National Assembly which handed over the government to the Prime Minister.

The revenue is derived from land tax, Crown lands, customs, opium and salt, while the recently enacted law concerning a sugar and tea monopoly is calculated to bring in over £1,000,000 annually, and this sum is being earmarked for the construction of railways. British commercial interests in Persia much exceed those of any other country, the trade between the British Empire (including India and Mesopotamia) and Persia amounting to more than 53 per cent. of the total trade of the country.

In 1924-25 the leading imports into Persia were cotton fabrics, sugar, iron and steel goods and tea; the principal exports were heavy oils, benzine, petrol, carpets, opium, fruits, cotton and rice.

	1924-25.
Revenue	£5,654,739
Debt (Sept. 21, 1925)	2,338,882
Imports (1925-26)	22,000,000
Exports (1925-26)	26,150,000
Imports from U.K. (1924-25)	10,600,000
Exports to U.K. (1924-25)	10,786,000

Foreign Relations.—By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests.

In March, 1921, Persia signed a treaty with the Russian *Soviet* Republic, which provides (*inter alia*) for mutual diplomatic and consular representation, restores to Persia Firuzeh and Ashurada, annuls all concessions previously granted to Russians in Persia, hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia, denounces all previous Russo-Persian treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia.

In 1922 the Persian Government engaged a number of American advisers (under Dr. Mills Paugh) for the supervision and direction of the country's finances. Considerable strides have been made by the country under this new régime, a balanced budget and a programme for gradual development of the country's resources having been evolved.

CAPITAL, Tehran (pop. 210,000); other large towns are Tabriz (180,000), Ispahan (80,000) Meshed (80,000), Kerman (50,000), Yezd (60,000), and Shiraz (60,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Vice-Consul, Señor Don Gerardo Varges.
Con.-Gen. at Liverpool, Señor Don G. Leguia.
Consul, Glasgow, Señor Don Jorge Rivera Schreiber.
Do., Cardiff, Señor Don Juan de Aliaga.

Peru is a maritime Republic of South America, situated between 1° 31′ 29″ and 19° 13′ S. latitude and between 69° and 81° 19′ W. The territory between 17° 47′ S. and 19° 13′ S. is occupied by Chile, as the result of the Pacific War of 1879–1882. The area of the Republic is estimated at 352,000 square miles, and the population (1921) at 5,550,000. It is bounded on the north by Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under the Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic under a newly drawn constitution of 1919. The President is elected for five years by direct vote of the people.

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being *Huascaran* (22,050 feet), *Huandoy* (21,100 feet), *Arequipa* (or Misti) volcano (20,013 feet), *Hualcan* (20,000 feet), and *Lirima*, *Tocora*, and *Sarasara*, all over 19,000 feet. There are four distinct regions, the *costa*, west of the Andes, the *sierra* or western slopes of the Andes, the *punas* or mountainous wastes below the region of perpetual snow; and the inward slopes (*montaña*) and boundless forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the equator, being cooled by the Humboldt-Current; its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased; it is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising, at present almost wholly unexplored owing to lack of communication. This part of the country should show most interesting developments in the future. The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. There are here dense jungles, of which the principal commercial product is wild rubber. The gold production in 1923 was valued at £564,598, and in 1922 at £412,399. The Lobos and other islands on the Pacific coast provide guano.

The principal imports are coal, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are cane sugar, cotton, petroleum and copper. In 1925 the U.S.A. sent 39 per cent. of the imports and took 34 per cent. of the exports, while the U.K. sent 18 per cent. and took 23 per cent.

The total length of the railways open (1924) was about 2,067 miles, of which 1,084 miles are under

the control of the Peruvian Corporation. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 8,000 of all ranks; the Navy (now under the direction of a United States Mission) includes 2 cruisers built at Barrow, a destroyer bought from the French Government, and 2 submarines built in U.S.A. There is a military aerodrome at Chorillos (near Lima) and a seaplane station at Ancón.

Language.—Spanish is the official language of the country, but native dialects (of which Quichua is the most important) are spoken by a considerable portion of the Indian population.

Commercial Attaché, A. Poklewski-Koziell.
Vice-Consul, Dr. A. Kruczkiewicz.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the *Treaty of Versailles* (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic, which is reconstituted within the limits of the 18th-century "Polish Commonwealth." This state extended in the year 1772 over an area of 740,000 sq. kilometres, and included a population of about 13,000,000. The political neighbours of the Republic are the Baltic Sea, the German Republic (Prussian Königsberg District), and the Republic of Lithuania, in the N.; the Republic of Czecho-Slovakia in the S.; the Kingdom of Rumania in the S.E.; Soviet Russia in the E.; and Germany in the W. The present area of the Republic may be estimated at 386,273 sq. kilometres, with a population, at the 1921 census, of 27,160,000 (of whom 18,660,000 are Poles, and 8,500,000 other nationalities). The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign. Poland was enabled to conclude peace on favourable terms, and claimed the renunciation by the Soviet at Moscow of about 110,000 sq. kilometres, containing a population of about 3,610,000 (1,048,000 Poles).

Government.—A Republican form of government was adopted by the Constituent Assembly in 1919, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. The Legislature consists of a Diet (*Sejm*) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age. The Constitution voted on March 17, 1921, is very Liberal. Since Marshal Pilsudski's *coup d'état* of May 12, 1926, amendments have been inserted in the Constitution conferring on the President of the Republic the power of legislation by decree at times when the Diet is not sitting.

Production.—Mining, cotton, metal work, agriculture, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar-beet; the live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland

* Peruvian £125 = (Sept. 1926) £100: at par £1 = £1.

(Galicia); zinc, lead ore, mineral and potassium salts, and in Galicia (Boryslaw) are famous oil fields; the output of crude oil (1925) was 647,843 metric tons. The chief manufactures are textiles, those of minor importance being machinery and metal works, chemicals, and leather. The exports in former years were principally agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

Defence.—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, has been organized.

Education.—Education is compulsory and free, and there is considerable voluntary effort in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at Cracow (founded 1364), Warsaw, Lwow, Poznan, Lublin, and Wilno; Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow.

Communications.—There are about 10,000 miles of railway and over 25,000 miles of telegraph line, with well-developed telephone systems in all the large centres. Over 4,000 miles of navigable waterways exist on the Vistula, Narew, Bug, Warta, and Pilica, of which about 1,100 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed.

Commercial Counsellor and Consul-General (*London*), Senhor Joaquim Pedrosa, 40, Woburn Sq., W.C. 1.

Portugal lies in 37°—42° 8′ N. lat. and 6° 15′—9° 30′ W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 35,500 square miles, with a population in 1920 of 6,399,355, and the Portuguese Colonies a total area of 804,841 square miles, with a population estimated at 9,675,000. The Azores and Madeira are regarded, not as colonies, but as a part of continental Portugal. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, vines, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1917) numbered 104 steam and 202 sailing vessels, with a tonnage of 122,736. In 1920, 9,909 steam and sailing vessels, of 16,101,695 tons, entered the ports of the Republic. Railways 1,827 miles in extent were open for traffic in 1917, and there were 5,351 miles of telegraph line in 1917. For many years the national income was considerably less than the expenditure; this deficiency has added to the national debt.

Defence.—Service in the militia is universal and compulsory. The peace effective is about 32,000. War strength, about 150,000. The Navy consists of a few small ships of old pattern.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and over 75 per cent. of the population above 7 years old are illiterate. Secondary education is conducted in State lyceums. There are also military, naval and other special schools

The University of Coimbra (founded A.D. 1291) had 1,100 matriculated students in 1910.

	1925-26.
Revenue (estimate)	*$1,306,193,611
Expenditure (estimate)	*$1,369,758,749
External debt (1925)	gold $146,953,530
Internal debt (1925)	gold $2,229,044,626

	1924.
Imports	*$3,178,905,000
Exports	2,459,987,000
Imports from U.K. (1925)	£4,172,000
Exports to U.K. (1925)	4,776,000

CAPITAL, Lisbon. Population (1920), 486,372; Oporto had a population (1920) of 203,091.

FLAG: Green and red, with arms in centre.

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at 15 Rua Costa Santos, *Oporto*, and 81 Rua dos Netos, *Funchal, Madeira*).

Lisbon, distance 1,210 miles; transit, 50 hours.

PORTUGUESE COLONIES.

PORTUGUESE INDIA has a total area of 1,470 square miles, with a population of 605,000, and includes Goa, Damaun, and Diu. Revenue, 1924-25, $1,840,470.

MACAO, in China, on the Canton River, has an area of 3 square miles and a population of 80,000. Revenue, 1924-25, $5,473,927.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,450 square miles, with a population of 300,000. Revenue, 1921-21, $378,125; expenditure, $695,750.

CAPE VERDE ISLANDS, off the west coast of Africa, have an area of 1,475 square miles and a population of 150,000. Revenue, 1924-25, $9,114,900.

PORTUGUESE GUINEA, on the west coast of Africa, has an area of 14,000 square miles and a population of 400,000. Revenue, 1924-25, $17,519,538; expenditure, $17,505,454.

SÃO THOMÉ and PRINCIPÉ ISLANDS, in the Gulf of Guinea (area 442 square miles, population 45,000). Revenue and expenditure, 1923-24, $5,920,865.

PORTUGUESE WEST AFRICA (Angola and Kabinda) has a total area of 480,000 square miles, with a population of 5,000,000. Revenue, 1924-25, $108,080,000; expenditure, $158,000,000.

PORTUGUESE EAST AFRICA (Delagoa Bay, Gazaland, Inhambane, Mozambique, Nyasa, Quilimane, and Tete) has a total area of 300,000 square miles, with a population of 3,200,000. Revenue, $52,459,048; expenditure, $51,678,757; total trade, 1917-8, (imports and exports), £8,600,000. A scheme for a trans-continental railway from *Benguella* (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Buluwayo and eastwards to Beira is being developed under British, Belgian and Portuguese control.

RUMANIA.

(România.)

King, Ferdinand, *born* August 24, 1865; *succeeded his uncle* Oct. 10, 1914; *mar.* Jan. 10, 1893, Princess Marie of Edinburgh.
Heir Apparent, Prince Mihail, *born* Oct. 25, 1921.

MINISTRY (Sept. 1926).

President of Council, General Averescu.
Interior, Octavian Goga.

Counsellor, M. Constantin Laptew.
2nd Secretary, M. Gregoire Constantinescu.
3rd Secretary, M. D. Hiott.
Military Attaché, Col. T. Antonescu.
Consul-General, M. Marcu Beza.
Consul-Gen. (*Hon.*), M. G. N. Gologan, 5–7 St. Mary Axe, E.C. 3.
Commercial Attaché, M. Gr. Michaescu.

Rumania is a kingdom of South Eastern Europe in the classical *Dacia* and *Scythia Pontica*, the territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians. The territory is known as Wallachia (Muntenia and Oltenia), Moldavia, Dobrudja, Bessarabia, Bukovina, Transylvania, with parts of the Banat, Crizana and Maramuresh. The kingdom has its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an Independent State, and part of the *Dobruja* (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom. Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912–13. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobruja) frontier in 1913. In the War of 1914–1918, Rumania fought on the side of the Allies from Aug. 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly increased as a result of the War, and the *ante bellum* area of the Kingdom (74,461 sq. miles) may now be estimated at 159,269 sq. miles, and the 1915 population of 7,897,311 has been increased to nearly 18,000,000. The dominating religion is that of the Greek (Orthodox) Church.

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (56 members) elected for 4 years, and of a Chamber of Deputies (361 members) elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties. The executive is entrusted to a council of ministers.

PRODUCTION.—The soil of Walachia, Bessarabia, and Moldavia is among the richest in Europe, and it was stated in August, 1921, that "from a comparative point of view Rumania would probably be one of the first war convalescents to attain complete recovery." The wheat crop for 1925 was 2,850,604 metric tons. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,795,353 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica; the workers in the oilfields are the largest single unit of workers in any one industry; the production of petroleum was 1,885,225 tons in 1913, and 2,316,979 tons in 1925. Manufactures are in their infancy, and the imports are chiefly manufactured goods, textiles, machinery and metals; the exports consist principally of wheat, barley, maize, oats, petroleum, timber, cattle, salt and hides. All large estates have been expropriated and divided among the peasants.

DEFENCE.—Service in the *Army* is universal and compulsory. In the War of 1914–1918 over 900,000 all ranks passed into the Armies of Rumania, and of this number over 25 per cent. were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field. This force was the deciding factor in the Rumano-Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest. There is a small *Navy* on the Black Sea (30 vessels) and on the Danube.

EDUCATION is free and nominally compulsory, there being 19,374 schools with 1,612,763 in attendance. Secondary schools are well attended. There are also special schools and Universities at Bucharest, Jassy, Cluj, and Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS.—In 1919 there were about 7,131 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 19,715 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza, the latter is linked with the interior by a railway.

		1925.
Budget revenue	*lei	31,750,000,000

Commercial Attaché, F. Rabinovitch.

BRITISH MISSION IN THE SOVIET UNION.

(Ulitsa Vorovskovo 46, Moscow.)

Chargé d'Affaires, Sir R. M. Hodgson, K.B.E., C.M.G.
3rd Secretary, A. V. Burbury, M.C.
Commercial Secretary (*1st* Grade), W. Peters.

BRITISH CONSULAR OFFICES.

Moscow—Vice-Consuls, J. A. Waite; C. B. Jerram; E. Charnock.
Leningrad—Consul, Thomas H. Preston.
Tiflis—Consul, B. J. Gilliat Smith.
Vladivostock—Consul, G. P. Paton, C.B.E.

The Union of Socialist Soviet Republics.—The Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Russian Union. The total area of the Union is approximately 7,900,000 square miles, with a population (partly enumerated and partly estimated) in 1925 of approximately 140,000,000, the rural population forming 80 per cent. and the urban 20 per cent. Prior to the War of 1914–18 the *Russian Empire* of the Tsar Nicholas II. covered more than 8,500,000 square miles, with a population of about 183,000,000.

The federal system of Russia was adopted by the 10th All-Russian Congress of Soviets on December, 31, 1922, and the constituent Republics of the Union are:—

Republic.	Sq. miles.	Population
I. R.S.F.S.R.	7,238,533	94,865,174
II. Ukraine	183,655	28,397,000
III. Transcaucasia	74,105	5,938,100
IV. White Russia	23,022	4,151,076
V. Turkmenistan	150,845	1,100,000
VI. Uzbekistan	212,636	4,400,000
VII. Mongolia	1,360,000	3,000,000
	9,251,796	141,851,250

The Union is governed by the Congress of Soviets of the Union, and during the intervals of sessions the supreme authority is vested in the Central Executive Committee of the Union, which consists of the Council of the Union and the Council of Nationalities. The regular session of the Union Soviet Congress is convened by the Central Executive Committee (*"Tsik"*) of the Union once a year. *The Council of the Union* consists of 371 members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics, counted in proportion to the population of each republic. *The Council of Nationalities* is formed of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of 5 representatives from each, and of representatives of the autonomous Provinces of the R.S.F.S.R. on the basis of 1 representative thereof. The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union.

(The autonomous Republics of Ajaria and Abkhasia and the autonomous Province of Southern Ossetia send one representative each to the Council of Nationalities.)

The regular sessions of the *Tsik* meet three times a year, and in the intervals the supreme authority is vested in its *Presidium*, formed by the *Tsik* of the Union, of 21 members, amongst whom are included the whole of the Union-Council Presidium and the Presidium of the Council of Nationalities.

Chairman of Presidium, Michael Ivanovitch Kalinin (*R.S.F.S.R.*); G. T. Petrovsky (*Ukraine*); M. Musabekoff (*Transcaucasia*);

A. G. Tcherviakoff (*White Russia*); M. Aitakoff (*Turkmenistan*); M. Khaizula-Khodzlaieff (*Uzbekistan*).

Secretary, A. S. Yenukidze.

Representatives are elected to the Soviet Congress of the Union by indirect voting, each village *Soviet* sending representatives to a *Volost Soviet*, the *Volosts* to *Uyezd* (district) *Soviets*, the *Uyezds* to Government *Soviets*, and the last-named to the Congress of Soviets of the Union. The cities and townships *Soviets* send representatives to the Congress of Soviets Union on the basis of 1 deputy for each 25,000 electors, whereas the provincial *Soviets* send 1 deputy for each 125,000 inhabitants.

The principal executive and administrative organs of the *Tsik* of the Union are: The Council of People's Commissaries, the Council of Labour and Defence, and the Supreme Court of the Union.

The People's Commissariats of the Union are divided into (1) *Federal* People's Commissariats for the entire Union, and (2) *Joint* People's Commissariats of the Union. *Federal People's Commissariats* of the Union are: (1) War and Marine, (2) Foreign Affairs. (3) Foreign Trade, (4) Transport, (5) Post and Telegraph. The *Joint People's Commissariats* are: (1) Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection. The *Federal Commissariats* have their representatives in the constituent republics, who are directly subordinated to them. The *Joint Commissariats* exercise their functions through corresponding Commissariats of the several constituent republics on their territories.

Each of the constituent republics has within its territory its own Congress of Soviets, its Central Executive Committee (*Tsik*), and Council of People's Commissaries (*Sovnarkom*), the latter consisting of Chairman, Vice-Chairman, and the following Commissaries: (1) Chairman, Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection (all these are subordinate to the People's Commissaries of the Union), (6) Agriculture, (7) Education, (8) Health, (9) Social Welfare, (10) Justice, (11) Internal Affairs (the latter six independent), and also including, with an advisory or deciding vote, according to the decision of the respective *Tsik*, the representatives of Federal Commissariats of the Union, *i.e.*, of Foreign Affairs, Foreign Trade, War and Marine, Transport, Post and Telegraph.

The *Council of Labour and Defence* (*Soviet Truda i Oborony*, or *S.T.O.*) is attached and subordinate to the *Sovnarkom*, and in addition to a general direction of commissariats in their economic and military activity, has the power to ratify statutes of joint-stock companies and trusts.

The *Supreme Court of the Union* is attached to the Central Executive Committee, and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics, (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties. The Supreme Court consists of 11 members.

To the Council of People's Commissaries (*Sovnarkom*) of the Union is attached a Joint State Political Department, formerly known as the *Tcheka*, but since 1922 as the O.G.P.U. (*Obiedinionnoje Gosudarstvennoje Politicheskoje Upravlenie*), which is designed to combat political and economic counter-revolution, espionage and brigandage. The Chairman of the O.G.P.U. is a member of the Council of People's Commissaries of the Union. The O.G.P.U. is directed by special rules and regulations, which have not been promulgated. The control of the legality of the acts of the O.G.P.U. is exercised by the Attorney-General of the Union in accordance with a special decree issued by the *Tsik*.

I. SOVIET RUSSIA.

Rossijskaia Socialistieeskaia Federativnaia Sovetskaia Respublika — The Russian Socialist Federal Soviet Republic.

President of the Council of the People's Commissaries of R.S.F.S.R., A. I. Rykoff.
Chairman of Supreme Council of National Economy,
Finance, K. Vladimiroff.
Agriculture, A. P. Smirnoff.
Internal Trade, — Aggeeff.
Labour, A. M. Bakhutoff.
Internal Affairs, A. G. Beloborodoff.
Justice, D. J. Kurski.
Education, A. V. Lunacharski.
Health, N. A. Semashko.
Social Welfare,
Workers' and Peasants' Inspection, N. J. Ilin.

The R.S.F.S.R. consists of 50 Governments and includes 11 Autonomous Republics and 10 Autonomous Provinces, *Autonomous Republics*: Bashkir, Tartar, Kirghiz, Mountain, Daghestan, Turkestan, Crimea, Yakut, Karelia, Buriat-Mongol and Volga Germans. *Autonomous Provinces*: Chuvash, Kalmuick, Mari, Votiak, Zyrian (Komi), Oirad, Kabardian-Balkarsk, Karachai-Circassian, Adighe-Circassian, Tchetchen. From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones," the *Black Soil Zone* being subdivided into (1) Central Agricultural Region, (2) Middle Volga Region, (3) Lower Volga Region, (4) Northern Caucasus, (5) Siberia, (6) Kirghiz Autonomous Republic, (7) Crimea; while the *Other Zones* are (1) Western Region, (2) North-Western Region, (3) Central Industrial Region, (4) North-Eastern Region, (5) Basins of the rivers Viatka and Vetluga, (6) Ural.

The R.S.F.S.R. arose out of the "November Revolution." Involved in the Great War from Aug. 1, 1914, the forces of the Tsar fought against the Central Powers with varying success. On March 12, 1917, a revolution was followed by the abdication of Nicholas. The Grand Duke Michael, nominated by him to be his successor, was not admitted to power, and a Provisional Government was set up under Prince Lvov. In May, 1917, this administration was taken over by the Cabinet of Alexander Kerensky, but Kerensky failed to establish a settled Government, and on Nov. 7, 1917, the "Military Revolutionary Committee" of the Petrograd Soviet seized the authority of Government and transferred it to the All-Russian Congress of Soviets. The Tsar Nicholas II., with the Tsaritsa, Tsarevitch Alexis (heir-apparent), and the Princesses (and such faithful adherents as remained to them) were arrested by order of the Kerensky Cabinet. They subsequently fell into the hands of the Bolsheviks, and on July 16, 1918, the Tsar and his family and attendants were shot in cold blood in Ekaterinburg.

The Russian peasantry had never reconciled itself to the serfdom established as a system at the end of the 16th century, but the abolition of serfdom by Alexander II. and an agrarian reform (1861) did not soothe the ferment among the peasantry, who had to pay by instalments high prices for their allotments, the distribution of which developed into a hidden form of economic serfdom; while the educated classes demanded constitutional guarantees against arbitrary administration. In consequence of the irreconcilable position of the reactionary Government and the Emperor himself, on one hand, and the inhuman methods with which the antagonists of the Government were treated, a party, known as *Narodnaya Volya* (=Liberty of the People), and representing the bulk of the original *Zemlya i Volya* (Land and Freedom) party, resolved to have recourse to terrorism and assassination, and on March 14, 1881, Alexander II. was murdered by terrorists (the term *Nihilists*, set in circulation by I. S. Turgeneff in quite another sense, was afterwards wrongly applied as a nickname for Russian revolutionaries, who were credited in Western Europe with a desire to reduce rule to anarchism and substitute for existing authorities "nothing"). During the reign of Alexander III. the activity of the *Narodovoltsy* was almost destroyed by the secret Imperial police (*okhranka*), and political movements did not revive until the end of the 19th and the beginning of the 20th centuries. In the year 1898, under the influence of the Socialist theories of Karl Marx, the Russian Social-Democratic Workers' Party was established, which at the Conference of 1903 split into two factions—*Bolsheviks* and *Mensheviks* (from the words *bolshe*=more, and *menshe*=less; the nicknames originating in the precarious majority of Lenin's adherents at that conference). The *Bolsheviks* are of the opinion that the proletariat must seize and retain the supreme political power and that no collaboration with other classes may be admitted; they demand from their party comrades absolute obedience up to the annulling of their individuality. The *Mensheviks* admit of compromises with the *bourgeoisie* on the basis of preserving control over the trade unions' and workers' movement, and are against autocratic tendencies within the party itself. The Russian party of "Socialists-Revolutionaries," successors of "Narodovoltsy," aimed chiefly at nationalisation of all landed estates for distribution in allotments among the peasants without any compensation; in their political tendencies they were embittered antagonists of the autocratic system, and all terrorist acts in the period 1898–1912 were executed by their *Boyevaya Druzhina* (military detachment), including the assassination of the ministers Bogolyepoff, Sipiaghin, Plehve, the Grand Duke Sergius, &c. In July, 1917, the *Bolsheviks* made their first attempt to obtain the supreme power by means of revolt, but the attempt was abortive. In the autumn of 1917 they succeeded in gaining a majority in the *Soviets* (Councils of Workers' and Soldiers' Deputies) of Petrograd, Moscow, and some other places, and on Nov. 8, 1917, after severe street fighting in Petrograd and Moscow, they achieved their aim. In Jan. 1918, they dispersed the Constituent Assembly, where the Social Revolutionaries enjoyed an absolute majority.

The *Bolsheviks* claimed to act in the name not only of the Russian people, but of the "Proletariat of the World," and formed plans for a world revolution.* The military revolution of 1917 was accompanied by a *débâcle* in the field, and many of the soldiers abandoned their arms and returned to their homes, while the armies of the Central Powers advanced victoriously into Russian territory, and, after granting an armistice, they imposed on the *Soviet* Government the crushing conditions of the *Treaty of Brest-Litovsk* (March 3, 1918), which remained effective until the military strength of Germany and Austria was broken by the Allies. The Bolshevik *régime* had been fostered by the Central Powers and was opposed by the Allies, who sent such naval and military help as could be afforded to various bodies who were stemming the tide of Bolshevism in Siberia (Admiral Koltchak), South Russia (Denikin), and North Russia (Tchaikovsky), mainly with a view to create a diversion on the eastern German-Austrian front, and in response to a declaration of war by the *Soviets* against Governments which were held by them to be representative of *Menshevik* rule and of the *bourgeoisie* they had pledged themselves to eradicate. But the victorious close of the European War caused a growing reluctance among the allied nations for further military adventures, and the reinforcements sent in 1918 were withdrawn during the autumn and winter of 1919 from Archangel and Murmansk in the north, from Odessa in the south, and from Vladivostok in Siberia. The withdrawal preceded a collapse of the "White" resistance to the "Red" (*Bolshevik*) armies. In 1920 war broke out between the Republic of Poland and the *Soviet* armies, in conjunction with operations under General Vranghel, the successor of Denikin in the south. After initial successes the Polish armies were driven back, and Warsaw appeared to be in imminent danger, when a dramatic recovery saved the Polish capital and brought about negotiations for peace on terms favourable to Poland, under the *Treaty of Riga* (March 19, 1921).

Government.—The *Soviet* Government, although composed of representatives indirectly elected by the masses, cannot be called representative, as no provision is made for "the opposition" to the executive power; and although the rural population (*i.e.*, 80 per cent. of the population) elects usually a very small number of Communists (=*Bolsheviks*), nevertheless the Congress of the *Soviets* consists almost entirely of Communists. As to the cities and towns, only candidates nominated or approved by the *Bolsheviks* can succeed in these elections. Under *Soviet* rule individual liberty is considerably less than in the time of Tsardom, while freedom of speech and the liberty of the Press are definitely denied to the people.

Local Government was, and still remains, highly developed. The villages in Imperial Russia had their assemblies (*skhod*) under the presidency of a mayor (*starosta*); they were grouped into "volosts," the latter into districts (*uyezd*), and these into governments (*guberniya*). The districts and governments had their elective

* Bolshevik propaganda work has been extensively carried on in Europe and the United States, chiefly through the Third International (*Comintern*), but has gained few adherents in democratic countries. In 1920 the sum of £75,000 was offered by the *Soviet* Government as a subsidy to the London Labour organ, *The Daily Herald*, but was refused by the directorate.

councils (*zemstvos*) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was disposed of in return for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*); but in many cases the local authority of such municipalities and local land councils (*zemstvos*) was overshadowed by the superior authority of the *bureaucratic* governor. After the Revolution, the village and other administrative units set up *soviets* of workers and peasants, and the provincial councils send representatives to the All-Russia Congress, municipalities having a double representation from their own *soviet* and from that of the province (or district) in which the municipalities are situated.

Education.—Under the Bolshevik *régime* popular education is administered by a commissary, in whose charge have been placed all educational institutions, theatres, museums, and galleries. Beyond this, the State has monopolised the photo-cinematographic industry and the publishing of manuals for schools of all types; and as the *Soviet* Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching; but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued. Generally speaking, only children of workers and officials are allowed to attend the primary schools in towns, and only those who belong to the Communist youth or are members of the Communist party may enter secondary school and universities; exceptions to this rule are reduced to the minimum. The average salary of a village schoolmaster does not exceed £2 a month, which very often is not paid regularly. Very often professors of universities and higher schools get a remuneration of £4 to £7 a month. Only schools established by the Communist party for special party purposes are well supplied in every regard. In 1922 there were stated to be 5,000,000 pupils in the 55,000 elementary and secondary schools, and about 300,000 in 4,000 advanced and technical schools; while there were (in 1922) two universities in Moscow and one in each of twenty other large cities.

Religion.—The Orthodox Church was disestablished by the *Bolsheviks* and all its property confiscated. All ecclesiastic schools, seminaries and academies have been abolished, and the teaching of religion to persons under 18 years of age forbidden. But the law does not forbid the exercise of religion, and churches remain open in virtue of contracts concluded between the congregations and the local authorities. A recent questionnaire addressed to the soldiers of the Red Army shows that 70 per cent. of them believe in a Deity. The clergy live on voluntary donations from their parishioners. On Feb. 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar.

Finance.—The *Bolsheviks* had at their disposal after the November Revolution (1) a gold reserve in the State Bank of about 1,000,000,000 roubles, (2) paper currency left over by the previous Imperial and Provisional Governments, (3) cash, foreign securities, and jewels confiscated in banking-houses, (4) all the nationalised industries, and (5) immense stocks of raw materials and supplies inherited from the old *régime*. But the nationalisation of industrial plant has almost paralysed industry. According to official figures their exploitation caused (in 1920) a commercial loss of about 63,000,000 gold roubles. At the same time, the income from customs and from the State liquor operations (*i.e.*, 30 per cent. of the Tsarist budget) disappeared. Normal taxes could not be collected at all. The revenues of the Bolshevist Treasury in 1920 were reduced to about 32,000,000 gold roubles, against expenditures extending to 303,000,000 gold roubles. The finances of Soviet Russia culminated in chaos, and since Communism had declared war on capital, and the possibility of getting credits abroad was totally excluded, the Government was compelled to have recourse to printing presses for the production of paper money. These presses also provided payment for the Army and Government officials, until the paper rouble, which was exchanged at about ten to £1 sterling in 1914 had ceased to possess any value after reaching grotesque quotations of 500 billions to £1 in the spring of 1924.

After the close of the civil war a *new economic policy* (known as N.E.P.) was inaugurated early in 1921. Private enterprises were allowed to enter the lists as competitors in the open market, and the restrictions on hoarding of money by individuals and co-operative societies were abolished. The State retained the means of transport and all essential enterprises, and put them on the basis of economic management, *i.e.*, they were removed from the State budget as items of expenditure and had to be "self-supporting." The system of taxes in cash, both direct and indirect, was also restored under the new policy. In October, 1921, the State Bank was re-established with a capital of 25,000,000 gold roubles. It obtained a monopoly of transactions in precious metals and foreign currency. All this contributed to the need for a stabilised currency, and the State Bank was authorised by a decree to issue (in 1922) banknotes known as the *Chervonetz*, representing the value of the Tsarist 10-rouble gold coin. The decree provides that 25 per cent. of the face value of the banknotes shall be secured by precious metals and stable foreign currency, and the rest by commercial short-term bills of exchange and other securities. The exchange of *chervontzy* for their gold equivalent is to be inaugurated later on. According to the official figures of October, 1924, the State Bank issued 51,886,650 *chervontzy* secured to the extent of over 50 per cent. by precious metals, English pounds, American dollars, and Swedish crowns. The value of this monetary unit has hitherto fluctuated only insignificantly, and the *chervontzy* are current throughout the Union. In February, 1924, the Government decided to discontinue the further printing of depreciated Soviet paper currency, and to issue Treasury notes in denominations of 1, 3, and 5 roubles to an amount not exceeding one-half of the total amount of *chervontzy* in circulation. Since May 18, 1924, the money market disposes of three sorts of money: *chervontzy*, Treasury

notes, and silver and copper coins in circulation since the summer of 1924.

Budget 1926-27—	*Gold Roubles*
Ordinary revenue	3,620,512,000
Ordinary expenditure	3,398,525,000
Extraordinary revenue	158,125,000
Extraordinary expenditure	480,112,000

The revenue from direct taxation is estimated at 569 million gold roubles, and from indirect taxation at 976 million. The estimated expenditure includes 624 million for Navy and Army.

In October, 1922, was issued a 6 per cent. State Lottery Loan for a total amount of 100,000,000 gold roubles in bonds of 57. each, redeemable within 10 years. The loan was taken up among the population after some measures of compulsion. A second 8 per cent. State Lottery Loan for 100,000,000 gold roubles, and a special Peasantry Lottery Loan to the amount of 50,000,000 gold roubles were issued in 1924, and met with only a small measure of voluntary support. On Jan. 1, 1926, the Internal Debt was stated to be 500,000,000 gold roubles.

Debt.—The outstanding Foreign Debt of Russia on Jan. 1, 1917 (before the Revolution), may be stated as under :—

	Debt.
To Great Britain	£622,674,406
To France	*Francs* 3,950,000,000
To U.S.A.	$282,000,000
To Japan	*Yen* 256,000,000
To Italy	*Lira* 36,123,836

All internal and external obligations have been (in 1918) proclaimed null and void, but the Soviet Government is inclined to acknowledge some part of the Tsarist debts in return for further credits abroad.

Defence.—The *Red Army* consisted in 1923 of about 720,000 all ranks, including 37 cavalry brigades of about 3,000 men, and about 30,000 sailors serving on land. It was reported that the *Red Air Fleet* was to comprise an organisation of 10,000 aeroplanes for the year 1924; in 1926 it was stated to consist of less than 100 aeroplanes. The *Red Navy* is believed to consist of 2 Dreadnought battleships launched in 1911, 4 old cruisers, 13 destroyers, and 8 submarines.

Agriculture.— The average land allotments given to the peasantry in 1861 were about 4·8 *dessiatins* (1 *dessiatina* = 2·7 acres) per capita of male population; they failed to provide for the natural increment of the population and dropped to 2·6 in 1900, reaching in 1916 17 somewhere between 1·5 and 1·8. The situation was aggravated by the poor quality of the land allotted, inconveniences of scattered fields, overlapping strips, remote pastures, high instalments of payment, and the system of communal ownership. These drawbacks hampered the development of tillage, which continued to remain on an almost primitive level. In 1898 in 50 provinces of European Russia alone, about 8 million passports had been issued to individual peasants who were quitting their native villages in search of employment. The *Duma's* scheme of agrarian reform was repudiated by Nicholas II., and the *Duma* itself twice dismissed (1906 and 1907). The census of 1917 revealed the fact that out of 27,000,000 able-bodied male population 15,000,000 had been called to the colours, and during the first three years of war over 2,000,000 horses were requisitioned. These facts contributed to a further decay of agriculture. After the November Revolution the Bolsheviks abolished land-ownership. Land was to be taken by the local peasants for "seasonal tillage," and under no circumstances was the land so taken to become their property. The civil war called forth new mobilisations of men and new requisitions of horses and cattle, while the Government took charge of feeding large numbers of the civil working population, so that at one time, besides providing for 5,000,000 soldiers, it was supporting more than 25,000,000 people in the towns. Under these circumstances the Bolsheviks decreed a State monopoly of food-stuffs (grain, meat, butter, eggs, potatoes), so that it became compulsory for the peasants to deliver the whole of their surplus produce to the State without any compensation. This resulted in risings of the peasantry and in a reduction of cultivated area by about 32 per cent. The unparalleled famine of 1921, together with a complete exhaustion of food supplies, brought the Communist system to the verge of complete collapse. In the spring of 1921 the "New Economic Policy" (*N.E.P.*) was proclaimed. This opened the markets and allowed the peasants to dispose freely of their produce, while a decree of March, 1921, ensured regular and continuous land-tenure, preserving the prohibition of selling, buying, mortgaging and alienation of their allotments, and cancelling the law in virtue of which no more land was leased than could be tilled by the tenant and his family without the aid of hired labour. There was an increase of cultivated area in 1923 to 60,000,000 *dessiatins* against 49,000,000 in 1922. The irksome and multifarious taxes were replaced in the summer of 1923 by the "Unified Agricultural Tax," and by the end of 1923 80 per cent. of this tax was paid in money and only 20 per cent in kind. Since January 1, 1924, the Unified Agricultural Tax is to be collected only in cash. The total amount of the revenue from this direct tax was in 1923 about 400,000,000 gold roubles. The enormous rise in prices for manufactured articles is substantially equivalent to overwhelming indirect taxes, but the difference between the low prices for agricultural produce and the high prices for manufactures ("the scissors" problem), coupled with weakened paying capacity, discourages the peasantry and may result in a new reduction in the cultivated area. In 1924 a new famine gripped the hitherto fertile provinces of the Volga and of Southern Russia. The total harvest of cereals in 1924 amounted to (official figures) 2,600,000,000 poods against 4,000,000,000 before the war, 1,900,000,000 in 1922, and 2,800,000,000 in 1923.

Agriculture outweighs in Russia all other industries in importance, the principal crop being rye, the food of the people; wheat, the second largest crop, was formerly exported in great quantities, and in 1925-26 125,000,000 poods of grain were exported, against 73,000,000 in 1922-23; barley, oats, millet, and maize are also important food crops, and potatoes are largely grown. Among the important industrial crops are flax and hemp and cotton. The livestock included (1923) 22,800,000 cattle, 30,400,000 sheep, 9,100,000 pigs, and 16,500,000 horses.

Industry.—The natural riches of Russia in coal, iron-ores, copper, manganese, gold, platinum, timber, naptha, and so on, are enormous. Russia represents a wide field for

investing capital in industry, and in the last two decades before the war already attracted considerable internal and foreign capital. The November Revolution nationalised all enterprises, and during the civil war only an insignificant number of factories continued to work (chiefly for the Army). The census in the autumn of 1921 gave the figure of 1,120,000 industrial workers against 2,700,000 in 1913. Under the New Economic Policy groups of homogeneous enterprises were united into trusts and syndicates, with a good deal of independence in regard to their management, and were removed from the State Budget and had to be "self-supporting." This resulted in an increase in the number of workers (1,600,000 in July, 1923) and in production. The average productivity of a worker in 1923 was estimated at 1,365 *gold roubles* per annum, against 628 *gold roubles* in 1920-21, and 2,163 *gold roubles* in 1913.

The chief mineral is petroleum, the total in 1922-23 being nearly 5,000,000 tons, and in 1924 6,250,000 tons. The chief metals produced in 1922 were gold—318 poods (against an average output of 3,553 poods in pre-war days), and platinum—12 poods (against 352 poods in 1912). The output of coal was in 1924 540,000,000 poods.

External Trade.— The external trade of 1923 across the European frontier and the Caucasian border, but exclusive of the trade of the Trans-Caucasian Republics, is stated as under in *gold roubles* :—

Exports from Russia to	Countries.	Imports into Russia from
11,267,000	Estonia	5,217 000
7,989,000	Finland	5,962,000
61,139,000	Germany	49,707,000
16,541,000	Gibraltar	...
33,511,000	Great Britain	36,597,000
6,364,000	Italy	679,000
23,890,000	Latvia	2,514,000
11,829,000	Netherlands	...
1,434,000	Norway	3,274,000
491,000	Persia	2,304,000
2,431,000	Poland	7,749,000
...	Sweden	5,772,000
10,222,000	Turkey	593,000
...	U.S.A.	18,695,000
205,818,000	Total	144,056,000

Trade in 1924-25.—Provisional figures for Oct. 1, 1924–Sept. 30, 1925, give 557,000,000 *gold roubles* as the value of the exports (507 m. over the European, and 50 m. over the Asiatic frontiers), and 693,300,000 *gold roubles* for imports, (633·3 m. over the European and 60 m. over the Asiatic frontiers).

British Trade with Russia (1923).—According to *Russian* official figures, the trade between Great Britain and Russia in 1923 was as under :—

Classification.	Imports from Great Britain. *Gold Roubles.*	Exports to Great Britain. *Gold Roubles.*
Foodstuffs	1,576,000	5,114,000
Raw Materials	25,826,000	28,282,000
Manufactures	9,914,000	115,000

The chief import from Great Britain was coal ; the principal export to Great Britain was timber.

According to *British* official (Board of Trade) figures, the trade of Great Britain and Russia in 1925 was as under :—

Imports consigned *from* Russia	£19,994,000
Exports *to* Russia	3,820,000

Communications.—There were (1923) 45,957 miles of railway in use, and 9,070 post offices and radio stations, with 24,003 post boxes and 349,309 miles of telegraph wire. Under *Soviet* administration the financial deficit on the working of the railways has increased in proportion as transport conditions have deteriorated. In 1921-22 the deficit exceeded 150,000,000 *gold roubles*, in 1922-23 it was 274,000,000 *gold roubles*, against an average credit balance of 270,000,000 *gold roubles* for the years 1914-16.

	1913.	1922-23.
No. of Locomotives :		
In full order	19,866	8,500
Disabled	840	11,000
No. of Wagons :		
In full order	480,000	20,000
Disabled	290,000	129,000
Total haul (miles)	254,364,000	90,618,000
Freight (poods)	16,135,300,000	2,800,000,000

In 1923 there were about 830,000 employés on the railways, but the number was reduced in 1924 to 650,000. The principal railway lines are the main *European* network from Leningrad, through Moscow to Astrakhan and across the Urals *vid* Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus ; the *Trans-Siberian Line* from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok, where a northward extension runs to Khabarovsk. The *Amur Railway* connects Stryetensk with Khabarovsk, and the Trans-Siberian line thus connects the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv, Bokhara, Samarkand, Khokand and Andijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent Line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the Trans-Caspian system. The *Trans-Caucasian Line* runs through Georgia, Azerbaijan and Armenia, from Batum and Poti, on the Black Sea, *vid* Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiflis branches run to Kars, and *vid* Erivan to Mount Ararat on the Armenian frontier, and to the Persian frontier at Julfa. There are in the *Soviet* Union (1923) 164,793 miles of navigable rivers and canals and lakes, of which 103,935 miles are within European Russia, and 60,858 in Asiatic Russia : of the total about one-fourth of the distance is navigable by steam vessels, a further eighth by sailing vessels, and nearly one-half by rafts. In 1923 the ships and rafts carried over 10,000,000 tons of goods and 8,218,356 passengers. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Sevastopol and Novorossiysk (Black Sea), Archangel on the White Sea, and Ekaterininsk in the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropaulovsk in Kamtchatka.

Capital.—On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1923 of about

1,700,000. LENINGRAD (before the war "St. Petersburg," and until the death of Lenin, "Petrograd"), the former Capital, founded by Peter the Great on the banks of the Neva in 1703, had a population in 1925 of about 1,000,000. Other centres are Saratov (190,000), Rostov (177,000), Samara (150,000), Nijni-Novgorod (84,000), Voronezn (100,000), Kazan (147,000), Krasnova, formerly Ekaterinodar (143,000), Astrakhan (123,000), Orenburg (109,000), Irkutsk (104,000), Tomsk (90,000), Omsk (144,000), Taskent (200,000), Kokand (112,000), Samarkand (87,000), Vladivostok (100,000). Archangel had about 40,000 inhabitants in 1920.

II.—THE UKRAINE.

(Ukraina.)

President, V. J. Tchubar.
Vice-President, M. J. Vladimirsky.
Chairman of Central Executive Committee, G. J. Petrovski.
Ukrainian Representative in Moscow, A. T. Prikhodjko.

On Nov. 21, 1917, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia," and Podolia and Volkynia in "West Russia"), was encouraged by Germany to declare itself independent as the *Republic of the Ukraine*. The new Republic was invaded by Germany in 1917–18, and subsequently overrun by Bolshevik forces, and a military and economic alliance was concluded between *Soviet* Russia and the *Ukraine Socialist Soviet Republic* (Dec. 28, 1920). The majority of the inhabitants belong to the Greek Orthodox Church. The chief town and seat of government is Kharkoff (pop. 1923, 312,000), other large centres being Odessa, the great port on the Black Sea (with a population in 1923 of 316,000), Kieff (pop. 1923, 406,000), Ekaterinoslav (pop. 1923, 127,000), Nikolayev (81,000), Poltava (88,000), and Taganrog (100,000). The Ukraine is the great cereal-growing district of Russia, and before the Great War the harvests exceeded 1,000,000,000 poods; during the Civil War the production was reduced to 385 million poods, but in 1923 it had increased to 700 millions. In 1922–3 there were 112 sugar-beet factories (200 in 1915) producing 10,000,000 poods (360 millions in 1914–15). The Ukraine also contains large deposits of iron ore and coal, and is the principal source of the European supply of quicksilver. Agriculture is the principal industry, and there are large iron and steel works. Before the Great War the exports from the Ukraine (grain, sugar, hides, bristles, quicksilver, and wool) were of the annual value of about £75,000,000, and the imports (manufactured goods and machinery) about £50,000,000. The Budget of 1923 showed a surplus of 46,000,000 *gold roubles*.

CAPITAL, Kharkoff. Population (1923), 312,000.

III.—TRANSCAUCASIA.

(Zakavkarskaya F.S.S.R.)

President of the Council of People's Commissars, M. D. Orakhelashvili.
Chairmen of Central Executive Committee, MM. Zkhakaya (*Georgia*); Agamaly-Ogly (*Azerbaijan*); Ambarzoumian (*Georgia*).
Plenipotentiary in Moscow, S. M. Ter-Gabrielyan.

The Transcaucasian Federation consists of three Socialist Soviet Republics:

Republic.	Sq. miles.	Population.
Armenia	15,065	1,339,969
Georgia	25,470	2,135,033
Azerbaijan	33,570	2,463,098
	74,105	5,938,100

Armenia, or Hyastan.
(S.S.S.R.A.)

President of the Council, M. Lukashin.

Armenia occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great War it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,518 sq. miles). The rivers Euphrates, Tigris, Aras, Kur, and Tchorokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is *Mount Ararat* (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy); more than half the supply of copper from Russia was derived in 1914 from *Soviet* Armenia, and the value of carpets manufactured in 1914 exceeded 10,000,000 *gold roubles*. The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the *vilayet* of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently occurred. In 1915–17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia*. Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the *Armenian Socialist Soviet Republic*, on the lines of the Moscow government.

CAPITAL, Erivan. Population (estimated), 90,000. Leninkan (formerly Alexandropol) had 50,000 inhabitants in 1925.

Georgia, or Sakartvélo.
(G.S.S.R.)

President, M. Macharadse.
Chairman of Central Executive Committee, M. Zkhakaya.

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhasia and

Adjaria), and one autonomous Province (Southern Ossetia).

Georgia, a former Kingdom in Transcaucasia with a history of more than 2,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783. At the beginning of 1918 it regained its independence, but in 1921 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation. *Soviet Georgia* is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. There are 970 miles of railway, the trunk line connecting the Black Sea ports of Poti and Batoum with Baku, on the Caspian. Batoum and Baku are also connected by a petroleum pipe-line. The manganese ore beds are the richest in the world, more than one-half of the world's supply being derived from the Tchiatury mines (in the district of Sharopansky) in 1914. There are also abundant supplies of coal (5 million poods in 1914) and over 500 mineral springs partly unexploited. Wine is produced in considerable quantities, and the tobacco plant (chiefly in Abkhasia) yielded 800,000 poods in 1914, a great deal of which was imported by Egypt and produced as local grown. Timber (especially box) is an important industry. Oil wells with unproved quantities of crude oil have been discovered in many places, particularly in the Shirak Steppe. The chief town and seat of government is Tiflis, population (1925) 400,000; the administrative centre of Abkhasia being Sukhum (62,000), and of Ajaria, Batum (32,000); other large centres being Kutais (54,000) and Poti (21,000).

CAPITAL, Tiflis. Population (1925), 400,000.

Azerbaijan.
(A.S.S.R.)

President, M. Musoabekoff.
Chairman of Central Executive Committee, M. Agamaly-Ogly.

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south, and from the Caspian on the east to Armenia and Georgia. It includes the provinces of Baku, Hanjin (Elisavetpol), the district of Zakathal and the autonomous territories of Nakhitchevan and Nagorni-Karabach. More than 75 per cent. of the people are Muhammadans. The *Azerbaijan Socialist Soviet Republic* entered the Union as a Member of the Transcaucasian Federation on Dec. 31, 1922. The Republic is very rich in minerals (naphtha, magnetic ironstone, and manganese), but oil is the principal industry, concentrated in the Baku region, the production being 466,800,000 poods in 1914, and 213,000,000 poods in 1922–3. Fishing is also important, and 15,000,000 poods of caviare were produced in 1922. The principal crop is cotton.

The CAPITAL is Baku (pop. 237,000) on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batum (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Hanjin (65,000), Kuba (40,000) and Noucha (50,000).

IV.—WHITE RUSSIA.
(Byelorussiya.)

President (and Chairman of the Central Executive Committee), A. G. Tchervyakoff.

The Independence of White Russia was recognised by *Soviet* Russia in 1919, and a military and economic alliance was concluded Jan. 16, 1921. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghiler. The political neighbours are Lithuania and Poland on the west, and the Ukraine on the south. The capital is Minsk (pop. 118,000), where there is a University founded by the *Soviet* Government; other towns are Bobruisk (41,000) and Moghilеff (40,000).

CAPITAL, Minsk. Population, 118,000.

V.—TURKMENISTAN.
(T.S.S.R.)

President, M. Atabaieff.
Chairman of Central Executive Committee, M. Aitakoff.

Turkmenistan is bounded on the west by the Caspian Sea and on the south by Persia, with Afghanistan as a south-eastern neighbour. Eighty-five per cent. of the inhabitants are Muhammadan Turkomans, with about ten per cent. Muhammadan Uzbegs and five per cent. Russians of the Orthodox faith. The seat of administration is temporarily at Poltarask (formerly Achabad), until removal to Leninsk (20,000), other centres being Merv (15,000), and Karichi (30,000). Krasnovodsk is a port on the Caspian and a railway terminus on the Trans-Caspian line.

CAPITAL, Poltarask (26,000).

VI.—UZBEKISTAN.
(U.F.S.R.)

	Sq. miles.	Population.
Bokhara	85,000	2,650,000
Khiva	26,000	900,000
Tadzhik	101,636	750,000
	212,636	4,400,000

President, Achun Babaieff.
Chairman of Central Executive Committee, Parsa Khodjayef.

Bokhara lies between Turkmenistan (on the W.), the Kara Kalpak territory of the R.S.F.S.R. (on the N.), and is bounded on the south by Afghanistan. The majority of the inhabitants are Muhammadan Uzbegs. The former capital (Old Bokhara) is a station on the Russian Trans-Caspian Railway. The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A *Soviet* Republic of Bokhara was established and its independence was recognised by *Soviet* Russia by treaty of March 4, 1921.

Khiva, or *Khorezm*, formerly the Khanate of Khiva, lies between Bokhara and the Kara Kalpak territory of the R.S.F.S.R., and has a population of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly productive (rice, wheat, cotton, silk, fruit, hemp).

Tadzhik.—The autonomous Soviet State of the Tadzhik lies between Bokhara (on the W.) and the Kara Kirghiz territory of the R.S.F.S.R., with Afghanistan as a southern neighbour. The inhabitants are largely nomads, and almost

all are Muhammadans. CAPITAL OF UZBEKISTAN, Samarkand (population 85,000); other towns: Taskend (245,000), Andijan (80,000), Bokhara (75,000), Kokand (121,000), Namagan (71,000). Khiva has about 10,000 inhabitants.

VII.—MONGOLIA.

Mongolia, formerly part of the Chinese Empire, has an estimated area of about 1,360,000 square miles, and a population of 3,000,000 to 5,000,000, of whom the greater number are Buddhists. In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and the Russian Union (in treaty with China) declared a protectorate over Mongolia in 1924.

North-West (or Outer) *Mongolia* covers an area of about 360,000 square miles, and consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtish and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides and skins, and gold. The chief centres are Urga (Kuren), Uliassutai, and Kobdo, all of importance as trading centres on the main caravan routes.

Inner Mongolia covers an area of about 1,000,000 square miles and includes the *Gobi* ("Desert"), or *Sha-mo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwang-ho river. In the north-east of Inner Mongolia rises the Keru-lun, which flows into the Dalai Nor, in Manchuria. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi, the general direction of the caravan routes being from south-east to north-west. The principal centres are: Kalgan, Kuku-khoto, Kuku-erghi, Dolon-Nor and Biru-khoto. In the north-east, Keru-lun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechili and the western route from Urga, in N.W. Mongolia.

Russian Protectorates.—The Russian Protectorate recognises three areas in Mongolia, viz., *Inner Mongolia*; *North-West or Outer Mongolia*, with administrative centre at Urga, re-named Ulan-Butor-Khoto (Town of the Red Knight); and *Tannu Tuva*, which is part of North-West Mongolia, between the Sayan and Tannu Ola ranges, with administrative centre at Chem Belder, or Krasny (Red Town).

SARRE TERRITORY.

Under the *Treaty of Versailles* Germany renounced the government of the Sarre Basin in favour of the League of Nations, the government being entrusted to a commission of 5 members nominated for one year by the League. At the expiration of 15 years from Jan. 10, 1920, the population will be called upon to decide by a plebiscite the government under which they wish to be placed. The total area is about 743 square miles, with a population of about 713,000. The chief towns are Sarrebruck (117,000), Neunkirchen (35,000) and Saint Ingbert (18,000).

SALVADOR.

(República de El Salvador.)

President (1923–1927), Señor Dr. Don Alfonso Quiñonez Molina, *assumed office* March 1, 1923.
Vice-President, Señor Dr. Don Pio Romero Bosque.
Foreign Affairs, Education and Justice, Señor Dr. Don Reyes Arrieta Rossi.
Interior and Public Works, Señor Dr. Don Francisco Martinez Suarez.
Finance, Señor Ingeniero Don Gustavo Vides.
War and Marine, Señor Dr. Don Pio Romero Bosque.
Envoy Extraordinary and Minister Plenipotentiary to Gt. Britain, (vacant).
Chargé d'Affaires and Consul-General in London, Señor Dr. Don Antonio Reyes-Guerra, 7, Union Court, Old Broad Street, E.C. 2.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 13,176 square miles, with a population estimated in 1924 at 1,609,724. It is divided into 14 departments. In 1924 there were 60,591 births and 33,047 deaths.

Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States. The government is based upon a written constitution and is composed of (*a*) the Executive power, which is exercised by the President; (*b*) the Legislative power, which is in the hands of the National Assembly, and (*c*) the Judicial power, which rests ultimately with the Supreme Court. Elections take place once every four years, and the President is ineligible for a successive term.

The surface of the country is very mountainous, many of the peaks being volcanoes. The highest peak is the Santa Ana volcano (8,300 feet). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services. There is a wet season (winter) from May to October, and a dry season (summer) from November to April. Earthquakes have been frequent in the history of Salvador, the most recent being that of 1919, when great damage was done to the capital and other towns.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while further away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the present Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as indigo, rice, balsam, &c. Cotton-growing on a large scale was commenced in 1924, but on account of the ravages wrought by insects it has been practically abandoned after two seasons. In the lower altitudes towards the east henequen is produced. The principal exports are coffee (80 per cent. of total value), sugar, indigo, balsam, henequen, hides and skins. The chief imports are cotton textiles, flour, iron and steel goods, lard, motor cars, manures, jute sacks and chemical products.

The total length of the railways is 262 miles; a British railway nearly 100 miles in length connects Acajutla with the capital and with the important coffee centre of Santa Ana. A line from the port of La Union (on the Gulf of Fonseca) to the capital was opened in 1922. Construction on a new line from Santa Ana to Zacapa (in Guatemala) is being rapidly pushed forward. During 1924-26 the re-draining and re-paving of most of the capital were completed, and plans have been made for the macadamizing or paving of several hundred miles of rural roads, many of which are now impassable during the rainy season. There is a good motor road between the port of La Libertad and the capital, while motor transportation is usually possible between the capital and Guatemala City, over the International road opened in 1923.

There are 120 post-offices and 234 telegraph offices, with 2,400 miles of wire. There is a wireless (receiving and transmitting) station at the capital, and during 1926 a broadcasting station was inaugurated.

The language of the country is Spanish.

	1925.
Revenue	£2,095,000
Expenditure	2,090,000
Internal debt (Dec. 31, 1925)...	*U.S.$13,588,900
External debt (do.)	*£1,008,340

	1923.	1924.
Imports	£2,061,000	£2,887,744
Exports	2,345,000	5,024,262
Imports from U.K.	502,000	374,159
Exports to U.K.	38,000	40,464

CAPITAL, San Salvador. Pop. *circ.* 90,000. Other towns are Santa Ana (70,000), San Miguel (40,000), San Vicente (30,000), Nueva San Salvador or Santa Tecla (26,000).

BRITISH LEGATION.

British Minister (*see* Guatemala).

BRITISH CONSULAR OFFICES.

San Salvador—Consul and Chargé d'Affaires (*ad interim*), Gerald Harrington.
Vice-Consul, W. J. Hunter.
Acajutla—Vice-Consul, (vacant).
Cutuco—Vice-Consul, Capt. John E. Griffiths.

* The whole of the Public Debt, exclusive of temporary floating indebtedness, is external, consisting of both dollar and sterling bonds. Many of the dollar bonds are held in the country, having been given in exchange for floating debts incurred over a number of years prior to 1923, when the consolidation of the public debt took place. All bonds, both dollar and sterling, are secured by a lien on 70 per cent. of the Customs receipts, and the service of the debt is rigidly controlled by a local representative of a New York banking house which acts as Fiscal Agent for the bondholders. The unit of currency is the Colon, which = 50 cents U.S. currency.

Salvador is 5,700 miles from London; transit (passenger), *viâ* New York and thence every 3 weeks by direct steamer to La Libertad; or *viâ* New Orleans and thence every week by direct steamer to Puerto Barrios (Guatemala), or by various direct lines from England to Panama Canal and thence by steamer (about once every 8 days) to La Libertad; time 2 to 5 weeks.

SAN DOMINGO. *See* Dominican Republic.

SAN MARINO.

Regents, Two "Capitani Reggenti."
Consul-General for San Marino in Great Britain, Grand-UK. Melvill A. Jamieson, F.R.G.S., 17 Cockspur Street, S.W. 1.
Vice-Consul, Comm. Giovanni Sovrani, Savoy Hotel, W.C. 2.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 38 square miles, the population 12,952. There is an army of about 1,000. The city of San Marino (pop. 2,000) occupies the slope of Mount Titano, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utilization and export of gravel from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 16, 1899.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

British Consul-General, E. Mervyn de Garston (Leghorn, Italy).

SERBIA. *See* Yugo-Slavia.

SIAM.

(Muang T'ai.)

King, Prajadhipok, G.C.B., *born* Nov. 8, 1893; *succeeded* Nov. 26, 1925.
Foreign Minister, H.H. Prince Traidos.

Envoy Extraordinary & Minister Plenipotentiary in London, H.S.H. Prince Varnvaidyakaru, 23 Ashburn Place, S.W. 7.

The Kingdom of Siam, or Muang T'ai (area about 195,000 square miles; population, 1923, 9,513,000), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. The King is an absolute monarch, and appoints his successor. There is an Executive Council of Ministers with an adviser in Foreign affairs (usually of American nationality), and a Financial adviser (hitherto always of British nationality), and, since 1895, a Legislative Council of State, consisting of the Ministers, eight royal princes, and over twenty members appointed by the King, who has an absolute power of veto. There is also a Supreme Council of Five which advises the King in important matters. A number of English, French, Italians, Danes, and

Americans are employed in the various State departments. There is an army of nearly 50,000 men, and a few small gunboats; compulsory military service has been introduced. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,800 Europeans. The principal religion is Buddhism. There are 364 Government schools and 4,124 schools of all kinds, attended by 448,380 children. The Chulalankarana University is organised with faculties of medicine, political science, engineering, and literature and science.

The upper part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Eighty-five per cent. of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping, which had held the lead in tonnage for many years past, has ceased to visit Bangkok since August, 1914, and, as a consequence, there has been a large increase in Norwegian and British shipping. The chief products of Siam are rice, teak, and tin (from Lower Siam). The area under rice is being much enlarged by irrigation. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1924–25 rice constituted 82 per cent. and teak 4 per cent. of the exports from the port of Bangkok; while hides and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 3 per cent. *ad valorem*. Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies and sapphires, there are no important mineral products as yet. About 1,640 miles of railroads (mostly State-owned) are now open for traffic. Railways from Bangkok run to Surindr (260 miles N.E.), with an extension (13 miles) to Tha Chang, Chiengmai (462 miles N. of Bangkok), Krabinburi (100 miles E.); the southern line to Trang, on the west coast of the Malay Peninsula, was open to traffic in October, 1916, and in July, 1918, was completed to the Kedah border where junction with the Federated Malay States Railway system was effected. There is through railway connexion between Bangkok and Penang and Singapore, and the railway is being extended from Petriv to the Cambodian frontier. Good roads are few. There are 4,000 miles of telegraph lines.

	1923–24.	1925–26.
Ordinary Revenue	£8,260,000	£8,798,643
Ordinary Expenditure	8,510,000	9,172,051
Public debt (1926)		12,328,093

	1924.	1925–26.
Total imports	£14,000,000	£15,095,633
Total exports	15,234,000	18,403,869

Counsellor, Marqués de Aycenena.
1st Secretary, Señor Don Manuel de Yrclan.
2nd Secretary, Señor Don José Ruiz de Arana, Vizconde de Mamblas.
3rd Secretary, Señor Don Roberto de Satorres.
Attachés, Señores Don P. J. de Zafueta, Don E. M. Peña, Marqués de Murrieta.
Military Attaché, Lt.-Col. Don Fermin Espellargas.
Naval Attaché, Lieut.-Com. Señor Don Fernando Navarro.
Agricultural do., Señor Don Jesus Navarro de Palencia.
Consul-General, Illmo. Señor Don Enrique Gaspar, 47 Bloomsbury Square, W.C. 1.
Vice-Cons., Señor Don Pedro Lecuona; Señor Don Fernando Illera.

A Kingdom situate in the south-west of Europe, between 36°–43° 45′ N. lat. and 4° 28′ E.—9° 20′ W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 English square miles, and an estimated population, in Jan. 1924, of 21,763,000 —110 to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges —the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada,

Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquiver, the Ebro, and the Miuho. The Constitution upon which the present Government is formed is dated June 30, 1876. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the War, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1923 there were about 10,000 miles of railway open, and 69,400 miles of telegraph line. The sea-going mercantile marine over 50 tons, on Jan. 1, 1923, consisted of 1,198 steamers (1,008,890 tons) and 591 sailing vessels (97,491). In 1923, 19,500 vessels of 24,584,581 tons (displacement) entered and 16,913 vessels of 20,773,523 tons (displacement) cleared at Spanish ports.

Defence.—The authorised peace establishment, including forces in North Africa, was, in 1923, 19,827 officers and 284,212 men; in 1924 these forces were increased by 100,000 men, and the army of occupation in North Africa reached the figure of 150,000 all ranks. War strength: Field Army, first line, 300,000; second line, 450,000.

The Navy consists of 3 (15,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers; there are also 7 torpedo-boat destroyers, 20 torpedo-boats, 7 submarines, and 21 gunboats.

Education, Primary, is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Many private schools are under clerical control, and supervision is lacking. *Secondary* High Schools are in each province, but the curriculum is defective. *Universities* at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

	1925–26. *Pesetas.*†

BRITISH CHAMBER OF COMMERCE FOR SPAIN, 8 Rambla de los Estudios, *Barcelona* (Branch, 9 Calle Marqués de Cubas, *Madrid*).

Madrid, 1,150 miles; transit, 45 to 50 hours.

THE BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Iviza, and Formentara; the total area is 1,935 square miles, with a population (1923) of 342,462. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CEUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of 35,219.

THE CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 473,497. The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Teneriffe.

Spanish Colonies.

The Spanish Colonies (exclusive of Ceuta and the Canary Islands, which form an integral part of the kingdom) consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

FERNANDO PO (*Fenando Póo*) lies in the Bight of Biafra in 3° 12′ N. lat. and 8° 48′ E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. Total population 20,650. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies of the island of Fernando Po are:—

Annobon Island (*Anno Bom*), in the Gulf of Guinea, in 1° 24′ S. lat. and 5° 35′ E. long.; population 1,391.

Corisco Islands, consisting of Corisco, Bata, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce. Total population 96,072.

RIO DE ORO is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between 21° 20′–26° N. lat., and extending eastwards to about 13° W. long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs; population 253.

Rio Muni (or *Spanish Guinea*) is a coastal settlement of West Africa between Cameroon and French Congo (1° N.—2° 10′ N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast.

SPANISH MOROCCO. — Spain exercises a protectorate over a part of Northern Morocco (*see* "Morocco") and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements.

Melilla is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. The population is 50,170.

Alhucemas is a settlement on the bay of that name, and includes six islands; population 322.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 398.

Spanish Southern Morocco.— *Ifni*, on the Atlantic coast of Morocco, about 100 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 328.

THE SUEZ CANAL.

The Suez Canal.—The *Compagnie Universelle du Canal Maritime de Suez* is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1922, £19,740,125). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a minimum width of 45 metres (147 ft. 8 in.), having cost 855,522,662 francs to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 9·75 metres (32 feet). The average time for the transit through the canal is 15 hours 20 minutes. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether

armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest).

British Directors, Viscount Inchcape, P.C., G.C.S.I., G.C.M.G., K.C.I.E. (*Vice-President of the Company*); Sir Aubrey Brocklebank, Bt.; Sir Fredk. Green, K.B.E.; Rt. Hon. Sir R. S. Horne, G.B.E., K.C., M.P.; T. Harrison Hughes; Oswald Sanderson; Sir E. Wyldbore-Smith.

Representing H.B.M. Govt., Sir Ian Malcolm, K.C.M.G.; Sir J. T. Davies, K.C.B., C.V.O.; The Earl of Cromer, G.C.I.E., C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1915, with the percentage of British vessels:—

Year.	No. of Vessels.	Net Tons.	British Tonnage.
			%
1915	3,708	15,266,155	76·3
1916	3,110	12,325,347	79·6
1917	2,353	8,368,918	73·6
1918	2,522	9,251,601	79·5
1919	3,986	16,013,802	70·9
1920	4,009	17,574,657	61·7
1921	3,975	18,118,999	62·9
1922	4,345	20,743,245	64·5
1923	4,621	22,730,162	62·8
1924	5,122	25,109,882	59·7
1925	5,337	25,761,935	59·9

The tonnage of the *merchandise* carried was 25,776,000 tons in 1913; 17,047,000 tons in 1920; and 26,578,000 tons in 1925. Details of the nationality of the vessels passing through the Canal in 1925 are appended:—

	No. of Vessels.	Net Tons.	Per cent. (Tonnage).
British	3,099	16,016,439	59·9
Netherlands	526	2,699,365	10·1
German	359	1,791,228	6·7
French	331	1,628,215	6·1
Italian	360	1,416,386	5·3
Japanese	188	1,066,941	4·0
United States	132	811,803	3·0

Danish	83	359,918	1·4
Swedish	57	262,903	1·0
Greek	54	166,426	0·6
Spanish	22	68,478	0·3
Russian	6	35,080	0·1
Yugo-Slav	7	24,444	0·1
Finnish	7	21,340	0·08
Belgian	4	12,720	0·05
Portuguese	7	5,423	0·02
Egyptian	2	1,856	0·007
Siamese	2	1,340	0·005
Totals	5,337	26,761,935	100

The transit receipts in 1870 were 5,718,756 fr., and in 1925, 398,458,609 fr.

The rate of transit dues as from April 1, 1925, is 7 fr. 25c. per ton, and 4 fr. 75c. for vessels in ballast.

The net dividends for the year 1925 amounted to 300 fr. on the ordinary 250 fr. shares, and 294·150 fr. on the Actions de Jouissance.

The 3,099 British vessels included in the total for 1925 are grouped under the following categories:—

	No.	Net Tonnage.
Merchant vessels	2,088	10,298,346
Mail steamers	376	2,790,469
Warships and transports	165	831,25
Government chartered vessels	35	212,659
Vessels in ballast	435	1,883,750
	3,099	16,016,439

SWEDEN.
(Sverige.)

King of Sweden of the Goths and the Wends, Gustaf V., *born* June 16, 1858; *suc.* December 8, 1907; *mar.*, Sept. 20, 1881, Victoria, dau. of Grand Duke of Baden, *born* August 7, 1862 (and has issue 2 sons).

Vice-Consuls, O. C. G. Lundquist; Harry Eriksson.
Attaché, R. Kumlin.
Chancellor, O. Gad.
Swedish Church, Harcourt Street, Marylebone Road, W. 1.

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 173,105 square miles, and a population, Dec. 31, 1925, of 6,053,562, nearly all Protestant. This area includes the great lakes of Hjällmaren, Mälaren, Vänern, and Vättern. Nearly 40 per cent. of the population are devoted to agriculture, about 60,000 being owners and 70,000 tenants of the land they cultivate. The country may be divided into three separate districts—the northern, forest; central, mining and agricultural;

the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, rye, barley, wheat, potatoes, roots and grasses. The forests are very extensive, covering over one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphite and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich: iron of excellent quality; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Lulea on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Scania (Skåne). The chief imports are coffee, tobacco, and other ordinary colonial produce, coal, cloth, yarn, wool, cotton, skins, manure, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c. In 1925 the exports of wood pulp and paper were 1,781,000 tons.

Railroads 9,988 miles in length (of which 3,756 are the property of the State) were open on Jan. 1, 1926; and 50,114 miles of telegraph wires (inclusive of 22,207 railroad telegraph wires), 144 control stations, and 1,916 railroad and 1,533 other telegraph stations. There were at the same date 497,957 miles of telephone wires.

Defence.—Service in the *Army* is universal and compulsory. The peace effective is about 95,000 trained men, which can be raised to war strength of about 380,000. The *Navy* consists of 57 fighting vessels (390 guns), 13 being ironclads, with submarines, submersibles, and some training ships, &c.

Education.—(i.) *Primary:* Compulsory and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics and navigation. (iv.) *Universities:* Lund, Uppsala, and private faculties in Stockholm and Gothenburg.

The Helvetia of the Romans, a Federal

* At par, the Crown=1*s.* 1½*d.* (18·159 *Kronor*=£1).

* The President is elected in December, and remains in office from 1 Jan.—31 Dec.; he is *generally* succeeded by the Vice-President.

Republic of Central Europe, situated between 45° 50′—47° 48′ N. lat. and 5° 58′—10° 30′ E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 3,888,320 in 1920, who are divided between Roman Catholics, 41 per cent., and Protestants, 57 per cent., Jews numbering 21,000, and others 43,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romansche (Grisons), 1½ per cent. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-fifth of the whole surface. The chief industries comprise the manufacture of silks, artificial silks and silk ribbons, wool, cotton and cotton ribbons, linen, embroideries, strawplait, machines, paper, chemicals, chocolate, condensed milk, dyestuffs, and tobacco; while the metallurgical, electrical and pharmaceutical industries are also extensive; clocks and watches have long been the staple products of Geneva and Neuchâtel. In 1923 there were 3,593 miles of railway in working order, 25,338 miles of telegraph line, 426,460 miles of telephone line, and 3,929 post-offices.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 198 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 27,000 francs; the Vice-President and other members of the Federal Council 25,000 francs each. The members of the Federal Council are elected for three years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council.

Defence: Militia. Active Army, 12 yrs.; initial trg., 65–90 days. Subsequently 11 days per ann.; *then* Landwehr, 8 yrs.; 1 trg., 11 dys. for dismtd. branches only; *then* (Landsturm to age 48). *War Strength*, 140,600; Landwehr, 65,000; Landsturm, 57,000.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary:* Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary:* Age 12–15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

SYRIA AND LEBANON.

Syria.—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia. By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate (Cilicia was restored to Turkey by the French in 1922).

The Emir Feisal (son of the ex-King of the Hedjaz and, since 1921, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as Independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned

* Estimated.

King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (*q.v.*). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beyrout. The latter three States were later grouped together to form the *Syrian Federation*, with a nominated Council. The Federation has now been abolished. *Damascus and Aleppo* have been amalgamated into a single State (the details of the amalgamation have not yet been worked out), and the *State of the Alaouites* again becomes independent. The actual form of government differs in each of the States, but the guiding principle in each is real and effective French control.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, and its Northern limits are still undefined. The present temporary Northern boundary between Syria and Asiatic Turkey was defined in the agreement between France and the Kemalists, and is roughly as follows:—From a point immediately S. of Payas (on the Gulf of Alexandretta) to Meidan Ekbes (the railway station and environs remaining in Syria), thence S.E. to the railway station of Tchoban Bey, leaving the districts of Marsova to Syria and of Karnaba and Killis to the Kemalists; thence along the Baghdad Railway to Nussebin and along the old highway to Jizireh ibn-Omar on the Tigris (the districts of Nussebin and Jizireh-ibn-Omar remaining in Kemalist territory, with the roadway between these two places). The E. boundary separates Syria from Mesopotamia along a line running roughly N.E. from the E. side of Jebel Druze to a point 15 miles S.E. of Jezrieh Ibn Omar (80 miles E. of Mardin); the S. boundary follows a line from Ras el Nakoura on the coast, N. of Akka, and running S.E. by E. to the Hedjaz railway line S. of Nasib, with a projection northwards to include the head waters of the Jordan, the Hule Lake and the Lake of Tiberias being included in Palestine. Within these limits, the estimated area is 100,000 sq. miles, with a population of about 3,000,000, of whom the greater number are Orthodox Muhammadans, with a proportion of Shiites and Druses. The products of Syria are wheat, tobacco, fruit, wine, silk, liquorice, copper and brass goods; there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier, running parallel with the coast. The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen. The principal Syrian towns are Damascus (est. pop. 300,000), Aleppo (250,000), Homs (70,000), and Hama (50,000). The administrative capital is at Beyrout (Grand Lebanon). Damascus contains the Mosque of the Ommayedes (where is the tomb of Saladin), and in the south-western quarter is "The Gate of God," through which the pilgrimage to Mecca passes annually, while the "street called Straight" (Acts ix, 11) runs E. to W. through the city. Damascus is an important commercial centre, and among its industries are metal work and mother-of-pearl inlay, and also native-made silk and cotton stuffs. At Baalbek (Heliopolis), on the western slopes of the Anti-Lebanon range (35 miles N.N.W. of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world (60 × 17 × 14 feet), weighing 1,500 tons. The railway system consists of a line from Beyrout to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, *viâ* Homs, was re-opened in 1921. A narrow-gauge tramway runs from Mameltein along the coast. From Damascus there is railway communication with Palestine, and with Transjordania (Kerak) and The Hejaz, *viâ* Deraa, and the Syrian railways link up with the Baghdad railway at Aleppo. Road communications between Beyrout and Baghdad, *viâ* Damascus, have been recently developed by the opening up of the desert motor routes. Baghdad is now within 24 hours of Beyrout.

In the Autumn of 1925, following a revolt of the Jebel Druze in the Hauran, rioting took place in Damascus on Oct. 18, and the city was bombarded by French artillery, when part of the Azm palace and parts of the Street Called Straight were destroyed by shell-fire or burned. Soon after the receipt of news of the disturbances in Syria, the Governor-General (Gen. Sarrail) was recalled by the French cabinet and in Sept. 1926 the revolt had not been completely suppressed.

Beyrout is the residence of the French High Commissioner and the capital of the Lebanese Republic. Damascus was the Federal capital, and has become that of the new Unified State.

The Lebanese Republic (the former Turkish provinces of Lebanon and Beirut), declared a State by the High Commissioner, under the title of *Etat du Grand Liban*, in 1920, extends along the Mediterranean littoral from the Palestine frontier to Nahr el Kebir (15 miles N. of Tripoli) and is bounded on E. by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about 120 miles, and its width varies from 30 to 35 miles. The estimated area of the Lebanese Republic is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives, wheat, grapes, oranges and mulberry-trees; the live stock are numerous and one of the principal sources of wealth. The Capital is Beyrout (pop. 150,000), which is the chief seaport and commercial centre, and also the administrative capital of Syria. Tripoli is the next important town and seaport. Minor ports are Junieh, Tyre and Sidon. The national flag is the French tricolour with a Cedar of Lebanon on the white band.

Governor of Syria, M. Henri de Jouvenel.
President of the Lebanese Republic, M. Charles Debbas.

The Ottoman Turks are derived from Central Asian tribes, who were converted to the Muhammadan faith in the seventh century. These Muhammadan tribes attacked and conquered the Asiatic Provinces of the Byzantine (Eastern Roman) Empire, and by the middle of the fourteenth century they had spread from Asia Minor into South East Europe. In 1453 they captured Constantinople, and spread over the whole of the Balkan Peninsula, their name of Osmanli, or Ottoman Turks, being derived from Othman, or Osman (1299–1326), a notable Turkish leader in the fourteenth century. Early in the sixteenth century the Ottoman Empire was spread over Egypt and northern Africa, and penetrated northward into Hungary, a great part of which was incorporated with the Turkish dominions until 1699, when the *Peace of Carlowitz* freed the country from Turkish rule. In the nineteenth century the outlying African dominions, with the exception of Tripoli, broke away from their suzerain, or were occupied by other Powers, and in the latter part of the century the northern states of the Balkan Peninsula asserted their independence, under guarantees of the Christian Powers. The outcome of these political upheavals was a demand for better government in the remaining dominions of the Sultan. During the process of constitutional reforms, which drove the Sultan Abdul Hamid (1876–1908) from the throne, war broke out between Italy and Turkey, and Tripoli and Benghazi were ceded to Italy under the *Treaty of Lausanne* (Oct. 12, 1912). These events were followed in the autumn of 1912 and the early months of 1913 by a disastrous war with the states of the Balkan League (Bulgaria, Montenegro, Serbia and Greece). At the outbreak of hostilities the European dominions of Turkey extended westwards to the Adriatic and northwards to Bosnia-Herzegovina (Austria), thus including the districts known as Macedonia, Thrace, and Albania. By the *Treaty of London* (1913), the north-western boundary of European Turkey was a line drawn from Enos, on the Adriatic coast, to Midia, on the Black Sea, thus excluding Adrianople, which had capitulated (after a long siege) to the Bulgarian forces. At the outbreak of the second Balkan war (in which Serbia and Greece were aided against Bulgaria by Rumania), Turkey re-occupied Adrianople, thus recovering a part of the lost dominions. In the Great War of 1914-1918, Turkey threw in her lot with the Central Powers and made unsuccessful attacks on Egypt and South Russia. Great Britain sent an expedition to Gallipoli (which was withdrawn) and to Mesopotamia and Palestine, which freed those countries and Syria from Turkish rule, while various tribal revolts in Arabia ended the Turkish suzerainty in that peninsula. On Oct. 30, 1918, Turkey surrendered unconditionally before the conquests of the various Anglo-Indian and Imperial British columns and their Arabian allies. The final peace settlement with Turkey was the subject of protracted negotiations. The first definite proposals were embodied in the *Treaty of Sèvres*, which was signed on Aug. 10, 1920, but was never ratified. The rise of the Turkish Nationalist movement in Asia Minor, which brought into existence a *de facto* Government at Angora, and the defeat of the Greek armies in August–September, 1922, finally destroyed any possibility of the *Treaty of Sèvres* being brought into force.

Treaty of Lausanne.—As a result of the Peace Conference, which met at Lausanne from November, 1922, until February, 1923, and again from April to July, 1923, a treaty was signed there on July 24, 1923. This treaty has been ratified by Turkey and Greece, and came into force as between Great Britain and Turkey on Aug. 6, 1924. The main provisions of the treaty and various instruments annexed to it are that Turkey retains Eastern Thrace, including Adrianople, while ceding Syria, Palestine, Mesopotamia and the rest of Arabia. The northern boundary of Mesopotamia is to be settled by negotiation within nine months, or failing that by reference to the League of Nations. Italy is confirmed in possession of the Dodecanese, and Greece in possession of the islands formerly held by Turkey in the Aegean, except Imbros and Tenedos. Turkish rights over Egypt, the Sudan and Cyprus come to an end. A special convention demilitarises zones on either side of the Bosphorus and Marmora, and lays down rules for preserving the freedom of the Straits in peace and war. These rules are to be applied under the auspices of the League of Nations by a commission composed of representatives of Turkey, France, Great Britain, Italy, Japan, Bulgaria, Greece, Rumania, Russia, Serbia and, in the event of her accession, the United States. The minorities clauses are the same as in recent European treaties. Turkey cedes ground for military cemeteries at Anzac and elsewhere. The old extraterritorial privileges of foreigners ("Capitulations") are abolished, but a special convention concluded for seven years provides that foreigners residing or trading in Turkey are to be subject to no taxes or disabilities not imposed on Turks. A commercial convention concluded for five years establishes an import and export tariff and lays down that there shall be no discrimination against foreign shipping and trade.

Turkey in Europe (10,000 sq. miles, estimated population 2,000,000) thus consists of Eastern

Thrace, including the cities of Constantinople and Adrianople, and is separated from Asia by the Bosphorus at Constantinople and by the *Dardanelles* (Hellespont)—about 40 miles in length, with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (400,000 sq. miles, estimated population 12,000,000) comprises the whole of Asia Minor, and extends from the Aegean Sea to the western boundaries of Georgia, Erivan and Persia, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria, Arabia and Iraq. This area corresponds approximately with *Anatolia* ("Land of the Rising Sun," or Orient) and includes *Cilicia* round the Gulf of Alexandretta, assigned to France by the Allies, but restored to Turkey by the French. Cilicia is generally fertile and produces wheat, cotton, wool, sesame, &c., and is capable of considerable agricultural development. Alexandretta or Iskanderun, the chief port and an important strategical centre, secures the command of the Beilan Pass. Cilicia was handed over to the Kemalist forces by the French on Jan. 4, 1922. The district is now part of the Turkish Republic, and is under the control of the National Assembly at Angora.

Government. — Sultan Muhammad VI. Vehiduddin fled to Malta on Nov. 20 without, however, abdicating, and the Heir Presumptive, Abdul Mejid Effendi, succeeded, after election by the Grand National Assembly at Angora, without any temporal functions and with the title of Caliph. Abdul Mejid was a direct descendant from Othman, and bore the "sword of Allah" girded upon Sultan Selim in 1517. On October 29, 1923, the Grand National Assembly proclaimed Turkey a republic and elected Ghazi Mustafa Kemal *Pasha* President of the Republic; on March 3, 1924, the Grand Assembly passed a law abolishing the office of Caliph and ordering the Caliph and the other members of the dynasty to leave Turkish territory. The Caliph and his family, from which for over four centuries the "Commander of the Faithful" had been drawn, were expelled from Turkey on March 4, 1924, and the remaining members of the dynasty within the next few weeks. The *Grand National Assembly* is a single chamber legislature, which delegates its executive power to ministers acting in its name and responsible to the Assembly for their actions.

Religion.—The religion of the State is by law Muhammadan, and the majority of the inhabitants are Muhammadans, but there are numbers of Christians (of the Latin and Eastern rites) and Jews. Education is nominally compulsory and free. There are primary schools, training schools for teachers, and at Constantinople a university, founded in 1900.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still very primitive in centres that are not served by railways. The peasant is, however, gradually adapting himself to the more modern methods, particularly in the vilayet of Aidin, Adana, and Messina. Cereals are abundantly produced, as well as tobacco, raisins, figs, cotton, opium, nuts, olives valonea and liquorice root, and many varieties of fruit are grown. Samsoun is the chief centre of the tobacco growing industry, which is also of importance at Smyrna, Ismidt and Brousa. The export of merchandise was considerable before the War, and consisted principally of opium, tobacco, cotton, carpets, gums, mohair, wool, raisin and figs, and to a less extent coffee. The forests should be a source of wealth, but scientific exploitation is disregarded; beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Broussa and Ismidt. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver, and arsenic are among the minerals produced. The principal manufacture is carpet-weaving. Before the War the total exports were valued at about £T25,000,000 annually, and the imports at about £T45,000,000 (£T1 = £1 0s.). In 1913–14 the share of Great Britain in the import trade of Turkey was approximately 20 per cent.. In 1923 it had fallen to 17·3 per cent., and for the first half year of 1924 to 17·3 per cent.

Communications.—About 300 miles of railway remain to Turkey in Europe. In Asia Minor there are 1,860 miles, consisting of the Anatolian Railway (645 miles), Baghdad Railway (393 miles), Smyrna-Aidin (376 miles), Smyrna-Cassaba (420 miles), and Mudania-Brussa (26 miles). There are electric trams in Constantinople and Smyrna.

Turkish Finances.—The Budget estimates for the financial year 1926–27 showed expenditure amounting to £T232,761,930 as against revenue estimated at £T218,315,245, thus leaving a deficit of £T15,146,615. The National Debt of Turkey at the commencement of the financial year 1923–24 amounted to £441,503,196, as against £127,561,342 at the same date in 1913, both amounts being exclusive of the kilometric guarantees for railways and pensions; but the amount stated for 1923–24 is subject to considerable modification, as the final repartition of the pre-war public debt of Turkey will eventually be distributed between Turkey and her detached territories. The *Ottoman Debt* is administered by a Council: Sir Adam Block, K.C.M.G. (*Delegate of British and Netherlands Bondholders*); M. F. de Closières (*French*), M. B. Nogara (*Italian*), Djavid Bey (*Turkish*), A. H. Reid (*Imperial Ottoman Bank*). *Imperial Commissary*, Zekiai Bey; *General Manager*, M. Grasset. Sir Adam Block and M. de Closières preside alternately.

	1924.
Total Imports	£T195,000,000
Total Exports	160,000,000
Imports from U.K.	£4,650,000
Exports to U.K.	2,500,000

CAPITAL OF TURKEY, ANGORA, the headquarters of the Republican Government, an inland town of Asia Minor, about 200 miles E.S.E. of Constantinople, with a population in 1923 of about 65,000. Angora (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple dedicated to Augustus (now in ruins) contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. It is reported that a new city is to be laid out, on the lines of Washington, D.C. CONSTANTINOPLE, the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire, A.D. 364;

population estimated at 1,000,000. Other cities are Smyrna (70,000), Broussa (60,000), Konia (60,000), Adana (60,000), Adrianople (50,000), Scutari in Anatolia (50,000), Cæserea (50,000), Marash (50,000), Sivas or Sebasteia (45,000), Trebizond (30,000). The population of Asia Minor has been greatly reduced by the exodus of Greeks and Armenians following upon the Turkish capture of Smyrna.

FLAG: Red, with white crescent.

The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°–35° S. and long. 53° 25′–57° 42′ W., containing an area of 72,180 square miles, and a population on Dec. 31, 1923, of 1,662,116.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug. 25, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Treinta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated, with a Constitution of Sept. 10, 1829. The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office. By an amendment to the Constitution (which came into force March 1, 1919) an administrative council was appointed to share the Executive power with the President.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the Rio de la Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Mirim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

Wheat, barley, and maize are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (8,431,623 in 1924) and sheep (14,443,341 in 1924), the wool of which is of excellent quality. Gold mines exist at Cuñapirú. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and bloodstock. The principal imports from the U.K. are woollen and cotton goods, hardware, and coals. There are 1,499 miles of railway open (1926), of which 1,486 miles are in British hands, and three short lines owned by the State; and 4,850 miles of telegraph, with 19,039 miles of telephones. There were 995 post-offices, dealing with 116,687,496 letters and packets. The language spoken is Spanish.

	1924–25.	1926–27.
Revenue	$45,182,207	$48,139,893

Consul-General, Liverpool, S. A. Mendoza.
Consulates at *Birmingham, Manchester, Cardiff, Glasgow, Hull, Newport*, and *Southampton*.

The most northerly Confederation of South America, situated approximately between 1°40′ S. lat. and 12° 26′ N. lat. and 59° 52′—73° 15′ W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1925 gave the population as 3,026,878.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. Margarita has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonzo de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Lastoguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at Caracas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822–1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1892, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcón divided the country into States and formed them into a Federal Republic. The present constitution rests upon the fundamental law of June 13, 1919, under which the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years; a new Constitutional Law of 1925 left that position unchanged.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincote and de Usupamo enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the north-east. The Orinoco is navigable for large steamers from its mouth for some 700 miles, and by smaller

vessels as far as the Maipures Cataract, some 200 miles further up stream. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The costal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (200 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from April to October, the dry cooler season from November to March.

The principal industries are agriculture and cotton raising. The oilfields are of increasing importance, the production in 1923 being 640,000 metric tons, and in 1924, 1,330,912 metric tons. The principal imports are cotton prints and shirtings and cotton drill, mainly from the U.K., and hardware, principally from the U.S. The principal articles of export are coffee (46,433 metric tons in 1923); cacao (22,420 metric tons in 1923); goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer.

In 1926 there were about 680 miles of railway in operation.

Spanish is the language of the country.

The area and population of the Kingdom of the Serbs, Croats, and Slovenes are approximately as under:—

District.	Sq. Miles.	Est. Pop.
Serbia	34,500	5,000,000
Montenegro	5,800	500,000
Croatia and Slavonia	16,418	2,700,000
Banat (part)	6,000	800,000
Bosnia	16,233	1,630,000
Herzegovina	3,527	270,000
Carniola (part)	2,500	350,000
Styria (part)	1,900	350,000
Total	86,878	12,600,000

Montenegro (*Tzrna-Gora*) was formerly a province of the old Serbian Empire. On Nov. 29, 1918, the National Skupshtina deposed King Nicholas, and a decision was made to reunite Montenegro with Serbia. King Nicholas died on March 21, 1921, and the union of the country with Yugo-Slavia is now an accomplished fact. The chief town is Cettinje (pop. 5,000) and the ports are Antivari and Dulcigno.

Old Serbia has no seaboard, but the whole coast of Croatia, Dalmatia, and Montenegro is included in the Yugo-Slav Kingdom, and access is thus possible to the Adriatic at any point of the littoral of these territories. By a convention with Greece of May, 1914, similar access is obtained to the port of Salonika, on the Aegean; this convention was renewed in another form in 1923, a free zone in Salonika harbour being thus secured to the S-C-S. Kingdom. In 1922 there were about 6,000 miles of railway in operation. The Danube forms a great commercial highway, the Save and Tisa being also extensively used

by river steamers. In January, 1923, a French company secured a contract for an aerial passenger and mail service between Paris and Belgrade. The Army on a peace footing consists of 130,000 officers and men, the war strength being about 250,000.

The religion of the state is Greek-Orthodox and Roman Catholic. Primary education is free and nominally compulsory, but the attendance does not exceed 25 per cent. of the young. The State also maintains Secondary and Girls' High Schools. The University is at Belgrade.

The principal industry is agriculture, and the crops of 1922 were of average quality, enabling a considerable surplus of wheat, barley, oats, rye and maize (over 660,000 tons of last named) to be exported. The product of the vines also permitted a surplus to be exported. Of the exports of all kinds in 1922, Italy took 28 per cent. and Austria 23 per cent.

Revenue, 1925-26	*Dinars*12,534,000,000

CIVIL LIST PENSIONS, 1925-26.

A list of Pensions granted during the year ended March 31, 1926, under the provisions of the Civil List Act, 1910.

MR. LEWIS SAUL BENJAMIN (Lewis Melville), in recognition of his literary services £75

MISS HELEN LOUISA MARGARET BURGE and MISS AMY RACHAEL WATSON BURGE, in recognition of the public, literary, and ecclesiastical services of their brother, the Right Rev. Hubert Murray Burge, M.A., D.D., formerly Bishop of Oxford, each £50

MRS. MARIAN DIBDIN, in recognition of the scientific work of her husband, the late Mr. William Joseph Dibdin, F.I.C., E.C.S. £125

MRS. ISABELLA JANE FRITH, in recognition of the services rendered to art by her husband, the late Mr. William Silver Frith £125

MRS. BEATRICE MAUD EMILIA HERON-MAXWELL, in recognition of her literary work £75

LADY DOROTHEA HOSIE, in recognition of the public, literary, and scientific services rendered by her husband, the late Sir Alexander Hosie, M.A., LL.D., F.R.G.S. £100

MRS. ELIZABETH JAPP, in recognition of the services rendered by her late husband, the late Professor Francis Robert Japp, F.R.S., LL.D., to the advancement of organic chemistry and chemical education £100

MRS. MARIAN CHARLES TREBOETH JONES, in recognition of the public, theological and literary services of her father, the late Rev. Thomas Charles Edwards, D.D. £75

MRS. MARIA LUCY ALICE LONGFORD, in recognition of the public and literary services of her husband, the late Professor Joseph Henry Longford, D.Litt. £100

LADY (MABEL WALDRON) PIGGOTT, in recognition of her public services and of the services rendered by her husband, the late Sir Francis Piggott, M.A., especially in the study of international law £50

MISS CONSTANCE ISABELLA STUART SMITH, in recognition of her valuable services in the promotion and advancement of social welfare £150

MRS. EDITH MARY WESTLAKE, in recognition of the literary, archæological, and ecclesiastical services of her husband, the late Rev. Herbert Francis Westlake, M.V.O., M.A., F.S.A., Minor Canon and Custodian of Westminster Abbey £125

THE International Institute of Agriculture at Rome was originally founded in 1905 as the result of a Convention made between the representatives of 40 different countries. The number of nations subscribing to the Convention has now risen to 73, and not only may the Institute fairly be regarded as, in a sense, the pioneer of official international institutions, but it is in fact to-day the most representative of all. It is estimated that the countries and colonies adhering to the Institute represent over 90 per cent. of the population of the world.

The following is a complete list of the countries now adhering to the Convention of 1905, and therefore represented at the Institute and contributing to its funds:—

Abyssinia.
Argentina.
Austria.
Belgium.
  Belgian Congo.
Brazil.
Bulgaria.
Chile.
China.
Colombia.
Costa-Rica.
Cuba.
Czechoslovakia.
Denmark.
Ecuador.
Egypt.
Estonia.
Finland.
France.
  Algeria
  French West Africa.
  Indo-China.
  Madagascar.
  Morocco.
  Tunis.
Germany.
Great Britain and
  Northern Ireland
  Australia.
  British India.
  Canada.
  Irish Free State.
  New Zealand.
  Union of South
  Africa.
Greece.
Guatemala.
Haiti.
Hungary.
Italy.
  Eritrea.
  Cyrenaica.
  Italian Somaliland.
  Tripoli.
Japan.
Latvia.
Lithuania.
Luxemburg.
Mexico.
Netherlands.
  Dutch East Indies.
Nicaragua.
Norway.
Panama.
Paraguay.
Persia.
Peru.
Poland.
Portugal.
Rumania.
Russia.
San Marino.
Siam.
Spain.
Sweden.
Switzerland.
Turkey.
United States.
  Hawaii.
  Philippine Islands.
  Porto Rico.
  Virgin Islands.
Uruguay.
Venezuela.
Yugo-Slavia.

The essential objects of the Institute are defined in Article 9 of the original Convention as follows:—

The Institute, confining its activities to the international sphere, shall:—

(*a*) Collect, examine and publish, with the least possible delay, statistical, technical and economic information with regard to farming, crop and live-stock production, trade in agricultural products and the prices current on the different markets;

(*b*) Communicate all such information to persons interested as soon as possible;

(*c*) Indicate the wages paid for farm work;

(*d*) Record any new diseases of crops which may have appeared in any part of the world, showing the countries affected by such diseases, their progress and, where possible, any effective measures for their control;

(*e*) Study questions concerning agricultural co-operation, insurance and credit in all their forms; collect and publish all information that may be useful in the various countries for the organisation of systems of agricultural co-operation, insurance and credit;

(*f*) Submit, should occasion arise, for the approval of the various Governments, measures for the protection of the common interests of farmers, and for the improvement of their conditions, after the preliminary study of all requisite sources of information, such as resolutions passed by international or other agricultural Congresses and Societies, or by scientific and learned bodies, &c.

All questions affecting the economic interests, the legislation or the administration of any particular State are outside the competence of the Institute.

In accordance with the terms of the Treaty, the Institute has its seat in Rome, and is established in a palace in the Villa Borghese, specially erected through the munificence of H.M. Victor Emmanuel. The Governing Body consists of a Permanent Committee of Delegates, resident in Rome, acting as the executive of a larger body of national representatives, known as the General Assembly, which normally holds biennial meetings at the Institute. The detailed work is distributed between the following offices: (1) the General Secretariat or administrative department, with which are also particularly connected the Section of Agricultural Legislation and the Library; (2) the Bureau of General Statistics; (3) the Bureau of Agricultural Science; (4) the Bureau of Economic and Social Questions.

The life of the Institute as an advisory international institution covers a period during the greater part of which, owing to the almost universal state of war, it was a matter of practical impossibility for definite action to be undertaken for the promotion of international understandings in regard to agricultural questions, such action being among the chief duties of the Institute. It has, however, exercised considerable influence upon the organisation of agricultural statistics in the various countries, and has taken the initiative in promoting international conferences on plant diseases, olive-fly and locust control, and agricultural meteorology, which have resulted either in the drafting of conventions, or the establishment of permanent organisations.

As occasion demands, the Institute collaborates with the League of Nations and the International Labour Office, and sent experts in 1922 on equal terms with those bodies to the Economic Congress at Genoa. A joint Standing Committee, including three representatives of the Governing Body of the International Labour Office, and three representatives of the Permanent Committee of the Institute, with power to invite expert members from either institution and others to attend meetings, was established in 1922. The Institute has also developed close relations with non-official international institutions dealing with agricultural questions, and is represented at the most important international agricultural congresses.

The general diffusion of information on agricultural questions is mainly carried out by means of periodical publications, issued in English and French and, in some cases, also in Spanish, Italian and German.

The Institute publishes two Year-Books, the *International Year-Book of Agricultural Statistics* and the *International Year-Book of*

Agricultural Legislation, a monthly bulletin entitled the *International Crop Report and Agricultural Statistics*, and two quarterly reviews, the *International Review of the Science and Practice of Agriculture* and the *International Review of Agricultural Economics*. These periodical publications are from time to time supplemented by monographs based on special research or specially acquired information. The publications of the Institute may be obtained in London from the Ministry of Agriculture and Fisheries, Messrs. P. S. King & Son, or by direct application to the Institute.

The Library of the Institute, which contains nearly 100,000 volumes and pamphlets, and 70,000 unbound volumes of periodicals from all parts of the world, offers quite unusual facilities for the study of agricultural problems, and may be freely consulted by all properly accredited persons. Some 3,500 periodicals are regularly received by the Institute Library.

During the current year (1926) the Eighth Meeting of the General Assembly was held, and was followed by a World Forestry Congress which was of a particularly representative character. The year has also seen the establishment of a number of commissions of experts to advise the Permanent Committee on particular phases of its work. These commissions together form a body known as the International Scientific Council of the Institute. Very considerable progress has been made with the scheme for the World Agricultural Census in 1930-31, for which marked support has been secured in the principal countries. An important feature in the programme of 1927 is an International Conference of Wheat Experts for the consideration of the technical and other problems of grain production.

President: His Exc. Prof. G. De Michelis, Delegate of Italy.
Vice-President: M. Louis-Dop, Delegate of France.
British Delegate: R. J. Thompson, C.B., O.B.E.
United States Delegate: Prof. Asher Hobson.
General Secretary: Prof. Carlo Dragoni.

THE NOBEL PRIZES, 1908–1926.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees for distribution to those who have contributed most largely to the common good, and is divided into five shares, which are devoted to workers in the domains of (*a*) Physics, (*b*) Chemistry, (*c*) Medicine or Physiology, (*d*) Literature, and (*e*) the Preservation of Peace. The testator was the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. *The first awards were distributed on the fifth anniversary of Nobel's death*, Dec. 10, 1901 (for awards before those recorded below *see* former issues of WHITAKER). The awarding authorities are the Swedish Academy of Science—(*a*) Physics, (*b*) Chemistry; the Stockholm Faculty of Medicine—(*c*) Medicine or Physiology; the Swedish Academy of Literature—(*d*) Literature; and a committee of five persons elected by the Norwegian Storthing—(*e*) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from Nobelstiftelsens Styrelse, Sturegatan 17, Stockholm, Sweden.

LIST OF AWARDS (Value about £6,500 each).

WORLD'S PRODUCTION OF CEREALS.

WHEAT.

Country.	Production (Millions of Quarters of 480lb.).	
	Actual 1925.	Estimated 1926.
U.S.A.	84	105
Soviet Union	73	75
Canada	51	45
India	41	41
France	41	31
Italy	30	27
Argentina	27	...
Spain	20	20
Germany	15	14
Australia	14	...
Rumania	13	14
Egypt & N. Africa	13	11
Yugo-Slavia	10	10
Hungary	9	9
U.K.	7	7
Poland	7	6
Bulgaria	6	5
Czechoslovakia	5	4

The Argentine and Australian crops will be harvested only in December or later, so cannot be stated here for the current season.

The probable total world's production (1926) is 525,000,000 quarters.

RYE.

Country.	Production (Millions of Quarters of 480lb.).	
	Actual 1925.	Estimated 1926.
Soviet Union	90	90
Germany	37	34
Poland	30	24
Czechoslovakia	7	6
U.S.A.	7	5
France	5	4
Hungary	4	4
Spain	4	4
Sweden	3	3
Lithuania	3	2

The probable total world's production (1926) is 190,000,000 quarters.

BARLEY.

Country.	Production (Millions of Quarters of 400lb.).	
	Actual 1925.	Estimated 1926.
Soviet Union	28	30
U.S.A.	26	24
India	15	15
Japan and Korea	15	13

Questions of the Day.

BETTING TAX.

A NOTABLE change in national fiscal policy is marked by the introduction of a tax on betting, which came into force on November 1, 1926. The proposal, which was included in the Finance Bill, aroused much opposition, particularly from religious bodies and people connected with the racing industry. In order to obtain £6,000,000 from this source the Chancellor of the Exchequer originally proposed a tax of 5 per cent. on all legal bets. Revised estimates, however, showed that the Chancellor's estimate of betting turnover was too low, and the proposed amount of the tax was therefore reduced. The Act provided that duty is chargeable at the rate of 2 per cent. of the amount staked in the case of bets which fulfil all the following conditions :—

(*a*) The event must be a horse race.

(*b*) The bet must be made on a ground used for the purpose of horse-racing, or any ground adjacent thereto.

(*c*) The bet must be made on a day on which horse-racing takes place on such ground.

(*d*) Both the bookmaker accepting and the person making the bet must be in personal attendance at that ground.

In the case of every other bet made with a bookmaker, the duty is at the rate of 3½ per cent. on the amount staked. The expression "bet" means any bet made with a bookmaker on any event of any kind. The bookmaker is responsible for payment of the proper duty to the Commissioners of Customs and Excise in respect of all bets made with him. There are two methods by which a bookmaker may pay the betting duty, viz., by returns to the Commissioners or by the use of Revenue tickets. Any bookmaker, whether operating in an office or on the course, may apply to the Commissioners for permission to pay by returns. Under this arrangement he must furnish returns at weekly intervals of all bets received by him and pay at such intervals the appropriate amount of duty. The bookmaker is required to keep proper books and records for official inspection. Bookmakers who do not enter into such an arrangement must pay duty by the purchase of Revenue tickets. These tickets are purchasable in books of 50 tickets in the following denominations—2*s.*, 2*s.* 6*d.*, 3*s.*, 4*s.*, 5*s.*, 10*s.*, £1, £2, and £5. Duty is payable on the number of tickets in the book at the appropriate rate of duty.

Every bookmaker must take out annually a certificate in respect of himself, and in addition an "Entry Certificate" in respect of any betting premises used by him. For each of these certificates a duty of £10 per annum is payable. Authorised officers are empowered to inspect all premises used for betting and to examine any books, accounts, vouchers, revenue tickets and other documents relating to the bookmaker's business. Heavy penalties are prescribed in the Act for contravening its provisions. With regard to illegal betting, Section 15 (2) of the Act stipulates that "Nothing in this Part of this Act shall operate so as to render lawful any betting in any manner or place in which it is at the commencement of this Act unlawful, or so as to authorise the writing, printing, publication or sending of any notice, circular or advertisement which is at that time unlawful."

THE BRITISH LEGION.

ANNUAL Conference was held in London at Queen's Hall May 23–25, 1926. The Chair was taken by F.-M. Earl Haig, President, and a message of loyalty was sent to H.M. the King from the 2,700 branches of the B.L. at home and in the Dominions. A net increase of 159 branches was reported during the year. Appeal was made for a scheme of emigration to the Dominions for unemployed ex-Service men with the co-operation of the Home and Overseas Governments. The Prince of Wales addressed the delegates, and he mentioned: "I hear that there are now 118 B.L. Relief Committees working in Southern Ireland. . . . To my mind, the most important of the Legion's several duties in the country is the finding of employment for individual ex-Service men, and especially the disabled ex-Service men." Resolutions were passed to provide for a more detailed yearly statement of accounts, no meeting of branches in political, licensed or sectarian premises, official prohibition of imitation poppies being sold on Remembrance Day, giving support to the League of Nations and Empire Day.

During the General Strike the E.C. of the B.L. issued an appeal to members: "The present state of emergency is one in which it is the duty of all loyal citizens, and men of good intent, actively to support the cause of law and order and to do everything in their power to ensure the interests of the country and uphold the Constitution." This action was questioned by the South Paddington Branch at the Conference, but the protest was defeated by an overwhelming majority.

WOMEN'S SECTION.

ANNUAL Meeting of W.S. of B.L. was held at Holborn Restaurant on April 30, with Lady Edward Spencer-Churchill in the Chair. During 1925-26, 151 new branches were established to bring total to 478. The sum of £158,417 had been expended in relief, and £14,359 in loan grants.

UNITED SERVICES FUND.

B.L. has 75 per cent. representation on Management Committee. The benevolent staffs of U.S.F. and B.L. are now in same offices and practically work together. The B.L. is concerned with relief for unemployment; the U.S.F. with relief during times of sickness.

BROADCASTING.

BROADCASTING has continued to make progress, both in the number of stations and the number of listeners. Broadcasting stations now number 21, and the number of licences in force in July last was stated by the Postmaster-General to be 2,076,000 compared with 1,387,000 a year previously. The number of licences issued in June last was 57,512 compared with 31,311 in June, 1925. It is estimated that something like one-quarter of the houses and flats in the country now possess receiving sets. No definite progress has yet been made in the direction of establishing more high-power stations which would give listeners alternative programmes; experiments were made, however, during last summer with a view to ascertaining how far it would be possible with existing apparatus to give alternative pro-

grammes over an area such as London. The recommendations of the Committee appointed under the chairmanship of Lord Crawford "to advise as to the proper scope of the broadcasting service and as to the management, control and finance thereof after the expiry of the existing licence on December 31, 1926," were in general accepted by the Government, and the coming year will see the working of the service under a public body incorporated under Royal Charter, in place of the Broadcasting Company. Among the chief recommendations of the Crawford Committee were the following:—(1) That the broadcasting service should be conducted by a public corporation acting as trustee for the national interest and holding the licence of the Postmaster-General for a period of not less than ten years; (2) That the corporation should be known as the "British Broadcasting Commission," and should consist of not more than seven or less than five Commissioners, all nominated by the Crown, the first Commissioners to hold office for five years; (3) That the entire property and undertaking of the Broadcasting Company as a going concern should be vested in the Commission on January 1, 1927, and all existing contracts and staff should be taken over by the new Commission; (4) That the Postmaster-General should remain the licensing authority and be responsible for collecting the licence fees, and that the fee of 10*s.* for a receiver's licence should be maintained; (5) That the provision for experiment and research should be generous; (6) That every effort should be made to raise the standard of style and performance in every phase of broadcasting, and particularly in music; (7) That licences should be granted to blind persons free of charge.

Notable among the transmissions of the Broadcasting Company during the past year was the broadcasting of speeches at the League of Nations Assembly. It is clear that only detailed improvements are required to make such transmissions and other international broadcasts a great success. The question of broadcasting the Chancellor of the Exchequer's Budget speech was considered by the Government, but the decision was against the proposal. The plan of the international organisation known as the Bureau International de Radiophonie, for the redistribution of wave-lengths of European wireless stations, was published in August last, and as a result of the adoption of its suggestions listeners generally should be more free from interference and "jamming" than in the past.

CALENDAR REFORM.

It has been felt that our Calendar—that Calendar that has come down with only slight alteration from the time of Julius Cæsar—might be improved, and as the matter is international, and schemes for reform have come from several countries it appears to come within the purview of the League of Nations, so that, in 1923, a Special Committee of Enquiry was appointed under the auspices of that body to consider the question, take evidence, and report.

The Committee met three times and issued their Report in 1926. Apart from the question of Easter, the points for reform seem to centre about the facts, first, that the lengths of the months, and consequently of the quarters and half-years, are unequal, and, secondly, that the day of the month does not fall on the same day of the week in all years, which seems inevitable since the number of days in a Solar year is not a multiple of seven, and is held to be a drawback because the dates of some occurrences have to be re-fixed year by year and also because of the variability of the number of week days in a period defined by dates. Beyond these main points, the Committee had before them, and took opinions on, the questions of changing the beginning of the year from January 1 to the day now known as December 32; of altering the length of the year as fixed by the Gregorian Calendar, in the sense, perhaps, of establishing a "normal" year consisting of a complete number of weeks, with the occasional addition of a "leap" week or month; the alteration of the names of the months. The Committee could not recommend any of these, though they may have approved them in principle, and the first received the support of several of those whose opinion was asked.

A remedy for the two main faults of the Calendar above mentioned is to be found in a scheme proposed many times and in various forms, which, in effect, makes the year consist of 364 days—52 weeks of 7 days—with an additional day that should not have a date nor bear the name of a week-day, or two such days in a leap year. This overcomes both difficulties, but it is seriously opposed by religious bodies because the introduction of the blank day would break the cycle of weeks of seven days. Another scheme would make the quarters consist of three months, of 90, 90 and 91 days respectively, with an additional day to one quarter not outside the week, which would equalise the quarters as much as possible, but would not make a perpetual calendar. A third scheme which proposed that the year should consist of 13 months of 28 days, with an additional day as before, found some adherents, among them the representative of one of the large British railway companies; the Committee mention it as significant that there are already commercial organisations that use the 13 months system as an auxiliary calendar.

As to the fixing of the date of Easter, or its "stabilisation" as the Committee prefer to call it, for since it is a Sunday the date will unavoidably oscillate in a period of 7 days in a non-perpetual calendar, the Committee felt justified in making a very definite recommendation. There is no reason of dogma why any religious body should oppose a fixed date, or its equivalent, for the Easter festival, and Chambers of Commerce, representatives of railways, commercial organisations and school authorities were strongly in favour of this plan. Following the lead given by the opinions of these bodies the Committee recommend that Easter-day be the Sunday following the second Saturday of April. There seems to be prospect of reforming the Calendar so far as the date of Easter is concerned, but changes in other directions are not likely to be made without further enquiry and consideration."

COAL COMMISSION.

Report of the Royal Commission on Coal was issued on March 10, 1926. The R.C. had been appointed on Sept. 5, 1925, to consist of Sir H. Samuel, Chairman, with Gen. Sir H. Lawrence, Sir W. Beveridge and Mr. K. Lee as members. The document ran to 292 pages and was first published at 2*s.*

In consideration of the demand and use of coal, the view was expressed that a comprehensive survey was imperative of the heat, light and power needs of industry under a *National Fuel and Power Committee*. It was only too obvious that a great waste of coal power took place in general use of raw coal instead of the various products that might be obtained from the scientific distillation of coal. Suggestion was made of the development of the present Owners' *Research Association* so that it could deal adequately with the problem of winning the coal and co-operating with oth r organisations working in the national interest.

The loose organisation at present applying came under criticism, and proposals were put forward of *amalgamation* of old mines. Whilst pointing out that amalgamation compulsorily of concerns that might object to such methods would not be advisable, "there are still a large number in which such amalgamations are desirable." A suggested scheme of fusion of mining companies was given.

Chapter 4 was devoted to the question of *Nationalisation*. This proposal was turned down: "We recognise that there is substance in the demand that nationalisation is intended to meet—the demand for large changes in the organisation and improvements in the efficiency of the industry, for an expansion of the miner's influence over the conditions that govern his working life. This legitimate demand we believe can be met without embarking upon an operation so vast and hazardous."

On *Royalties*, the Commission held that surface boundaries have no relevance at all and surface rights only a minor relevance to conditions underground. "The mineral is not the property of the surface owner; the State either owns it or has the right to grant concessions for its working." It was further added: "It is unlikely there will be the lasting peace in the industry so long as the grievance (royalties to private owners) exists."

The old error of permitting coal to fall into the hands of private ownership must be retrieved. The mineral should be acquired by the State—purchase in case of marketable value or declaration of State ownership when unproved or unworkable—with the establishment of a *Coal Commission* to regulate purchase or compensation values.

With *distribution*, collieries were recommended to establish co-operative selling agencies and give more attention to the blending and selection of coal. A *Joint Standing Committee* should be established by the Mines Department and Ministry of Transport to deal with the transport of minerals. Local Authorities should be given the power to act as coal retailers.

The *relations* between owners and employees need to be considerably revised. The standard length of the working day, on the average 7½ hours underground, should be maintained, but a re-distribution of the hours in the working week might be considered with advantage with a multiple shift system in force. Family allowances, pit committees, better housing, profit-sharing, direct interest in output, pit-head baths, were other proposals for improving employment conditions.

On the question of *demand for coal*, it was pointed out that we were back at pre-war conditions. Growth of demand for fuel has been met by economies on the one hand, and likely growth has been sapped by industrial depression in trades that might use more coal. The foreign demand for coal was 22 per cent. less in 1925 than it was ten years earlier. The boom of the 1923 period consequent upon the disorganisation of the Ruhr coalfields had passed away. The *subsidy* of the winter of 1925 was not to be continued. The principle of bolstering up with the subsidy was quite wrong, and there were instances where men and mines were doing better under the subsidy than had been the case before.

The *immediate recommendations* were a reduction in wage costs or alternatively a longer working day. District agreements to meet the local conditions were to be preferred to a level national wage basis, but whilst variations will be essential, national wages agreements should continue. With the closing of many unprofitable workings, the Government should be ready for a transfer for the displaced labour.

C.O.D.

AFTER long consideration the Government decided during the past year to institute an inland cash-on-delivery (C.O.D.) parcel service in Great Britain and Northern Ireland (including the Channel Islands and the Isle of Man). The service does not apply to the Irish Free State in either direction. For many years there has been in existence a cash-on-delivery system for parcels between this country and certain Dominions and foreign countries which has worked satisfactorily. The receipts from this service amounted in 1925 to nearly three-quarters of a million sterling in the case of outgoing goods, and to £20,000 in the case of goods coming into this country. An inland C.O.D. system is in existence in the following countries, and it is noteworthy that no country which has once tried the system has ever given it up:—Austria, Belgium, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Hungary, Iceland, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Norway, Poland, Portugal, Rumania, Spain, Switzerland, Yugoslavia, Australia, Canada, Ceylon, India, the Irish Free State, South Africa, United States, Egypt and Japan. The German postal authorities have stated that the service in that country is regarded as almost indispensable; it had done no harm to retail trade, and had proved equally advantageous to large transport concerns and to small tradesmen. The experience of other countries has been similar. But in face of this evidence as to the working of the system abroad, much opposition was shown to its introduction in this country, particularly by sections of small traders and the organisations representing them. Agricultural associations and chambers of agriculture were, however, in favour of the scheme, which had been strongly recommended by the Linlithgow Committee as an aid to agriculture and small holdings. Although, as might be expected, there were in the early days of the working of the service some misunderstandings on the part of the public, the postal authorities carried out their work of delivery of parcels, collection of money and its remittance to the senders of the parcels in an emine tly satisfactory manner; and it would seem probable that the system will steadily increase in popularity as the facilities which it affords become better understood. The number of parcels carried under the system from the inception of the service on March 29

up to June 7 last was 127,400. The service was suspended during the general strike.

Under the C.O.D. service, which applies to everything transmissible by parcel post, the value of a parcel, up to a value of £40, is collected from the addressee by the Post Office and remitted immediately to the sender by means of a special Order. Parcels, ordinary or registered, may be posted C.O.D. at any Money Order Post Office. Parcels not exceeding £5 in value are delivered upon payment by this addressee to the postman of the amount to be collected; for those which exceed £5 in value, the addressee is required to pay the amount to be collected at the Post Office indicated upon an advice note which is sent to him. The C.O.D. fees, which are additional to the ordinary parcel postage, vary according to the amount to be collected (Trade Charge) and are fixed on the following scale:—

Trade Charge.	Fee.
Not exceeding 10s.	4d.
Exceeding 10s. but not exceeding £1	6d.
,, £1 ,, ,, £2	8d.
,, £2 ,, ,, £5	10d.
,, £5 ,, ,, £10	1s. 0d.

and 2d. for each additional £5 or fraction of £5 up to the maximum of £40.

CO-OPERATIVE MOVEMENT.

FIFTY-EIGHTH Annual Congress of the Co-operative Societies was held at Belfast, May 24–26, 1926. Delegates numbered 1,411, representing about 1,450 societies belonging to the Co-operative Union of Great Britain and Ireland and having a shareholding membership of over 5,000,000. Mr. W. J. McGuffin, of Belfast, presided. Internal arrangements for arbitration in disputes between societies and employees had long given dissatisfaction, and the Congress adopted a resolution to set up a National Conciliation Board to which matters in dispute would have to be submitted before any strike or lock-out might take place.

An addition to the constitution was carried by a majority of 689 to organise local voluntary Co-operative Parties in those areas where the societies failed to do so. By a majority of 424 a proposal of a joint newspaper Press with Labour was defeated and an amendment carried for the development of the Co-operative newspapers by the "Co-operative Movement under its own control." The coal question was debated on three days in order to obtain unanimity, and this was found in the pious expression of regret at present difficulties, appeal for maintenance of a good standard of living, request for Government to implement the findings of the Royal Commission on reorganisation, and the establishment of a fund to help societies and members suffering from the strike. Other Congress resolutions were in favour of pure foods, better education, public control in case of subsidised industries, effective dealing with trusts, &c. The 1927 Congress will be held at Cheltenham during Whit week.

The Annual Conference of the *Co-operative Party*, i.e. "political expression of the Co-operative Movement," was held in London Jan. 30, 1926. The report stated that only one-third of the societies of the Co-operative Union were affiliated with the Co-operative Party. Relations between Co-operative and Labour Parties were conflicting in various constituencies.

It was announced on July 10, 1926, that the sum of £565,000 owing by Rumanian Co-operatives would be paid in instalments over 25 years under Government guarantee.

COST OF LIVING.

No doubt exists that a gradual fall would have been registered in the Index Figure given as that of the Cost of Living by the Ministry of Labour, but the mining stoppage has meant additional costs in production in all directions, and the effects will be feared for some time longer. A slight decrease in wages has been reported during 1926, but the working week remains at practically the same number of hours. (This statement is made apart from any settlement in the mining industry, where Parliamentary permission has been given for the eight-hour day in place of the seven-hour one.)

1st day of Month.	Index Figure above that of July, 1914.	Workpeople concerned. (in 000's)	Net Increase in weekly Wages. (in 000's £)
Year 1919	105–110	6,174	+ 3,456
,, 1920	125–176	7,796	+ 4,760
,, 1921	99–165	7,244	− 6,024
,, 1922	78– 92	7,707	− 4,209

Aug. ,,	70	169	− 7
Sept. ,,	72	75	+ 5
Oct. ,,	74	...	...

The Index Figure for May was the lowest since Feb. 1917.

The *Civil Service bonus* revision took place in September as based on the average of the preceding six months, i.e. 69·16. As a consequence of the fall, the bonus was reduced 2/26ths for permanent and 2/36ths for temporary officials. The C.S. bonus system applies to most Local Government officials and in many offices.

CO-PARTNERSHIP.

VERY little progress is to be reported in Co-partnership. Eight new schemes came under the observation of the Ministry of Labour in 1925, but five old ones were reported as discontinued. At the beginning of 1926 it was understood that 246 firms had adopted co-partnery in some form, and the actual number of schemes in operation was 252, in which 190,800 employees participated. Of the 190 schemes of which financial details were available, the bonus paid during the past year averaged at £9 13s. 9d. per work-person, or the equivalent of 5·3 per cent. addition to wages. Altogether, 519 schemes have been started; of these 261 have been discontinued and 6 are in a state of suspension. These figures do not include certain Co-operative Societies in which the employees have some form of profit-sharing. The Co-op. S. with schemes totalled 112, a drop of 9 on 1923, with 22,000 employees whose bonus averaged £4 18s. 8d. for 1925, or a percentage addition of 4·1 to earnings.

It should be noted that the Report of the Royal Commission on the Coal Industry, issued March 6, 1926, recommended that "profit-sharing schemes, providing for the distribution to the workmen of shares in the undertakings, should be generally adopted in the industry, and should be made obligatory by statute." The London Electricty Act of 1925 permits a sum not exceeding one-sixth of the difference between standard prices and amounts charged to consumers to be distributed, subject to the profits being available, under a co-partnership scheme.

The *Labour Co-partnership Association* held a Conference of Yorkshire Co-partners in September, 1926, at Leeds. One difficulty in the adoption of "full-blooded" schemes of co-partnership mentioned was that a full disclosure had necessarily to be made to all co-partners and the men's directors, and danger in loss of trade secrets as well as failure to maintain necessary confidence might follow.

DISARMAMENT.

SINCE the Washington Naval Agreement of 1922, attempts have been made on several different lines to frame measures and arrange conferences intended to lead in the direction of a reduction of armaments throughout the world, but up to the present no further agreements have been made. Progress has at times seemed impossible until nations could first be assured by agreements of security against aggression. The first proposal in this direction was the Anglo-American pact which was to guarantee France against attack. This was declined by America and Great Britain. In 1922 a defensive pact was offered to France as part of a general arrangement for the pacification of Europe, but the offer was not accepted. In 1924 the famous Protocol was drafted, but was not ratified by any of the Great Powers, and the Disarmament Conference, which was to have been held in June, 1925, if sufficient ratifications were received by the League, was not called. Definite progress in the direction of controlling the international traffic in arms appeared possible through the medium of the Convention for the Supervision of the International Trade in Arms and Ammunition and Implements of War, which was signed by representatives of 18 States at a League Conference in June, 1925, and was to have come into force as soon as it was ratified by 14 States. In July last, Sir A. Chamberlain announced in the House of Commons that neither Great Britain nor any other Power had ratified the Convention.

Two events which have removed some obstacles in the way of a limitation of armaments are the conclusion of the Locarno Agreements, and the entry of Germany into the League. Another attempt to tackle the problem has been made by the Committee appointed by the Sixth Assembly of the League — the Preparatory Commission for the Disarmament Conference—which met for the first time on May 18 last. Germany and the United States were represented on the Committee, but unfortunately Russia refused to send delegates to Geneva on the ground that she is not in diplomatic relations with Switzerland. The business of the Committee, which was to prepare the basis of a disarmament conference, involved the consideration of a questionnaire regarding various points of principle upon which a reduction of armaments might be effected. The Committee decided that reduction must be on the basis of the armaments maintained in time of peace rather than in terms of the potential war strength of any country, and on the proposition of the French delegation it was decided that the best way to begin the final discussion would be that each nation should bring forward the reduction it thought it could make, with the full reasons to justify the extent of the reduction. Two sub-committees were appointed by the Committee, to whom a large number of highly technical questions were referred; a technical military sub-committee of experts of the three arms—the Navy, Army and Air Force; and a sub-committee to deal with economic problems which might arise in connexion with those questions. The Committee's report, which was presented to the League Assembly in September last, stated that the Committee considered it would be possible to draw up a programme for a Conference by the beginning of 1927; and the Assembly passed a resolution that preparations for a Conference should be pushed forward as rapidly as possible, and expressed the hope that it will be possible to convene the Conference before the Eighth Assembly of the League.

DOLE FOR LAND WORKERS.

AN inter-departmental committee, appointed by the Minister of Agriculture and presided over by Sir Henry Rew, went into the question of extending the principle of unemployment insurance to agricultural workers. Considerable divergence of opinion was revealed, and two reports were produced in the autumn. The larger half of the committee adopted, by a majority of only one, a recommendation that the dole should be given to land workers, while the remaining members urged that agriculture should continue to be exempt from unemployment insurance. In these circumstances it is unlikely that any action will be taken in the matter.

The majority report expressed the view that the terms of the present Acts were not applicable to agriculture and that new legislation and separate finance and administration were desirable. They recommended a scheme with a lower scale of contributions, but substantially the same benefits as under the existing Acts. The suggested scale provided for a total contribution of 6*d.* per week per insured person, half being paid by the State and the remaining half being shared by the employer and the worker. In the case of regular farm workers employed all the year round by the same employer, it was proposed that provision might be made for the payment of contributions quarterly in advance on a somewhat reduced scale.

With regard to casual farm workers who are partly employed in agriculture and partly in other occupations, the differentiation in the amount of contributions paid by the workers presented a difficulty. The majority report considered that provision might be made whereby the worker should be entitled, if unemployed, to claim benefit from the general fund or from the agricultural fund in proportion to contributions made by him to each of them. Responsibility for the administration of the whole scheme, it was added, should be entrusted to the Ministry of Agriculture with such co-operation as the Ministry of Labour should be able to give. The local administration could be entrusted to a joint body, possibly the existing Agricultural Wages Committees.

FACTORY LAWS.

THE Factories Bill, which was given a first reading in the House of Commons on August 2, 1926, was introduced in order that the different industries affected might have the opportunity during the autumn and winter of examining the proposals for the amendment of the Factory Acts, which are put forward by the Government for consideration, of consulting among themselves with a view to arriving at agreements on disputed points, and of submitting any representations they desire to the Government. An official memorandum issued by the Home Office states that the Government do not expect that in a Bill of this kind, affecting many industries of widely varying character, and dealing with a range of problems arising over the whole field of industrial health, safety and welfare, there will not be many points in regard to which differences of opinion, possibly wide differences, may prevail in different quarters; but they believe that, on the whole, the Bill raises the general standard of factory conditions to the level of the better managed and more efficient factories, without placing any undue financial burden on industry, and that the result will be to promote the efficiency of industry as well as the welfare of the workers.

The Bill, which contains 140 clauses, differs in many respects from that introduced by the Labour Government in 1924. It abolishes the distinction which exists in the present law between factories and workshops, and between textile and non-textile factories, and employs only the one term "factories"; and, except where otherwise expressly provided, the provisions of the Bill apply indifferently to factories of all descriptions. Under the existing Acts the provisions relating to the sanitary condition of workshops, cleanliness, overcrowding, ventilation and the drainage of floors, are enforced in the first instance by the local sanitary authorities and not by the factory inspectors (as in factories), and the provisions as to sanitary conveniences, both in factories and in workshops, are, in London and in any place where Section 22 of the Public Health Acts (Amendment) Act, 1890, is in force, also enforced by the sanitary authorities. Under the Bill all the corresponding provisions are enforceable by the factory inspectors, except that in any factory in which mechanical power is not used and which forms part of a dwelling-house or shop, or is adjacent to a dwelling-house or shop in the same occupation, the provisions are to be enforced by the sanitary authority; and in the case of any other factory in which mechanical power is not used, the Secretary of State, if satisfied that the provisions would be satisfactorily enforced by the sanitary authority, is to delegate the duty to them. The important matters covered by the provisions of the Bill include hours of labour, home-work, piece-work and wages, air space, cleanliness of factories, provision of fire-escapes, welfare questions, including the supply of drinking-water, first-aid facilities, and the provision of seats, &c. Under the existing law the cubic space to be allowed to each person is 250 feet at ordinary times, and 400 feet during overtime. The Bill proposes 400 feet at all times for rooms not used as workrooms before the Bill is finally passed into law. It also excludes from the calculation of the cubic space any space more than 14 feet from the floor. In connexion with the employment of women and young persons, the Bill provides that the hours worked shall not exceed 10 in any day, or 48 in a week, but allows overtime to be worked within certain limits; employment must begin and end between 6 a.m. and 8 p.m. on week-days, and 6 a.m. and 2 p.m. on Saturdays.

F.I.D.A.C.

WARSAW was the scene of the Seventh Annual Conference of the *Federation Inter-Alliée des Anciens Combattants* that opened on Sept. 6, and closed at Cracow and Zakopane on Sept. 10, 1926. Delegates attended from the U.S.A. and those Continental countries that formed the Allies during the war. The Political Section decided that the F.I.D.A.C. should remain confined to the old Allies to confer periodically with international organisations that support the Versailles Treaty and maintenance of International Peace. The F.I.D.A.C. disagreed with the Geneva Labour Bureau in summoning a conference of ex-Service men from all combatant nations, and proposed a meeting at Luxembourg late in 1926 with enemy organisations that were prepared to accept the present boundaries. The U.S.A. proposal was accepted that sacrifices sustained during the war and the economic and financial conditions of the countries should be taken into consideration when adjusting Allied debts, but the U.S.A. delegates wished it to be understood that in bringing forward that motion for acceptance they were not criticising their own Government. The F.I.D.A.C. passed a resolution asking the League of Nations to insist upon Germany complying with Article 16 of the League Covenant. Lady E. Spencer-Churchill represented the Women's Section of the British Legion; Sir Frederick Maurice was Chairman of the Political Section.

FOOD COUNCIL'S OPERATIONS.

THE Food Council, established in 1925 as a result of the report of a Royal Commission, sat at frequent intervals, either as a complete body or by means of committees, throughout the year, and maintained a close watch upon the prices of the staple articles of food in the interests of consumers. There is little doubt that the knowledge that an official organisation of this description is closely examining the trend of both wholesale and retail prices has acted beneficially from the point of view of the public, although the trading organisations have not invariably been prevented from imposing increases.

For instance, in the case of milk, the London distributors raised the rate of supply to 7*d.* a quart in September. The Food Council lost no time in considering the question, and in a report signed by the chairman, Lord Bradbury, and approved by the President of the Board of Trade, this action was severely criticised. While withholding a final opinion on the matter, the Council declared that as regards the succeeding year winter prices during April and September would not be justified, as under an agreement with the producers the latter would receive only summer prices during those months. The increase, the Council stated, was not due to any shortage of supplies, but to "a new harmony of views" among the distributors, and they alleged that this was achieved at a meeting of the Milk Pool Committee set up by the Government to safeguard supplies during the General

Strike. This committee, the report said, was used by its trade members as a means of discussing the establishment of a higher price to the consumer after the emergency that led to the formation of the committee had disappeared.

Another report dealt with tea prices, and in this the Council recommended the Tea Buying Brokers' Association to alter their rules so as to preclude their members from carrying on business both as brokers and jobbers, as was alleged to have been done in one case. The Council also recommended that the giving of short weight or measure should be made a statutory offence. They advised that bacon and ham, butcher's meat, butter, lard and margarine, cheese, cereals, flour, sugar, coffee, cocoa, dried beans and peas, dried currants, raisins and sultanas, jam and marmalade and potatoes should be required to be retailed exclusively by net weight, a legible statement of which should be delivered to the purchaser.

HEALTH OF THE NATION.

THE health of the nation is improving in many directions, but there is ample indication of the need for greater and wider progress. In a review of the period between 1925 and 1875, when the Public Health Act was passed, the Chief Medical Officer of the Ministry of Health in his report for 1925 points out that there has been a remarkable reduction in, and in some cases a disappearance of, devastating epidemics such as cholera and typhoid fever; a fall in fatality has occurred in scarlet fever, diphtheria, whooping cough, tuberculosis, smallpox and bronchitis. Infancy and childhood are unquestionably healthier to-day than 50 years ago, and twice the number of children survive to grow up; the treatment of disease is more expeditious and more effective; and there has been improvement in the social and personal habits of the people in regard to health, *e.g.*, personal cleanliness, living more in the sunlight and fresh air, increased sobriety and improved nutrition. On the other hand, cancer appears to gain ground; tuberculosis is still all too prevalent; pneumonia and influenza are undefeated; the risk of smallpox is often preferred to vaccinia; maternal mortality in 1925 was higher than the average of the previous 10 years; 10,000 children died from measles and whooping cough in 1925; and general invalidity and physical incapacity cost the country, among insured persons only, the equivalent of 12 months' work of half a million people.

In 1925 the birth rate was 18·3 per 1,000 persons living, the lowest on record if the war years 1917 and 1918 be excluded. The death rate was 12·2 per 1,000, which was the same as in 1924 and ·6 higher than in 1923; 39 per cent. of these deaths occurred under the age of 50 years. The chief "taxes of mortality" were, per 1,000 deaths—

(i) Diseases of heart and circulation	177
(ii) Bronchitis, pneumonia and other respiratory diseases	165
(iii) Cancer	110
(iv) Diseases of the nervous system	99
(v) All forms of tuberculosis	85

These five diseases in 1925 were responsible for over 60 per cent. of the death rate. Among cases of infectious diseases notified during the year, diphtheria cases numbered 47,720 as against 41,980 in 1924, scarlet fever 91,362 (84,654 in 1924), and smallpox 5,365 (3,765 in 1924). No infants or young children who had been vaccinated were attacked by smallpox. In the old days, however, before vaccination was introduced, smallpox was in the main a disease of childhood. Of 925 cases of smallpox which occurred in previously vaccinated persons, only 9 of them were vaccinated at an age period beyond infancy, but the intervals elapsing between vaccination and attack, even in these 9 cases, were 10, 10, 12, 14, 15, 27, 31, 49 and 60 years respectively. (The Royal Commission on Vaccination reported that immunity arising from vaccination could not be assured beyond 9 or 10 years.)

The infant mortality rate—the death rate of infants under 1 year per 1,000 born—was 75, the same as in 1924. This means that in 1925 the country saved upwards of 37,000 babies' lives over and above the average annual saving in the period 1901–1910. It also implies a better physical condition in children from 1 to 5 years of age and a more enlightened understanding of personal and public hygiene. There is, however, still room for further reduction before a completely satisfactory standard has been reached, particularly as regards the exceptionally high mortality in the first four weeks of life.

HOUSING.

ALTHOUGH some inroad has now been made on the great shortage of houses, the arrears to be overtaken are still great, and it would seem that even with the greatest possible activity in building it will be some years before the nation's needs are fully met. As regards new houses erected for letting, the number is negligible. Since the war, according to a statement made by the Parliamentary Secretary to the Ministry of Health in September last, about 696,500 houses had been built. During the last financial year ended March 31, 1926, 173,000 houses were completed, of which about 153,700 might be considered as working-class houses. The housing grants, as stated by the Minister of Health in July last, amounted to £8,440,000, of which about £370,000 was given for houses built under the 1924 Act, £750,000 was in connexion with houses built under the 1923 Act, and £7,320,000 was due to the Act of 1919. The Exchequer liability per house is as follows:—1924 Act, £9 for 40 years; 1923 Act, £6 for 20 years; 1919 Act, £41 for 60 years. After conferences with representatives of local authorities, the Government decided in August last that the subsidy should be continued till October, 1927, in England and Wales, and till October, 1928, in Scotland. The differentiation in favour of Scotland is due to the slow progress of building there.

With a view to improving accommodation for agricultural labourers and other country workers the Government introduced in the House of Commons the Housing (Rural Workers) Bill, which passed second reading in August last. The Bill proposes to encourage by subsidies, partly paid by the State and partly by county councils, the reconditioning of old country cottages which have suffered by neglect. The State is to pay one-third of the total cost, the county council one-third, and the owner one-third, and it is one of the conditions of public assistance being given that the houses must be let during a period of 20 years to agricultural workers, or those in comparable circumstances, at a rent not exceeding the normal agricultural

rent plus 3 per cent. of the amount expended on the alterations by the owner.

Further attention has been given during the past year to new methods of building; steel houses of various types, timber houses—some constructed on systems used in Canada, Norway and Sweden—and concrete houses of various kinds are amongst those which have been tried as alternatives to the brick building. The London County Council in July last decided to build a new estate of over 600 houses of concrete on the pier-and-panel system. The same body, desiring to erect two blocks of dwellings comprising 64 tenements containing 144 rooms, decided to ascertain whether any economical substitute could be obtained for the type of brick construction usually adopted by the Council for block dwellings. Tenders were invited for buildings of brick and of concrete; for the latter, alternatives of (1) a steel frame with external walling entirely of concrete; (2) a steel frame with external walling of concrete with brick facing; (3) reinforced concrete. In every case where a firm submitted prices for brick and concrete construction, the price for brick was considerably lower. The lowest tender for brick construction was equivalent to about £151 a habitable room; for steel frame with external walling of concrete, £199; for steel frame with external walling of concrete with brick facing, £170; and for reinforced concrete construction, £172 a room.

THE IMPERIAL CONFERENCE.

After an interval of three years, the Imperial Conference again assembled in London in the autumn of 1926, the delegates including the Prime Ministers of six of the Dominions—Canada, Australia, New Zealand, South Africa, the Irish Free State and Newfoundland—as well as representatives of India. Speaking of the proceedings at the Guildhall Banquet, Mr. Baldwin, who presided over the main deliberations, said there could never have been a conference in which a better and more harmonious spirit had been manifest, and in which there had been a more genuine desire to solve many difficult problems, to bring unity to their councils, and to pave the way for further and more rapid progress in the future than had been hitherto achieved. The Conference considered the main questions, such as foreign policy, Imperial defence and Empire trade, at plenary sessions, but a great part of the work was first dealt with by committees, which made recommendations for adoption by the full Conference, a large number of subjects securing exhaustive attention in this way.

STATUS OF THE DOMINIONS.

One of the most important committees set up—with the Earl of Balfour as chairman—considered the subject of inter-Imperial relations and made recommendations of far-reaching significance, which were adopted unanimously by the full Conference. Without laying down a Constitution for the British Empire, the report of this Committee emphasised that Great Britain and her self-governing Dominions are "autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or external affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations."

As a result of the establishment of the Irish Free State, the Committee recommended that the title of the King should be changed to "George V, by the Grace of God, of Great Britain, Ireland, and the British Dominions beyond the seas King, Defender of the Faith, Emperor of India," the United Kingdom being thus omitted. The Governor-General of a Dominion, it was laid down, should hold the same position to its public affairs as is held by the King in Great Britain, and they urged that he should not be the representative or agent of His Majesty's Government in Great Britain, or of any department of that Government. He should no longer, therefore, be the formal official channel of communication between the Home and Dominion Governments, which should communicate directly with each other.

The Committee expressed the view that it would not be in accordance with constitutional practice for advice to be tendered to His Majesty by His Majesty's Government in Great Britain in any matter appertaining to the affairs of a Dominion against the views of the Government of that Dominion. As to the conduct of foreign affairs generally, it was freely recognised that in this sphere, as in the sphere of defence, the major share of responsibility rests now, and must for some time continue to rest, with His Majesty's Government in Great Britain, but neither Great Britain nor the Dominions should be committed to active obligations without the definite assent of their own Government.

In welcoming the delegates, Mr. Baldwin said that in regard to foreign policy the problem was how to reconcile the principle of self-government, in external as well as domestic affairs, with the necessity for a policy in foreign affairs of general Imperial concern which would commend itself to a number of different governments and parliaments. In the field of Imperial defence, he went on, there had been a steady, if unobtrusive, progress towards improving the facilities for co-operation, if the necessity should unhappily arise. The principle of Dominion navies was now not merely accepted but whole-heartedly endorsed by the Admiralty, and in the land force much had been done to facilitate co-operation. He thought that substantial results had followed from the preference accorded in the Dominions to Empire goods, and he was confident that the measure of preference which the Mother Country had been able to afford, even under its very limited tariff system, supplemented by the operations of the newly-established Empire Marketing Board, had increased and would increase the flow of inter-Imperial trade.

The questions of foreign affairs and Imperial defence were considered in secret, and after hearing a review of the world situation by Sir Austen Chamberlain, the Conference congratulated the Home Government on its share in the promotion of peace through the Locarno agreements. When the problem of Empire trade was tackled, Sir Philip Cunliffe-Lister, the President of the Board of Trade, revealed a satisfactory improvement in the position since the War. He said that in the first half of 1926 one-third of our imports had come from the Empire and nearly half of our exports had gone to the Empire. In 1913 the Empire proportion of our imports was 24·87 per cent., and of our exports 37 per cent. There had been a considerable growth in the aggregate trade of Canada, Australia, New

Zealand and South Africa, and Indian trade has shown a marked revival. The need of the development of trade within the Empire was as great as the opportunity, for the more they bought and sold within the Empire, the easier it was for us to maintain our own exchanges. Referring to the Empire Marketing Board, he said that it would be of more value in increasing sales of Empire produce than the limited preference for which it was substituted. He spoke of the regrettable position of British films, and on this point a sub-committee of the Conference urged upon the various Governments a number of remedial measures, including effective customs duties for foreign films and legislation to prevent blind and block booking.

Explaining Canada's point of view, Mr. Mackenzie King said that in the preceding four years the Dominion's imports from the British Isles had increased from £23,400,000 to £32,600,000. His Government, he added, was considering various methods of providing assistance for the maintenance and extension of their exports to the Mother Country. Mr. Bruce said that Australia still believed that the great problem of the Empire was that of men, money and markets, but that Britain's problem was almost entirely one of markets. It was their duty to see where were the markets for Britain in the future, since the development of the Dominions absolutely depended upon the purchasing power of Britain.

INTERNATIONAL EIGHT-HOUR DAY.

UNDER the Washington Conference of 1919 a Convention came into existence for a general, not rigid or absolute, limit of 48 hours weekly or 8 hours daily as a working week. Certain exceptions were made: a limit of 56 to be permitted in the case of continual process work, the loss of hours on the customary short day of the week to be made up on the other five, the averaging of 48 throughout the year when conditions meant going beyond the 48 at certain periods. The Convention has been ratified by Bulgaria, Chile, Czechoslovakia, Greece, India and Rumania. In March, 1926, Labour Ministers from Belgium, France, Germany and Italy met the British Minister of Labour and Monsieur A. Thomas of the International Labour Office in the hope of securing a uniform standard of working hours amongst the chief industrial countries of Europe. And that hope still remains. In Sept. 1924 a similar meeting had been held, when the Conference broke up with a statement of "unanimous feeling that a common ratification of the Convention was possible." A regular resolution at all Labour gatherings is the immediate adoption of the 48-hour Convention, but the difficulty is to get an international agreement, notwithstanding the subscription to the Covenant of League.

In 1924 a Committee was set up under the Chairmanship of Sir Arthur Balfour "to enquire into the conditions and prospects of British Industry and Commerce." The second report of the Committee was issued on March 25, 1926, in which it was stated that the average weekly hours had been reduced from 53 and 54 to about 48, an average decrease of 10 per cent. on pre-1914 conditions. The Committee pointed out that legislation enacted for the 48-hour maximum week abroad has been frequently modified by expedients.

INTERNATIONAL PARLIAMENTARY COMMERCIAL CONFERENCE.

TWELFTH Assembly of the I.P.C.C. met at Westminster May 25, 1926, with Mr. S. Samuel, M.P., in Chair. Delegates numbered 200 from 40 countries, Germany being represented for the first time since 1914. The President of the Board of Trade gave an official welcome on behalf of H.M. Government. Various Committees were formed to prepare for the Conference in full session subjects covering international aspects of coal, shipping laws, bankruptcy laws, agricultural credit, international credits, commerce restrictions, &c. Resolutions were passed in favour of currency stabilisation, removal of all prohibitions and restrictions upon exports and imports, universality of bankruptcy laws, unification of legislation concerning agricultural credits, an international study of coal problems, international agreement to avoid double taxation of shipping companies, &c. Conference closed on May 27.

His Majesty received the delegates at Buckingham Palace (27th) and extended a hearty welcome to them. The Prince of Wales presided at the Dinner (26th) given to the I.P.C.C. at the House of Lords by H.M. Government. Mr. Churchill, Chancellor of the Exchequer, said in the course of his speech: "Sane and instructed people should find no difficulty in reconciling national and international duties, just as a good citizen could reconcile his duty to his family and to his town, to his country, and to the State. All men were necessary to one another; all legitimate institutions were in harmony; and it was folly to suggest that there was a limited heap of happiness or prosperity or wealth or trade which was to be divided and scrambled for between the nations."

KENT COALFIELDS.

AIDED by a Treasury guarantee of £2,000,000, under the Trade Facilities Act, the firm of Messrs. Pearson & Dorman Long, Ltd., have started work on the development of the mineral resources of Eastern Kent. The development is likely to be rapid, and in a comparatively short time the Kent coalfields will probably become an important factor in the industrial life of the south-east of England. In addition to the large coal areas which are to be developed, it is also intended to develop the large beds of a fairly good quality of iron ore which run inland from the coast between Dover and Folkestone. The past history of Kent coal has been one of misfortune; many companies have been formed and much capital sunk in fruitless endeavours to establish colliery undertakings. Coal was first discovered in Shakespeare's Cliff at Dover over 40 years ago, but it was not until 1896 that the Kent Coalfields Syndicate was registered to work the coal. Their efforts, however, were unsuccessful, and after great appreciation in the shares, the Company failed before any pits were working. Other companies were formed to acquire the works, but up to the present no coal has been obtained in this area. Collieries have been established at Tilmanstone, Snowdown and Chislet. That at Tilmanstone has been producing about 4,000 tons a week for some years, but the Snowdown colliery, after producing for some years between 3,000 and 4,000 tons a week, failed in 1923, and was purchased by Messrs. Pearson & Dorman Long, Ltd. The

Chislet colliery, which has not been acquired by this firm, is also producing about 4,000 tons a week.

The population of the coal and iron area which is to be developed is about 300,000, and it has been estimated that this population will be doubled in 30 years, as a result of this development and the establishment of new manufacturing and industrial enterprises in the district. The question of preserving the beauties and amenities of the countryside, and at the same time bringing into existence the new townships to accommodate the new population, has received much consideration, and it would appear probable that such objectionable developments as have taken place at Tilmanstone and Chislet will not be repeated in connexion with the proposed new collieries. Long before the present extensive developments were contemplated, the East Kent Joint Town-Planning Committee was formed—in 1923—with representatives of 17 local authorities, and a preliminary survey for a regional town-planning scheme of East Kent was carried out, which it is hoped will prove a valuable basis for the development of definite schemes which the authorities may decide to adopt. The Eastry Rural District Council, within whose area of jurisdiction important coal-mining developments will take place, has already made arrangements for a lay-out of a new village to be settled with the co-operation of the coal-owners. Provision will be made for shops, public buildings, open spaces, and a surrounding belt of open land, and it is intended that the lay-out generally shall conform to the most modern town-planning ideas.

LABOUR DISPUTES

WITH the coal stoppage spreading its paralysing power over industry, labour disputes have been quite a secondary matter. There were signs that trouble might be expected with the engineers, but, apart from the General Strike and the mining stoppage, the industrial world has more or less kept the peace. What strikes occurred were centred upon internal workshop disputes, employment of non-unionists, and wages questions. Here are the official statistics :—

	Disputes in progress.	Workpeople involved.	Days lost.
1913 (whole year)	1,459	664,000	9,800,000
1919 ,, ,,	1,352	2,591,000	34,970,000
1924 ,, ,,	710	608,000	8,420,000
1925 ,, ,,	601	438,000	7,980,000
Jan. 1926	63 (40 new)	26,000	412,000
Feb. ,,	62 (36 ,,)	22,000	366,000
March ,,	63 (35 ,,)	37,000	460,000
April ,,	68 (42 ,,)	51,000	424,000
May ,,	36 (18 ,,)	93,000	114,000
June ,,	32 (10 ,,)	7,000	36,000
July ,,	24 (10 ,,)	2,000	18,000
Aug. ,,	35 (16 ,,)	2,000	18,000
Sept. ,,	33 (16 ,,)	2,000	15,000

These figures do not include the General Strike, that is believed to have involved 1,580,000 workpeople, who were idle for approximately 15,000,000 working days in the aggregate, and also the 1,094,000 miners who went on strike at the end of April and remained on strike through the summer, until a gradual return to work took place. It has been estimated that the miners lost from Jan. 1 to Aug. 31 the equivalent of 80,000 ... two lost days through the stoppage.

GENERAL STRIKE.

ON Friday, April 30, 1926, the coal subsidy ceased and the mining stoppage began. After a day of negotiations, in which the Government, Trade Union Congress Council, miners and mine-owners were concerned, only a blank could be reported. The Government, however, took steps to warn local authorities of the possibilities of something more than a mining dispute. On May 1 the miners' leaders met the General Council of the Trade Union Congress, and at 2 p.m. the latter body announced its intention to call a General Strike to begin at midnight on May 3. Full instructions, prepared well in advance following the T.U.C. annual meeting of the previous September, were issued to all trades, stating what work should be done. Prior to this announcement the Government proclaimed a State of Emergency existed consequent upon the conditions in the mining industry. The General Council of the T.U.C. had an interview with the Prime Minister the same evening.

Sunday was almost a blank day in negotiations, but a very busy one behind the scenes in Government concerns and Labour organisations. In the evening the Prime Minister attempted to obtain a clear assurance from the Miners and the T.U.C. of the acceptance of the Royal Commission's Report. Whilst these conversations were going on, the General Strike had begun in the offices of the London edition of the *Daily Mail*, where certain members of the printing staff refused to accept the leading article for insertion. The Prime Minister then issued a public announcement that the "immediate and unconditional withdrawal of the instructions for a general strike" must be made. A message by broadcast was issued to the nation by the Prime Minister: "Keep steady. Remember that peace on earth comes to men of goodwill."

In the House of Commons on Monday the Prime Minister announced that coal negotiations could be continued only by a withdrawal of the General Strike threat. A challenge had been made to the Constitution, and the Prime Minister said that had to be met. Volunteers for public services rolled up, whilst the O.M.S. organisation warranted its initiation. Tuesday, May 4, was the first and worst day. Transport services throughout the country were to all intents and purposes entirely suspended. They were restarted by volunteers, and every day witnessed an improvement in what were termed skeleton services. Food distribution came under the control of the Government, and Hyde Park was made the centre of milk distribution. From the first the Authorities collected more milk than could possibly be sold, and there was never the slightest danger of shortage of any food in the Home Counties. Similar organisations were at work throughout the country, and only in isolated districts was the slighest shortage noticed.

Parliament met daily. On May 6 the Prime Minister made a national promise of protection against victimisation by anyone or body to those men who returned to work. The illegality of the General Strike was pointed out by Sir John Simon in Parliament, and on May 11 Mr. Justice Astbury laid it down in Court that the General Strike was not only illegal, but the protection of the Trade Disputes Act no longer applied. Whilst the nation as a whole remained calm, there were several local riots that were put

down by the police. Convoys of food supplies were organised under military protection from the London docks, apparently as a display of power rather than anything approaching a necessity. Every day witnessed a gradual return to work throughout the country—miners excepted. Newspapers, with certain exceptions, appeared throughout in shadow form, whilst the Government issued the *British Gazette* (1*d.*) daily from May 5 to 13, the T.U.C. replying with the *British Worker* (1*d.*) daily from May 6.

Wednesday, May 12, witnessed a call by the President and Council of the T.U.C. upon the Prime Minister to tell him that "The General Strike is being called off from to-day." But those who had sown in the whirlwind found that the calm was not entirely fruitful. Days elapsed before general resumption could take place, and the country did not settle down in earnest until the following Monday. Then it was discovered that jobs existing before the strike had disappeared in many instances, and that the coal dispute was to add from 750,000 persons to the unemployed registers of the Labour Exchanges. From May 9 an unofficial attempt was being made by the Chairman of the Royal Commission (Sir Herbert Samuel) to find some means of compromise on the coal controversy, and his work furnished a possible basis of settlement that was accepted generally by the T.U.C.

MINERS' STRIKE.

AGREEMENT between Mining Association (employers) and Mining Federation (employees) of Great Britain of June 18, 1924, expired on July 31, 1925, after the M.A. had given one month's notice. Previously, on July 1, M.A. submitted to M.F. a lower wages schedule that was rejected forthwith. Government appointed Court of Enquiry, and on September 5, 1925, a Royal Commission. Meantime, a subsidy was paid to make up minimum wages offered on July 1, 1925, to those of the June, 1924, agreement. The R.C. issued its report (see separate article) on March 6, 1926. Mr. Baldwin met M.A. and M.F. on March 24, when he said the Government were prepared to initiate legislation to give effect to the recommendations of the R.C. report, besides giving a temporary subsidy, provided those connected with the industry would carry on in accordance with the recommendations.

Both M.A. and M.F. held many meetings of their own and issued statements. The most important was that of the M.F. on April 9, when the programme was laid down of: 1. No increase in length of working day; 2. National minimum wage; 3. No wage reduction. Following a meeting of M.A. and M.F. on April 13, the owners posted notices on 15th to the effect that with end of subsidy on 30th a new wages schedule would come into force. Meanwhile the Trade Union Congress Council, through its Industrial Committee, had protested against abandonment of national negotiations and attempt to open district ones on the part of the owners. On 15th, Prime Minister met the M.F. and promised to get into touch with the M.A. on the deadlock. A week later the M.A. and M.F. met, with the only tangible result that the former would supply particulars of the new wage rates. On 23rd, Prime Minister met M.A. and M.F. and organised a negotiation committee from both sides, but in spite of many interviews no advance was made. On 26th the Prime Minister saw the I.C. of the T.U.C. and four days later he was able to make a new definite offer.

Main points of offer were 20 per cent. upon 1924 standard with an 8-hour day, and this offer was refused immediately by the M.F. on April 30. More conversations followed, but there was no sign of the M.F. amending in the slightest the programme of April 9. The general stoppage began on May 4 and lasted to May 12 (see separate article). Sir Herbert Samuel had been having unofficial conversations during that period, with the result that on May 15 the Prime Minister was in a position to make an offer on the part of the Government.

In addition to a temporary subsidy, a Board was to be set up to form a national agreement governing the principles on which district wages should be based, and Bills were to be introduced into Parliament and Committees set up to carry out the recommendations of the Royal Commissioners. The M.F. and M.A. declined the terms on May 20 and 21, and they held a joint meeting on June 8. Nothing happened to stop the course of the dispute until June 21, when the Coal Mines Bill (to permit an 8-hour day temporarily) and Mining Industry Bill (covering reorganisation, amalgamation, welfare levy, profit-sharing and non-entry into mining industry of any person over 18) were introduced, and became law on July 7 and August 4.

A gradual drift back to work began with mine-owners offering new terms under the longer working day. A section of the Church leaders intervened, and on July 19 met the Prime Minister with proposals based upon discussions with the M.F. The Prime Minister could not accept the subsidy proposal, whilst, though the M.F. recommended the districts to accept the Church scheme, the delegates returned with district instructions to vote it down. Another meeting was held between M.F. and M.A. on August 10, but the M.F. adhered to the 7-hour day, a national wages agreement, and reorganisation of the mines before any consideration could be given to wage reductions. M.F. met the Ministry on August 26 and two days later the Notts Miners' Council asked the M.F. for permission to enter into district negotiations. Following M.F. meeting on Sept. 2, Government received letter that was considered a likely basis for settlement, but by this time the M.A. had ceased to function in matters of national negotiations.

In a letter of Sept. 13, the Secretary of the M.A. informed the Government that the districts, with one small exception, had refused to give the M.A. power to negotiate a national wages settlement. On 17th the Prime Minister saw representatives of each side and issued a Cabinet offer of a National Arbitration Tribunal following provisional settlements arrived at by local negotiations. After submission to the districts, the M.F. rejected the N.T.A. on Oct. 7 and decided to call out the safety men who had been left in the mines. The Leicester Council called off the district strike on Oct. 9. By Oct. 13 out of 1,207,129 usually employed in the mines 224,896 were at work.

BUILDERS.

LESS than three thousand employees in the building trades were concerned in labour disputes during the first nine months of 1926. In July a joint Conference was held

between the representatives of the National Federations of Building Trade Employers and Operatives, when tentative proposals were adopted for stabilisation until August, 1927. The executives of the Trade Unions concerned met on July 13, 1926, and approved of the draft agreement. The building trades employees have enjoyed a boom that has lasted since 1918 and which is expected to continue until 1932. The effect of the coal strike was marked by the number of unemployed in the industry reaching 11 per cent. in August, but that was the lowest of all large industries.

ENGINEERS.

WITH 17 per cent. of the engineers being unemployed, conditions have not been too rosy in the industry. The average loss in days through minor disputes has been less than 7,000 monthly, a low figure in view of the three-quarters of a million employees in the industry. In 1924 the engineers demanded an advance of £1 weekly in wages, and the agitation continued in various forms until August, 1926, when at a York Conference, under presidency of Mr. Brownlie, the trade unions decided to abandon the campaign owing to national circumstances and conditions in the engineering industry as a whole. An unofficial strike began in a London engineers' establishment in January in support of the 20s. advance demand; a national lock-out was ordered for March 18, but the threat of expulsion of the strikers from the union had the result of bringing the dispute to an end. During April, 1926, a National Conference of employers and employees was held in York, when the 20s. increase demand was put forward. All the employers could offer was 2s. 6d. increase plus certain modifications.

GENERAL WORKERS.

FIRST Biennial Conference of the National Union of General and Municipal Workers was held at Bournemouth May 24–26, 1926. This Union was the result of the fusion of separate organisations of Municipal Employees, General Workers and Union of Labour in 1924. Mr. Clynes, M.P., was elected President by 204,257 votes, opposition mainly coming from the Communist element. Resolutions passed included: support for Council that branches must not be associated with the Minority Movement; permanent appointment of officials without having to submit to re-election every two years; no stoppage in trade dispute until two-thirds of members vote in favour; T.U.C. would be sufficient in unity of action without N.U.G.M.W. joining the Industrial Alliance.

RAILWAYS.

ANNUAL Conference of the National Union of Railwaymen was held at Weymouth July 5–10, 1926, under presidency of Mr. Dobbie, a railway shopman of York. Upon a resolution barely carried that only reporters from "trade union papers throughout" should be eligible for admission, the whole of the Press representatives left and independent observation of first day's proceedings was lost. An 80 per cent. majority was secured in a vote of confidence in the officials who signed the award of the National Wages Board in December, 1925. Resolutions included: against victimisation on return after general stoppage; lack of confidence in the Ministry; refusal to place an embargo on coal during mining stoppage; right to work or maintenance to unemployed; but rejection of proposal to submit another "all grades" wages programme to the railway companies.

One internal trouble is that of the railway shopmen. In August, 1926, after a conference between N.U.R. and craft unions, it was agreed that there should be no stealing of members from one union by another; in craft matters each union should negotiate on its own, and non-unionists should be asked to join the society attached to their particular trades.

The Railway Clerks had conference in London (Jan.) and Morecambe (June). At the former a card vote of 31,825 to 18,250 turned down proposal to join Industrial Alliance and a unanimous vote was passed on pensions questions. At the second meeting only 25 delegates voted in favour of withdrawal from T.U.C. as a protest against the grave position of the clerks following the General Strike.

Apart from the general stoppage, there is no need for any labour disputes on the railways since there is in existence a complete system of arbitration boards. Unemployment has been severe—a matter of 14 per cent.—on the railways since the miners' strike began.

SHIPYARDS.

AT the end of August the Ministry of Labour reported that 40 4 per cent. of the 241,700 insured persons in the shipbuilding and ship-repairing trades were unemployed. In Dec. 1925 a new agreement was framed by the two Federations of employers and employees in the industry for the settlement of industrial disputes, and at the quarterly meeting of the men's Federation at York in February, 1926, it was announced that a ballot had shown a majority for acceptance. The scheme permits of a dispute being carried through several enquiry stages to a general conference or outside arbitration if necessary. Sporadic strikes are quite ruled out. In Sept. 1926 the Boilermakers' Society announced a small majority against affiliation to the committee of the men's unions to work the conciliation scheme. A Joint Committee enquired into the Foreign Competition and Conditions of the Shipbuilding Industry, and in a report made a series of wide suggestions. Whilst the employers accepted the report, the men's unions were laggard because the proposals apparently cut across established customs.

TEXTILES.

UNEMPLOYMENT has been particularly severe—the percentage unemployed registrations at the Labour Exchanges have been 23, 29 and 21 in the cotton, linen and woollen sections. Short time has been general. Even so, a matter of 200,000 working days were lost in the first nine months of 1926 in labour disputes within the industry.

TRANSPORT WORKERS.

A SCHEME has been under consideration during 1926 for the amalgamation of the Transport Workers' Federation with the National Union of General and Municipal Workers. This would result in an organisation with over 600,000 members, and, whilst providing a powerful body, would at the same time obviate much overlapping and redundancy of officials. The Biennial Conference of the T.W.F. was held at Scarborough in July, with Mr. Gosling, M.P., as President. Delegates were mostly concerned

with the miners' strike, unemployment, and safety conditions of working.

The Third International Transport Workers' Congress met at Paris in Sept. 1926, when delegates representing twenty-two countries met under the chairmanship of Mr. Cramp (N.U.R.). The discussions were general, and resolutions could not bind the countries represented.

LABOUR PARTIES.

COMMUNISTS.

It is very difficult to get an idea of the real strength of the Communists in this country. There is a Communist Party, seven of whose members were released from Wandsworth Gaol in April, 1926, after serving six months' imprisonment in connexion with propaganda work. On June 24 the Government Blue Book was issued containing the papers that passed between the British Communist Party and the Soviet Leaders in Moscow. It is believed that the actual Communists are few in number, but they are in command of organisations under various names like Left Wing Movement, Minority Movement, Organised Unemployed, International Class War Prisoners' Aid, whilst their representatives hold positions in the various Labour bodies of the presumably legitimate type like the I.L.P., Labour Party, and the Trade Union Congress. The Communists are very active and so give an impression of strength of numbers.

G.F.T.U.

Twenty-seventh Annual Conference of the General Federation of Trade Unions was held at Dover, July 8-10, 1926. The membership on the previous March 31 was returned as 116 societies with 735,468 members, compared with 118 of 830,316 in 1925. Membership is now back to the pre-war level. Loss was due in one instance to the inability of the Electrical Trade Union to pay up arrears; some unions had seceded upon amalgamation with others. Mr. Birchenough (Cotton Spinners) occupied Chair at Conference and put the case of the woollen textile industries look-out before members. Mr. Naylor (Compositors) placed before delegates the need of each trade union to prepare for a dispute, and cited his own case where large contributions had enabled a reserve fund to be built up and from which £3 weekly was paid to members during the General Strike.

INDUSTRIAL ALLIANCE.

Not much has been heard of the new Industrial Alliance since the mining stoppage began. At the end of March, seven trade unions (Miners, Transport and General, Amalgamated Engineering, Workers', Electrical Trades, Locomotive Engineers, and Iron and Steel Trades) had expressed their approval of the scheme. The total membership of these seven bodies numbers less than one million and three-quarters. The National Union of Railwaymen dropped out during the early stages of the discussion, and the Boilermakers declined to amalgamate. Perhaps more will be heard of the body that was to promote "an offensive alliance" in view of the unfortunate experiences of labour organisations in 1926.

I.L.P.

Thirty-fourth Annual Conference of the Independent Labour Party was held at Whitley Bay in Easter week, 1926. There was much criticism of the action of the Parliamentary representatives of the I.L.P. An outline of the scheme of transition from private to State ownership was accepted without division after a long explanation and debate, from which it appeared that the first step was to be nationalisation of the banks, and the second nationalisation of all imports. A much involved scheme of minimum wages and allowances seemed very theoretical. The action of the National Administrative Council of the I.L.P. in pressing the Labour and Socialist International to approach the executive of the Third International (*i.e.* Moscow) for an all-inclusive International was supported by the majority of delegates. The aim of the I.L.P. is "Socialism in our own time."

A Summer School was held in August by the I.L.P. at Easton Park, Dunmow, at which various phases of the Labour and Socialist Movement were considered. During the same month the N.A.C. issued a statement of policy of disarmament, in which it was stated: "to take an uncompromising stand against war, by a united campaign for universal disarmament by mutual agreement and by the organisation of working-class resistance to any threatened war." The I.L.P. has kept its policy well before the public by means of statements upon national and international problems.

INDUSTRIAL PEACE UNION.

During Aug.-Sept., 1926, an Industrial Peace Union was established with the ambition of securing "five years' peace in industry." Meetings have been held in large industrial centres, including Cardiff, Newcastle, Manchester, Leeds and Birmingham, with the object of obtaining support. Organisers of the I.P.U. include Labour leaders of the less militant type like Mr. Havelock Wilson and Mr. J. A. Seddon. This policy is directly opposite to the "class war" of the Minority Movement.

INTERNATIONAL TRADE UNIONISM.

Though the Triennial Congress of the International Federation of Trade Unions is not due to be held until 1927, a Congress organised by the International Federation of Trade Unions and the Labour and Socialist International took place in London in June, 1926, to discuss the question of Labour Migration. Seventeen European and six Overseas countries were represented by 150 delegates.

No signs exist of a united International amongst the Labour and Socialist Parties of the world. The widely drawn distinction still holds between the Third International, with H.Q. at Moscow, and the International, with H.Q. at Amsterdam. The Council of the I.F.T.U., meeting at Amsterdam on Dec. 5, 1925, reaffirmed its decision of Feb., 1925, and considered any new decision unnecessary. There is evidence from the actions of certain leaders of the British Trade Union Congress that a desire exists for a United International, but such leaders do not consider the time opportune for leading a campaign to that end.

LABOUR PARTY.

The 26th Annual Conference of the Labour Party was held at Margate October 11-14, 1926 with Mr. R. Williams in the Chair. It is to be noted that on the election of the National Executive at the close of the Conference, Mr.

Williams was not re-elected to that body—the first occasion of a defeat of a Chairman since the inception of the L.P.

On the disaffiliation of Communists, the Executive received support on a card vote of 3,414,000 to 209,000 after a previous vote of 2,706,000 to 349,000 in favour of removal from agenda of certain resolutions put forward in connexion with the Communist Party. A resolution supporting the miners and in favour of nationalisation was carried by 3,315,000 to 210,000 after a vote on an amendment that the resolution was not strong enough of 1,368,000 to 2,159,000. The delegates in favour of birth control, in the removal of the Ministry of Health's embargo on giving information at the Ministry's controlled clinics, gained a slight majority in a vote to refer back a paragraph in the National Executive's report of 1,656,000 to 1,602,000. The whole question was subsequently remitted to the new Executive for consideration and report for next year's Conference.

Agriculture, as defined in a report of 38 pages, was discussed almost throughout the third day. The plan of compensating the dispossessed landlord on the basis of the Schedule A Income Tax valuation was approved. In addition to Government control of farming, it is proposed under the Labour Party policy to centralise the whole of wheat imports. The Conference confirmed the action of the Executive in getting ready a new Workmen's Compensation Bill for the next Parliamentary session and its efforts in connexion with the prosecutions of Communists. There was complaint that Labour M.P.s were not so regular in attendance at Parliament as they might be. Support was given to the proposal for further political campaigns in the rural districts. The Executive did not welcome discussions on Dominion and Colonial policies, Mr. Macdonald asking the Conference not to make the difficulties of a Labour Government greater.

Resolutions were passed welcoming the entry of Germany into the League; urging the Government to arrange with the Russian envoys for the stabilisation of political and economic relations on a normal foundation; deploring the naval activities in the China Seas; forming a commission to enquire into the means for establishing the principle of a living income. The Conference did not find it expedient to make a levy of members of affiliated bodies for the purpose of assisting the miners. Officials who spoke referred to the poverty of their own societies through unemployment claims.

LEAGUE'S NEW COUNCIL.

As a result of deliberations by a special committee, an important change was made in the composition of the Council of the League of Nations at the same time that Germany was admitted to the Assembly and the Locarno Pact came to fruition. Originally the Council of the League consisted of eight members, representative of four of the principal Allies and of four countries elected by the Assembly annually. With the growth of the Assembly the membership of the Council was increased to ten in 1922, the two extra seats being allotted to the smaller nations, so that six members were chosen each year.

The new scheme enlarged the Council to a membership of fourteen, by giving Germany a permanent seat—making five permanent members—and increasing the number of non-permanent seats from six to nine. There was considerable opposition at the Assembly in September to this further extension of the Council, but it was argued in its favour that the arrangement would allow of a more just representation of the different continents, enabling three seats to be given to Latin America, and would facilitate the principle of rotation. Protests were also voiced at the procedure which forced delegates to vote upon this controversial matter simultaneously with their vote on the admission of Germany, which was not opposed in any quarter, but rather than jeopardise Germany's election the proposal was accepted. An entirely new set of nine members was then elected to the Council, and it was arranged that three should sit for three years, three for two, and three for one year, thus ensuring a change every year. The countries eventually elected were as follow: for the term of three years, Poland, Rumania and Chile; for a two-year term, Holland, Colombia and China; and for one year, Belgium, Salvador and Czecho-Slovakia.

LONDON'S BRIDGES.

THE controversy as to whether Waterloo Bridge should be rebuilt or merely widened and strengthened, which followed the discovery that its piers had settled, aroused so much diversity of opinion that the Government set up a Royal Commission, over which Lord Lee of Fareham presided, to enquire into the whole problem of cross-river traffic from every point of view. A mass of evidence, involving many gigantic and costly schemes, was presented on behalf of the municipalities and organisations interested in the question, the most important contribution being made by Sir Henry Maybury, the Director-General of Roads at the Ministry of Transport and Chairman of the London Traffic Advisory Committee. His proposals, costing many millions, were designed to meet London traffic needs for the next thirty or forty years.

Following a report on the subject by the Advisory Committee, which recommended the early construction of a new St. Paul's Bridge and the immediate rebuilding of a new Waterloo Bridge on the site of the old, to accommodate not less than four lines of traffic, with five arches instead of eight, with a road bridge at Charing Cross at a later date, Sir Henry said the Ministry of Transport were strong advocates of the St. Paul's Bridge. This was also urged by the Bridge House Estates Committee of the City Corporation, who stated that the scheme would cost £3,306,696, and that the bridge would be of enormous assistance to all traffic interests. The Corporation's consulting engineer informed the Commission that no danger to St. Paul's Cathedral was to be anticipated from the new bridge. Incidentally he quoted evidence of a vibration expert that the actual magnitude of the displacements caused in the Cathedral fabric by street traffic was less than a thirtieth of the thickness of the paper on which WHITAKER'S ALMANACK is printed.

With regard to Waterloo Bridge, the London County Council came to a decision to rebuild, and their witness before the Commission stated that the new bridge would take six lines of vehicular traffic. The Council's chief engineer expressed the belief that the cost would be one-and-a-half millions. As to the proposal to build a bridge at Charing Cross, it was explained that expense

alone made this project impossible at present, and that the Southern Railway Company were not prepared to move their station to the other side of the river as had been suggested.

LUNACY REFORM.

RECOMMENDATIONS of the greatest importance have been made by the Royal Commission on Lunacy, which was appointed in 1924, in their report published during the past year. The terms of reference were—(1) To inquire as regards England and Wales into the existing law and administrative machinery in connexion with the certification, detention and care of persons who are, or are alleged to be, of unsound mind; (2) to consider as regards England and Wales the extent to which provision is or should be made for the treatment without certification of persons suffering from mental disorder; and to make recommendations. The Commission in their report express the opinion that there is no clear line of demarcation between mental illness and physical illness. The distinction is commonly based on a difference of symptoms, and is in practice no doubt convenient, but it has an undue influence on the development of the lunacy system. The modern conception of mental illness calls for a complete revision of the attitude of society in the matter of its duty to the mentally afflicted. Whereas the keynote of the past has been detention, the Commission insist that the keynote of the future should be prevention and treatment. They take the view that every facility and encouragement should be afforded to the mentally ailing to submit themselves voluntarily to treatment; but where compulsory detention is unavoidable the intervention of the law should be as unobtrusive as possible and should extend no further than is necessary to secure that the patient's liberty is not infringed longer or to a greater extent than his symptoms necessitate in his own or the public interest.

In connexion with certification and treatment without certification, the Commission recommend *inter alia*—(1) That the lunacy code should be re-cast so that the treatment of mental disorder should approximate as nearly to the treatment of physical ailments as is consistent with the special safeguards which are indispensable when the liberty of the subject is infringed; that certification should be the last resort and not a necessary preliminary to treatment; that the procedure for certification should be simplified, made uniform for private and rate-aided cases alike, and dissociated from the Poor Law. (2) That facilities for the treatment of voluntary boarders should be increased, particularly by their admission to public mental hospitals. (3) That in the case of an involuntary patient, if there is a prognosis of early recovery, facilities should be provided for treatment without certification for a period of one to six months under a Provisional Treasury Order. (4) That involuntary patients requiring full certification should be the subject of a reception order made by a judicial authority on two medical certificates. Far-reaching recommendations in connexion with the detention and care of patients are made by the Commission. As regards private institutions, some of the Commission recommend that licensed houses should be abolished as soon as alternative accommodation could be provided, while the other members recommend that licensed houses should continue to be recognised, but should be placed on a new footing under conditions which include stricter administrative and financial supervision and the conferment of powers on the Board of Control to issue new licences.

MARS.

IN the popular mind the astronomer has always been something of a mystery—a person possessed with knowledge of obscure kind denied to the ordinary mortal. As recently as fifty years ago official astronomers were troubled not infrequently with letters—with or without included stamps—asking for predictions as to the writer's future. A popular astronomical lecturer of the same period always thought it necessary to pander to similar curiosity by closing his address with veiled reference to the end of the world, and cryptic suggestions as to how and when it would happen. These things have passed away, and the subject of enquiry is now the planets, and their inhabitants, if any. The buoyant person, to show a pretended interest in, and perhaps his knowledge of, the pursuits of his astronomical friend, greets him with the vague query, "How about Mars?" It is always Mars: Jupiter and Saturn are too far away. The astronomical writer is more or less responsible. It began when he discussed the known physical facts about the planets—partly, no doubt, with the idea of satisfying this natural curiosity to determine the possibility of their being the abode of life. Then came Mr. Wells, who wrote the "War of the Worlds" and made our flesh creep by bringing to our earth fearsome but ingenious creatures, bent on our destruction, from which we were only saved by the necessary microbe. The inference of Prof. Lowell and others that Mars is the home of active and sensible beings, drawn from the appearance of the so-called "canals" which may or may not be actual entities revealed by observation, fostered the idea of Martian inhabitants, and to be able to communicate with these planetary neighbours seemed to be the next object. Some of the plans for this put forward by ingenious people suggested that they, the Martians, or we, should spend our time constructing huge signals—the diagram of a proposition of Euclid on the desert of Sahara was one of these wild schemes—that would be mutually understood. It has not yet been suggested that the Red Spot on Jupiter, which brightens and fades periodically, is a bonfire made by the Jovians to attract our attention. This interest in Mars has found financial backing. A considerable sum of money has been supplied by an enthusiast in France for a prize to be awarded to him who makes most progress in knowledge of its physical state, whilst another, more daringly expectant, offers a prize for the first who actually establishes communication with the planet. The common knowledge of wireless telegraphy of to-day has brought the idea of such communication still more within the bounds of possibility to unthinking but optimistic minds, and when Mars comes comparatively near to the earth, as it does every two years, and specially when it comes nearer than usual, as it did in 1924 and 1926, the planet and possible intercommunication becomes a topic in certain sections of the Press to be treated quasi-scientifically or with mild humour, so that the owner of a wireless set that fails to function on the

night of nearest approach may be led to attribute the failure to Mars, though he be perfectly ignorant of the etherial conditions of interplanetary space, and the possibilities of the Heaviside layer. So far there is no sign of such communication; we have not yet got beyond the humorist who sent a telegram addressed to Mars to the Post Office with fee for transmission, and the other who issued a Morse "M" in the hope of deceiving minds attuned for its reception.

MASONIC MILLION MEMORIAL.

In view of the large number of persons who wish to be present at the laying of the foundation stone of the new buildings in Great Queen Street, in connection with the Masonic Million Memorial Fund, on July 14, 1927, it has been decided to hold the ceremony in the Royal Albert Hall. The Duke of Connaught, as Grand Master, will perform the ceremony there by means of a smaller replica, and the action will be synchronised by electrical control with the site in Great Queen Street. Up to the present more than £800,000 has been promised or paid, and it is hoped that by July the whole sum of £1,000,000 will be raised or promised.

MIGRATION AND SOCIAL INSURANCE.

That unemployment insurance and out-door Poor Law relief to able-bodied persons discourage migration at precisely the ages when it might be expected that the opportunities for oversea life would prove most attractive was one of the principal conclusions arrived at by an inter-departmental committee, presided over by Sir Donald Maclean, which considered the effect on migration of the various social insurance schemes. National Health Insurance, it was found, did not act perceptibly as a check on migration, and old-age pensions had no considerable effect, but the committee thought that the new widows' and orphans' pensions would have some effect on married men and that the prospective loss of pension would be a material consideration in the case of widows contemplating migration.

The rise in the general standard of living, accelerated by social legislation, the committee stated, had given a sense of security to workers of all classes and tended to increase the reluctance of the population to leave Great Britain for settlement overseas.

The committee emphasised the economic principle that migration is greatest in times of prosperity and lowest in times of depression, and declared that the two chief causes of decreased migration were bad trade conditions and restrictions placed by the Dominion authorities upon the grant of assisted passages. The committee recommended that the Imperial Conference should consider the standardisation of schemes of social insurance throughout the Empire, with a view to the establishment of full reciprocal arrangements. They suggested that all who received pensions under contributory schemes should, on proceeding overseas as migrants, be credited with a year's pension in lieu of the pension which they surrendered, and that extended facilities should be provided for the training of the young in the elements of rural occupations. The interesting comment was added that the use of the word "dole" as a synonym for unemployment benefit had done much to obscure the fact that benefits paid during unemployment accrued by virtue of participation in an insurance scheme, and that in the majority of cases unemployment was the result, not of lack of energy or resourcefulness, but of prolonged trade depression.

NATIONAL LEFT WING CONFERENCE.

First National Left Wing Conference was opened at Poplar Town Hall on Sept. 18, 1926, when Mr. J. J. Vaughan presided over an attendance of 150 delegates. This body consists of the Communist section of the Labour Movement, a section that exists in spite of the 1925 decision of the Labour Party Conference. The national programme laid down by the delegates covered a legal 44-hour week; a minimum weekly wage of £4, irrespective of sex, to increase with cost of living; organisation of a workers' defence corps as a maintenance of supplies guarantee in the case of a national dispute.

A Greater London Left Wing Conference had been held at Bethnal Green on June 19 at which it was stated that Mr. Lansbury, M.P., had written a letter to the Conference that he had done his best to prevent the exclusion of Communists from the Labour Party, but majority resolutions could not be overridden.

Earlier still, March 20, a *Conference of Action* had been arranged by the National Minority Movement at Battersea under chairmanship of Mr. T. Mann. Eight hundred delegates took part on credentials that were said to have been issued by 52 trades councils, 300 branches of trade unions, and 65 sundry labour bodies. Resolutions were passed for the organisation of pit and job committees and these workshop committees to become the units of industrial organisation; institution of workers' defence corps; repeal of anti-labour laws; calling for a National Congress of Action at which plans should be produced for the scientific utilisation of the trade union movement in the class struggle, with co-ordination of the co-operative societies, and others of similar extreme type. (See article on T.U.C.)

NURSING HOME CONTROL.

The early introduction of legislation to give effect to a scheme of registration and inspection of nursing homes was recommended by a Select Committee which examined the question during the year. It was proposed that the supervising authorities should be county and borough councils, but that they might delegate their powers to committees upon which both doctors and nurses should be represented. The duties of inspection would be carried out by medical officers of health, with the assistance of other technical officers, inspection to be limited to the general suitability and organisation of homes, and not to embrace any inquiry into the medical records or private affairs of patients.

The committee suggested that the definition of the term "nursing home" should be made wide enough to include all types of nursing homes, including maternity homes, but they thought that certain publicly controlled institutions should be expressly excluded from the scheme, and that certain charitable organisations might be exempted for defined periods of time. A nursing home would not be exempt, however, on the sole ground that there was a medical practitioner resident in, or in actual control of, a home. When registration should be refused or cancelled, a referee appointed by the Minister

of Health would hear appeals under the proposed scheme.

Evidence was given to the committee that in certain cases there was very decided room for improvement in nursing homes under the direct control of a doctor. The activities of inspectors, it was suggested, should be mainly directed to the border-line homes, where the standard of efficiency was in doubt. Attention was drawn to the shortage of trained nurses, and it was recommended that in every nursing home which applied for registration the matron or other person in charge should be a fully-qualified nurse. No rules were laid down by the committee as to the percentage of trained nursing staff, but they pointed out that the public paid for expert nursing and expected to receive it. The committee was deeply impressed with the urgent need for registration and supervision in nursing homes catering for poor, senile and chronic patients.

ONE-WAY TRAFFIC.

ONE of the most difficult problems with which the Ministry of Transport has to deal is that of London's traffic. The great increase in the vehicular traffic of the metropolis in recent years has not been met by any far-reaching measures to ensure its steady flow and to counteract congestion in any effective way. No additional bridges have been constructed over the river, and so far as the central districts are concerned few great street improvements have been carried out. Further, until last year no new methods of controlling the movement and distribution of traffic had been introduced for many years, with the result that congestion at all the great main road junctions has grown apace, and traffic delays have concurrently increased in duration. Some advance has now been made in dealing with the problem by the introduction of what has been designated "one-way traffic," and the "gyratory," "rotary," or "roundabout system of traffic." The system was first put into force in Parliament Square, and its success there in reducing delay in the progress of wheeled traffic was followed by its introduction at the Queen Victoria Memorial, Hyde Park Corner, Trafalgar Square and Piccadilly Circus. The reason for the introduction of the new system at the Queen Victoria Memorial was not very apparent, as there has never been any great congestion of traffic at that point; but at the other centres vast volumes of traffic have to be regulated. At each of these points, as the drivers became accustomed to the new conditions, there was marked improvement in the flow of traffic, and consequently a decided reduction in the number and the duration of delays. Permanent signs and directions to drivers let into the road surfaces have now started to replace the temporary painted signs on the roadway at these points. It would seem that further important traffic centres will see the introduction of the new system as soon as schemes can be worked out for them. All the centres at which the new system has been tried are in the West End of London, but unfortunately in the district which experiences the greatest traffic delays—the City of London and its neighbourhood—the conditions differ in a marked degree from those which obtain in the West End, viz., extremely narrow streets and a much larger proportion of slow "carrier traffic." The difficulties in this area involve the consideration of much greater problems than have to be tackled elsewhere. Coincident with the improvement shown at the points where the new system is operating, so far as wheeled traffic is concerned, has been the increase in the difficulties of pedestrians, and the possibility of an increase in the number of street accidents is perhaps the most serious objection that has been urged against the system as a whole. This objection, it is hoped, will be met by the adoption of suitable measures which will enable Londoners to cross the road with no more risk than hitherto. Looking at the enormous difficulties connected with the question of London's traffic, it would seem that the present innovation can only provide a certain amount of local and limited relief, and no solution can be looked for until additional traffic facilities are provided and altogether wider measures of distribution and control are adopted.

POLAR FLIGHTS.

ANOTHER interesting chapter has been added to the story of Arctic exploration by successful flights to the North Pole by both aeroplane and airship, the latter crossing the Pole within three days of the aeroplane's success. Lieutenant-Commander Byrd, of the United States Navy, with three companions, left Spitsbergen in an aeroplane—a three-engine Fokker—on May 9 last, and reached the Pole, a distance of about 650 miles, after about 8½ hours' flying. After remaining over the Pole for 14 minutes to take observations, he returned to Spitsbergen, which was reached about 7 hours later after a thrilling flight. All went well with the plane until within an hour of the Pole, when oil was found to be leaking from one of the motors. After flying on two motors for some time, Pilot Bennett walked out on to the wings and made an adjustment which relieved the oil pressure and enabled full power to be used again. His action probably saved the expedition from disaster. Excellent weather conditions prevailed during the flight, and Commander Byrd stated that the visibility at 1,000 feet to 4,000 feet extended from 100 to 150 miles. During the flight he saw at least 100,000 square miles of Polar sea, and covered 10,000 square miles of unexplored regions. No life was seen anywhere, and the temperature at the Pole was just zero; but the average temperature during the flight was from 6° to 7° below zero. There was open water at the Pole.

Captain Amundsen's great flight in an airship from Spitsbergen across the Pole to Teller in Alaska started within two days of Commander Byrd's return. The airship *Norge I.*, in which the flight was accomplished, was constructed in Italy. It is a semi-rigid of about 670,000 cubic feet capacity, and is therefore much smaller than existing airships of the rigid type. The semi-rigid type has, size for size, greater lifting power than the rigid type, and was considered more suitable for the difficult Polar flight. This was Captain Amundsen's third attempt to fly to the North Pole. His first attempt was to have been made in 1922 from Alaska to either Greenland or Spitsbergen, but owing to an accident to his aeroplane on a trial flight the attempt was abandoned. His second attempt, which narrowly escaped disaster, was described in the 1926 WHITAKER, p. 803. With Captain Amundsen on his successful flight was Signor Umberto Nobile, the designer of the airship and the chief exponent of the semi-rigid type of

vessel, who acted as commander of the airship. The journey lasted 72 hours, and during the flight the explorer and his crew were exposed to severe discomforts and great risk due to fragments of ice dropping from the rigging and gondolas and being caught by the propellers and shot through the fabric of the vessel. At the Pole the explorers spent some considerable time taking observations at a height of 600 feet; here they found only thin ice and open sea, with a few rocky islands. Between the Pole and Port Barrow in Alaska no land was discovered. Apart from the value of the meteorological observations taken by the expedition, the flight establishes the practicability of an airship journey across the Pole on the shortest route from Spitsbergen to Asia; but it seems improbable that Spitsbergen will be used as a base for any air route which may be established between Western Europe and Asia.

SCOTLAND'S SECRETARY OF STATE.

A NOTABLE honour was conferred upon Scotland during the year by the raising of the status of the country's chief representative in the Administration, who became a full Secretary of State instead of merely Secretary for Scotland. The office was thus restored to the rank which it held nearly two centuries ago after the Union.

It was in the twelfth century that Scotland first had a Secretary, but for two or three hundred years the duties of the office were very vague and largely consisted of acting as a kind of superior scribe to the Sovereign, with little, if any, administrative power. In the reign of Mary, however, the post became more important owing to the personality of two of the Queen's Secretaries, Sir William Maitland of Lethington and David Rizzio. When the Court left Scotland in 1603 the Scottish executive was given place and influence in Parliament, and for a time there was a second Secretary, but protests led to the abolition of the new official. Between the Restoration and the Revolution the Secretaryship for Scotland was maintained, and from 1660 to 1680 the holder was invariably a Peer.

Shortly after the Union of the two Parliaments a Secretary of State for Scotland was appointed in 1708, and the administration of the affairs of the northern kingdom remained in the hands of this official until 1725, when the then Secretary of State was dismissed and the office abolished. Six years later it was revived, but in the year following the famous "'forty-five," the Secretaryship of State died a natural death. For a century and a half the conduct of Scottish business was carried out by the Lord Advocate, and then in 1885 the office of Secretary for Scotland was definitely created by Act of Parliament. The holder has been an important member of the Government, and, except for the first few years, has usually been in the Cabinet, and he has enjoyed all the powers and duties of one of the Sovereign's Principal Secretaries of State, as he now becomes actually. In addition to the direct administration of various affairs through the Scottish Office, he is responsible for the Board of Agriculture, the Fishery Board, and the Ministry of Health for Scotland, the Lord Advocate's duties being now purely legal.

S.D.F.

THE Annual Conference of the Social Democratic Federation was held at Burnley July 31–Aug. 1, with Mr. F. Montague, M.P., in the Chair. The S.D.F. leans to the political rather than the industrial weapon in what it terms the "class war." Resolutions passed by the Conference included: no possible form of direct action could be regarded as a substitute for political action; independent democratic action was the only means to secure peaceful and permanent measures of social change beneficial to the wage-earning class; placing of workless labourers on the land; the usual condemnation of the Ministry for its conduct during the miners' dispute. The S.D.F. does not hold the pride of place in the Socialist Movement that was once its position; just now Socialism is somewhat obscured by the many other isms with attractive names to adherents in whole or part of the Labour Movement.

SMALL HOLDINGS.

WITH the object of empowering county councils to continue and extend the provision of small holdings and cottage holdings, the Government introduced the Small Holdings and Allotments Bill, which was read a second time in July last. The Bill provides that if a county council or the council of a county borough finds it impossible to provide small holdings without incurring a financial loss, it may submit to the Minister of Agriculture and Fisheries proposals, together with financial estimates, for the acquisition of land and its development and subdivision into small holdings. The Bill empowers the Minister to approve such proposals, with or without modifications, and to give the council concerned an undertaking that if it carries out the proposals, as approved, the Minister will pay a contribution each year towards the cost. The amount of such contribution, which will be stated in the approval, will in no case exceed in any one year 75 per cent. of the amount of loss in the approved estimate for that year. The contribution will not be affected by reason of any savings or economies the council is able to effect, and it is hoped that it will therefore endeavour to reduce the actual loss to a minimum. The same procedure as regards Exchequer contributions is to be applied to the provision of small holdings both for sale and letting to occupiers, and to cottage holdings (*i.e.*, a cottage and an area of ½ acre to 3 acres of land) which may be provided by county councils for sale to *bonâ fide* agricultural labourers and persons employed in village industries. Hitherto local authorities in England and Wales have not been asked by Parliament to shoulder any of the cost of providing small holdings. During the period 1908–14 councils were restricted to self-supporting schemes. The Land Settlement (Facilities) Act, passed in 1919, recognised that in the changed circumstances brought about by the war a financial loss was unavoidable, but placed the responsibility for such loss for a limited period, which has now terminated, upon the Exchequer in one form or another. That Act required county councils to give preference to ex-Service men when selecting smallholders. The present Bill breaks new ground in authorising local authorities to meet out of the rates (or possibly out of surplus balances which would otherwise stand to the credit of their small holdings accounts) any loss which may remain after the Government contribution has been received. Until it is seen how far councils will be prepared to initiate and carry out schemes

under the Bill it will be difficult to estimate the extent of the Exchequer liability under the Bill. The Ministry of Agriculture state that in the period 1908-14 about 2,000 holdings per annum were provided, and from 1919-26 an average of about 3,000 per annum. Assuming that under the Bill 8,000 holdings are provided during the first 4 years, at the end of that period the total annual loss may be estimated at £200,000, of which £150,000 may have to be paid by the Exchequer. For the provision of 8,000 holdings at an average cost of £750 each, loans amounting to £6,000,000 will, it is estimated, have to be raised by local authorities.

SUCCESSION TO THE THRONE.

THE birth in April of Princess Elizabeth Alexandra Mary, the daughter of the Duke and Duchess of York, had an interesting bearing upon the succession to the throne. As the daughter of the King's second son, the Princess is in the direct line, and, ranking after the Prince of Wales and her own father, is third in succession. She takes precedence over the King's two younger sons, Prince Henry and Prince George, and over Princess Mary and her two sons, who fill the next three places in the order of succession. According to the Act of Settlement, an elder brother's daughter is preferred in the succession to a younger brother, and it was owing to this provision that Queen Victoria ascended the throne ninety years ago instead of the Duke of Cambridge, who was next surviving brother to King William IV, but was junior to the young Queen's father, the Duke of Kent. In the event of the Prince of Wales marrying and having children, Princess Elizabeth of York would go out of the line of succession, and the birth of a brother would place her one position lower. At the moment the little Princess is the fourth lady in the realm in the order of precedence, being preceded only by the Queen, Princess Mary, and her mother, the Duchess of York.

TRADE UNION CONGRESS.

FIFTY-EIGHTH annual Trade Union Congress took place at Bournemouth Sept. 6-12, 1926, with Mr. A. Pugh in the Chair. A small decrease was reported in delegates entitled to attend, 727 of 1925 falling to 697, but a small increase was shown in membership, 4,350,982 to 4,365,414 of the trade unions represented. Resolutions discussed included: against Emergency Powers Regulations, unanimously; affiliation with National Minority Movement (see par. on Left Wing) rejected, 2,710,000 to 738,000; investigation by General Council into question of extension of powers in case of strikes, carried, 2,573,000 to 1,404,000; equality of unemployment relief to single men and women, rejected, 2,345,000 to 1,304,000; merging of unions within an industry into groups of industrial unions, carried, 2,164,000 to 1,658,000; development of Easton Lodge by a levy, defeated, 2,441,000 to 1,481,000; extension of unemployment insurance to agriculture, amendment of Workmen's Compensation Acts, full use of Trade Boards Act in food, drapery and distribution trades were carried unanimously. Ratification of the Washington Convention on the 48-hour week was to be urged upon the Government.

A *Women's Trade Union Congress* took place for the first time during the Bournemouth T.U.C. Apparently it was not the success anticipated, some of the women delegates being extremely critical of its poor powers. Resolutions were passed in favour of formation of women's Trade Union Guilds, encouragement of women members to take greater interest in trade union affairs, whilst the proposal of family allowances was left over for further consideration.

During the year the General Council of the T.U.C. was very active. In January, the Countess of Warwick presented Easton Lodge and 1,100 acres for a trade union college under the control of the T.U.C. February witnessed the announcement that the T.U.C. had established departments of research and publicity of its own in place of joint working with the Labour Party.

The Annual Conference of *Trade Councils*, at which 200 delegates, representing 392 Councils, were present, was held at Victoria on March 26. Schemes were carried for the greater organisation of women workers, county federations of trades councils, personal canvass campaigns for increasing membership, and setting up of workshop committees.

During April the T.U.C. General Council was concerned in the coming mining dispute. On May 1 the General Council announced its decision to call the General Stoppage in accordance with plans previously drawn up. The stoppage began on May 4, and on May 12 the General Council informed the Prime Minister that the General Stoppage had been declared off. Subsequently the G.C. of the T.U.C. was concerned in the various mining negotiations and propaganda. Appeals were also issued for contributions to the miners' funds.

On August 28 and 29 the *National Minority Movement* held its third Annual Conference at Battersea. It was stated that the delegates represented 800 organisations composed of 956,000 members. The main attack was upon the G.C. of the T.U.C. in its conduct of the General Strike and connexion with the mining stoppage. This body was responsible for the issue of a remarkable communication during the T.U.C. at Bournemouth.

The 39th annual *Scottish Trade Union Congress* was held at Inverness April 21-24, 1926, with Mr. J. F. Duncan (Farm Servants' Union) in the Chair. Resolution instructing a delegation to proceed to Russia to report on conditions was defeated; a proposal to co-ordinate with the Co-operative Movement for concerted action was rejected in favour of an amendment to keep in touch with the English T.U.C.; the Congress carried a resolution in favour of helping the All-India Trade Union Congress and exchanging fraternal delegates.

WAR DEBT SETTLEMENTS.

THE war debts of France and Italy to Great Britain were both funded during the year as a result of negotiations between Mr. Churchill, the Chancellor of the Exchequer, and M. Caillaux, the French Finance Minister, and Count Volpi, the Italian Minister of Finance, each of the latter paying visits to London for the purpose of signing the respective agreements.

In the case of France, the settlement covered not only the war debt but virtually all outstanding accounts between Great Britain and France. Our Allies arranged to make a total payment equal to 62 annuities of £12,500,000 in respect of a total war debt of £647,106,000, it being provided that the payments should begin with the

sum of £4,000,000 already acknowledged in the Budget, and should rise above £12,500,000 in the later years in order to make the average payment approximately £12,500,000. The payment for 1927–28 was expected to be £6,000,000, that for the following year £8,000,000, and for the fourth year £10,000,000 was to be paid. From 1930–31 to 1956–57 the payment was to be £12,500,000, and from then until 1987–88 it was to be £14,000,000.

In order to safeguard France in case Germany failed to fulfil her reparation obligations, it was agreed between Mr. Churchill and M. Caillaux that if, for reasons outside the control of France, receipts from Germany under the Dawes Scheme should cease completely or to an extent greater than one-half, the French Government should have the right to ask the British Government to reconsider the question.

The Italian settlement involved an average payment to this country of slightly over £4,000,000 a year for 62 years. For the first year the payment was to be £2,000,000; for the next two years it was to be £4,000,000, and for the succeeding four years it was to be £4,250,000. Then would follow payments by Italy of £4,500,000 a year until 1986–1987, and the final payment would be one of £2,250,000. A clause was inserted in the agreement that if Great Britain at any time should receive more from reparations and Allied debts than she had paid to the United States for the British war debt to the United States, Italy's proportionate share of such surplus would be credited to her against future payments.

WEMBLEY EXHIBITION LIQUIDATION.

THE financial position of the British Empire Exhibition at Wembley after its two years' mixture of success and failure was disclosed by the liquidators—Mr. J. H. Thomas, M.P., Sir James Cooper, and Sir Arthur Whinney—in a statement which they issued in making a further call upon the guarantors. During the year the freehold property was sold for £300,000 to Mr. James White and the Beecham Trust, Ltd., but at the time the call was made only £30,000 of this had been paid, the contract date for the completion and payment of the balance being July 1, 1927, or earlier at the purchasers' option. There were also other assets—consisting of outstanding book debts and calls still unpaid by subscribers—which were estimated to realise rather more than £5,000. In addition, some of the claims against the Exhibition were the subject of litigation and might be reduced.

After the position had been ascertained upon the closing of the Exhibition in 1925, the total deficiency amounted to £2,104,060, and a first call was made on the guarantors of 15s. in the pound. This produced £1,574,133, leaving a further deficiency of £529,927. In order to cover part of this balance a further call of 2s. 6d. in the pound was made in November. In estimating the deficiency, the auditors excluded the probable realisable value of unrealised assets, which included the purchase money. The liquidators pointed out that the terms of the undertaking rendered the subscribers liable to pay up at once the remaining 5s. in the pound on the amounts subscribed by them, with the right of subsequent reimbursement to the extent of any surplus ultimately found to be available. They decided, however, with a view to meeting the convenience of the subscribers, only to call for payment of an instalment, and they expressed the hope that no further call would be necessary.

As soon as the sale of the property is completed and the claims against the company finally adjusted, the guarantors will be advised of any further amount that may be required, or, alternatively, will distribute any amount that may be repayable to them. Among the principal guarantors are the Government (£1,100,000), Messrs. McAlpine and Sons (£150,000), Lloyd's underwriters (£100,000), and the Royal Mail Steam Packet Company and Allied lines, the Football Association, the Peninsular and Oriental Steam Navigation Company, the Canadian Pacific Railway Company, and Furness, Withy and Company (£10,000 each).

YORK MINSTER.

DURING the summer of 1927, the 1,300th anniversary of York Minster and the revival of Christianity in the North of England is to be celebrated. The festival will be largely religious and will extend over a week, the main commemoration having been arranged for St. Peter's Day, June 29, when the Archbishop of York will preach, other leaders of the Church, including, it is hoped, the Archbishop of Canterbury, preaching on the remaining days of the celebration. There will also be a musical day, when the Minster Choir will be augmented by other choirs, and all periods of English Church music will be represented in the music sung on other days of the festival.

It was not until the beginning of the thirteenth century that the present Minster, the "Cathedral and Metropolitical Church of St. Peter in York," was begun, but its forerunner dates from 627, when Christianity first found adherents in the North. There is a touch of romance about the foundation of the modest wooden church built by Edwin, King of Northumbria, for his own baptism. Two years earlier Edwin sent to Eadbald, son and successor of Ethelbert, King of Kent, who had been converted by Augustine, asking for the hand of his sister, Ethelburga. At first Eadbald refused on the ground that it was not lawful for a Christian maiden to become the wife of a pagan, but Edwin promised that he would not obstruct her in the practice of her religion, and would himself examine it with a view to becoming a Christian.

They were married on this condition, and Queen Ethelburga, with Bishop Paulinus, succeeded in converting Edwin in two years. He was baptised on Easter Day, 627, in the Church of St. Peter the Apostle, which he had built of timber. Immediately afterwards Edwin enclosed this wooden church in a larger one of stone, completed after his assassination by his successor, Oswald, and later superseded by a Norman cathedral, which seven hundred years ago gave place to the present dignified Minster.

EVENTS OF THE YEAR (Nov. 1, 1925–Oct. 31, 1926).

THE BRITISH ISLES.

THE KING AND COURT.—**(1925) Nov. 3.** Prince of Wales had fall while hunting with the Whaddon Chase, but was not hurt. **11.** The King, Prince of Wales, Duke of York, the Cabinet and four ex-Premiers headed crowd at the Cenotaph on Armistice Day during the Silence. **19.** Queen Alexandra taken suddenly ill with severe heart attack at Sandringham. **20.** Her Majesty passed away peacefully at 5.25 p.m. in presence of King and Queen and members of Royal Family. IRELAND.—**(1925) Nov. 3.** Unofficial report published of supposed decisions of Irish Boundary Commission aroused considerable discussion. **9.** Armed men in Dublin captured films intended for Remembrance Day. **11.** Smoke bombs thrown among crowd at unveiling of Irish Division memorial in Dublin. **20.** Dublin cinema partially wrecked by bomb and two policemen injured by revolver shots. **21.** Dr. John MacNeill, Free State's Education Minister and representative on Boundary Commission, resigned. **26.** Mr. Cosgrave conferred with Mr. Baldwin regarding Boundary Commission situation. **29.** Conversations on the boundary question continued at Chequers with Free State and Ulster Ministers. **Dec. 3.** Agreement reached between the Cabinet, Irish Free State and Northern Ireland on question of the boundaries and all matters arising out of it. Boundary remained as it was, and Free State was released from financial liability under Article V. of the original Treaty. **10.** Dail Eireann ratified the London Agreement by 71 votes to 20. Bill confirming the Agreement received Royal Assent. **15.** Ulster Special Constabulary refused Government's disbandment proposals. Free State Senate passed Agreement Bill, which thus became law. **18.** Ulster Specials accepted Government's terms and strike ended. **(1926) Jan. 11.** Bench and Bar in Northern Ireland decided to form an Inn of Court for Ulster. Lord Londonderry succeeded by Lord Charlemont as Minister of Education for Northern Ireland. **19.** Government Bill introduced in Dail Eireann for Free State coinage in nickel, silver and bronze. **Mar. 11.** De Valera resigned

presidency of Sinn Fein. **31.** In mansion at Malahide, near Dublin, two brothers named McDonnell, their two sisters, a maid and a man servant, were found dead in house that had been set on fire. **May 18.** In Northern Ireland House of Commons Mr. H. M. Pollock, Minister of Finance, made his Budget statement. **Aug. 22.** Population of Free State, shown by census taken in April, was 2,972,802, decrease of 166,886 compared with 1911. That of Northern Ireland rose by 5,791 to 1,256,322. **Sept. 5.** Terrible disaster occurred during cinema performance in wooden hall in village of Drumcollogher, Co. Limerick. Fire broke out and ladder stairway from only exit was smashed. 48 men, women and children were killed. **13.** Manifesto issued by Captain William A. Redmond, son of John Redmond, proposing new Constitutional Party in Free State.

LABOUR.—**(1925) Nov. 2.** Telephone staff of Marconi Company went on strike as sequel to certain dismissals. **4.** Strike settled and dismissed men reinstated. **5.** Conference of executives of leading unions to consider formation of new industrial alliance discussed draft constitution and adjourned. **6.** Railwaymen's executive decided against proposed alliance. **24.** Miners' Federation opened their case before Coal Commission. **26.** Following breakdown of wages negotiations, cable and wireless telegraphists called out on strike. **Dec. 5.** International Federation of Trade Unions at Amsterdam reaffirmed rejection of proposal to affiliate with Russian Council. **9.** National Railways Wages Board rejected companies' claim for reduction of wages and men's claim for improved conditions, but recommended that new entrants should receive only the base rates without bonus. **10.** Delegates of British and Russian trade unions met at Berlin and passed resolutions regretting International Federation's refusal to sanction conference with Russian unions. **(1926) Jan. 12.** Coal-owners' case to Coal Commission included return to eight-hour day, abolition of national wage agreement, wage reductions based on district circumstances, and lower wages for railwaymen to permit cheaper transport. **14.** Public sittings of Coal Commission concluded after presentation of Labour plan for national ownership of mines and minerals and linking of coal and electrical power industries. **21.** Railwaymen's delegates by large majority rejected National Wages Board award. **25.** After railway managers had rejected men's proposals, union delegates agreed by 41 to 37 to accept Wages Board award. **28.** Negotiations between engineering employers and trade unions on demand for wage increase broken off. **Feb. 17.** Engineering and shipbuilding unions by ballot accepted scheme for settling miscellaneous grievances in shipyards. They rejected proposal to join industrial alliance of miners and transport workers. **18.** Strike of wireless operators settled. **26.** Engineering employers decided to lock out men of seven unions unless unofficial strike in Hoe's factory were settled. **Mar. 1.** Hoe's men refused to return to work. **5.** Engineering lock-out notices posted; joint conferences of unions affected recommended men to return to work. **10.** Lock-out notices suspended for few days on appeal by union leaders. Coal Commission's report issued and recommended cessation of subsidy, seven-hour day, reduction of percentage and reorganisation of working of mines. **12.** Mr. Baldwin discussed report with representatives of Mining Association and Miners' Federation. **18.** Engineering lock-out averted, strikers agreeing to return to work. **24.** Cabinet accepted Coal Commission's report provided owners and miners also did so. **April 1.** Owners informed miners they accepted principle of minimum percentage on basis rates in each district. **4.** Independent Labour Party conference opened at Whitley Bay. **9.** Miners' delegate conference recommended districts to refuse longer working day and reduced wage, and to adhere to principle of national agreement. **13.** Owners' and miners' representatives conferred, but made no progress towards agreement. **14.** Trade union leaders protested against mine-owners' action in abandoning national negotiations and attempting to arrange district settlements. **15.** At joint conference of masters and men in engineering trades, men rejected offer of *2s. 6d.* increase in weekly wages. **16.** Engineering negotiations broke down. **19.** London engineers decided to take ballot on question of their demand for increase of £1 a week. **23.** Prime Minister conferred with miners and owners without result. **29.** Delegates representing London engineers recommended strike action on wages question. **30.** After many conferences, negotiations to avert mining stoppage failed, and at midnight subsidy came to an end and owners' lock-out notices came into force. *The General Strike.* Owing to final breakdown, General Council of Trade Union Congress on **May 1** declared a general strike to start at midnight on May 3, the vital services involved being railways, road and sea transport, the Press, iron and steel, building workers, and the power men in electricity and gas undertakings. Efforts were made to settle the dispute, but when Government heard on May 2 that "overt acts"—stopping publication of "The Daily Mail" on refusal of editor to alter a leading article—they required a repudiation of this action and immediate withdrawal of general strike. Informal discussions took place on May 3, but without result, and at midnight General Strike began and Emergency Powers regulations came into force. At first response to union leaders' order seemed fairly general. On May 4 services were practically at a standstill, but day by day transport improved and there was no shortage of food. Train services improved steadily on all the lines and thousands of men returned to work after few days. In view of interference with newspapers Government brought out official organ "The British Gazette," and other papers produced small issues, while news was broadcast frequently. There was comparatively little disorder, though arrests were made in Glasgow, London and elsewhere. Port of London was kept going with help of naval ratings, and convoys of food were taken by troops to Hyde Park, turned into distributing centre. Many workers in other industries were rendered idle by lack of fuel, but at close of first week of strike Government's measures had proved entirely successful, thanks largely to enormous number of volunteers. On May 12 General Council of Trade Union Congress went to Downing Street and announced that strike was being ended that day. Work was not resumed generally until May 17, after new agreements had been negotiated in several trades, and the stop-

page in the mines continued. **May 20.** Miners' delegate conference rejected Mr. Baldwin's new wage proposals for settling dispute but supported his reorganisation scheme. Owners also rejected plan and demanded return to eight-hour day. **23.** Prime Minister condemned attitude of both parties and said Government was no longer bound by its offer. **June 15.** In Commons Prime Minister announced Government's intention to suspend Seven Hours Act and put into force some of reorganisation recommendations of Coal Commision. **29.** Miners' executive maintained policy of resisting owners' proposals, both as regards pay and hours. **July 2.** Engineers' ballot showed majority for strike action. **5.** National Union of Railwaymen conference opened at Weymouth. **6.** Mr. J. H. Thomas routed his critics, only six voting for his dismissal. **17.** Conference between representatives of the Churches and miners submitted new basis for a settlement. **19.** Church leaders saw Mr. Baldwin on the question. **23.** Church leaders renewed appeal to Premier to consider terms proposed. **26.** Mr. Baldwin declined settlement offer. **30.** Miners' delegates recommended district associations to accept Churches' peace plan, but they were rejected. **Aug. 23.** Many miners in various districts resumed work. **26.** Miners' leaders conferred with Mr. Churchill and other Ministers without result, request for subsidy being definitely refused. **Sept. 2.** By 557,000 to 225,000 miners' delegate conference authorised executive to negotiate for settlement. **3.** Miners' executive asked Government to convene conference of owners, miners and Government, and invitation was sent to owners. **6.** Mr. Churchill conferred with owners on question of reopening negotiations. Trade Union Congress opened at Bournemouth. **9.** Congress condemned impudent attack by Tomski, Soviet delegate, whose admission to England was banned by Government. **13.** Mine-owners' district associations declined Mr. Churchill's call for a three-party conference. **17.** After discussing situation with leaders on both sides, Prime Minister made new proposals, consisting of district negotiations of provisional agreements and a national appeal tribunal on general resumption of work to review any settlement involving revision of hours. **23.** Miners submitted memorandum to Government offering immediate return to work at wages not less than pre-stoppage rates, and reference of question of permanent wages and reorganisation measures to arbitration tribunal. **24.** Cabinet rejected miners' offer, not being prepared to go beyond Government's proposals of the 17th. **30.** Miners' delegates left districts to accept or reject proposals. **Oct. 7.** Miners' delegate conference rejected offer of national arbitration tribunal by 737,400 votes to 42,000, and by 594,000 to 194,000 decided to call out the safety men and appeal to other unions to enforce embargo on foreign coal. **8.** Resolution to call out safety men was referred to districts. **11.** Labour Party Conference opened at Margate, Communist delegates creating several scenes. **14.** Districts voted 460,150 for safety men's withdrawal and the embargo and 284,336 against. **15.** Miners' executive formed themselves into "Central Council of War," and commenced campaign to get out men who had returned to work. **29.** Following conference with Premier, leaders of Trade Union Congress met miners' executive and delegate conference was called to consider temporary settlement based on district agreements. 269,557 men at work.

LEAGUE OF NATIONS.—**(1925) Nov. 21.** International Court of Justice ruled that Council's decision on Mosul dispute would be binding and constitute definite determination of frontier, but must be unanimous. **Dec. 7.** Council of League opened its 37th meeting at Geneva. **10.** Council heard General Laidoner's report on Mosul frontier incidents. **12.** Council adopted programme for dealing with problem of disarmament, and appointed Commission to carry out enquiry in preparation for a World Conference. **14.** Council disposed of Greco-Bulgarian dispute, Greece being ordered to pay Bulgaria indemnity of £45,000. **16.** Council decided to make the Brussels Line the definite frontier between Turkey and Iraq, thus awarding Mosul to Iraq, on condition British mandate was extended to 25 years. **(1926) Jan. 30.** France, Italy, Japan, Czechoslovakia and Uruguay asked for postponement of preparatory Commission for Disarmament Conference, and request was granted. **Feb. 12.** Germany formally applied for admission to League. **Mar. 8.** Council and Assembly held opening meetings. **10.** Brazilian delegate announced he would oppose admission of Germany unless Brazil were given a permanent seat. **12.** Position complicated by French demand for seat for Poland: **15.** Sweden and Czechoslovakia offered to resign their non-permanent Council seats to create vacancy for Poland. **16.** Brazilian veto being maintained, question of Germany's entry to League postponed until September. **17.** Assembly closed with regrets at failure of its task. **April 19.** Secretariat received United States refusal to send delegate to World Court Conference. **June 7.** Fortieth session of Council opened. **10.** Brazil resigned membership of Council. **Sept. 1.** Special Commission appointed to consider future composition of Council at Geneva. Agreed that non-permaneut members should number nine instead of six, and be elected for three years. **6.** Spain and Brazil were absent when seventh Assembly opened. **8.** By unanimous vote of 48 nations Germany was admitted to League, and non-permanent seats were increased to nine. **10.** German delegates took their seats at the Assembly, and Dr. Stresemann and M. Briand delivered notable speeches. **11.** Spain announced her withdrawal from the League. **14.** Ratifications of Treaty of Locarno deposited at the League Secretariat and Treaty came into force. **16.** New Council, numbering 14, elected. **24.** Chinese delegate attacked Great Britain for incidents on the Yangtse. **25.** Assembly closed after passing Budget for estimated expenditure of £980,000.

LEGAL.—**(1925) Nov. 10.** Mr. Ivan Snell and Mr. Vernon Gattie appointed Metropolitan Police magistrates. **18.** Case in Probate Court revealed that a man legally "presumed to be dead" was still alive. **Dec. 10.** Three women teachers dismissed because they were married lost Chancery action against the East Ham Corporation. **15.** Verdict given for the Crown in claim by officer for £300,000 as the originator of the war tank. **(1926) Jan. 18.** Moot revived at the Inner Temple after interval of 200 years. **26.** Baroness Clifton, peeress in her own right, called to the Bar. **Mar. 4.** Miss Kidd appeared

in appeal in House of Lords, first woman barrister to do so. **18.** Mr. Justice McCardie decided that girl who won breach of promise action was entitled to keep the engagement ring. **April 19.** Jury awarded Mr. W. S. Harnett £500 damages against the doctor who certified him a lunatic, but subsequently judge ruled that Statute of Limitations applied to the case, and doctor obtained judgment. **28.** Prince Henry called to the Bar and elected Bencher of Gray's Inn. **May 11.** Mr. Justice Astbury ruled that the General Strike was illegal and restrained officials of a union from calling out members without a ballot. **July 15.** Capt. Peter Wright awarded £125 damages and costs against Bath Club for his expulsion following an allegation against Mr. Gladstone. **28.** Divorce Court Judge decreed that Geoffrey Dennis Russell was lawful son of his parents in petition for declaration of legitimacy. **Aug. 23.** Lord Sinha and Sir J. E. P. Wallis appointed members of Judicial Committee of Privy Council. **Oct. 7.** Lord Justice Warrington retired from Court of Appeal and was given peerage. **8.** Mr. Justice Lawrence appointed to Court of Appeal, and Mr. A. C. Clauson, K.C., to Chancery Court.

IMPERIAL DOMINIONS.

(1925) Nov. 2. Serious rioting between seamen strikers and police on British steamer at Fremantle. **4.** In New Zealand elections Government of Mr. Coates gained several seats. **5.** Canadian Government decided to retain office. Seamen's strike in Australia practically over. **14.** Elections took place in Australia on "Red" question, and Mr. Bruce secured clear majority in both House of Representatives and Senate. **20.** On Mr. Bruce's orders, Messrs. Walsh & Johannsen, president and assistant secretary of the Seamen's Union, were arrested. **Dec. 11.** Australian High Court ordered release of seamen's strike leaders. **(1926) Jan. 2.** Eight women attendants of Maharani of Patiala killed in lorry at level crossing in Punjab. **7.** Canadian Parliament was opened. **15.** Canadian Government retained office by majority of three on no-confidence motion. Older wing of Chateau Frontenac Hotel, near Quebec, practically destroyed by fire. **21.** Lord Lloyd opened great Sennar Dam on the Blue Nile. **Feb. 1.** Indian Government proposed Commission of Inquiry into the Bawla murder case. **2.** Supreme Court of British Columbia ruled that all judgments of Judge Helen McGill of Vancouver Juvenile Court were illegal as she had not been properly appointed. **10.** Formation of Royal Indian Navy officially announced. **15.** Serious bush fires occurred in Australia, many lives being lost. **27.** Maharajah of Indore abdicated in favour of his son, thus preventing inquiry into his alleged connection with the abduction of Mumtaz Mahal and murder of Mr. Bawla. **Mar. 8.** Swarajists walked out of Indian Assembly as a demonstration. **25.** Lord Reading bade farewell to Indian Legislature. **April 3.** Lord Irwin assumed office as Viceroy of India. **4.** Rioting between Hindus and Mohammedans in many places in India, 30 persons being killed and 200 injured in Calcutta. **May 20.** General Smuts in South African House of Assembly warned Government against proceeding with their Bill providing for new Union flag. **24.** South African Government decided not to proceed with Flag Bill during present session. Changes in New Zealand Ministry announced, Sir James Parr being appointed High Commissioner in London. **June 8.** Viscount Willingdon appointed Governor-General of Canada. **9.** Sir Malcolm Searle, Judge of the Cape, and fourteen other persons, killed in railway accident near Capetown. **10.** Brisbane express derailed, eight persons being killed. **11.** Announced that Duke of York would visit Australia in 1927 to open Federal Parliament at new capital, Canberra. **28.** Canadian Government resigned after Lord Byng had refused Mr. Mackenzie King's request for dissolution. **29.** Mr. Meighen sworn in as Prime Minister. **30.** New provisional Cabinet obtained majority of ten in Canadian House of Commons. **July 2.** Mr. Meighen defeated by majority of one and Lord Byng agreed to dissolution, decision that aroused great controversy. **8.** Australian Budget showed increase in revenue over the estimate of £3,422,000. **31.** Dominica, in Leeward Islands, struck by hurricane, serious damage being done. **Aug. 3.** Mr. Bruce, Australian Prime Minister, in speech at Melbourne, condemned doctrine of "the international independence of the Dominions." **30.** Announced that Nepal slave liberation scheme had been completed. **Sept. 2** Mr. Bruce, Australian Premier, flew from Melbourne to Adelaide, and sailed for London for Imperial Conference. **5.** Referendum in Australia resulted in majority against measure for regulating industry and grant to Government of powers to carry on essential services should their maintenance be in danger. **13.** Two trains collided at Murulla, New South Wales, 26 persons being killed and 50 injured. **14.** Polling took place in Canada for new Parliament and resulted in striking victory for Mr. Mackenzie King and Liberal Party, who with Progressives had independent majority. **17.** General Hertzog announced South African Flag Bill would be submitted to referendum. **26.** Mr. Meighen, Canadian Premier, resigned and Mr. Mackenzie King formed his administration. Mr. Meighen decided not to seek seat in Parliament. **30.** Lord Willingdon sworn in as Governor-General of Canada at Quebec. **Oct. 11.** British Empire Parliamentary delegation presented Speaker's Chair to Australian Parliament at Canberra. **14.** Col. F. S. Jackson appointed Governor of Bengal. **20.** Lord Irwin visited Lahore. **22.** Serious hurricane visited Bermuda and caused considerable damage.

UNITED STATES.

(1925) Nov. 3. In municipal elections Tammany triumphed in New York. **12.** At Littleton (Colorado) Dr. Harold Blazer was acquitted of charge of murdering his imbecile daughter by administering chloroform, defence being there would be nobody to look after her when he died. Two trains collided in fog near Plainsborough, many lives being lost. Agreement reached at Washington for funding of Italy's war debt of £420,000,000. **18.** American banks arranged loan of £20,000,000 to Italian Government. **Dec. 8.** In his Message to Congress, President Coolidge said Locarno had justified the Government's policy of leaving Europe to solve its own problems. **10.** By explosion in Overton Mine, near Birmingham, Alabama, 61 men were killed. **15.** Battling Siki, the French Senegalese boxer, shot dead in New York street. **22.** Panic occurred at children's entertainment at Erie, and three children were trampled to

death. **(1926) Jan. 4.** In special message to Congress, President Coolidge urged United States co-operation in disarmament discussions at Geneva. **7.** Bank rate advanced from 3½ to 4 per cent. **30.** Mr. Kellogg informed League of Nations that United States would take part in committee preparing for disarmament conference. **Feb. 11.** Vera, Countess Cathcart, was refused permission to land at New York because she had been divorced. **12.** Anthracite coal strike in Philadelphia settled after lasting about six months. **14.** As sequel to detention at Ellis Island of Vera, Countess Cathcart, warrant issued for arrest of Earl of Craven. **15.** Great welcome given by New York to *President Roosevelt* for her rescue of crew of *Antinoe*. **22.** Vera, Countess Cathcart, released for 10 days. **23.** House of Representatives approved Tax Reduction Bill, reducing next year's taxes by £77,000,000. **24.** Bill passed by Senate. **Mar. 5.** New York Federal Court quashed deportation order against Vera, Countess Cathcart, who was admitted to the country. **9.** Dr. B. S. Hopkins announced discovery of a new element, No. 61. **15.** Over 200 persons killed in derailment of excursion train near San Jose, Costa Rica. **17.** President postponed Naval Disarmament Conference which he had considered calling. **18.** Death of President Coolidge's father. Mr. Houghton's report to the President on condition of affairs in Europe aroused considerable discussion. **20.** New York State Assembly passed resolution in favour of a State referendum on modification of the "dry" law. **21.** Senate ratified Italian debt settlement. **28.** Assistant State Attorney at Chicago murdered in street by rain of bullets fired from machine gun in motor car. **29.** Debt Funding Commission approved French offer for settlement of war debt. **June 17.** Train crashed into stationary express near Pittsburg, 20 lives being lost. **20.** Eucharist Congress opened at Chicago. **July 9.** Submarine S51 sunk preceding September was raised and bodies of 17 victims removed. **10.** Magazine in great ammunition depot at Dover, New Jersey, struck by lightning and series of explosions followed, over 50 marines and civilians being killed and enormous damage done, many places in neighbourhood being evacuated owing to rain of fragments. **14.** Summer hotel in Catskill Mountains, Twilight Inn, destroyed by fire, 12 lives being lost. **20.** Treasury Department issued statement showing war expenditure of Allies in United States totalling 7,219,408,669 dollars. **Aug. 23.** Rudolph Valentino, the film actor, died in hospital from peritonitis. **24.** Number of people injured by rushes in huge crowd which viewed Valentino's lying-in-state. **27.** Great reception at New York for Miss Gertrude Ederle, first woman to swim English Channel. **Sept. 19.** Destructive cyclone swept Florida and large part of Miami, famous pleasure resort, ruined. Hundreds of lives lost there and in other towns, and damage estimated at millions of pounds. **20.** Mr. Mellon visited the President after his trip to Europe and advised no change in war debt policy. **23.** In fight for world's heavy-weight championship at Philadelphia, Gene Tunney beat Jack Dempsey on points in 10 rounds. **26.** Mr. Henry Ford announced introduction of five-day week throughout his organisations. **Oct. 4.** Explosion occurred in mine near Pittsburg, 32 miners being entombed. **9.** Suzanne Lenglen made her first professional appearance at New York. **11.** Jury were unable to agree in trial of former Attorney-General, Mr. H. M. Daugherty, and Col. T. W. Miller of conspiring to defraud Government. **18.** Queen Marie of Rumania arrived in New York. **19.** Queen Marie was received by the President at White House. **22.** Earthquake shocks registered on Pacific coast.

FRANCE.

(1925) Nov. 7. Farewell banquet given on closing of Paris Exhibition. **12.** Captain Arthur, "Mr. A.'s" aide-de-camp, sentenced for receiving a cheque knowing it to have been obtained by fraud. **15.** Finance Committee of the Chamber adopted Government's financial proposals. **22.** M. Painlevé's Cabinet resigned after defeat in Chamber by three votes on a financial proposal. **28.** M. Briand succeeded in forming a Cabinet with M. Loucheur as Finance Minister. **Dec. 3.** After 14 hours' sitting the Chamber voted new Finance Minister's inflation proposal. **4.** Senate also passed the scheme. **7.** Three Englishmen arrested in Paris on suspicion of being associated with alleged woman spy. **14.** Finance Committee of Chamber rejected proposed new taxation and referred M. Loucheur's Finance Bills to the Government. Franc reached low record of 135.25. **15.** M. Loucheur, Minister of Finance, resigned after Finance Committee had reaffirmed its reference back. **16.** M. Doumer accepted Finance Ministry. **18.** Group of French industrialists offered to grant loan of £76,000,000 to finance proposed State sinking fund and help Government liquidate the floating debt. **22.** Paris express derailed at Noisy-le-Sec, five persons being injured. **(1926) Jan. 2.** Runaway engine struck passenger train near Sceaux, 15 persons being injured. **Feb. 21.** Finance Committee of Senate passed Finance Bill. **24.** French airman killed in attempting to fly beneath Eiffel Tower. **28.** Senate passed Finance Bill by 268 to 27. **Mar. 1.** Chamber Finance Committee rejected tax on payments. **3.** Nearly all shops in Paris closed for two hours as protest against Government's financial policy. **6.** Chamber rejected tax on payments by 274 to 221 and M. Briand's Ministry resigned. **9.** M. Briand agreed to form new Cabinet. M. Caillaux declined Finance Ministry. **10.** New Ministry completed. **April 1.** Chamber adopted Government's financial proposals to balance the Budget. **4.** After compromise on certain points Senate passed Budget and Parliament adjourned. Several new taxes came into operation. **14.** Civil servants in Paris protesting against low salaries came into conflict with police, over 400 arrests being made. **19.** M. Malvy, a former Minister, cleared of suspicion of having written to Mata Hari, the dancer spy shot during the war. **May 13.** Three Englishmen sent to prison by Paris Court for espionage in "Mlle. Foxtrot" case. **19.** After declining for some weeks the franc touched 178.21. Finance Minister announced Government would defend the franc with support of the banks. **22.** Franc recovered to 149. **June 4.** Senate ratified Locarno Treaty. **7.** Owing to continued depreciation of the franc Government resolved to reduce imports and restrict consumption. **15.** As sequel to continued fall of the franc M. Briand's Government resigned. **23.** M. Briand formed new Cabinet with M. Caillaux as Finance Minister. **26.** M. Caillaux dismissed

Governor of Bank of France and appointed his nominee. **July 3.** Havre-Paris express left rails 15 miles from Paris during heavy rain, 18 people being killed and over 70 injured. **6.** M. Caillaux explained Government's financial proposals and announced re-opening of debt negotiations with Great Britain. **11.** Government secured majority of 121 on financial proposals. **16.** M. Caillaux submitted his scheme to stabilise the franc to Finance Commission. **18.** Ministry overthrown in Chamber by 288 to 243 and resigned. **19.** M. Herriot formed Cabinet. Franc fell to 225. **20.** Franc reached 240. American tourists insulted in Paris. **21.** M. Herriot's Government defeated in Chamber by 290 to 237 and resigned. M. Poincaré agreed to form Ministry. **22.** Franc recovered to 216. **23.** M. Poincaré completed his Cabinet; franc at 206. **27.** M. Poincaré secured large majorities in Chamber. **30.** Four postal servants killed and 17 injured in train wreck near Noisy-le-Sec. **31.** Chamber passed M. Poincaré's Finance Bill imposing further taxation. Mdlle. Lenglen signed contract to play exhibition matches and became a professional. **Aug. 2.** Franc rose to 183. **4.** Franc recovered to 167 and remained about that value for some months. **14.** The National Assembly at Versailles adopted Governments Bill making the Sinking Fund for reduction of floating debt a part of the constitutional law by 672 to 146. **26.** Capt. R. B. Howey, British motorist, killed in speed hill climb at Boulogne; 2 spectators also killed and 4 injured. **Sept. 17.** M. Briand and Herr Stresemann lunched together at Thoiry and examined various problems affecting France and Germany. **23.** In railway collision which occurred in fog near Fontainebleau 5 persons were killed and 20 injured. **27.** Government commenced buying gold and silver coins and there was rush to sell. **Oct. 10.** General Hertzog inaugurated memorial in Delville Wood to South African troops who fell in Great War. **12.** Jewels valued at £50,000 stolen from Condé Chateau at Chantilly. **15.** Thieves entered M. Alfred Lowenstein's villa at Biarritz and stole quantity of valuable jewels. **29.** Prince of Wales visited Military Academy at St. Cyr.

GERMANY.

(1925) Nov. 23. Locarno debate opened in Reichstag by Chancellor, who announced he would resign after the Pact had been signed. **26.** Second reading of Locarno Treaty Bill passed by Reichstag by 259 to 171. **27.** Reichstag approved third reading by 291 to 174. **Dec. 1.** British troops commenced evacuation of Cologne and proceeded to Wiesbaden. **5.** Dr. Luther handed Cabinet's resignation to President von Hindenburg. **30.** British Army took over Wiesbaden zone from the French. **(1926) Jan. 19.** Cabinet formed with Dr. Luther as Chancellor and Dr. Stresemann Foreign Minister. **25.** Application made for plebiscite on expropriation of Hohenzollern property without compensation. **28.** Reichstag by majority of 11 sanctioned the Locarno policy. **31.** Evacuation of Cologne completed amid German rejoicings. **Feb. 8.** German Cabinet adopted Note to League of Nations embodying Germany's application for membership. **April 4.** Death of Herr August Thyssen, head of many great industrial concerns. **24.** Russo-German Treaty signed at Berlin. **30.** Reichstag referred back to legal sub-committee the Socialist Bill for confiscation of properties of former Royal houses. **May 17.** Herr Marx formed new Cabinet. **June 7.** The President called on nation to reject Socialist proposal in referendum on question of confiscating property of the Hohenzollerns. **20.** Referendum did not receive necessary majority, though figures were 14 889,703 for confiscation and 542,311 against, large number of electors not voting. **July 9.** General Ludendorff declared to be guilty party in divorce suit. **Aug. 11.** Seventh anniversary of adoption of Republican constitution celebrated. **19.** By derailment of train near Hanover 21 persons were killed. **Sept. 23.** At Scientific Congress at Düsseldorf Professor Ehrenhaft of Vienna announced that he thought he had succeeded in splitting the electron. **24.** Cabinet received report from Dr. Stresemann of his Geneva mission and approved his tentative agreement with M. Briand. **Oct. 6.** General von Seeckt resigned post of Chief of the Army Staff because he permitted ex-Crown Prince's son to take part in manœuvres. **8.** Lord D'Abernon presented his letters of recall to the President. **14.** German industrialists who participated in British conference reported to their colleagues.

OTHER COUNTRIES.

(1925) Nov. 4. Plot to kill Mussolini as he was speaking in Rome discovered shortly before time fixed for speech and two prominent Italians arrested. **9.** King and Queen of the Belgians reached Brussels after their visit to India. **13.** Mummy of Tutankhamen taken out of its wrappings at Luxor. **26.** King Rama VI of Siam died at Bangkok. **Dec. 2.** Following demand by the Army chiefs, the Spanish Directory was dissolved and a mixed Cabinet formed. **12.** Riza Khan, Regent of Persia, appointed Shah by Constituent Assembly. **19.** King Ali of Hedjaz abdicated. **24** The Pope walled up the Jubilee Door, thus bringing Holy Year to an end. **26.** Battle for Mukden resulted in victory for Chang Tso-lin, defeated leader, Kuo Sung-lin, being captured and beheaded. **29.** Sir Austen Chamberlain met Signor Mussolini at Rapallo. **30.** Floods in Transylvania district of Rumania caused by ice jam resulted in drowning of over a thousand people. **31.** Rumanian Crown Prince renounced succession to the throne. **(1926) Jan. 3.** General Pangalos, Greek Premier, proclaimed a dictatorship. Serious floods occurred in Holland and Belgium following stormy weather. **4.** Several prominent persons arrested in Hungary in connection with forged French banknotes. Queen Margherita, Queen Mother of Italy, died at Bordighera. **11.** Ibn Saud proclaimed King of the Hedjaz in Jeddah. **17.** Fall of Kameneff and Sokolnikoff, Soviet leaders, announced. **23.** Cardinal Mercier died at Brussels. **25.** Following Soviet ultimatum, Chinese General Chang released Russian railway workers in Manchuria. **28.** Viscount Kato, Japanese Prime Minister, died at Tokio. **Feb. 3.** Small revolt in Lisbon suppressed after rebels had shelled capital. **6.** In fiery speech in Italian Chamber, Signor Mussolini warned Germany against the anti-Italian campaign proceeding in Germany. **22.** Port of Canton closed to safeguard the revenues. **Mar. 9.** After considerable fighting in China, Pekin and Tientsin practically isolated. **20.** Death of Queen Dowager of Denmark. **24.** Three of five men

tried for murder of Signor Matteotti, the anti-Fascist deputy, found guilty at Rome and sentenced to terms involving imprisonment for further 70 days. **28.** Duke of Orleans died at Palermo. **April 7.** Signor Mussolini shot at and wounded in the nose while leaving the Capitol in Rome by Hon. Violet Albina Gibson (sister of Lord Ashbourne), who was arrested. **12.** General Pangalos elected President of Greece. **16.** Peking evacuated by "Red" troops before advancing army of Chang Tso-lin. **18.** Peace negotiations opened with Abd-el-Krim in Morocco. **May 14.** Marshal Pilsudski captured Warsaw and formed new Government for Poland. **23.** Abd-el-Krim's headquarters captured by French troops. BRITISH ISLANDS: The *maximum temperature* of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The *lowest temperature* of the air recorded in the shade at 4 feet above the ground is —23° Fahr., or 55° below freezing point, at Blackadder, Berwickshire, on Dec. 4, 1879.

The *greatest rainfall* in a day was at Bruton, Somerset, when 9·56 inches fell in the 24 hours ended 9 a.m., June 29, 1917. This rainfall is equal to 965 tons of water per acre.

The *total rainfall* for a year at Stations in the British Islands during the 55 years 1870 to 1924 ranged from 246·92 inches at Llyn Llydaw (Copper Mill), Carnarvon, and 247·30 inches at the Stye, Cumberland in 1923, to 9·29 inches at Margate in 1921.

The *maximum wind-velocity* on record in the British Islands was recorded at Quilty, west coast of Ireland, on Jan. 27, 1920, when a gust exceeded the rate of 110 miles per hour.

GENERAL: The *maximum temperature* on record of the air in shade is 134° Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The *wettest station* in the world is generally allowed to be Cherra Poonjee in Assam, where the total fall for the year has exceeded 551½ inches. From June 12 to 16, 1876, 114·14 inches was collected, or an average daily fall of 22·83 inches. On one of these days, June 14, 40·80 inches fell in 24 hours.

WEATHER RECORD OF THE HARVEST AND HOLIDAY MONTHS FOR FIFTY-ONE YEARS (1876-1926).

THE following is a brief record of the weather during what may be termed the "harvest and holiday months" for fifty-one years—including the last twenty-five years of the nineteenth century and the first twenty-six of the twentieth. The expression "holiday months" has been chosen because during June, July, August and September is the period of the highest pressure of work in the rural districts and of corresponding relaxation among dwellers in towns and suburbs. There are some parts of the globe where the weather of certain seasons can be forecast with certainty. In the British Isles this is an impossibility, as the tables at the end will show.

The weather records are derived mainly from observation in the neighbourhood of London, but they hold good as well for the south, middle and east of England, sometimes even for the west. There are, however, parts of the United Kingdom to which these observations cannot apply. June in the north is frequently cold and sometimes wet: July s often wet, and August nearly always so. June and July in the west and in Wales are sometimes dry and fine, August and September more often than not stormy and wet.

The records are general statements; statistics as regards temperature, rainfall and sunshine are not included for reasons given in the summary.

JUNE.

In many years the sunshine record and the temperature have been high throughout (1884, 1887, 1893, 1895, 1899, 1908); in others during parts of the month (1881, 1889, 1917, 1919, 1925). Sometimes most of the month has been abnormally cold (1882, 1909. 1923), at others—and very frequently—partially so (1880, 1886, 1894, 1900, 1902, 1903, 1905, 1907, 1916, 1919, 1925). The rainfall has often been slight—occasionally negligible, as in 1895 and 1925. The rainfall values of an otherwise dry month have been raised by heavy thunderstorms or other rainfall as in 1906, 1917. For nearly 20 years (1881-1899) June was on the whole a dry month; from 1900-1912 it was considerably wetter; since 1913 the weather has varied; but on the whole it has since then been more often fine than wet. Excessive precipitation in some months of June (1878, 1879, 1900, 1903, 1905) has of course increased the average of the rainfall. The record of June 1903 is most extraordinary. For the first eight days there was fine weather. From the 9th till the 20th rain fell in torrents, mostly accompanied by a N. wind. On Friday the 19th the temperature did not exceed 48°. From the 20th to the end of the month it was quite fine and rainless; the closing days were hot. The heavy rains only affected the southern part of the Kingdom.

JULY.

This month furnishes an excellent example of alternate cycles of differing types of weather extending over more or less long periods. For many years preceding the opening of the last quarter of the nineteenth century (1876) July, with occasional exceptions, had been a hot and dry month. This kind of weather terminated in the July of 1878, and thenceforward up to and including 1895 an unsettled type was prevalent. The most marked exceptions occurred in 1881 (very hot for the first three weeks, unsettled towards the close), 1885 and 1887 (dry throughout). July was very wet and cold in 1879, very wet though warmer in 1880, very wet and excessively cold in 1888, wet in most of the month in 1890, very wet at the beginning and end of the month in 1891, and wet again in most of the month in 1894. In other years the month was partly fine and warm, and partly wet. In 1896 a change took place, and lasting up to and including 1908, the month was remarkable for fine and hot weather. The only exception occurred in 1903, which was a year of extraordinary weather. But the month was almost rainless up to and past St. Swithin's Day. After that there were tropical downpours. Since 1908, July has been a generally unsettled month; in 1909, 1910, 1918 and 1922 it was wet throughout; in 1911 and 1921 very dry; in other years mixed weather has prevailed.

AUGUST.

The quarter-century opened with the termination of a series of years in which August had been a fairly fine month. With 1877 began a series of bad-weather Augusts (dry in one year, 1880). August 1879 was desperately wet, the latter half especially. From 1883 to 1887 the month was tolerably fine. There was much hot weather in 1884 and 1887. With 1888 another series of wet Augusts began, the only exception being 1893; this definitely wet series lasted till 1897. From 1898 onwards the weather in this month has been variable. In 1898, 1899 (very hot), 1901, 1904, 1906, 1911, 1913, 1914, 1921, August was more or less a good month. In 1902, 1903, 1912, and 1917 it was wet. With the sole exception of 1899, the weather of the month has never been perfect. If it has begun well it has ended badly (1916, 1919, 1923); sometimes when it has begun badly it has ended well (1914, 1915). At the end of August 1912 the phenomenal Norwich Floods occurred. In the second half of August 1916 the Thames Valley and the Midlands were devastated by thunderstorms and torrents of rain which destroyed the standing harvest. In August 1921 the weather was fine on the eastern side of England, wet on the western and in Wales.

SEPTEMBER.

The year 1876 came in the middle of a series of unsettled Septembers. In 1876 the month was wet: in 1877 and 1878 it happened to be dry. In several of the following years the weather of the month was definitely unsettled. In 1883 and 1885 the rainfall was very heavy. From 1888, onward, the month was generally very fine with the marked exception of 1896, when September was very wet throughout without a break. It was in consequence of this comparatively long era of recurring dry and fine weather that September acquired a high reputation for being a fine holiday and harvest month. If August was wet, as it frequently was, September could generally be relied upon for the safe in-gathering of the crops, and holidays could usually be arranged for September long in advance without disappointment as regards weather. But a change came in 1918, when the month was disastrously wet throughout. Indeed, as the month advanced, the worse the weather became, and the colder as well. September 1919 was warm at first, but bleak and cold later. September 1920 was very wet and

cold in the second half. In 1921 (the exceptionally fine *year*—not merely summer) September was warm throughout; but in each succeeding year the month's weather has been wet or unsettled, rarely warm, and generally cold. It is to be hoped that this second untoward cycle may have a speedy ending. (The warm September now just ended strengthens that hope.)

SUMMARY AND CONCLUSIONS.

(1.) The tabular statements month by month over a series of years are given in general terms: figures relating to sunshine, temperature and rainfall are not recorded. The rainfall and sunshine records from one particular station, say Greenwich, Kew or Kensington—would be misleading, as these factors vary within a few miles' radius. An average computed from the figures supplied by a group of local weather stations can be the only fair guide, as a few instances will illustrate:—*September* 1880 was very fine at the beginning and end, but there was a deluge of rain all over the country in the middle of the month (Greenwich total 4 inches). Yet no one could say it was a month of bad weather. *June* 1917 had most brilliant weather up to the 16th. On that day tropical rainstorms and thunderstorms occurred. They did not affect the Greenwich neighbourhood to any great extent, but Central and West London had about treble the rainfall of Greenwich.

August 1916 began with ten or twelve days of hot, rainless weather, with hazy skies. In the Thames Valley and the Midlands, the rainfall in the second half was extraordinary. Clouds would roll up from any quarter; there was little or no wind. "The rain poured down from one black cloud"; and the standing crops all round London were destroyed. Yet along the south coast the hot weather in this August was only succeeded by some unsettled showery days.

In *July* 1913 the weather round London was rather nondescript. In the second half it was mostly dry, but dull and not very warm. In North Wales it was brilliantly hot and fine: this being a personal experience.

August 1920 was fairly dry, but it was so cold in the second half that the month could hardly be called really fine.

(2.) As regards the four months individually:—

The present average rainfalls for each month are the following, as given in WHITAKER'S ALMANACK:—

June	2·02 inches.
July	2·24 ,,
August	2·19 ,,
September	1·79 ,,

The two most equable months are July and August: much of the weather in June may be bleakly cold, as in 1909 (when it was wet) and 1923 (when it was dry). In September 1912 day after day was almost sunless, and in the second half of September 1919 it was almost cold enough to snow, and that in the south of England! Therefore it is little wonder that though the adventurous look forward to a September holiday, those who do not like changes in temperature prefer July or August.

July has by far the most brilliant sunshine records: August has rarely very cold days, but in general it is not nearly so bright. Both months are on an average wetter than June, and far wetter than September.

The work of compiling a complete weather record over a series of years will be rendered easy for future investigators, as the Meteorological Office now issues complete tabular statements of each month's weather, and a summary at the end of the year. These records embrace the whole of the British Isles. For past statistical records one has to rely upon the work done by official observation (Greenwich, Kew, and the observatories in provincial cities), and upon the painstaking investigations of private recorders. Foremost among these was the late Mr. G. J. Symons, F.R.S., of Camden Square, London, who not only kept his own records but collated them with these of his correspondents.

EARLY RECORDS.

Of early records by far the most interesting are those of Gilbert White, given in his *Naturalist's Calendar*, covering the years 1768–1792. A perusal of them will dispel the illusion as to the prevalent fine summers of bygone days. Just occasionally the summer was hot and dry, but rarely throughout. Not infrequently it was terribly wet. The Selborne Rainfall Records tabulated for eleven years show that for his district Gilbert White found that June was by far the driest month, whereas July, August and September were comparatively wet: August was the driest month of these three, next came September, and lastly July, not very far behind.

The *London Magazine* (famous for the original publication of Lamb's *Essays of Elia*, and De Quincey's *Confessions of an Opium Eater*; and notorious for literary contributions by the poisoner, Wainewright) also contains records of each month's weather. This was in the early twenties of the nineteenth century. These records are remarkably interesting, and much resemble those given in WHITAKER'S ALMANACK of the present day.

But one may go much further back and obtain still more interesting records than these in Samuel Pepys' *Diary*, a quotation or two from which we give in conclusion: "September 1st, [1661] (Lord's Day). Last night being very rainy [the water] broke into my house, the gutter being stopped, and spoiled all my ceilings almost."—[September] "24th. We rose, and set forth; but found a most sad alteration in the roads, by reason of last night's rains, they being now all dirty and washy, though not deep."—[July, 1662] "15th. About bed-time it fell a-raining, and the house being all open at top, it vexed me, but there was no help for it. 16th. In the morning, I found all my ceilings spoiled with rain last night, so that I fear they must be all new whited when the work is done."—"19th. In the afternoon I went upon the river; it raining hard upon the water, I put ashore and sheltered myself, while the King come by in his barge, going down towards the Downes to meet the Queen; the Duke being gone yesterday. But methought, it lessened my esteem of a king that he should not be able to command the rain." "22nd. I had letters from the Downes from Mr. Coventry, who tells me of the foul weather they had last Sunday, that drove them back from near Boulogne, whither they were going for the Queen, back again to the Downes, with the loss of their cables, sayles and masts; but are all safe, only my Lord Sandwich who went before with the yacht; they know not what is become of him, which do not trouble me much; but I hope he got ashore before the storm begun; which God grant!"

	JUNE.	JULY.	AUGUST.	SEPTEMBER.
1876	Dry and pleasant, hot towards close.	Hot and dry throughout.	Hot and dry to past middle of month, afterwards unsettled and showery.	Wet and showery, a few fine days.
1877	After the first few days, fine and hot.	Mixed weather, some very fine days.	Except for one week in middle, broken and unsettled.	Fine, but sometimes cold.
1878	Very cold with heavy rains in first half, later fine and hot.	Very fine and dry throughout.	Very wet, heavy rainfall, but fairly warm and sunshine moderate.	Very warm and fine till towards close.
1879	Very wet throughout.	Very wet, a few fine days at end.	Showery at opening. One fine week, then excessively wet.	After a few fine days rain set in again, very unsettled.
1880	Cold and showery.	Wet but warm throughout, a few very fine days.	After the first week very fine and warm.	Hot at beginning, violent rains about middle, closing days fair.
1881	Generally very fine and hot.	Very hot till last ten days, then somewhat unsettled.	First eight days fair, afterwards cold with heavy rains, occasionally a fine day.	Very unsettled, one fine week in middle, a few fine days at close.
1882	Very cold and showery.	A few fine days at opening, then cold and showery, fine at close.	Very fine first half, then unsettled and showery.	Mixed weather, opening days stormy.
1883	Hot at first, then rather unsettled.	First ten days fine, afterwards unsettled.	Very fine, especially in latter half.	First half wet and stormy, fine week in middle, wet at end.
1884	Heavy rains at opening, afterwards very fine and warm.	Hot the first half, then unsettled, closing days hot again.	Very fine and hot till closing week, when rather unsettled.	Heavy rains at opening, then very fine till closing days, when unsettled.
1885	Very fine, a few cold days.	Very fine and hot throughout.	Some unsettled weather about second week, otherwise fine, cold towards end.	Very wet and sunless throughout; temperature moderate, but last week very cold.
1886	Fairly dry with many fine days, very cold in third week.	Variable, hot at first, then showery, warm again, but last few days cold and wet.	Rather unsettled first half, second half fine and hot.	Unsettled in first half, later dry and fine.
1887	Heavy rains in opening days, rest of month fine and hot.	Very fine and hot, a little unsettled weather towards end.	Very hot, heavy thunderstorm in middle, closing week broken and unsettled.	Cold and showery throughout. Not much sunshine.
1888	Opening days fine, then unsettled, middle very cold, ending with heavy thunderstorms.	About the wettest July known, ending with violent thunderstorms and torrents of rain.	Opening days wet, then a few warm days, with a dry spell till the last week, which was very wet.	Fine and fairly warm throughout.
1889	Hot at opening, unsettled with heavy rain and thunderstorms at end of first week, afterwards very fine.	Opening week fine, then unsettled, fine at close.	After four opening fine days very unsettled till last week, which was warm and dry.	Warm and dry till last week, which was cold and unsettled.
1890	Very unsettled throughout with frequent rain, a few warm days about the 25th.	Very wet, heavy rains and severe thunderstorms. Fine just at close.	The first ten days fine, afterwards unsettled with heavy rains till 28th; closing days fine.	Very fine and warm throughout.
1891	Very fine, but some days rather cold.	Wet at beginning, very wet at end; a fine warm interval from 10th to 26th.	Very wet throughout, thunderstorms and heavy rains.	Fine on the whole, a few wet days towards end.

	JUNE.	JULY.	AUGUST.	SEPTEMBER.
1892	Generally fine.	Generally fine, unsettled in middle, hot at close.	Generally fine in first part, heavy rains towards end.	Unsettled at first, afterwards finer.
1893	Very hot and dry throughout.	Hot in first part, cooler with heavy rain later.	Unsettled about second week, great heat and drought later.	Hot at first, cold and showery towards close.
1894	Cold and wet in first part, warm and fine last week.	Hot during first week, afterwards wet and unsettled.	Wet during first three weeks, closing week warm and fine.	Opening days warm and fine, afterwards cold and showery.
1895	Hot, fine and dry throughout.	Hot and fine first fortnight, heavy rains afterwards.	Rain fell every day in first fortnight, afterwards fine, hot at close.	Very fine and warm throughout.
1896	Occasionally unsettled, but on the whole fine.	Very hot and fine throughout.	Moderately fine first half, later broken and unsettled.	Very wet throughout, with excessively heavy rains.
1897	Variable, some cold days, but on the whole fine.	Very hot and fine the whole month.	After a few very hot days weather broke up, heavy rains towards close.	Wet the first week, then finer, some cold days, unsettled again at close.
1898	Dry throughout, much sunshine, very cold dull spell about second week.	Fine, warm and dry on the whole, but some cold days.	Fine at first, then unsettled about second week, afterwards hot and fine.	Very hot, fine and dry throughout.
1899	Very hot and fine, a few unsettled days towards close.	Very hot and fine throughout.	Again very hot and fine throughout with little rain.	The fine weather and great heat continued the first week, then heavy thunderstorm, afterwards unsettled but often fine.
1900	Cold and wet at opening, then a warmer spell, cold with heavy rain last week.	Unsettled first week, afterwards fine and dry and very hot.	Wet with strong wind first ten days, then a hot spell, wet again third week, ending fine but dull.	Generally fine and warm throughout.
1901	Generally fine and warm.	Fine and warm first three weeks, heavy local rains towards close.	Warm and fine till closing week, which was unsettled and rather cold.	Unsettled at first, afterwards finer and hot at close.
1902	First warm, then cold spell with heavy rain, hot and finer later.	Fine and warm.	Very unsettled with occasional heavy rains.	Moderate weather, cold towards end.
1903	Opening days fair, weather broke up with northerly winds and an extraordinary deluge lasting about 12 days; last week very fine.	First fortnight, including St. Swithin's day, warm and fine, weather then broke up with thunderstorms and heavy rains.	Moderately fine first week, afterwards very heavy rains with small intervals of fine weather.	Cloudy, damp and showery with occasional fine days.
1904	Dry and fairly warm.	Generally fine and hot, some unsettled weather towards close.	Fine on the whole; hot at beginning and towards end.	Rather unsettled at first, afterwards much finer.
1905	Fine at first, then northerly winds, heavy rains and cold; before middle of month warm weather again.	Very fine and hot throughout.	Much unsettled weather, a fine spell about middle, towards end heavy rains.	Somewhat unsettled and showery, occasional fine spells.
1906	Mainly fine and very warm, two cold days with heavy rain at end.	Very fine and hot throughout.	Very hot at first, then a cooler spell with showery weather; last ten days excessively hot.	First week very fine and hot, then a few days of heavy rain followed again by fine weather.
1907	Cold at first, then warm, generally unsettled, some heavy rain in last week.	Dry and dull, some brighter days towards close.	First week warm and fine, unsettled with occasional heavy rain in middle, fine and warm last week.	Unsettled at first, afterwards remarkably fine and warm.

	JUNE.	JULY.	AUGUST.	SEPTEMBER.
1908	Remarkably fine and warm throughout.	Fine and warm, broken by a period of 12 days' heavy rain in middle.	Fine up to 20th, afterwards heavy rains with gales till end of month.	First fortnight wet and windy, afterwards very fine.
1909	Very cold first half and wet throughout, rather warmer last ten days.	Wet throughout, with occasional fine days.	First fortnight fine and warm, then ten days' wet weather; closing days finer again.	Cold and rainy with N.W. winds, occasionally a fine day.
1910	First three weeks fairly good weather, closing week wet.	Wet and unsettled throughout.	A few fine days early in month and about middle, otherwise unsettled.	Cool and dry with little sunshine except in closing week.
1911	First week hot and fine, second dull and cold, last fortnight wet and unsettled.	After first few days, hot, dry and rainless.	Very hot indeed till 20th, then a little unsettled, fine again till close.	Very hot and fine till near close of month, then cold.
1912	Unsettled and showery throughout.	Moderate weather at first, a very hot and fine fortnight in middle of month, a little unsettled at close.	Very wet throughout with heavy rains.	Cool and dry, 2 or 3 days of heavy rain at end of month.
1913	Warm and dry throughout.	Some unsettled weather in middle, otherwise fine. Rather dull in S.E., but hot in W. and Wales.	Fine on the whole throughout, last day very wet.	Variable, opening days wet, then finer, unsettled and cool in middle, fine and warm at close.
1914	Variable in first half, with some cool days, fine and hot towards close.	Variable, some hot days, but generally showery, cold at beginning of last week.	First week unsettled, with heavy rain, afterwards remarkably fine and warm.	Very fine and warm throughout.
1915	Generally fine, warm and dry.	First few days warm and fine, then very unsettled with heavy rains.	Heavy rains and thunderstorms first half, second half dry and fair.	Opening days unsettled, fine and warm from 5th to 26th; closing days cold with heavy rain.
1916	Unsettled, cold and showery throughout, little sunshine.	First half unsettled, second half hot and fine.	First 12 days hot and fine, remainder of month wet; particularly bad round London, torrential rains and thunderstorms.	Moderate weather, some very fine days, others cool and showery.
1917	First half hot and dry, heavy thunderstorm with excessive rain on 16th, afterwards unsettled.	Much very fine hot weather with occasional rain till 28th; on 29th to end of month heavy rains with N. wind.	Heavy rains of last days of July continued first week, then a little finer but unsettled; renewal of heavy rains last week.	Moderately warm, fine and dry, one wet week about middle.
1918	Mixed weather, unsettled in middle, warm at close.	Fine weather at opening and end, but extraordinarily heavy rainfall in middle and later.	Opening week wet and unsettled, fine period 9th–23rd; wet from 23rd to 29th, closing days fair but dull.	Almost the wettest September known, opening day fine, 16th, 17th, 25th fine, deluges of rain at end, and very cold.
1919	Fine and hot up to 20th, then cold and dull. One day's heavy rain about 19th.	Cold and sunless, moderate rainfall, a few fine days in middle.	Fine and hot up to 18th, broken weather rest of month.	Fairly warm and fine till 18th, afterwards cold and dull, dry on whole.
1920	Mixed weather, some very fine days, others cold and wet.	Wet and unsettled, but one week of fine weather in middle.	Wet at beginning, then finer and warm; heavy rain for two days in middle, afterwards dry but cold and dull.	Fine during first fortnight, followed by cold spell with heavy rains, warmer towards close.

	JUNE.	JULY.	AUGUST.	SEPTEMBER.
1921	Dry throughout; cool at first, very hot later in month.	Very hot throughout, almost rainless.	Dry and fine in east and south of England, very wet in north and west, also Wales.	Opening week hot, second week heavy rain; third week dull, fourth hot and fine again.
1922	Very fine and hot first eleven days, weather then broke up with heavy rain, unsettled rest of month.	Wet throughout, no fine spell, an occasional fine day.	Unsettled throughout, some fine days.	Cold and showery throughout, N.W. winds.
1923	Very cold and dry, a few warm days towards close.	Mixed weather, many fine warm days with moderate rainfall.	Fine and hot first three weeks, most unsettled 19th to 29th ending on that day with storm and rain; two closing days fine.	Much fine weather, but marred by one very wet week (18th to 24th).
1924	Very wet first half, fine second part of month.	Fine first half, wet later.	Only one fine warm week, 11th to 16th, remainder wet and unsettled.	Very wet, a few occasional fine days.
1925	First three weeks fine and hot, followed by several days' cold dull weather; almost rainless.	Most of month fine and hot, heavy rains and thunderstorms towards end.	Variable weather, fine warm days alternating with rainy ones; last four days very fine.	Cold and showery throughout, great prevalence of N.W. winds.
1926	One very cold day (2nd) at beginning. Heavy rains at intervals throughout month. Some days fine and warm.	Generally unsettled with moderate temperature; one very hot spell from 11th to 18th, which broke up with a thunderstorm.	Fine and warm till 6th; unsettled, but with much fine weather and sunshine till 21st; heavy rain 9th and 10th; very fine and warm from 22nd to 31st.	Opened with great thunderstorm on 1st, followed for some days by unsettled weather; remarkably fine and hot spell from 8th to 24th, followed by an equally cold one from 25th to 28th; closing days warmer again.

STORMS AND FLOODS IN 1925-26.

(1925) *October* 4. A violent storm in the Gulf of Bothnia caused the wreck of the Finnish torpedo boat S. 2. The crew of 52 were lost. 10. During a heavy storm, accompanied by severe rain, at Badolato, the railway bridge was swept away. A local train fell into the Ponzio and 15 people were killed. 10. A gale which reached a velocity of 78 miles an hour raged over New York. Five people were killed and many injured. 12. Heavy rainstorms in Morocco caused the temporary abandonment of the military operations. 16. Five inches of rain fell in Calcutta. This was the heaviest downpour for October since the tempest in 1899. 20. A severe gale in the Atlantic caused the wreck of the Italian steamer *Ignazio Florio* (5,435 tons). 24. A gale reaching 75 miles an hour at Baltimore wrecked 17 U.S.A. seaplanes and caused the postpouement of the race for the Schneider Cup. 25. A tornado over Alabama killed 16 people, and an 85 miles an hour gale in New York did much damage.

November 1. During a hurricane in the Atlantic, damage to the extent of £2,500 was caused to the Cunard liner *Berengaria*. 25. A severe gale at Norddeich, Germany, blew down three wireless masts each 500 feet high. 25. Heavy snowstorms over Denmark caused much damage. 26. A gale raged in Lisbon. 28. Heavy snow at Lyons caused much disorganization of traffic. 29. Terrific storms and hurricanes in Southern Italy and Sicily. The orange and lemon crops were completely ruined. 30. A violent storm in the valley of the Wergha; 3 men killed and 20 injured. The sheds at the Fez aviation camp were destroyed and 18 aeroplanes damaged.

December 10. Heavy rains in Madras caused the collapse of an embankment. A train was overturned and 9 people were killed and 21 injured. 20. A violent storm at Espinho, near Oporto, wrecked many cottages. Over 60 persons were injured. 21. A severe thunderstorm with hail at Lyons caused much damage. The power station was struck and put out of action. 22. Wind storms and cold weather at Rapallo made outdoor sports impossible. Reported to be the worst Christmas weather for this district in living memory. 22. Violent hurricane with torrential rain swept the whole of Belgium. Much damage done to dwellings and telephones. 23. Terrific storm in Northern Japan resulted in 20 boats and 140 fishermen being lost. 25. A 40 miles an hour gale in New York brought a severe cold wave. The temperature dropped to 12° F. 27. Lightning set fire to the petroleum tanks at Buenos Aires, doing damage to the extent of 2,000,000 pesos. 29. Severe gale raged over Holland. A motor bus was blown off the ferry in the province of

Zeeland and six passengers were drowned. 30. Owing to the continuous rain the Seine had reached 13 feet above the normal level. 31. A gale reaching a velocity of 55 miles an hour in Berlin did considerable damage to buildings and trees. 31. Heavy rains caused the floods in Cologne to rise at the rate of 1½ inches an hour, the water in the main street being over 7 feet deep.

(1926) *January* 1. Several earthquake shocks were felt in Italy. The centre of the earthquake was about 50 miles from Padua. 2. Heavy rain flooded large parts of Bombay city. Most unusual for time of the year. 4. The Rhine dyke at Pannerden gave way and a large area of land was inundated. 6. The floods reached the British War Cemetery at Mons and the graves were under water. 7. Heavy rains in Northern Holland caused 45,000 acres of land to be flooded to a depth of about 3 feet. 8. The Yssel main dyke gave way, and vast areas were flooded. 9. A snowstorm at Sjoa caused a naval flying boat to make a forced landing. 12. Heavy snowstorms caused Mt. Vesuvius to be covered. Such a fall had not been seen for many years. 13. A foot of snow fell in Milan, causing great delays on the railways and many accidents. 14. The first snow for 20 years fell at Rapallo. A violent storm over Barcelona caused 500 families to be homeless. 15. A snowstorm at Vienna covered the city to a depth of about four inches, and drifts in many places were knee deep 17. A violent thunderstorm in the Canary Islands did much damage to buildings, and a woman was killed by lightning. 23–24. Severe gales and snowstorms in the Atlantic caused much damage and delay to shipping. Waves 50 feet high were reported. Two British boats, Antinoe (2,000 tons) and Laristan (2,700 tons) were wrecked, and several of the crews were drowned.

February 1. A south-westerly gale off Gibraltar caused the Sixth Destroyer Flotilla to return to port. 2. Violent thunderstorms in France did considerable damage. 9. Ten inches of snow fell in New York, and in New England the temperature fell to 30° below zero. 16. An avalanche of snow and rocks in Salt Lake City buried between 50 and 100 persons. Fire broke out in the ruins and many people were burned to death.

March 5. Snow fell at Dijon and many parts of the Rhone valley, causing considerable damage to property. 6–7. A gale raged over Italy and several people were killed in Sicily. Heavy snow fell at Florence and on the Appennines to a depth of 3 to 4 feet. 29. The heaviest snowfall for 18 years occurred at Amarillo, Texas.

April 7. Lightning struck two reservoirs belonging to the Union Oil Company at San Luis Obispo. The loss by fire is estimated at $15,000,000 (£3,000,000). 8. A break in the banks of the Tigris near the Royal Palace, Baghdad, caused floods to a depth of 15 feet. Many lives were lost and damage to the extent of £1,000,000 was done. 22. Heavy rain and rapid snow thaws at Moscow caused the River Moskva to rise 25 feet above normal, and the lower parts of the town were flooded. 24. A strong gale in the Bay of Naples raised heavy seas and much damage was done to shipping. 28. Rain measuring 1·65 inch fell in the Department of Calvados, Normandy, in 24 hours, breaking a 30-year "record."

May 24. The heaviest rain for more than 10 years fell at Aden, resulting in much damage to property. 25. A cyclone at Calcutta (the severest for many years) did a vast amount of damage and caused the loss of several lives. The court houses and most of the Government buildings at Akyab were destroyed. 25. A storm of extreme violence accompanied by torrential rain at Novisad (Yugoslavia) caused the death of nine people.

June 2. A foot of snow fell in parts of Switzerland. 8. A hailstorm, of which the stones are reported to have been as big as hens' eggs, burst over Odessa. 12. A violent thunderstorm over the north-west of Switzerland did damage to the extent of 2,000,000 francs. 23. Half the town of Leon, Mexico, was destroyed by the flood waters from the San Luisito River. Over 200 lives reported lost. 26. A long and violent earthquake at Candia (Megalokastron) in Crete. Many casualties occurred and the archæological museum was practically destroyed. Severe earthquake shocks were felt in Egypt. Damage to the extent of 110 people killed, 66 injured and 4,236 houses totally or partly destroyed.

July 4. A violent thunderstorm in Canton Vaud, near Lausanne, destroyed the vineyards, and part of the town of Rolle was flooded to a depth of 2 feet. 7. Heavy storms at Moji, in Southern Japan, caused the death of 26 persons. Twenty bridges were washed away. At Tsushima 5½ gallons per square foot fell; the heaviest rain for 30 years. 10. A terrific thunderstorm at Dover, New Jersey, U.S.A., caused three explosions in the Naval ammunition depôt. The casualties numbered 50 dead and 150 injured. 21–22. Nearly 12 inches of rain fell in Calcutta on these days and 3½ inches in an hour caused large areas to be flooded. Boats were plying in the streets. 26. A tropical hurricane from the Caribbean Sea swept over the coast of Florida and caused much damage to shipping estimated at £1,000,000. The wind reached a velocity of 130 miles per hour.

August 4. Several dykes on the Yangtse River in the province of Hupeh burst and caused the loss of 3,000 lives and two thousand square miles of country were flooded. 12. Severe rain (3½ inches in 75 minutes) fell over Greater New York and much damage was done. 13. A terrific rainstorm broke over Barcelona and a great part of the city and suburbs was flooded. 18. A cloudburst at Windsor (Ontario) flooded the business quarter of the town and caused damage estimated at £100,000. 28. During a gale off Saghalien, a 200-ton cargo boat, *Heian Maru*, sank. Twelve members of the crew were drowned.

September 4. A severe typhoon swept over Tokyo causing extensive damage to houses and crops. The velocity of the wind was 80 miles per hour. 6. A terrific rainstorm fell on New York. Many lives were lost in accidents which resulted from it. 12. Over 14 inches of rain fell at Neosho Falls causing floods in South-eastern Kansas. 18. A hurricane with a velocity of 100 miles per hour swept Miami and Palm Beach. Over 150 lives were lost and £20,000,000 damage caused to property. 27. A typhoon which raged at Macao caused the loss of the entire deep-sea fishing fleet. 28. At Trieste a cloudburst did much damage to property. Two bridges were swept away. 28. The worst storm since 1888 at Vera Cruz, but the damage was quite small, the majority of the houses having stone walls from 3 to 4 feet thick.

BRITISH ASSOCIATION. — The ninety-fourth annual meeting of the British Association for the Advancement of Science was held at Oxford from *Aug.* 4 to *Aug.* 11. The Prince of Wales, who succeeded Professor Horace Lamb as President, dwelt in his address on the bearing of scientific research on the daily life of the community and the ways in which that relationship may be developed by the mutual co-operation of scientific workers and the State. The establishment of the National Physical Laboratory had begun a new era, and the State's concern in science had expanded through the agricultural activities of the Development Commission, our work on fisheries in co-operation with other nations, the labours of the Medical Research Council, and the setting-up of the Department of Scientific and Industrial Research. Sound scientific research, he said, was never wasted, and public support should be accorded to it freely.

The Presidents of the various Sections, and the subjects of their presidential addresses, were as follows :—

A, Mathematics and Physics, Prof. A. Fowler, "The Analysis of Spectra"; *B*, Chemistry, Prof. J. F. Thorpe. "The Scope of Organic Chemistry"; *C*, Geology, Prof. S. H. Reynolds, "The Lower Carboniferous (Atonian) Rocks of England and Wales"; *D*, Zoology, Prof. J. Graham Kerr, "Biology and the Training of the Citizen"; *E*, Geography, the Hon. W. Ormsby-Gore, M.P., Under-Secretary of State for the Colonies, "The Economic Development of Africa and its Effect on the Native Problem"; *F*, Economics, Sir Josiah Stamp, "Inheritance as an Economic Factor"; *G*, Engineering, Sir John Snell, "The Present and Future Development of Electricity Supply"; *H*, Anthropology, Prof. H. J. Fleure, "The Regional Balance of Racial Evolution"; *I*, Physiology, Prof. Leathes, "Function and Design"; *J*, Psychology, Dr. J. Drever, "Psychological Aspects of our Penal System"; *K*, Botany, Prof. F. O. Bower, "1860–1894–1926"; *L*, Education, Sir Thomas Holland, "The Tandem System in Education"; *M*, Agriculture, Sir Daniel Hall, "The Limits of Agricultural Expansion."

The Meeting in 1927 will be held at Leeds, under the Presidency of Sir Arthur Keith; and in 1928 the Meeting will be at Glasgow.

AEROPLANE LANDED BY PARACHUTE.—A parachute large enough to break the fall of an aeroplane has been successfully tested at the Inglewood air port, Los Angeles. The apparatus, which has been invented by Mr. Harry Douchett, of the American Navy, is made of silk, and has an extended diameter of 50 ft. and weighs 45 lb., was packed inside the fuselage of an aeroplane. An ascent was made in the presence of 25,000 people to a height of 2,500 ft. When the engine was shut off and the parachute released, the machine came down and landed 67 sec. later 3½ miles to the west of the starting point. The only damage was a broken under-carriage and a snapped propeller blade. The pilot, aeroplane, and equipment weighed altogether 1,800 lb.

ALL-STEEL TRAIN.—An "all-steel" train travelled from London to Birmingham and back on *April* 15, 1926, to demonstrate a new departure in rolling-stock by the London, Midland, and Scottish Railway, who are building a number of steel-bodied third-class vestibule coaches. The cars are of the centre corridor type, each one accommodating 56 passengers, with a table to every set of four. The bodies are constructed entirely of steel, the sections which form the floor being covered with fireproof cement and suitably insulated.

ARCTIC LANDS FOR GRAZING.—Mr. V. Stefansson, in the course of a series of articles in the "Forum" on the food resources of the world, suggests that of the 3,000,000,000 acres of land which lie north of the possible wheat-line, the greater part might be turned to account for the grazing of reindeer and musk-ox. He points to the successful breeding of the reindeer in Alaska, where, since the introduction of domesticated deer from Siberia between 1892 and 1902, the herds have been doubling every three years. The raising of musk-ox in reindeer lands would be practicable because the reindeer feeds on lichens in winter and uses grass only in summer, while the musk-ox eats grass all the year round. In the Arctic tundras the number of reindeer is limited by the winter food, which is only about one-tenth of the summer supply. This leaves scope for large herds of musk-ox. The musk-ox in addition to supplying meat would produce fine unshrinkable wool, which has been proved to have the qualities of good merino. Mr. Stefansson estimates that the Arctic grasslands could support a hundred million reindeer and five times as many musk-ox with a total annual meat production of 55,000,000,000 pounds of meat.

ARCTIC TEMPERATURE.—From his six years' experience in the Arctic Dr. H. U. Sverdrup has drawn up a number of conclusions regarding the temperature of the air in that region of the world. He has discovered that in winter the temperature is always lower close to the ice than 300 metres above it. The mean temperature at the ice is −28·4° C., with a fall to about 100 metres, then a rapid rise to about 300 metres, and then a slower rise to −20.3° C. at 1,000 metres. On calm days the mean temperature at the surface averages about −33° C., but corresponds with the mean at higher altitudes. The low surface temperatures are due to contact with the ice, which loses heat by radiation. The minimum surface temperature is about −45° C., because, though the ice loses heat by radiation, it is always gaining heat from the underlying sea, which retains a temperature of about −1·7° C. The wind causes a mixture of the lower layers of the atmosphere on account of numerous eddies, and there is a decrease of temperature with altitude, but only in the lower layers. At higher altitudes an inversion of temperature is the normal condition. Thus an explanation is offered of the phenomenon, previously noticed in polar regions, of a rise in temperature when the wind begins, independently of its direction.

BANANA AND ITS ORIGIN.—Dr. E. W. Berry has been able to throw fresh light on the problem of the origin of the banana by the identification and description of fossil banana seeds from Tertiary beds in Colombia. The exact horizon cannot as yet be stated, but Dr. Berry favours an Oligocene age. The independent cultivation of the banana by the natives of America long before the advent of Europeans thus appears to be proved, though it cannot yet be argued that

South America was the actual region of origin. Hitherto the question of origin has given rise to much difference of opinion, though most botanists have assumed that it lay in the Indo-Malayan region. It has been suggested that the banana was introduced into America by way of the Canary Islands and Haiti about the year 1516. A few early writers, such as Humboldt, pointed out that it was cultivated along the Orinoco and Beni rivers by the aborigines at the time of their first exploration.

BATH SPRINGS.—Dr. R. H. Rastall, in an article in the "Geological Magazine" on the Bath springs, states that the temperature of the waters is about 70° F. above that of normal spring water, indicating that the ultimate source must be at least 5,000 feet below the surface. This deduction, and the saline character and radioactivity, lead to the conclusion that the Bath and similar thermal springs in other countries are fed by deep-seated sources of igneous origin, involving pronounced fractures. In the case of Bath the east and west lines of folding of the highly disturbed Mendip region and the similar north and south lines of the Malvern disturbances cross in the neighbourhood of Bath, producing lines of easy penetration through the older rocks. The fractures were produced before the Triassic and Jurassic beds were deposited, and the Jurassic clays seal up the water to some extent. Borings through the Rhætic clays encountered red sands from which hot water flowed. Thus the exact points of outflow at the present surface must be determined by small fissures of later origin in the clays which underlie the city itself.

BIOCHEMISTRY INSTITUTE.—Mr. Samuel Augustine Courtauld has given £30,000 to the Middlesex Hospital Medical School, London, to found an Institute of Biochemistry. The gift will enable the Hospital to establish a more compact department than has hitherto been the case in which the study of chemical physiology, chemical pathology and the chemistry of natural products can be pursued. It is proposed to make ample provision for the teaching of both chemical physiology and chemical pathology. A large laboratory for the more organic chemical side of the work will be included, together with accommodation for the pharmacological testing of chemo-therapeutic substances.

BIRD VELOCITY.—From statements in two notable books on bird migration, one by Dr. A. L. Thomson and the other by Dr. Horst Wachs, the velocity of birds in flight is shown to be much less than has been popularly supposed. In autumnal migration the following rates were measured for the following birds: hooded crow, 31 miles per hour; jackdaw 38; starling 46; finches 32; crossbill 37. Meinertzhagen gives 48 miles per hour for storks; 50 for mallard; 45 for rook; 55 for geese; 45 for lapwing. Golden plover, pressed by a pursuing aeroplane, attained to 60 miles per hour, and swifts passed a machine doing 68 miles per hour. There is evidence of greater speeds under exceptional stress, and the help of a favouring wind may be considerable. It seems, then, that we are safe in saying that a number of birds may cover a mile in a minute. They may keep this speed up for several hours when crossing a stretch of sea.

BOTANICAL STUDY FROM BRICKS.—A course of research into the plant content of adobe bricks by Mr. G. W. Hendry and Miss Margaret Kelly has furnished a considerable amount of exact information as to the number and kind of cultivated plants introduced into California by missionaries and travellers during the Spanish period. They examined a number of bricks from buildings dating from 1771 to 1845. The bricks were made of soils ranging from sandy loam to heavy loam, some natural, others the result of artificial mixing, and contained organic matter chopped into two-inch lengths, usually wheat or barley straw, but also weeds and grasses of various kinds. Of the twenty-two weeds, eleven were found to be introduced European species. Six varieties of wheat were identified. This establishes a new date for the introduction of Big Club wheat not previously known as a mission crop. One wheat, California Club wheat, is not grown in California to-day, but disappeared prior to the Mexican period of 1822–45, and another, a beardless wheat, is unknown. Propo wheat, supposed to have been introduced from a Chilean strain about 1875, was also found, and may have persisted from the original Spanish stock. Only one variety of barley was discovered.

CATHODE-RAY OSCILLOGRAPH. — In the Journal of the Franklin Institute Mr. F. R. Terroux suggests some improvements of the cathode-ray oscillograph, which will make a vacuum pump unnecessary, dispense with the need of a system of lenses, and enable the instrument to be used to study transient phenomena. At the present time there are two distinct types of this instrument, a modified form of Braun tube in which the cathode beam traces its deflection on a fluorescent screen inside the glass tube and the luminous streak is photographed by an ordinary camera. In order to get a good image the curve must be retraced several times by the cathode beam, and this greatly limits its usefulness. In the other, the Thomson type, the photographic plate is enclosed within the evacuated apparatus. Thus a single transit of the cathode beam will leave a distinct trace on the plate. Whenever the plate is to be inserted or withdrawn, however, the apparatus must be unsealed or evacuated anew. Mr. Terroux suggests the use of a plane sheet of quartz, sealed across the end of the oscillograph tube, opposite to the cathode. A fluorescent screen is deposited on the inner side of the quartz, and a photographic plate is placed flat against the outer surface. When the cathode beam traces a luminous curve on the screen, the curve is reproduced directly on the photographic plate and the losses due to dispersion and absorption are eliminated.

CINEMATOGRAPH IN COLOURS. — Mr. Leslie Eveleigh described before the Royal Photographic Society a method of producing cinematograph films known as the "Technicolour" process. The cost is about 3*d.* per foot, as against 1¼*d.* a foot for the ordinary monochrome film. "Technicolor" is a two-colour process, in which the records are taken alternately by means of a camera that has a prism light-divider behind the lens with an orange-red filter for one and a blue-green filter for the other. The two images are foot to foot, that is, the images of one colour being erect, while those of the other

colour are upside down. A specially exact perforating machine is used to ensure perfect registration of the subsequently superimposed pictures. In printing, the negative is shifted two spaces and the positive one, so that only the red-sensation pictures are printed, and then, on another film, the blue-sensation pictures are similarly printed. The two positives, before development, are brought back to back, the cementing liquid is sprayed on to them, and by pressure they are firmly fastened together. The compound film is then developed, washed, dried, and passed over the surfaces of the dye solutions, first one surface being dyed red and then the other surface dyed blue. Excess of the dye solutions is removed by suction, and when dry, both sides are sprayed with varnish. The protection is so complete that the final film may be soaked in water for two hours without damage.

COMPRESSION OF EARTH'S CRUST.—In a paper, "On the Relation between Barometric Pressure and Gas Pressure in Mines," read before the Royal Astronomical Society on May 7, Mr. Henry Harries showed that "the old ideas were completely at fault." From two coal mines situated 150 miles apart synchronous observations of U-shaped water-gauges were obtained, the gauge in one being at a depth of 386 feet below the sea level, and in the other at 1,300 feet, so that both horizontally and vertically they were very far apart. They were inserted in the stoppings of hermetically sealed off accumulations of fire-damp, one end of the gauge open to the gas and separated by the water column, the other end open to the free air. At three fixed hours daily the height of the water in the gas end was registered, and when projected on a diagram it was at once seen that during 56 consecutive days there was remarkable accordance in the rising and falling of the two distantly situated columns. Clearly, they were at the same time actuated by one natural force. This force was determined on examining the behaviour of the barometer during the same period. It was found that in all cases the sinking of the water, *i.e.*, gas pressure exceeding air pressure, occurred under anticyclones, the great weight of the superincumbent atmosphere squeezing or compressing the earth's crust; whereas under cyclonic or low barometer conditions this compression was removed, and the gas pressure was less than that of the air. A re-examination of the forgotten Seaham Colliery records of 1881 served to prove that the behaviour of the gas in waste areas freely open to the air was exactly the same as that of the gas in sealed off accumulations.

COVENT GARDEN RESEARCH LABORATORY.—The Department of Scientific and Industrial Research has established a research laboratory in the vicinity of Covent Garden fruit and vegetable market. The laboratory, which is situated at Dudley House, Endell St., will work in connection with the Low Temperature Research Station, Cambridge, the headquarters of the fruit and vegetable section of the Department's organisation for food investigation. The object of it is to bring the Low Temperature Research Station into closer contact with the trade in fruit and vegetables, and with such problems as that of their transport and storage.

CYCLONES IN THE PACIFIC.—In a bulletin published at Honolulu, Dr. S. S. Visher gives an account of the tropical cyclones in the Pacific, of which 50 on an average are said to develop each year. Most of the storms, he says, appear to start between 10° and 20° north and south. The majority of them move westward and poleward until they arrive in about lat. 20°–30°, and then they recurve and move eastward. Frequently cyclones move more abnormally. The movement of the storm has been found to range from 1 mile to more than 50 miles an hour; at their initiation they generally move slowly. The short-lived storm lasts a day or two, the common storm lasts three to six days, and the long-lived storm more than a week. The advantage of prediction would be great, but it seems likely that it will always be impossible to do more than state the probability of a hurricane occurring somewhere in a rather large region.

ECHO SOUNDINGS IN THE INDIAN OCEAN.—The Royal Observatory of Batavia has published an account of the extensive series of echo soundings which were taken last autumn by four Dutch submarines and the depôt ship *Pelikaan* in the waters to the south of Java and Bali and round Christmas Island. The instruments used were those usually employed for submarine communication between vessels. Several observations being made for each determination, the time error was reduced to about 0·1 of a second. The few previous soundings on the whole agree with the echo soundings. The regularity of the submarine contours in a region with great differences in depth suggests the reliability of the echo work. A remarkable result was the discovery of a row of submarine elevations in about lat. 11° S., or more or less in a line with Christmas Island, and immediately to the north of them a long steep-sided trough of more than 3,800 fathoms, and reaching in one place to 4,107 fathoms.

ELECTRIC WELDING OF A WATER MAIN.—An interesting example of the application of electric welding to a water main is described in the Journal of the American Waterworks Association. The pipe in question was 48 in. in diameter, and lay 20 ft. below the surface, working under a 30 ft. head. A crack between 5 ft. and 6 ft. long developed on the invert, and it was decided to repair it from the inside. A 2-in. wide V-groove was cut, tapering to the width of the crack on the outside, and was filled by welding with manganese bronze. The weld was reinforced by a steel plate ⅞-in. thick, which was also welded to the pipe and to a number of steel studs which had been tapped into the pipe. The work involved 101 man-days of skilled labour, the total cost being only $800, and gave a perfectly satisfactory result. Had the pipe been repaired by the usual method of opening up the trench the cost would have been $8,000.

ESKIMO ORIGIN.—Mr. K. Rasmussen, writing on the results of the fifth "Thule" expedition to the Arctic regions, 1921–24, expresses the belief that the original Eskimo culture must have been that of an inland type of people, dwelling by lake or stream. Either by following the reindeer or driven by hostile Indian tribes, the aboriginal Eskimo in course of time moved to the Arctic shores, adapting their implements to the needs of hunting on the ice or

in the sea. Reindeer appear to have led them to the region between Coronation Gulf and Boothia peninsula. From there they moved west to Alaska and east to Greenland. The belt of tundra west of Hudson Bay barred the passage of one large group now known as the Caribou Eskimo, among whom the aboriginal inland culture has been preserved. The Eskimo who moved to the coast evidently flourished, and hence their extensive migration west and east. Finally, in comparatively recent times, a new migration has taken place from the interior down to the coasts.

FALSE WILD OATS.—Mr. Leonard Huskins, of the University of Alberta, working under Professor Gates, of King's College, has made a discovery as to the true nature of "fatuoid" or "false wild oats," which have always presented a problem to farmers, and led to the deterioration of seed-oats and of the milling variety. "Fatuoid" oats, he finds, are a special type of mutation brought about by the loss of the hereditary material known as chromosomes, or by an interchange of certain portions of them. In ordinary cultivated oats the number of chromosomes is 42. Mr. Huskins, however, has made the discovery that some types of "fatuoid" or "false wild oats" contain only 41 chromosomes instead of 42. One of them has been lost. In the ordinary course all the chromosomes split so that the number persists, but in the case of the formation of the pollen there is a unique division in which the pairs of chromosomes are separate, and that reduces the number to one-half. Thus 42 will be reduced to 21, and each of the pollen glands will have the normal number of 21 chromosomes. In the course of that process occasional irregularities occur. Instead of 21 chromosomes getting into a single cell one of them is left behind, and simply disintegrates. If, therefore, a pollen grain with only 20 chromosomes fertilises an egg-cell containing the usual 21, the result will be an oat with 41 chromosomes—a "fatuoid" or "false wild oat" in fact.

FOOD OF TERNS.—In consequence of numerous complaints by Blakeney Point fishermen that terns were destroying the inshore industry by feeding on flat fish, the National Trust invited Mr. W. E. Collinge to investigate the food of these birds. He found that the food of the terns in the vicinity of Blakeney Point consisted of 40·32 per cent. of fish, of which 25·48 per cent. was food fishes and 14·84 per cent. sand-eels. The food fishes were entirely whiting, haddock, herring, and whitebait, and in no single instance was there any trace of flat fish in the stomach contents. His conclusion, therefore, is that any scarcity of flat fish in the Blakeney Point area can in no way be attributable to the terns living there.

FOUR ASPECT RAILWAY SIGNALS.—On various parts of the Southern Railway, especially in the neighbourhood of London, new "four-aspect" colour-light signals have been installed in order to secure the fullest benefits from the electrification of the track. These new signals consist of four powerful focused electric lamps, one beneath the other, with metal hoods projecting over each lamp to intensify the beam thrown out. They are mounted on masts and will be considerably lower than the present signals—level with the driver's eye. The signals will show lights by day and night as follows:—Green.—All right; proceed. Two yellows.—Be prepared to find next signal at caution. One yellow.—Be prepared to find next signal at danger. Red.—Stop. The lights are very powerful and brilliant, and can be seen in bright sunlight or thick fog.

FOWLS UNDER THYROID TREATMENT.—Professor Ercole Giacomini, of Bologna, has published the result of a number of experiments in administering thyroid to fowls. He found that the development, appearance, and colour of the plumage were considerably affected. The ingestion of fresh ox thyroid by young or old fowls of either sex invariably led to the production of feathers. In some cases the old feathers fell so rapidly that in a few days the body became almost bare, being covered only by the germs of the new feathers, which were surrounded by horny sheaths and resemble short prickles. Moreover, with birds having coloured feathers there took place an alteration in colour, the extent and intensity of which were enhanced if administration of the thyroid was continued. In certain instances, but never with white fowls, the opposite phenomenon occurred, increased formation of black pigment being observed in the feathers on some parts of the body. Similar but less pronounced changes followed the use of dried thyroid.

GIBRALTAR SKULL.—Miss D. A. E. Garrod, of the University of Oxford and a member of the Institut de Paléontologie humaine, on June 11, 1926, discovered fragments of a human skull, including the frontal bone, associated with Mousterian implements at the Devil's Tower, Gibraltar, where she had been carrying on excavations. The fragments were found at a depth of about 10 ft., embedded in travertine, and exhibit characters similar to those of the well-known Gibraltar skull which belongs to the Neanderthal group. Its site was only 170 yards from that of the skull discovered in 1848. In explaining the skull to the Anthropological Section of the British Association Miss Garrod stated that its Mousterian date was placed by expert examination absolutely beyond doubt. Sir Arthur Keith said that it was the first complete and representative Mousterian skull; it was that of a male child about eight to ten years of age.

HELIUM SOLIDIFIED.—Prof. W. H. Keesom, of the University of Leyden, announced that helium had been solidified there under a pressure of 150 atmospheres at the temperature of its boiling point and under 28 atmospheres at 1·5° absolute, thus completing the work of the late Professor Onnes. About three years ago it may be added the Dominion Mines Branch of the Canadian Government decided to make a re-examination of the Canadian natural gases for helium. Mr. R. T. Elworthy, who undertook the task, found that in Alberta, while some of the natural gases contained less than 0·1 per cent. of helium, a number of them contained so much as 0·25 per cent. In some cases in this Province the helium content ran so high as 0·34 per cent. In New Brunswick none of the natural gases was found to contain more than 0·064 per cent. In Ontario the natural gases varied considerably in their helium content.

The gases of Lambton, Kent, and Essex Counties were found to contain not more than 0·15 per cent., while those in the counties of Brant, Haldiman, Lincoln, and Welland had a helium content of from 0·25 per cent. to 0·35 per cent. The gas richest of all in helium was found in Peel County, the content being slightly more than 0·8 per cent. In this field three wells have been sunk, and the gas is drawn from a horizon approximately 600 feet deep. Though the gas supply is only moderate in amount, it has been estimated that the three wells will provide at least 100,000 cubic feet of helium per year. With a view to rendering the supply of helium permanently available for research work in the University of Toronto, the Government of Ontario has secured, for the Crown, the products of the three wells mentioned, and the natural gas rights over a large block of land in the immediate neighbourhood of the wells.

HUDSON RIVER TUNNELS.—The informal opening has taken place of the two train tubes joining New York City and New Jersey City beneath the Hudson River. The tubes, known as the Holland Vehicular Tunnel, in honour of the late Clifford Holland, the original engineer, are sunk 100 ft. below the river-bed. Both are nearly 2 miles in length and have a roadway 30 ft. wide, providing a space for three motors to travel abreast. Each tube has a footpath at the side. The tubes have a ventilation system which will remove the poisonous fumes from the motor exhausts and pump in fresh air 42 times per hour. The tubes cost £10,000,000 to construct, and will be opened for general traffic next March.

INSECTS' VISION.—At the British Association meeting Dr. H. Eltringham exhibited on the screen a photograph which had been taken by using the eye of a glow-worm instead of the ordinary lens of a camera. The eye in question was one-fifty-thousandth part of a square millimetre in size, and the projection on the screen was 8 in. across. Glow-worms, Dr. Eltringham said, had perfect sight. Dragon flies could see extremely well. Butterflies could recognize each other up to a distance of 3 ft. to 3½ ft. In a butterfly's eye there were 5,000 different lenses and 50,000 nerves. Butterflies could recognize colour, and their favourite was purple, because it was most conspicuous against a green background. Insects could also see ultra-violet rays.

KENT'S CAVERN SKULL.—Sir Arthur Keith, in his report on the human skull found in the autumn of 1925 in Kent's Cavern, Torquay, states that it is that of a woman, who was probably 25 years of age at the time of her death. It is of the same type as the skulls discovered about five years ago in and under the stalagmite floor of Aveline's Hole, a limestone cave in the Mendips, which have been assigned to a period as between 12,000 and 15,000 years ago. These skulls tended to assume a rounded form; they were high-vaulted; and the forehead bulged forward on its upper part and retracted towards the root of the nose, the opposite of the condition usually found in ancient skulls. It had been thought that round-headed people first appeared toward the end of the Neolithic period, when the eastern coasts of Britain were conquered, but the discovery at Aveline's Hole proved that the round-headed intruders had appeared much earlier, towards the end of the Ice Age. The skull found at Kent's Cavern, which was distinctly rounded, seems to throw further light on this early invasion. It has a cranial capacity of 1,400 c.c., and shows that in size of brain the woman was above the average. She is described as having probably been a woman with a flat face wide and prominent forehead, drawn in and flattened at the root of the nose, which was snub and child-like. The nasal bridge was wide and gently rounded. All the features pointed to the fact that she was of the same breed as the late paleolithic round-headed people of Aveline's Hole.

LAKE TSANA FOR EGYPT.—The mission dispatched in 1920 to Lake Tsana, in Abyssinia, the source of the Blue Nile, for the purpose of considering the possibility of converting the lake into an artificial reservoir, has now issued its report. The verdict of the mission is that the lake is eminently suitable for that purpose. The annual discharge in normal years is estimated at 3,500,000,000 cubic metres, and that amount could generally be stored. But by certain engineering operations, including excavation of the rock sill at the outlet, it would be possible to increase the reserve storage to 8,000,000,000 cubic metres, which would be sufficient to meet deficiences, if two seasons of low supply were experienced in succession. This reserve storage of 8,000,000,000 cubic metres, added to the annual supply of 3,500,000,000 cubic metres, would therefore give the reservoir a total effective capacity of 11,500,000,000 cubic metres. The report estimates the cost of the work at £E2,300,000, and that it could be completed without establishing any permanent means of communication with the Sudan; but if a railway or road to Gedaref should be found necessary, an increase in expenditure would follow.

LIGHTNING IN GLOBULAR FORM.—M. E. Mathias, the French scientist, has collected accounts of a number of cases where non-incandescent bodies were seen to explode, in some cases causing injury or death. These balls were black, white or grey, and in his opinion were due to a ball of ordinary globular lightning, the incandescence of which was hidden by a mantle of cloud or smoke, which in some cases clung to the surface of the ball, and in others formed a torn mantle around it. He suggests that this smoke was due to the actual burning by the incandescent mass of organic substances such as cellulose. In one case a number of luminous balls, and also grey balls, were seen to emerge from a waterspout or "tornado" at d'Arsonval, both kinds exploding with a loud detonation, sending out pieces of branches which the tornado had torn from the trees. The clinging mantle sometimes formed is ascribed to electrostatic attraction between the incandescent centre and the surrounding smoke.

MACKEREL FISHING PREDICTIONS.—Is it possible, by observing the salinity of the sea, to predict whether it will be a good or a bad mackerel year? Dr. A. C. Johansen, of Copenhagen, believes that it is, at any rate in regard to the occurrence of mackerel in the Kattegat and the adjacent parts of the Skagerak. In the waters of the Kattegat and Belt Sea, he says, two layers occur usually; a surface layer of relatively

low salinity, and a lower layer with relatively high salinity. This stratification is mainly due to the outflow of relatively fresh water from the Baltic, and the inflow of relatively salt water from the Skagerak. In the upper layer, to a depth of about 10 m. to 25 m., the resulting current is directed towards the Skagerak and the North Sea, while in the lower layer it is towards the Baltic. Dr. Johansen believes that there is a connection between yearly catches of mackerel in the Kattegat, a strong ingoing current in the lower layer in April and May indicated by a high salinity, and a low temperature of the surface waters in June. A prediction with a certain degree of probability whether it will be a good or a bad mackerel year can be given so soon as salinity observations in March and April are to hand, or about one or two months before the fishery in the Kattegat begins.

MOSQUITOES ATTACKED BY AEROPLANES.—Experiments have been carried out by the United States Department of Agriculture for testing the possibility of aerial control of the breeding of Anopheles mosquitoes. Paris green diluted mostly with fine siliceous earth was distributed from aeroplanes on extensive marshes and swamps in Louisiana in 1923 and 1924. No special trouble was found in distributing the insecticide over open water or rice fields: the greatest difficulty encountered was in heavily wooded areas where the water was protected by dense foliage. In areas overgrown with aquatic vegetation, 88 per cent. to nearly 100 per cent. of the Anopheles larvæ were destroyed. Controls were made by the use of open porcelain pans of water containing ten larvæ each. These were placed at the different stations before the dust was applied by aeroplane, and were examined the following day for the percentage of larvæ killed. A similar experiment was made by Mr. George Caudwell, a large potato grower near Spalding, who chartered an aeroplane to shower down powder on his crop. At times the machine was so low that the wheels appeared to touch the tops of the plants. The field consisted of 40 acres, and the operation, which would have taken two days in the ordinary way, was completed in 25 minutes.

ORIGIN OF FRIZZY HAIR.—Dr. Fritz Sarasin has contributed a study of changes in the character of the hair in Melanesian and African children to "L'Anthropologie." He is unable to endorse the view of certain anthropologists that the form of hair characteristic of the different races is already to be observed in the newly-born. Among New Caledonians, infants up to the age of a year or eighteen months have almost straight or slightly wavy hair, of brown, light brown, or even blonde. It does not begin to change until about five years, and does not become completely frizzy like that of an adult until about six years, when it is still slightly lighter in colour. This observation is supported by the records of observers in the New Hebrides, in Africa, and among the negroes of the United States. Among negroes, however, the hair is black and not lighter in colour, and the change in form takes place rather earlier. Frizzy hair must therefore be considered a secondary character in man, the straight or wavy hair being the primary character. No anthropoid or other ape has frizzy hair. Further, if it is a secondary character, it must have been acquired by the different races of which it is now a character at different times and in different ways. Frizzy hair, says Dr. Sarasin, cannot be regarded as a possible basis for racial classification.

"PERMALLOY" ATLANTIC CABLE.—By the new "permalloy" trans-Atlantic cable from Bay Roberts, Newfoundland, to Sennen Cove, Cornwall, a new era in the transmission of cable messages was begun. The cable, the first of its kind in this country, is capable of transmitting 2,500 letters a minute, a four-fold increase of capacity. The inductive loading which has brought about this remarkable advance consists in surrounding the copper conductor of the cable with a thin layer of "permalloy," an alloy of 78 per cent. nickel and 22 per cent. iron. The characteristic property of this alloy is its very high magnetic permeability at low magnetising forces; it is easily magnetised and demagnetised by small magnetising influences. Soft iron wire, the best loading material previously obtainable, has only one-twentieth of the permeability of "permalloy."

PHOTO-THEODOLITE.—The Council of the Royal Geographical Society have purchased a photo-theodolite which has been invented by Mr. Heinrich Wild, of Heerbrug. It is a combination of theodolite and camera. Hitherto the principal difficulty in mounting a theodolite over a camera has been to keep down the height which would seem to be necessitated by one vertical axis above and another below the camera. Mr. Wild solved the difficulty by adopting the device known as the Broca circle. Two flat shallow steel dishes were ground optically flat and a large number of carefully selected steel balls were arranged in a light brass cage between them. Thus two inches of height were saved and the resulting instrument is very compact. The camera can be set horizontal or at two fixed stages of elevation and depression, and the plates are intended primarily for stereo grammetric survey with Mr. Wild's stereo-cartograph, but they are equally well adapted for any photo-grammetric method.

PLANTS' NERVES.—Sir Jagadis Chandra Bose, in addresses to the Sorbonne, the Royal Society of Medicine, and the British Association, has propounded the theory that plants have a nervous system ten times as sensitive as that of man. After a prolonged study of sensitive plants, the flowers of which close when they are touched, and mimosa leaves, which turn so as always to face the sun, he has satisfied himself that plants actually feel and react to sensation, though much slower than in the case of man. The nervous system of the vegetable world, he says, stands about midway between that of the lower molluscs and the higher vertebrates. By means of his "resonant recorder," showing a band of light on a screen, Sir Jagadis demonstrated to the British Association the blood (or sap) pressure on a plant. A cut spray of leaves was placed in a vase. The band of light was still, the sap was not flowing. He then put some alcohol into a receptacle under the leaves. The light moved to the left, and he exclaimed, "The plant lives again: its blood is flowing." The slow movement of the light band became gradually more rapid. The lecturer then displaced the alcohol by cobra venom, and im-

mediately the band of light went rapidly to the left and recorded the death of the plant. The theory of Sir Jagadis is that the action of plants —the motion of leaves which turn to the sun and of the bean tentacles which seek support— is due to nervous impulse, and that there is in all plants a central heart in the form of a cylindrical layer going from top to bottom which propels sap by pulsations of one-millionth of an inch exactly similar in form to those of the human heart.

POPULATION OF THE WORLD. — Sir George Knibbs has concluded his examination of the problem of world-population, with special reference to the conditions governing the maximum possible population. He gives various estimates of the possible population ranging from 2,942,000,000 to 9,792,000,000 (providing that all arable land could maintain three persons per acre), and a final maximum of 13,440,000,000 if an average of 2½ persons per acre applied to the whole land surface of the globe. If present standards of living and present national "prejudices" are maintained, he says, it is doubtful if the population will ever reach the 5,000,000,000 limit. The adjustment of all territorial and economic relations, and the advance of systematised knowledge, might make a population of 9,000,000,000 possible.

POST OFFICE TUBE FOR LONDON.—The Post Office tube railway for the conveyance of mails, which was begun in 1913, has now been completed. The line, which is 6½ miles long, extends from the Eastern District Post Office in Whitechapel to Paddington, and has stations at Liverpool Street, the General Post Office, Mount Pleasant, the Western Central District Office in New Oxford Street, the Western District Office in Wimpole Street, and the Western Parcel Office. The tunnels between stations are 9 feet in internal diameter, and carry two tracks each of 2-feet gauge. The cars, which are 5 feet in height, have a length of 13 feet. There are 90 cars, and running three cars to each train a maximum service gives a carrying capacity of 45 tons of mails per hour in each direction. The cars are without drivers, a system of remote control having been adopted. A speed of from 35 to 8 miles per hour is possible. There are electric lifts and conveying appliances at the various stations specially designed to deal with the various classes of postal matter. The cost of the tube railway was about £2,411,000.

RADIO KNIFE FOR CANCER.—The claim is made by Dr. George Wyeth, of the Vanderbilt Clinic, New York, that he has been able to achieve successful operations in cases of cancer by means of a surgical knife using a radio current. The instrument is like an ordinary sewing needle, but it is held in a rubber handle, and high frequency currents are passed into it through radio tubes, which transform the current into undamped, continuous oscillations. The resistance of the tissues of the body produces heat, which increases with pressure and duration, instead of diminishing as with all other forms of applied heat. The cuts produce a minimum of bleeding, and by cauterisation of the nerves a minimum of pain. Control is stated to be so perfect that operations on the eyes and vocal cords have been performed with practically no scar. By placing another pole beneath the patient's body, Dr Wyeth has found that a current will pass into the cancer and mortify it. It can then be cut out with the needle, which produces a sterilised wound.

SCOTLAND'S FIRST MEN.—Dr. James Ritchie, in the course of a lecture in Edinburgh, put forward the theory that man first arrived in Scotland at or shortly after the 50-feet beach period, when the sea stood at a higher level and the Firth of Forth penetrated inland beyond Stirling. Clear evidence of the presence of a people of Azilean culture has been found in kitchen-middens in the Carse Falkirk in Oronsay, and in a few prehistoric settlements on the west coast. These people, it is suggested, reached Scotland about 9,000 years ago. Being unacquainted with agriculture and having no domestic animals, they lived entirely by hunting and fishing. In numbers they probably never exceeded sixteen to the square mile. Elk, reindeer, and the wild ox were common in the forests, and the beasts of prey included the wolf, the brown bear, and the lynx. Birds were represented by the great auk on the sea coast, by the forest capercailzie, the bittern, the crane, and the great bustard, all of which are now extinct.

SHUTTLELESS POWER-LOOM. — A shuttleless power-loom has been invented by Herr Gabler, a German, who is said to have tested it with success in South German factories. Instead of the complicated mechanism connected with the shuttle, it works on two shafts which are built into an ordinary power-loom and finished at either end with a set of hooks and loops reminiscent of knitting machines. These, instead of the shuttle, bring the weft-shot to the middle of the "shed," the opening in the threads of the warp through which the shuttle flies in an ordinary loom, where it is received by the same apparatus coming from the other side, and so carried over the entire breadth of the "shed." The movement carries the weft-shot slightly over the edge each side, where it is cut off, turned over, and forms a selvedge. This is the crux of the invention. The machine weaves continuously, makes 180 revolutions a minute, and is extraordinarily quiet. A further advantage appears to be the possibility of using cheap, soft, or inferior yarn owing to the very slight chance of its breaking. It is calculated that whereas one skilled weaver could look after twelve to sixteen looms with automatic change of shuttle hitherto, he could supervise twenty-four of the new looms with ease.

SNOW PLOUGH WITH WORM ACTION.— The snow barrier over the McKenzie Pass in Oregon, which has hitherto been icelocked from November to June, has been broken by means of a worm-action snow-plough and tractor, making a speed of eight miles an hour. The motive force is gasolene. The energy is employed on two pointed steel cylinders, each with six flanges an inch and a half high, running in a spiral from the point at the front to the rear. The cylinders revolve round each other, and when in use in the snow move by means of the helical action of the flanges in the same way as a screw pierces a piece of wood.

STEEL TRANSPARENT AS GLASS.—Dr. Karl Mueller, of the Physical Technical Institute of

Berlin, has discovered a method of making sheets of metal of unprecedented thinness, so thin in fact that they are as transparent as the clearest glass. His plan was to deposit an extremely fine film of the metal on a smooth surface by means of the electric current and afterwards separate the film from the foundation on which it was fixed. The test plates used to determine the transparency of optical glass, and ruled with lines one twenty-five-hundredth of an inch apart, were photographed through such a metal sheet, and when enlarged to four hundred diameters the scale lines showed distinctly without any distortion. Yet the sheet of metal is so strong that when fastened in a frame it may be bent out by blowing on it to a sixteenth of an inch without rupture. These transparent metal sheets seem likely to serve as semi-permeable membranes for the separation of gases. They may greatly advance the progress of telephotography and television, and prove serviceable in metallurgical research, and in the making of galvanometers, radio receivers, and apparatus for measuring the action of the heart.

TELEVISION.—Mr. J. L. Baird, a young Scottish electrical engineer, has invented the Televisor, a machine capable of transmitting an image of the human face or any other object to a considerable distance. The apparatus consists of a large wheel inset with hundreds of lenses. The wheel is spun at 5,000 revolutions a minute before the object it is desired to transmit, and in doing so the lenses take a succession of impressions of the object. The impressions, which are really light waves, act on a colloidal cell, causing the current passing through the cell to vary in intensity. These varying electric impulses are sent through the air, received and amplified as in wireless, and harnessed to a lamp, whose light, passing through the lenses in another disc, fall on a screen of ground glass and reproduce the picture. Mr. Baird has already been successful in transmitting pictures between London and Harrow-on-the-Hill.

TILBURY DOCK EXTENSION.—The Port of London Authority has sanctioned a scheme for the extension of the Thames Docks which will make it possible for the largest Atlantic liners to be accommodated there. The chief features of the plan are (1) a new entrance dock at Tilbury running west to east, about 1,200 ft. above the bend of the Thames at Tilbury Ness, which will have a length of 1,000 ft., a width of 110 ft., and a depth of 45 ft. 6 in. below Trinity high water; (2) a new dry dock to be built to the north of the existing dry docks, which will have a length of 750 ft. with extensions to 1,000 ft. when necessary, and a width of 110 ft.; (3) a landing stage 1,140 ft. long on the Thames front, with space set apart for railway lines and facilities for ferry and ocean passenger traffic; and (4) improvements at the West India Docks so as to allow of the admission of the largest ships able to navigate so far up the Thames. It is estimated that the scheme, which will cost £4,000,000, will take four or five years to complete.

VOLCANIC DUST.—Professor Stentzel has made an attempt to estimate the average speed with which the clouds of dust sent up by volcanic eruptions spread over the world. He finds that the dust from Mount Krakatoa, the greatest volcanic eruption ever recorded, which occurred in August 1883, with the loss of 36,000 lives, first appeared over Central Europe 96 days after the outbreak, having travelled more than 6,500 miles. The dust from the eruption on the island of Martinique, in 1902, reached Central Europe in 39 days, travelling nearly 5,000 miles. The dust from several eruptions of Mount Vesuvius reached Central Europe in about a week. He estimates the average progress of volcanic dust in the upper air to be about 88 to 125 miles per day.

WIRELESS ON TRAINS.—A further experiment in wireless reception on a moving train was tried by the Great Western Railway Company in March last. An Ethnodyne Burndept seven-valve instrument was installed on the Cornish Riviera express, which runs 226 miles without a stop from Paddington to Plymouth. The receiving instrument, placed in a first-class compartment, operated five loud speakers in the dining-cars and twenty head-phones. On the outward journey a certain amount of interference by induction was experienced owing to the working of the electric-light dynamo underneath the carriage. During the homeward run this was completely eliminated, and reception was of a perfect character. The speed of the train made no difference to the clarity of tone, but there was considerable fading as the train passed through a tunnel. Paris and Aberdeen were tuned in with perfect results.

WIRELESS PHOTOGRAPHS ACROSS THE ATLANTIC.—On the last day of April, 1926, photographs of Charles Dickens, Mr. Frank Kellogg, and others were successfully transmitted across the Atlantic from New York to London, by means of the improved method adopted by Captain R. H. Ranger, of the Radio Corporation. A photographic film is placed in the transmitting machine, and an electric transmitting current is effected by a beam of light shown through the film on to a photo-electric cell. This operates the ordinary wireless telegraph current, and the illustration is reproduced at the receiving station.

WIRELESS TALKS ACROSS THE ATLANTIC.—On February 7, 1926, conversation was carried on successfully over a period of 15½ hours between the new wireless station at Rugby and Long Island, near New York. The quality of speech in both directions was clear and free from distortion and fading, and the voices of individual speakers were easily recognised. On March 7 further experiments were made between the General Post Office, London, and New York, by Post Office engineers and journalists. The voices were heard most plainly in both cities, and the representative of a New York news agency had a ten minutes' conversation with the representative of a London financial paper.

YELLOW GLASS FOR MINERS.—Dr. H. S. Elsworthy, at a meeting of the Illuminating Engineering Society, contributed data with the object of showing that in the case of miners' nystagmus yellow tinted glass was of considerable benefit. It was suggested that this colour aids the miner in distinguishing bluish shale from black coal, that it is favourable to definition, and that the fact of the periphery of the retina being relatively insensitive to yellow light at low illuminations may help to check movements of the eyeball characteristic of nystagmus.

EARLY in January the Royal Academy opened an exhibition at Burlington House of the works of the late John Singer Sargent, R.A., which was representative of every phase of the activities of that distinguished painter. Numbers of his finest portraits in oil were shown, together with many landscapes in oil and watercolour, and portrait studies in line. The well-known "Carnation Lily, Lily, Rose" was lent by the National Gallery of British Art, and the Central Hall was filled with the artist's studies in sculpture and architectural decoration, including the model for a portion of the decorated ceiling in Boston Public Library. Eleven rooms in all were occupied by the exhibition, which was the most successful from the point of view of attendance of all the winter shows held by the Royal Academy.

For the summer exhibition the Selecting Committee was composed of Sir Frank Dicksee, P.R.A., Sir J. J. Barnet, R.A., Mr. C. L. Hartwell, R.A., Mr. W. L. Wyllie, R.A., Sir A. S. Cope, R.A., Mr. A. J. Munnings, R.A., Mr. W. G. de Glehn, A.R.A., Mr. Alfred Turner, A.R.A., Mr. W. C. Green, A.R.A., and Mr. Malcolm Osborne, R.A. The Committee of Arrangement for the paintings in oil and watercolours was composed of Mr. Munnings, Mr. Wyllie, Sir A. S. Cope, Mr. Melton Fisher, R.A., and Mr. Adrian Stokes, R.A. The miniatures and works in black and white were arranged by Mr. Osborne, the architecture by Sir E. L. Lutyens, and the sculpture by Mr. Hartwell. The number of works submitted to the judgment of the Selecting Committee was slightly less than in 1925, and the number hung rather more.

The pictures sold from the exhibition included "Dawn," by Mr. Adrian Stokes, R.A. (£200); "The Balcony, Cahors," by Mr. Stanhope Forbes, R.A. (£105); "A Lady with a Pink," by Mr. Gilbert A. Pownall (£157 10s.); "The Heat of the Day, Loch Achray, Trossachs," by Sir David Murray, R.A. (£250); "Evening, Martigues" (£225) and "Lagoons, Venice" (£100), by Mr. Terrick Williams, A.R.A.; "Peat Bog, Connemara," by Mr. Julius Olsson, R.A. (£120); "Durham," by Mr. Bertram Priestman, R.A. (£210); "The Amber Beads" (£420), by Mr. Walter W. Russell, R.A.; "Closing Time, Avignon," by Sir William Orpen, R.A. (£2,100); "A First Night Harvest," by Miss Anna Airy (£200); "The Western Sky," by Mr. Algernon Talmage, A.R.A. (£157 10s.); "The Mill," by Mr. Arnesby Brown, R.A. (£250); "A Northern Winter," by Mr. Reginald G. Brundrit (£300); "In Camera" (£262 10s.), by Mr. Frederick W. Elwell; "Twelfth Night," by Mr. Stephen Reid (£150); "Circe," by Mr. J. Charles Dollman (£315); "Springtime," by Mr. Hal Ludlow (£100); "City of Dreams," by Mr. Harry van der Weyden (£315); "Mrs. Booker," by Mr. John Crealock (£150); "Llangollen," by Mr. Charles Knight (£100); "Jane," by Mr. L. Campbell Taylor, A.R.A. (£150); "The Target," by Miss Eleanor Fortescue-Brickdale (£105); "London from Waterlow Park, Highgate," by Mr. R. Vicat Cole (£200); "Summer Flood," by Mr. Harry Watson (£210); "A Gybe Round the Mark on the Crouch," by Miss Alice Fanner (£125); "Through the Wood" (£400) and "Sheepshearing, Dundonald, Ross-shire" (£200), by Mr. Joseph Farquharson, R.A.; "Remonstrance, A.D. 1536" (£100), by Mr. John R. Wilmer; and "Patricia" (£105), by Miss Beatrice Bright. The pictures marked sold, but unpriced, included works by Sir David Murray, R.A., Mr. Arnesby Brown, R.A., Mr. Charles Ricketts, A.R.A., and Mr. G. Hall Neale. Four works were bought by the Royal Academy under the terms of the Chantrey Bequest, two of which were paintings—"Dawn" by Mr. Maurice Greiffenhagen, R.A. (£630), and "Rosalind" by Mr. Douglas S. Gray (£200). The others were a head in bronze, "Bess Norris" (£105) by the late F. Derwent Wood, R.A., and "Malua head, pearwood" (£95) by Mr. Alfred J. Oakley.

Acquisitions at the National Gallery included "Jacob and Laban" by Henrick Terbruggen, bought from the fund bequeathed by Sir Claude Phillips; a portrait of Sir Brooke Boothby reclining in a wood, by Wright of Derby, bequeathed by Miss Agnes Best; "Tobit and his Wife," by Rembrandt and Gerard Dou, purchased by the Trustees; and a late fifteenth-century painting of the Spanish School, "Death of the Virgin," presented by Lord Rothermere. At the National Gallery of British Art the principal event of the year was the opening of the splendid range of new galleries, the gift of Sir Joseph Duveen, intended to house examples of modern foreign art, and paintings by the late John S. Sargent, R.A. The Sargents shown on this occasion formed a fine and representative collection, which included a number of works temporarily lent by various owners. The foreign modern pictures included, besides those already in the national collection, some of those purchased by the munificent gift of Mr. Samuel Courtauld, such as the well-known Manet, "La Servante de Bocks." The National Portrait Gallery received, among other representations of eminent persons, portraits of Isaac Fuller, Sir William Orchardson, R.A., Sir Squire and Lady Bancroft, William de Morgan, and a bust of Sir Robert Walpole by Rysbrach. At the Victoria and Albert Museum an excellent and most interesting exhibition was held of plate and other objects of art lent by the various City Companies.

Several of the museums and public institutions suffered during the year from the depredations of thieves. Some panels of stained glass were stolen from the Victoria and Albert Museum, but were recovered; as were most of a number of gold coins taken a little later from one of the show cases. The coins (thirty-four) were Greek and Roman, and valued at about £500. At the London Museum an ancient watch was stolen; and small pictures at the Guildhall and at Burlington House. The Burlington House pictures were the property of the Royal Academy, and were taken from the walls of the staircase leading to the Diploma Gallery. They were sketches by Constable, small but of considerable value, and were missing for several days. They were then returned, with one exception, by parcel post—not to the Royal Academy, but to the office of the *Daily Mail*. The removal of the Foundling Hospital deprived London temporarily of a comparatively little known but highly interesting collection of pictures. These pictures, given by Hogarth and others soon after the foundation of the Hospital, were always on view to those who had attended the service in the Hospital chapel.

Many exhibitions were held in addition to those of the Royal Academy and the Sargent collection at Burlington House. At the Lefevre Galleries, King Street, St. James's, subject and

flower pictures were shown by the deceased French artist, Odilon Redon; and at the Chenil Gallery, Chelsea, portraits by Mr. Augustus John, A.R.A. A collection of French engravings of the eighteenth century was on view in the summer at Messrs. T. Agnew & Sons, Old Bond Street, where in the late autumn the third exhibition was held of baroque pictures gathered together by the Committee of the Magnasco Society. Examples of Elizabethan Art were shown at the Burlington Fine Arts Club, and of the work of French Impressionists at Messrs. Knoedler's. An exhibition of pictures by French nineteenth-century painters from Ingres to Picasso was held at the French Gallery in Pall Mall; and of those of the Armenian artist, Sarkis Katchdourian, and H. B. Brabazon at the Fine Art Society's in New Bond Street. A retrospective exhibition of the etched work of Mr. Donald Shaw Maclaughlan, the Canadian, was also held at the Fine Art Society's. Mr. Jack B. Yeats showed a number of paintings of Irish life at Messrs. Arthur Tooth's; and at the Leicester Galleries, Leicester Square, there were, among others, exhibitions of the work in sculpture and painting of the late Francis Derwent Wood, R.A., and the French painter Renoir.

In the sale room the most notable feature of the summer season was the price paid for Romney's portrait of Mrs. Davenport, which was sent to Christie's by Sir W. Bromley-Davenport. It was knocked down to Sir Joseph Duveen for £60,900, a record in England for any picture sold by auction. Another Romney, a portrait of Lady Hamilton, also belonging to Sir W. Bromley-Davenport, sold at the same time, realised £13,650. High prices were paid for pictures at the Bischoffsheim sale in May. Two pictures by Drouais, "The House of Cards" and "Blowing Bubbles," were sold together for £13,650; a portrait by Nattier for £12,075; and another of Elizabeth de Valois, by Sir Antonio Mor, for £11,025. A landscape by de Koninck fetched £7,875. Two Raeburn portraits, the property of Lord Carmichael, were sold for £8,800 and £8,000 respectively. Three Turners, all comparatively small, and painted in the Isle of Wight, went for £6,247, £4,410, and £3,097; and a David Cox, "Flying the Kite," for £4,620.

THE YEAR'S MUSIC.

Opera.

Although the interest taken in opera no longer admits of a lengthy Covent Garden season, as in musical pre-war days, the Royal Opera again opened its doors for several weeks. During the short (and eagerly anticipated) season artists of note appeared, enhancing their reputation and greatly pleasing the *cognoscenti*, amongst them being Signor Zenatello, who made a particularly welcome re-appearance as Otello. Signor Zenatello, a genuine *tenore robusto* of a type which has become rare, compelled admiration; for in the most strenuous phrases he sang without forcing his exceptionally fine voice. The *mezza voce* passages were sung with beauty of tone, while the singer's conception of the character showed most intelligent study. Not since the days of Tamagno has London heard so pre-eminently satisfying an Otello. The Desdemona of the cast was Madame Lehmann, who interpreted the "Ave Maria" with much charm and sympathy. Madame Lehmann proved no less successful as Donna Anna in "Don Giovanni," which was performed with the original *finale* and with only one interval—much to the annoyance of those who appreciate a good thing in smaller doses. Nor were musical persons any too pleased when they found "Mi tradi quell' alma ingrata" and "Dalla sua pace" ruthlessly "cut." "Metà di voi," however, was restored to the Covent Garden version of the score, and Signor Stabile, the Don Giovanni of the occasion, sang it in a very acceptable manner. The immortal work had for its conductor Herr Bruno Walter, whose readings of the *tempi* were, at times, strange.

"Mefistofele," "I Gioelli della Madonna," "Il Barbiere," "Falstaff," "Thais," the "Ring" and "Manon," with Madame Fanny Heldy and M. Ansseau, both of whom were at their best, figured in the scheme. The "Manon" performance, unfortunately, was greatly spoiled by the omission of the air for Lescaut in the Cours de la Reine scene, the duet for Manon and des Grieux *père* also being suppressed, thus ruining the action. Should it be intended to give a season this summer, the appointing of a musical superintendent might not be amiss. Those who understand opera do not welcome omissions which, in their view, are unnecessary.

Advocates of "Opera in English," sung by British singers, again demanded a government subsidy—and the exclusion of "the foreigner." Politicians expressed their approval; capitalists refrained from putting money into the venture.

London Concerts.

The Melba farewell concert at the Albert Hall gave one the impression that Madame Melba had chosen the psychological moment at which to retire. True, her lower notes remain serviceable, and the medium ones afford pleasure; but the upper part of the voice no longer responds to the call. This was particularly noticeable in the rather exacting air from Mozart's "Il Rè Pastore." Happily, Madame Melba elected to be heard in less arduous music, including "Comin' thro' th' Rye," a ditty which she performed with appropriate playfulness. The hall was crowded, despite the large sum charged for a ticket.

Herr Moritz Rosenthal again displayed an especially fine technique, thus affording a most useful object lesson to the many aspiring piano students who were present at his recital. Indeed, the performer's ability to play every note with exemplary clearness in the most rapid passages almost leaves him without a rival in this particular field. Nor was he less successful in his Beethoven and Chopin interpretations. Welcome, too, was Miss Esther Fisher, a pianist with a sympathetic touch which is quite out of the ordinary. M. Cortôt gave a recital at the Palladium, playing as temperamentally as ever; Mr. William Murdoch, a much appreciated pianist, satisfied his critics; M. Niedzielski's treatment of Debussy's "La Cathédrale Engloutie" suggested that he is well acquainted with the legend upon which the effective piece is founded. He was equally at home in the same composer's "Cake Walk," a curious—though not unmusical—composition.

Very interesting were some of the countless vocal recitals. M. Joseph Schwartz, for example, showed that, if his chief triumphs have been gained on the lyric stage, he is capable of singing Strauss and Brahms quite as effectively as any *aria* in an Italian opera, this being very noticeable in "Traum durch die Dämmerung" and "Feldeinsamkeit." Signor Formichi, another baritone, and a fine one, also was heard; he made a distinct hit with the "Pagliacci" "Prologue" and in the "Monologue" from "Andrea Chenier." The ever artistic Mr. Plunket Greene, now a veteran, gave a recital, including in his programme Schubert's rarely heard "Der Sieg" and the "Doppelgänger," both of which were so well interpreted that one almost may forgive the singer for wandering from the key. Welcome, too, was Herr Reinhold von Warlich, who sang the complete "Schöne Müllerin" cycle with all the resources of his art. Miss Esther Dale, an American soprano, made a promising *début*, at once impressing her audience with the fact that she had studied under an unusually capable teacher. A good word may be said for Miss Louise Marshall, another new-comer, who, if she still has something to learn, already has acquired a very solid foundation. The *débutante* rather gives one the impression of using the thoughts of others, whereas she apparently is highly capable of thinking for herself. Madame Elena Gerhardt, as usual, showed herself to be a *Lieder* singer of renown; and Mr. Kynaston Franks, a New Zealand baritone, with a very alluring *mezza voce* and a somewhat imperfect emission of the upper notes, pleased most of his hearers. Miss Linda Seymour, a young contralto, whom one would be glad to hear again, evidently has mastered the difficult art of breath control; her recital was in every way interesting. A well-chosen programme was offered by Madame Dorothy St. Clair Mackenzie, who elected to be heard in "Non so più" ("Le Nozze di Figaro"), Purcell's "Hark the Echoing Air," Bishop's "Should he Upbraid" (in which she was accompanied with complete sympathy and understanding by Mr. Archibald Gibson) and other old-time songs which delight the *cognoscenti*. Madame Mackenzie sang them with appreciation of their countless merits, while she used her sympathetic, flexible voice to their great advantage. Mr. Horace Somerville, a pianist whom one would gladly applaud more often, also took part in the recital, his selection including Chopin, Scriabin, Granados and Debussy.

Many violinists and 'cellists appeared, some returning to the scene of former triumphs, amongst them being the once esteemed Kubelik. The Bohemian violinist does not, however, charm as formerly he did; sureness of touch and dexterity, alas, were lacking, and he scarcely improved matters by playing a concerto bearing his name, for it is a singularly uninspired affair. The Hungarian Quartet, the Spencer Dyke Quartet and other quartet parties also performed.

The Provinces.

During the past year the smaller provincial towns have been particularly active. Buxton, for example, had its festival; Ryde was the scene of the Island Festival; Morecambe, ignoring the fatal strike, held a festival in May, losing £300 over the daring venture; Elgar's "For the Fallen" was given by the Municipal Choir of Burnley; the Barrow-in-Furness Madrigal Society displayed its versatility in widely different music; the Hove String Players showed that they had made considerable progress; the Cambridge University Musical Society added to its fame. Torquay supported various symphony concerts; Yarmouth celebrated the opening of its sixtieth season with a performance of Elgar's "Caractacus"; the Derby Choral Union gave "Israel in Egypt"; the Guildford Choral Society exploited Walford Davies's "Song of St. Francis." The St. Austel Philharmonic Society had appreciative audiences for its several concerts.

The large towns were not wanting in musical activities. The Paterson Orchestral Concerts (Edinburgh) proved successful; the Birmingham Music Society still is in a flourishing way; the Bristol Musical Society's concerts attracted all the town; the Scottish Orchestra continues to be part and parcel of Glasgow's musical life; Leeds has rejoiced in Saturday Orchestral Concerts. Miss Gladys Lack, a singer of exceptional attainment, was heard at Plymouth, the charm of her fresh voice and the excellence of her technique having made a deep impression on the audience.

New Music.

An enormous quantity of music has been published during the past year. It embraces a vast number of songs, a few duets, several anthems and glees, and pieces for violin, clarinet, 'cello, flute and viola. Few of the last-named are particularly interesting; the anthems and glees share the same fate; the songs mostly are rubbish, those which possess melody being uninspired, while the more pretentious ones are musicianly without being in the least musical. Seldom have they proved worth learning.

Various operas have been completed, in the hope that a day may dawn when there will be a market for them. Meanwhile, they await publication.

DISTANCE OF THE HORIZON.

The limit of distance to which one can see varies with the height of the spectator. The greatest distance at which an object on the surface of the sea, or of a level plain, can be seen by a person whose eyes are at a height of 5 feet from the same level is nearly 3 miles. At a height of 20 feet the range is increased to nearly 6 miles, and an approximate rule for finding the range of vision for small heights is to increase the square root of the number of feet that the eye is above the level surface by a third of itself, the result being the distance of the horizon in miles, but is slightly in excess of that in the table below which is computed by a more precise formula. The table may be used conversely to show the distance of an object of given height that is just visible from a point in the surface of the earth or sea. Refraction is taken into account both in the approximate rule and in the Table.

At a height of	the range is	At a height of	the range is	At a height of	the range is
5 ft.	2·9 miles.	500 ft.	29·5 miles.	4,000 ft.	83·3 miles.
20 ,, ...	5·9 ,,	1,000 ,, ...	41·6 ,,	5,000 ,, ...	93·1 ,,
50 ,, ...	9·3 ,,	2,000 ,, ...	58·9 ,,	20,000 ,, ...	186·2 ,,
100 ,, ...	13·2 ,,	3,000 ,, ...	72·1 ,,		

THE LONDON STAGE, 1925-26. — Notwithstanding the disturbance caused by the General Strike and the coal dispute, the year was not unpromising from a theatrical point of view. There were many productions which did little credit to the stage, but there were several of more than ordinary interest. The most arresting play was *The Constant Nymph*, adapted by Margaret Kennedy and Basil Dean from the former's novel, and another drama with a serious purpose which achieved popularity was *Escape* by John Galsworthy. Miss Clemence Dane's *Granite* did not secure so long a run as some of her earlier works, and a first venture by Mr. A. P. Herbert, *The White Witch*, was a disappointment. On the other hand, *Juno and the Paycock*, by Sean Casey, a young and unconventional new-comer from Ireland, won high opinions. Mr. Noel Coward followed up his run of successes with *Easy Virtue* and *The Queen was in the Parlour*, the latter a comedy which gave the Censor less trouble than most of this dramatist's plays; but *The Rat Trap* proved to be a very early effort. Sir Patrick Hastings joined the dramatic circle with *Scotch Mist*, and Mr. J. B. Fagan scored with *And So to Bed*, in which Pepys made a pleasant appearance. Among the most successful plays of the year were *The Best People*, by David Gray and Avery Hopwood, and *The Ringer* by Edgar Wallace. *The Last of Mrs. Cheyney* ran throughout the season, as did *The Farmer's Wife*, which was still drawing crowded houses after it had passed its 1,200th performance. There were several Shaw revivals, but no new work from his pen. Of Shakespeare's plays, *Much Ado About Nothing*, *Henry VIII.* and *The Tempest* were seen, and *Hamlet* was played by an Italian tragedian.

The following is a list of productions between *Nov.* 1, 1925, and *Oct.* 31, 1926 :—

ADELPHI, 411 Strand, W.C. 2.—(1925) *Nov.* 11. *Betty in Mayfair*, a musical play by J. Hastings Turner, with music by H. Fraser-Simson and lyrics by Harry Graham (Messrs. Arthur Margetson, Leslie Faber and Jack Hobbs and Mesdames Evelyn Laye and Mary Leigh). (1926) *May* 21. *Aloma* by John B. Hymer and Le Roy Clemens (Messrs. Francis Lister, Clay Clement and Cronin Wilson and Mesdames Vivienne Osborne and Muriel Alexander). *Sept.* 22. *Merely Molly*, musical comedy by J. Hastings Turner, with music by Herman Finck and Joseph Meyer (Messrs. Godfrey Tearle, Max Wall and Richard Dolman and Mesdames Evelyn Laye, Helen Haye, Marie Ault and Polly Emery).

AMBASSADORS, West Street, Cambridge Circus, W.C. 2.—(1925) *Nov.* 2. *The Burgomaster of Stilemonde*, Maeterlinck's drama revived (Sir John Martin-Harvey, Messrs. Walter Pearce, Fred Grove and Gordon McLeod and Miss N. de Silva). *Nov.* 30. *The Madras House*, Granville Barker's play revived (Messrs. Claude Rains, Allan Jeayes, Ernest Milton and Nicholas Hannen and Mesdames Cathleen Nesbit, Agnes Thomas and Doris Lytton). (1926) *March* 3. *The Widow's Cruise*, by Joan Temple (Messrs. Aubrey Smith and Nicholas Hannen and Mesdames Laura Cowie and Joan Maude). *June* 15. *Granite*, by Clemence Dane (Messrs Nicholas Hannen, Edmund Willard and Lewis T. Casson and Miss Sybil Thorndike). *Aug.* 12. *Escape*, by John Galsworthy (Messrs. Nicholas Hannen, Leon M. Lion and Austin Trevor and Mesdames Mollie Kerr, Ursula Jeans, Margaret Halstan and Betty Astell).

APOLLO, Shaftesbury Avenue, W. 1.—(1925) *Dec.* 22. *Tricks*, a revue by Dion Titheradge and Harold Simpson (Messrs. Bert Coote, Paul England and Arthur Chesney and Mesdames Margaret Yarde and the Trix Sisters). *Dec.* 23. *Baby Mine*, Margaret Mayo's farce revived (Mr. George Curzon and Miss Betty Fairfax). (1926) *Feb.* 15. *Is Zat So?* a comedy by James Gleason and Richard Taber (Messrs. James Gleason, Robert Armstrong and Anthony Bushell and Mesdames Amy Brandon-Thomas, Jo Wallace and Marjorie Crossland). *Sept.* 20. *The Fall Guy*, a comedy by James Gleason and George Abbott (Messrs. Ernest Truex, Frank McHugh and Effingham Pinto and Mesdames Beatrice Noyes and Mercia Swinburne).

COMEDY, Panton Street, Haymarket, S.W. 1.—(1925) *Nov.* 24. *The Ring O' Bells*, by A. Neil Lyons (Messrs. Richard Bird, H. O. Nicholson and Wyn Weaver and Mesdames Olga Lindo and Una O'Connor). *Dec.* 22. *9.45*, a mystery play by Owen Davis and Sewell Collins (Messrs. Frederick Leister, Kenneth Kent and Arthur Finn and Mesdames Margaret Moffat, Dorothy Tetley and Allison Leggatt). (1926) *March* 23. *Summer Lightning*, by Ernest Denny (Messrs. Ion Swinley and Cyril Raymond and Mesdames Iris Hoey, Margaret Scudamore and Faith Liddle). *April* 6. *The Man from Toronto*, by Douglas Murray, revived (Messrs. Campbell Gullan, Cyril Raymond and Rex O'Malley and Mesdames Iris Hoey and Ada Palmer). *April* 26. *The Rescue Party*, by Phyllis Morris (Messrs. Aubrey Mather and Frederick Lloyd and Mesdames Mercia Swinburne and Marie Ney). *June* 17. *A Man Unknown*, by Harold Owen (Messrs. C. M. Hallard, Clarence Blakiston and Evan Thomas and Mesdames Dorothy Dix and Fortescue). *Sept.* 6. *Virginia's Husband*, by Florence Kilpatrick (Messrs. Edmond Breon and Wilfred Shine and Mesdames Helen Ferrers and Ena Grossmith).

CRITERION, 218-223 Piccadilly, W. 1.—(1926) *April* 8. *The Cat's Cradle*, by Aimée and Philip Stuart (Messrs. W. Graham Browne, Tom Reynolds and Robert Andrews and Mesdames Marie Tempest, Louise Hampton and Gwen Wyndham). *Sept.* 30. *The Scarlet Lady*, by John Hastings Turner (Messrs. Ernest Thesiger, Tom Reynolds and W. Graham Browne and Mesdames Marie Tempest and Fabia Drake).

DALY'S, 2-6 Cranbourne Street, W.C. 2.—(1926) *May* 22. *Yvonne*, musical comedy by Percy Greenbank, with music by Jean Gilbert and Vernon Duke (Messrs. Mark Lester, Horace Percival, Hal Sherman and Arthur Pusey and Mesdames Ivy Tresmand and Maria Minetti).

DUKE OF YORK'S, St. Martin's Lane, W.C. 2.—(1926) *March* 17. *Life Goes On*, by Stephen Lind (Messrs. Sam Livesey and Ben Webster and Miss Annie Saker). *April* 19. *Loose Ends*, by Geoffrey Warren (Messrs. Dion Titheradge, Wilfred Fletcher and Owen Roughwood and Mesdames Mary Merrall and Mollie Kerr). *June* 9. *Easy Virtue*, by Noel Coward (Messrs. Marcus Barron and Philip Wade and Mesdames Jane Cowl, Joyce Carey, Mabel Terry-Lewis and Joan Clement-Scott).

EMPIRE, Leicester Square, W.C. 2.—(1925) *Dec.* 23. *Henry VIII.*, Shakespeare's play revived (Messrs. Arthur Wontner, Norman V. Norman, E. Lyall Swete, O. B. Clarence, Lewis Casson and Hubert Carter and Mesdames Sybil Thorndike, Ada King and Angela Baddeley). (1926) *March* 8. *The Cenci*, by Percy Bysshe Shelley, revived for few matinées (Messrs. H. R. Hignett, Arthur Wontner and Eugene Leahy and Mesdames Sybil Thorndike and Beatrice Wilson). *April* 14. *Lady, Be Good*, musical comedy, by Guy Bolton and Fred Thompson, with music by George Gershwin (Messrs. Fred Astaire, William Kent and George Vollaire and Mesdames Adele Astaire and Sylvia Leslie).

EVERYMAN, Old Drill Hall, Hampstead, N.W. 3.—(1925) *Nov.* 3. *The Dark Angel*, by Guy Bolton (Messrs. Arthur Pusey and G. H. Mulcaster and Mesdames Hilda Bayley and Elizabeth Pollock). *Dec.* 1. *Sweet Pepper*, by Geoffrey Moss (Messrs. Bryan Powley and Adelqui Millar and Miss Norah Robinson). *Dec.* 28. *The Inheritors*, by Susan Glaspell (Messrs. Herbert Lomas, Cecil Parker and Hugh Williams and Miss Muriel Randall). (1926) *Jan.* 20. *The Man Who Was Thursday*, adapted from G. K. Chesterton's novel by Mrs. Cecil Chesterton and Ralph Neale (Messrs. Ion Swinley and Miss Gwen Ffrangcon-Davies). *Dec.* 19. *The Blue Bird*, by Maeterlinck, revived (Messrs. Ernest Hendrie, Norman Page and Lewin Mannering and Miss Nora Johnston). (1926) *April* 7. *Enchantress*, by Karen Bramson, English version by Michael Orme (Messrs. Malcolm Keen, Paul Cavanagh and Léon M. Lion and Mesdames Gertrude Elliott and Ethel Irving). *April* 26. *The Unseemly Adventure*, by Sydney Blow and Gordon-Whitehead from the novel by Ralph Straus (Messrs. Bruce Winston, Frederick Cooper, Reginald Bach, and Victor Stanley and Mesdames Norah Robinson, Faith Celli and Alice Mansfield). *May* 31. *Ourselves*, an entertainment (Messrs. Arthur Prince and Norman Griffin). *July* 30. *None But the Brave*, a farce by Bernard Merivale and Brandon Fleming (Messrs. Huntley Wright, Henry Wenman, Ivan Berlyn, Lennox Pawle and Eugene Leahy). *Sept.* 13. *Easy Come, Easy Go*, a farce by Owen Davis (Messrs. Edward H. Robins, Sam Livesey and George Bealby and Miss Eva Gray). *Sept.* 20. *After Dark*, by J. Jefferson Farjeon (Messrs. Horace Hodges, Donald Calthrop, Malcolm Keen and Billy Speechley and Mesdames Norah Robinson and Helen Goss).

GLOBE, Shaftesbury Avenue, W. 1.—(1925) *Nov.* 6. *Lullaby*, by Edward Knoblock (Messrs. Francis Lister, Herbert Grimwood and A. Scott-Gatty and Mesdames Margaret Bannerman and Violet Farebrother). (1926) *Jan.* 25. *All the King's Horses*, by Charles Elton Openshaw (Messrs. Allan Aynesworth, Arthur Pusey and Edward Scott-Gatty and Mesdames Irene Vanbrugh and Jill Esmond-Moore). *April* 6. *By-Ways*, by H. C. M. Hardinge (Messrs. Herbert Marshall and Francis Lister, Lady Tree and Mesdames Margaret Bannerman and Grace Lane). *April* 19. *Hamlet* in Italian (Signor

Ruggero Ruggeri). *May* 14. Season of comedies of M. Louis Verneuil and his French company. *June* 1. *Engaged*, by William Hurlbut (Messrs. Herbert Marshall, H. G. Stoker and Edmund Breon and Mesdames Margaret Bannerman, Nina Boucicault and Norah Robinson); and *Our Dogs*, adapted from the French by Mrs. Stanley Bell (Mr. Edmund Breon and Miss Bannerman). *June* 29. *There's No Fool*, adapted by Stanley Bell from the French of Pierre Wolff (Messrs. Bertram Wallis, Leonard Upton and Morton Selten and Mesdames Margaret Bannerman and Martita Hunt). *July* 20. *Ask Beccles*, by Cyril Campion and Edward Dignon (Messrs. Basil Foster, Eric Maturin, E. Scott-Gatty and Charles Wade and Mesdames Barbara Hoffe and Barbara Gott).

HAYMARKET, Haymarket, S.W. 1.—(1926) *Mary Rose*, by Sir James Barrie, revived (Messrs. Leon Quartermaine, Norman Forbes, Reginald Bach and Frank Cellier and Mesdames Fay Compton and Hilda Trevelyan). *April* 15. *This Woman Business*, by Benn W. Levy (Messrs. Leon Quartermaine, O. B. Clarence, A. Bromley Davenport, Clifford Mollison and Sebastian Smith and Miss Fay Compton). *Sept.* 29. *The White Witch*, by A. P. Herbert (Messrs. Leon Quartermaine, Henry Caine and Sebastian Smith and Mesdames Fay Compton, Laura Smithson and Cecily Byrne).

HIPPODROME, Cranbourne Street, W.C. 2.—(1926) *Oct.* 7. *Sunny*, musical comedy by Otto Harbach and Oscar Hammerstein, with music by Jerome Kern (Messrs. Jack Buchanan, Claude Hulbert and Jack Hobbs and Mesdames Binnie Hale, Elsie Randolph, Nancie Lovat and Ula Sharon).

HIS MAJESTY'S, Haymarket, S.W. 1.—(1926) *Feb.* 3. *The Student Prince*, light opera by Dorothy Donnelly, with music by Sigmund Romberg (Messrs. Allan Prior and Herbert Waterous and Mesdames Ilse Marvenga and Lucyenne Herval). *Aug.* 25. *The Co-Optimists* presented a new programme.

KINGSWAY, 8 Great Queen Street, Holborn, W.C. 2.—(1925) *Nov.* 17. *The Old Adam*, a comedy by Cicely Hamilton (Messrs. Fewlass Llewellyn, Charles Carson, Roy Byford, William J. Rea and Scott Sunderland). *Dec.* 7. *Light O'Love*, by Arthur Schnitzler, adapted by Moreton Shand (Messrs. Arthur Pusey and Denys Blakelock and Mesdames Jane Ellis and Olive Sloane). (1926) *Jan.* 30. *The Immortal Hour*, the opera by Rutland Boughton and Fiona Macleod revived (Messrs. W. Johnstone-Douglas, Arthur Cranmer and William Heseltine and Miss Gwen Ffrangcon-Davies). *April* 7. *The Marvellous History of St. Bernard*, by Henri Ghéon, translated by Sir Barry Jackson (Messrs. Robert Harris, Dennis Barry, Scott Sunderland and James Dale and Mesdames Gwen Ffrangcon-Davies and Valerie Taylor). *Sept.* 30. *Rosmersholm*, Ibsen's play revived (Messrs. Charles Carson and Robert Farquharson and Mesdames Edith Evans and Muriel Aked).

LITTLE, Adelphi Terrace, W.C. 2.—(1925) *Dec.* 8. *Gloriana*, by Gwen John (Messrs. Sam Livesey, Ben Webster, Tristan Rawson and John Gielgud and Miss Nancy Price). *Dec.* 26. *Too Much Money*, Israel Zangwill's farce revived (Messrs. H. St. Barbe West, W. G. Fay and William Black and Mesdames Jane Bacon and Dora Gregory). (1926) *Feb.* 9. *The Forcing House*, by Israel Zangwill (Messrs. Harcourt Williams, George Bealby and Lewin Mannering and Mesdames Jane Bacon and Ethel Irving). *March* 25. *Paper Chase*, by John McNally (Messrs. Sutton Vane, James Lindsay and Arthur Grenville and Mesdames Paula Trevanion and Muriel Aked). *April* 13. *Autumn Fire*, by T. C. Murray (Messrs. Wilfred Shine and Percy Robinson and Mesdames Una O'Connor, Lesh Bateman and Cathleen Drago). *July* 12. *Distinguished Villa*, by Kate O'Brien (Messrs. Ivor Barnard, William Stack and Henry Hoare and Mesdames Una O'Connor and Gillian Lind). *Sept.* 7. *The Idiot*, by Dostoieffsky (Messrs. Ion Swinley and Michael Hogan and Mesdames Barbara Everest and Barbara Horder). *Oct.* 8. *London's Potinière*, a revue by Reginald Arkell and "Seamark," with music by Norman O'Neill (Messrs. Hay Petrie and Robert Atkins and Mesdames Nadine March and Babs Valerie).

LYCEUM, Wellington Street, W.C. 2.—(1925) *Nov.* 3. *The Man in Dress Clothes*, revival of play adapted from the French (Messrs. Seymour Hicks, Laurence Caird and Vincent W. Lawson and Mesdames Ellaline Terriss, Barbara Church and Betty Seymour Hicks). *Dec.* 26. *Dick Whittington*, a pantomime (Messrs. Dick Henderson, George Jackley and Archie McCaig and Mesdames Helen Gilliland and Ena Dale). (1926) *March* 24. *Saint Joan*, Bernard Shaw's drama revived (Messrs. Lyall Swete, Harold Scott, Lewis Casson, Eugene Leahy and O. B. Clarence and Miss Sybil Thorndike). *May* 22. *The Padre*, adapted from the French by Jose G. Levy (Mes rs. Basil Gill and H. R. Hignett and Miss Olive Sloane).

LYRIC, 29 Shaftesbury Avenue, W. 1.—(1925) *Dec.* 26. *Lilac Time*, revived (Messrs. Frederick Blamey, Robert Nainby and Edmund Gwenn and Mesdames Rose Hignell and Sylvia Leslie). Chesterton's novel (Messrs. Clifford Mollison, John Howell and Ivor Barnard and Mesdames Janet Eccles and Fabia Drake); at the Apollo on *May* 30, *Getting Mother Married*, by Neil Grant (Messrs. Lyn Harding, Arthur Pusey and Albert Brouett and Mesdames Eva Moore and Frances Doble).

Record Runs.—The "record run" at a London theatre, in pre-war days, was held by *Charley's Aunt* (1,466 consecutive performances). The present record is 2,238 consecutive performances of *Chu Chin Chow*, which was produced at His Majesty's on Aug. 31, 1916, reached its 1,467th performance on Oct. 17th, 1919, and was withdrawn after its 2,238th performance (having brought in over £700,000) on July 22, 1921. Other long runs are *Beggar's Opera* (1,463), *Our Boys* (1,362), *The Maid of the Mountains* (1,352), *A Little Bit of Fluff* (1,241), *The Farmer's Wife* (1,200 and still running), *A Chinese Honeymoon* (1,075), *Romance* (1,046).

The League of the Empire (FOUNDED 1901).

THE League is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The relation of the League to the Education Departments and Governments throughout the Empire has been regularised (*a*) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902–3; (*b*) by the active and widespread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Overseas Governments. One of the effects of this Conference was that the Imperial Government undertook to call the Imperial Conference on Education in 1911. In 1912 the first Imperial Conference of Teachers' Associations was held by the League, and in 1913 was inaugurated the Imperial Union of Teachers. In 1921 an Imperial Conference of Teachers' Associations was held in Toronto; in 1924 another was held in London. A Congress was held in Paris in 1926 in co-operation with French authorities. The League, through the liberality of the late Mr. Louis Spitzel, has published a series of text-books on the Empire, under the editorship of Professor A. F. Pollard: (1) "The British Empire—Its Past, Its Present, and Its Future" (a book of reference); (2) "The British Empire and Its History" (for Secondary Schools); (3) "The Story of the British Empire." In 1907 the League helped to establish a lace industry in St. Helena. With the co-operation of the Oversea and Home Education Authorities a Scheme for the interchange of Teachers throughout the Empire is now in active operation, over 700 interchange appointments have already been arranged. Visits to historical places in England and on the Continent are planned for overseas teachers. The School Affiliation and Comrades' Correspondence Sections were established in 1901–2. Other work undertaken is the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and the furthering of the keeping of Empire Day.

During the War the League distributed from its depôt over a million articles to the hospitals and troops, besides helping prisoners and others in distress. The League has also given colours and shields to all the overseas contingents who fought for the Empire.

Hon. Pres., H.R.H. The Duke of Connaught, K.G.
Acting Chairman, Dr. E. A. Gardner, late Vice-Chancellor, London University.
Chairman, Executive Committee, M. J. Rendall, LL.D., late Headmaster of Winchester.
Hon. Treasurer, Sir Philip Hutchins K.C.S.I.
Hon. Secretary, Mrs. Ord Marshall, C.B.E.
Address, 124 Belgrave Road, London, S.W. 1.

THE DERBY, 1883-1926.

For particulars of the Derby from 1780–1882 see 1921 edition.

The *Distance* of the Derby course at Epsom is now exactly 1 mile 4 furlongs, having been shortened 29 yards by the rounding off of Tattenham Corner. Sir J. Hawley scored four successes with Teddington, Beadsman, Musjid, and Blue Gown, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. Lady James Douglas was the first lady to win the Derby.

Year.	Name and Owner of Winner.	Betting.	Jockey.	Trainer.	No. of R.'s.

THE TURF IN 1926.

THE closing stage of the flat-racing season was notable for the putting into force of the new Betting Tax Act. Under its provisions every bookmaker has to be licensed, his office has to be registered, and he must pay a tax of 3½ per cent. to the State. He may, of course, deduct this tax from the backer's winnings. The Chancellor of the Exchequer estimates that the tax will realise 6 millions a year. Street betting is still forbidden, nor does the new Act legalise any betting contract, though it taxes it—a somewhat Gilbertian position. During the general strike in May racing was suspended for about three weeks.

For the first time for 23 years a Derby winner, Coronach, also won the St. Leger, Rock Sand being the last previous dual victor. Coronach is a colt by Hurry On from Wet Kiss, and is owned by Lord Woolavington, who has had a vintage year following a long period of ill-luck. Though beaten in the Two Thousand Guineas, won by Lord Derby's Colorado, Coronach improved so rapidly that he won the Derby easily. In the St. Leger, though getting away badly and bending a plate, he won with great ease in record time, beating Black Jester's time set up in 1914. The colt also won the Eclipse Stakes at Sandown Park, and credited Lord Woolavington with some £40,000 in stakes. There is no doubt that Coronach was the best of his age, and should this season make his mark as a cup horse.

Short Story, who won the Oaks for Lord Astor, was probably the best filly of the year, staying better than Pillion, the winner of the One Thousand Guineas, but taking them all round the three-year-olds were below average merit. Solario, as expected, won the Gold Cup at Ascot, but later in the season was defeated in the Jockey Club Cup at Newmarket by Sir Abe Bailey's Foxlaw. He has been retired to the stud.

The two-year-olds of the season appear to be up to the average, the most promising according to their running being Fourth Hand, Bold Archer, Damon, The Satrap, Sickle, Dian, Birthright and Call Boy.

There was no falling off in the demand for high-class blood stock. That generous purchaser, the Aga Khan, paid the record price of 17,000 guineas for a yearling colt by Hurry On—Ecurie, bred at the National Stud in Ireland. The previous highest price for a yearling was the £15,225 paid by Lord Glanely for Blue Ensign. At the Doncaster Sales Mr. J. S. Courtauld bought a yearling colt by Crusader—Love Oil for 12,000 guineas. The Sledmere Stud yearlings, 18 lots, realised 40,710 guineas—an average of 2,261 guineas each. At the Newmarket Sales a yearling colt by Gainsborough—Lady Bunghley was sold for 10,000 guineas, to be sent to America. Apart from these high prices the average was well maintained.

Lord Woolavington headed the list of winning owners, though he only ran 6 horses; Lord Derby was second and Lord Astor third. Lord Woolavington was also at the top of winning breeders, and F. Darling, his trainer, was ahead of Alec Taylor amongst the winning trainers. T. Weston (Lord Derby's jockey) for the first time topped the list of winning jockeys.

Trotting.—Fastest m. in America, 2 min. 54¾ secs., by Uhlan, 1913. Fastest pacing m., 1 min. 55 secs., Dan Patch, at St. Paul, U.S.A., Sept. 8, 1906. At Lexington (Ky.) in Oct., 1922, Peter Manning trotted a mile in 1 min. 56½ secs., unpaced and without wind shields, which were used in Uhlan's case.

CRICKET IN 1926.

After an interval of 14 years England recovered the "ashes" by beating Australia in this country. Four of the five Test matches were drawn—at Nottingham, Lord's, Leeds and Manchester—but the last, played to a finish at the Oval, was won by England by 289 runs, the scores being: England 280 and 436, Australia 302 and 125. This contest was a triumph for Rhodes and Larwood in bowling and J. B. Hobbs and H. Sutcliffe in batting. A. P. F. Chapman was the victorious captain, having displaced A. W. Carr. In the five Tests Hobbs had an average of 81 and Sutcliffe 78·86. Rhodes in 45 overs took 6 wickets for 13·16 runs apiece and Larwood in 107 overs took 9 wickets for 28 apiece.

The Australians had a successful tour. They played in all 40 matches—won 12, lost 1 and drew 27. W. M. Woodfull came out best in batting with an average of 57·55, with C. G. Macartney close up with 53·82. C. V. Grimmett, C. G. Macartney and A. A. Mailey did best of the bowlers.

In County Cricket, Lancashire deposed Yorkshire from the championship which they had held for four years, but the surprise of the season was the advance of Glamorgan from the bottom to eighth position.

COUNTY CHAMPIONSHIP TABLE.

County	Played.	Won.	Lost.	Won on 1st Innings.	Lost on 1st Innings.	Possible Points.	Points Obtained.	No Result.	Percentage.
Lancashire (3)	32	17	2	6	3	140	106	4	75·71
Yorkshire (1)	31	14	0	10	4	140	104	3	74·28
Kent (5)	32	15	3	3	8	140	92	0	65·71
Notts (4)	29	13	7	4	5	145	82	0	56·55
Surrey (2)	26	7	4	8	3	110	62	4	56·36
Middlesex (6)	24	9	4	0	6	95	51	5	53·68
Hampshire (9)	28	10	5	4	8	135	70	1	51·85
Glamorgan (17)	24	9	9	1	5	115	58	5	50·43
Essex (7)	27	9	7	3	3	140	62½	2	44·64
Sussex (13)	27	6	10	6	5	135	53	0	39·25
Derbyshire (14)	23	5	7	4	6	110	43	1	39·09
Warwick (8)	28	2	9	8	5	120	39	4	32·50
Leicester (12)	27	5	12	3	4	120	38	3	31·66
Somerset (15)	26	3	9	3	6	110	32½	4	29·54
Gloucester (10)	30	5	17	3	4	145	38	1	26·20
Northants (11)	25	3	13	4	5	125	32	0	25·60
Worcester (16)	28	3	13	3	4	115	28	5	24·34

The figures in parentheses indicate the positions in the table at the close of the season 1925.

The following matches were abandoned without a ball being bowled: Yorkshire v. Notts; Derbyshire v. Leicestershire; Northamptonshire v. Sussex. There was one tie, Essex v. Somerset.

BEST BOWLING AVERAGES, 1926.

Bowler.	Overs.	Maidens.	Runs.	Wickets.	Average.
Rhodes	892·4	315	1799	115	14·86
Mercer	986·2	226	2439	136	16·46

* Signifies not out.

Hobbs maintained his position as premier batsman, and increased his long lead in the number of centuries scored. His 316 at Lord's for Surrey v. Middlesex was the highest score of his career, and broke the record of Holmes, who made 315 for Yorkshire on that ground. This score of 316 was also Hobbs' best.

MISCELLANEOUS CRICKET RECORDS.

Highest individual scores, A. E. Stoddart, 485, for Hampstead v. Stoics, 1886; in first-class cricket in England A. C. Maclaren, 424, for Lancashire v. Somerset, at Taunton, July, 1895; in Australia, W. H. Ponsford, 429, for Victoria v. Tasmania, Feb. 5, 1923.

Highest totals.—In England, Yorkshire, 887, v. Warwickshire, 1896. In Australia, New South Wales, 918, v. South Australia, Jan. 1901. Victoria, 1059, v. Tasmania, Feb. 5, 1923.

Smallest totals.—Oxford University (one man absent), 12, v. M.C.C. at Oxford, May, 1877; Northants, 12, v. Gloucester, June 11, 1907.

Highest Aggregate.—1929 was scored by New South Wales v. South Australia at Sydney, Jan. 26, 1926. Scores: N.S. Wales 642 and 593, S. Australia 475 and 219.

Most centuries in one season—J. B. Hobbs, 16; next, T. Hayward (1906), C. B. Fry (1901) and E. Hendren (1923), 13 centuries each.

Most runs made in a year.—T. Hayward (Surrey), 3,518 in 1900. T. Hayward exceeded 2000 runs in 10 seasons.

Aggregates of 3,000 runs in a season—Hayward, R. Abel, Mead, K. S. Ranjitsinhji, C. B. Fry, J. Tyldesley, E. Hendren, and J. B. Hobbs.

ETON AND HARROW.

Year.	Winner.
1914	Eton won by 4 wickets.
1915-18, no match. War.

The record attendance for a football match is 127,307, at the International between Scotland and England at Hampden Park on Mar. 23, 1912. The largest "gate" receipts were £27,776 at Cup Final at Wembley Stadium, April 28, 1923, between Bolton Wanderers and West Ham, when 126,047 persons passed the turnstiles, besides many who broke in. This is a record England attendance, the previous best being 120,081 at Crystal Palace in 1913.

ASSOCIATION FOOTBALL IN 1925-26.

THE INTERNATIONALS.

Scotland retained the International championship, winning her 3 matches without the loss of a goal. England went down to the bottom, Ireland coming second with 1 win, and 2 draw, and Wales third with 1 win. England could only draw one of her 3 games. Results:—

Oct. 24, at Belfast, Ireland drew with England, no goals.
Oct. 31, at Cardiff, Scotland beat Wales, 3–0.
Feb. 13, at Belfast, Ireland beat Wales, 3–0.
Feb. 27, at Glasgow, Scotland beat Ireland, 4–0.
March 1, at Selhurst, Wales beat England, 3–1.
April 17, at Manchester, Scotland beat England 1–0.

Totals (including ties): Scotland, 21; England, 19; Wales, 3; Ireland, 2.

At Antwerp, May 24, England beat Belgium, 5–3.

Only two amateur Internationals were played, in which England beat Wales 2–1 at Wrexham and England beat Ireland 6 4 at Maidstone.

Two English teams toured in Australia and Canada. Neither lost a single game. The records were:—Australian tour—played 25, won 25, goals for 139, against 13. Canadian tour—played 20, won 20; goals for 102, against 13.

INTER-LEAGUE MATCHES.

In the Inter-League Tourney the English League won both their matches against the Scottish and Irish Leagues, and the Scottish beat the Irish League. The Free State League drew with the Welsh League and beat the Irish League.

PRINCIPAL CUPS.

ENGLISH.—Bolton Wanderers beat Manchester City 2–0 at the Stadium, Wembley, April 24, before 91,447 spectators.

AMATEUR.—Northern Nomads beat Stockton 7–1 at Roker Park, Sunderland, on April 27.

SCOTTISH.—St. Mirren beat Celtic 2–0.

IRISH.—Belfast Celtic beat Linfield 3–2.

FREE STATE.—Fordsons (Cork).

WELSH.—Ebbw Vale beat Swansea Town 3–2.

LEAGUE COMPETITIONS.

LEAGUE I.—Huddersfield Town, 57 pts.
LEAGUE II.—The Wednesday, 60 pts.
LEAGUE III. (Southern) Reading, 57 pts.; (Northern) Grimsby, 61 pts.
SCOTTISH.—Celtic, 58 pts. (Second Division) Dunfermline, 59 pts.
IRISH.—Belfast Celtic, 32 pts.
FREE STATE.—Shelbourne, 31 pts.
WELCH (North).—Rhyl, 49 pts.; (South) Swansea, 48 pts.
CENTRAL.—Huddersfield Town, 60 pts.
SOUTHERN (East).—Millwall, 54 pts. (West) Plymouth Argyle, 42 pts.

SPARTAN.—G.E.R. (Romford), 45 pts.
LONDON (Premier).—Leyton, 43 pts.
SOUTHERN AMATEUR.—Eastbourne, 31 pts.

RUGBY UNION IN 1926.

Scotland and Ireland were bracketed equal in the International Championship, both having won three matches and lost one. Wales came next with 2 wins, 1 loss and 1 draw, England next with 1 win, 4 losses and 1 draw, and France last with 4 losses. Results:—

Jan. 2. Paris—Scotland beat France by 20 pts. to 6.
Jan. 16. Cardiff.—England beat Wales by 3 pts. to nil.
Jan. 23. Belfast.—Ireland beat France by 11 pts. to nil.
Feb. 6. Edinburgh.—Scotland beat Wales by 8 pts. to 5.
Feb. 12. Dublin.—Ireland beat England by 19 pts. to 15.
Feb. 27. Twickenham.—England beat France by 11 pts. to nil.
Feb. 27. Edinburgh.—Ireland beat Scotland by 3 pts. to nil.
Mar. 13. Swansea.—Wales beat Scotland by 11 pts. to 8.
Mar. 26. Twickenham.—Scotland beat England by 17 pts. to 9.
Apr. 5. Paris.—Wales beat France by 7 pts. to 5.

By beating England at Twickenham Scotland won the Calcutta Cup.

At Twickenham Cambridge University beat Oxford University by 3 goals, 6 tries to 1 try. In the series Oxford have won 22 games, Cambridge 17, and 9 have been drawn.

The County Championship was won by Yorkshire, who beat Hampshire in the final by 25 pts. to 24.

Feb. 27. Twickenham.—England beat France by 11 pts. to nil.
Feb. 27. Edinburgh.—Ireland beat Scotland by 3 pts. to nil.
Mar. 13. Swansea.—Wales beat Scotland by 11 pts. to 8.
Mar. 26. Twickenham.—Scotland beat England by 17 pts. to 9.
Apr. 5. Paris.—Wales beat France by 7 pts. to 5.

By beating England at Twickenham Scotland won the Calcutta Cup.

At Twickenham Cambridge University beat Oxford University by 3 goals, 6 tries to 1 try. In the series Oxford have won 22 games, Cambridge 17, and 9 have been drawn.

The County Championship was won by Yorkshire, who beat Hampshire in the final by 25 pts. to 24.

THE RUGBY LEAGUE IN 1925-26.

Wigan headed the table of the Rugby League with a percentage of 2.666 followed by Warrington, Swinton and Hull. In the play off for the Club Championship, Wigan beat Warrington in the final by 22 pts. to 10, Swinton won the Challenge Cup, beating in the final Oldham by 9 pts. to 3. Dewsbury won the Yorkshire County Cup, beating in the final Huddersfield by 2 pts to nil. Swinton won the Lancashire County Cup, beating Wigan in the final by 15 pts. to 11. Lancashire won the County Championship by beating both Yorkshire and Cumberland. Pontypridd has been organised under Rugby League rules for the current season.

AVIATION.

The King's Cup.

The Air race for the King's Cup over a course of 1,464 miles was won by Capt. H. S. Broad on a small 27 50 h.p. Moth machine. Only 7 of the 14 starters survived the final stages and of these 4 made forced descents. It was a fighting finish between the Moth and a 450 h.p. Vickers-Vixen, piloted by Lieut. E. R. C. Scholefield. Broad's average speed for the whole course was 90·4 m.p.h. Scholefield was only 22 secs. behind.

Notable Events.

On May 9 Lt.-Com. Byrd (U.S.A.) with Floyd Bennett flew across the North Pole at a height of 3,000 ft. They shook hands and saluted the memory of Peary.

Commandante Franco and Capt. Ruiz de Alda flew from Spain to Brazil (3,450 miles) in 35 hrs. 20 mins. flying time. The engines were British (Napier-Lion).

Record non-stop flight made by Lieut. Challe and Capt. Weyser (French Flying Corps), 3,250 miles from Le Bourget to Zandar Abbas (Persian Gulf). Previous record Le Bourget to Omsk (Siberia), 2,975 miles, by Capt. Ginet and Lieut. Dordilly.

Alan Cobham (since knighted) flew from England to Australia and back by way of Greece, Asia Minor, Mesopotamia, India, and then over the sea to Port Darwin. He started on June 30 and received a public welcome at Westminster on Oct. 1. His total flying time was 23 days 18 hours. On the way out, his mechanic, Charles Elliot, was shot by an Arab, and for the rest of the journey he was assisted by Sergt. Ward. On the return he was also assisted by Mr. C. S. Capel. The aeroplane was the same De Havilland which he had piloted to the Cape and back. The engine was the same 385 h.p. Siddeley-Jaguar.

Ballooning.

The Belgian Gordon-Bennett Cup race was contested by 15 balloons of which 3, Banshee, Bee and Miramar, were British. The prize fell to the American Goodyear III, which landed at Sölvesberg, Sweden, 520 miles from Antwerp, the starting point. The U.S.A. Army S26 was second with 330 miles, and the Belgica was third with 270 miles.

This Ballooning Record is 1,895 miles, held by Germany. British record, 1,127 miles; French record, 1,375 miles.

BOWLS CHAMPIONSHIP, 1926.

Single Rink (Wood, Australian Cup)—Preston (Brighton) Club (A. Robinson, C. Wheater, W. T. Cripps, R. John) 25, beat Newbury (W. J. Jones, R. Cannan, T. Webb, F. Bennet) 24.

Singles—Plymouth (Robt. Jack, Sir Francis Drake B.C.).

Pairs—Poole (Dewland and Bamber, Poole Park B.C.).

POLO IN 1926.

International.—Argentina beat America. Hurlingham beat Argentina.
Champion Cup.—Harlequins beat Eastcott.
Coronation Cup.—El Gordo beat XVII.-XXI Lancers
Whitney Cup.—XVII.-XXI Lancers beat Hurricanes.
Buenos Aires Cup.—Whatcombe beat La Pampa.
Hurlingham Cup.—Birds beat Scouts.
Inter-Regimental Cup.—XXVII-XXI Lancers beat XIV-XX Hussars (7th win in succession).
Inter-University.—Cambridge beat Oxford, 7 goals to 4.
Ruehampton Cup.—El Gordo beat Templeton.
Harrington Cup.—No match between Lords and Commons.
Ranelagh Cup.—El Gordo beat Hurricanes.
Social Clubs' Tournament.—Bucks. won.
Rugby Tournament.—Hillmorton beat Templeton.

BILLIARDS IN 1926.

The professional championship of billiards now exists in name only. Thomas Newman, the holder, retained the honour last year by beating a single opponent, Davis of Chesterfield, who has no pretensions to champion form. The actual premiership rests with W. Smith of Darlington, who defeated the champion Newman in a series of 3 games, 16,000 each by 5,475 points. There were many exhibition games, but in spite of huge breaks the public interest appeared to be on the wane. No fresh records were set up during the season. A change in the rules now limits runs of winning and losing hazards to 25.

Amateur Championship.—This annual event was won by J. Earlam of Runcorn. He beat C. M. Helyer, Middlesbrough, in the final of 3,000 up by 1,249. J. Earlam, aged 20, was a newspaper seller. He has now become a professional. This competition was played with composition balls. Earlam holds the break record for this competition of 435.

Breaks.—The record break under modern rules and conditions is 2870, made by Walter Lindrum in Australia in 1928, previous best, 1379 scored by T. Newman, Nov. 2, 1924. Best "spot" break (exhibition match), 2,394, by W. J. Peall, 1890; match for money, 2,021, by W. J. Peall, 1888. Best spot-barred breaks, 1,332, by John Roberts, 1894, and 1,467, by W. Taylor, 1891 (balls jammed). With composition balls the highest breaks are 2,196 (324 and 1,620 off the red), by George Gray, 1911; 1,016, by H. W. Stevenson (under B.C.C. Rules), Oct., 1912. Other large breaks with ivory balls, under either B.A. or B.C.C. Rules, are 1,134 by G. Gray; 994 by H. W. Stevenson; 971 by T. Newman (October, 1926); 811 by John Roberts, in 1905. By means of the now abolished cradle cannon W. Cook, in June, 1907, scored 42,746. The highest break break was 499,135 by T. Reece with the anchor cannon in 1907.

CHIEF GOLF EVENTS IN 1926.

British Open.—R. T. Jones (U.S.A.).
British Amateur.—J. Sweetser (U.S.A.).
English Native Amateur.—T. F. Ellison (holder)
Ladies' Open.—Miss Cecil Leitch.
American Open.—R. T. Jones (U.S.A.).
American Amateur.—G. von Elm.
American Professional.—W. Hagen.
Irish Open Amateur.—Major C. O. Hezlet
British Boys'.—Eric A. McRurie (Leven Thistle).
British Girls'.—Miss Diana Esmond.
French Open.—Aubrey Boomer (St. Cloud).
French Open Amateur.—J. G. Anderson (U.S.A.).
French Amateur.—M. Vagliano.
Walker Cup.—U.S.A. beat Britain by 6½-5½.
International (Professional).—Britain beat U.S.A. by 13½-7½.
Inter-University.—Cambridge beat Oxford 9-3.
Canadian.—Macdonald Smith (U.S.A.).
Tournaments.—Gleneagles ("Glasgow Herald," £1,000), Aubrey Boomer. St. Andrews ("Daily Mail" £1,200), Aubrey Boomer. Southern Professional Championship, George Gadd. Moortown ("York-shire Evening News," £1,030), C. Whitcombe. Mid-Surrey ("News of the World," £1,040) Alexander Herd.

LAWN TENNIS IN 1926.

The Championships at Wimbledon.

Men's Singles.—J. Borotra (Fr.) beat H. O. Kinsey (U.S.A.).
Men's Doubles.—H. Cochet and J. Brugnon (Fr.) beat C. van Lennep and B. de Kehrling.
Ladies' Singles.—Mrs. L. A. Godfree (neé K. McKane) (Great Britain) beat Senorita E. de Alvarez (Spain).
Ladies' Doubles.—Miss Ryan and Miss M. E. Browne (U.S.A.) beat Mrs L. A. Godfree and Miss E. L. Colyer (Great Britain).
Mixed Doubles.—L. A. Godfree and Mrs. Godfree (Great Britain) beat V. Richards and Miss Ryan (U.S.A.).
All England Plate.—J. B. Gilbert (Great Britain) beat F. R. L. Crawford (Great Britain).

Internationals.—America beat Great Britain at Eastbourne by 5 matches to love. American Women beat British Women for the Wightman Cup at Wimbledon by four matches to three. England beat Ireland in Dublin by ten rubbers to five.
American Championships.—Men's Singles, R. Lacoste beat J. Borotra. Ladies' Singles, Mrs. Mallory beat Miss M. Ryan.
Davis Cup.—America (holders) beat France.

1925	Major Goodsell *beat* J. P. Hannan (N.Z.).
1925	M. Goodsell *beat* J. Paddon (N.Z.).
1926	M. Goodsell ,, Tom Saul.

HENLEY REGATTA, 1926.

There were no foreign competitors at Henley Regatta in 1926. Results:—
Grand Challenge Cup.—Leander R.C., 6m. 46s. (record).
Thames Cup.—Selwyn Coll. (Cambs.), 7m. 9s.
Ladies' Plate.—Jesus Coll. (Cambs.), 7m. 8s.
Diamond Sculls.—J. Beresford, jun. (Thames R.C.), 8m. 45s.
Silver Goblets.—Third Trinity (Cambs.), 8m. 35s.
Visitors' Cup.—Christ Church (Oxon), 8m. 15s.
Wyfold Cup.—London R.C., 7m. 49s.
Stewards' Cup.—Thames R.C., 7m. 34s.

OTHER AQUATIC EVENTS, 1926.

Wingfield Sculls.—J. Beresford, jun. (7th year in succ.).
London Cup.—J. Beresford, jun. (6th time).
Doggett's Coat and Badge.—T. G. M. Green (Mortlake).

THE UNIVERSITY BOAT RACE.

Year	Winner	m.	s.	Won by
1907	Cambridge	20	26	4½ lengths.
1908	Cambridge	19	19	2½ lengths.
1909	Oxford	19	56	3½ lengths.
1910	Oxford	20	14	3½ lengths.a
1911	Oxford	18	29	3½ lengths.a
1912	Oxford	22	5	5 lengths.b
1913	Oxford	20	53	½ of a length.
1914	Cambridge	20	23	4½ lengths.
1915-19	No race.—War.			
1920	Cambridge	21	11	4 lengths.
1921	Cambridge	19	45	6 lengths.
1922	Cambridge	19	27	4½ lengths.
1923	Oxford	20	54	½ of a length.
1924	Cambridge	18	41	4½ lengths.
1925	Cambridge	21	50	30 lengths.b
1926	Cambridge	19	29	5 lengths.

a Rowed on a Wednesday; *b* Oxford were waterlogged; *g* Best on record; *h* Race rowed twice owing to both boats sinking on first occasion—the second race was rowed on Monday. In 1829 the crews rowed a match at Henley, which Oxford won easily in 14 min. 30 secs., but the race was not then an annual event.

UNIVERSITY CONTESTS.

Boat Race—Oxford 40, Cambridge 37; dead heat in 1877.
Cricket—Cambridge 42, Oxford 36; drawn 10.
Rugby Football—Oxford 22, Cambridge 20; drawn 9.
Association Football—Cambridge 21, Oxford 21; drawn 6.
Sports—Cambridge 27, Oxford 25; ties 6.

Throwing the Discus—Middlesex, 1; Hants, 2; Kent, 3. 310ft. 10½in.

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

It is illegal to pursue the different kinds of game between the following dates (inclusive):—

GAME.	ENG. & W.	SCOTLAND.
Black Game or Heath Fowl.	11 Dec. to 19 Aug. (31 Aug. in Somerset, Devon, and New Forest).	11 Dec. to 19 Aug.
Bustard	2 Mar. to 31 Aug.	None.
Deer, Male	None.	None.
,, Fallow Male	None.	None.
*Grouse or Red Game	11 Dec. to 11 Aug.	10 Dec. to 11 Aug.
*Hare	None.	None.
*Heath or Moor Game	None.	As "Muir-fowl."
Landrail, Quail	As "Wild Birds."	As "Wild Birds."
*Muirfowl, or Ptarmigan	None.	11 Dec. to 11 Aug.
*Partridge	2 Feb. to 31 Aug.	2 Feb. to 31 Aug.
*Pheasant	2 Feb. to 30 Sept.	2 Feb. to 30 Sept.

It is also unlawful (in *England and Wales*) to kill the game marked * on a Sunday or Christmas Day.

In *England and Wales*, hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In *Scotland* the same remarks apply to deer and hares, to the first four birds, and to wild duck. The close-time for all these birds is, under the Wild Birds Protection Acts, 1880 to 1908, from 2 March to 31 July, both inclusive. Otherwise this close-time applies to all wild birds throughout Great Britain. The penalty for killing any wild bird in such close-time, or for selling or having in possession between 16 March and 31 July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence, or, in the case of the undermentioned birds, £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or egg, where protected—*see* next column) in respect of which the offence was committed. In the Island of St. Kilda the fork-tailed petrel and St. Kilda wren are deemed to be included in the following list, and the birds marked ‡ to be omitted.

American quail.	Dotterel.	‡Guillemot.
Auk.	Dunbird.	Gull (except
Avocet.	Dunlin.	black-backed)
Bee-eater.	Eider-duck.	Hoopoe.
Bittern.	Fern-owl.	Kingfisher.
Bonxie.	‡Fulmar.	Kittiwake.
Colin.	‡Gannet.	Lapwing.
Cornish chough.	Goatsucker.	Lark.
Coulterneb.	Godwit.	Loon.
Cuckoo.	Goldfinch.	Mallard.
Curlew.	Grebe.	Marrot.
Diver.	Greenshank.	Merganser.
Murre.	Redshank.	Spoonbill.
Night-hawk.	Reeve or Ruff.	Stint.
Night-jar.	Roller.	Stone curlew.
Nightingale.	Sanderling.	Stonechatch.
Oriole.	Sandpiper.	Summer snipe
Owl.	Scout.	Tarrock.
Ox-bird.	Sealark.	Teal.
Oyster-catcher.	Seamew.	Tern.
Peewit.	Sea parrot.	Thicknee.
Petrel.	Sea swallow.	Tystey.
Phalarope.	Shearwater.	Whaup.
Plover.	Sheldrake.	Widgeon.
Ploverspage.	Shoveller.	Wild duck.
Pochard.	Skua.	Willock.
‡Puffin.	Smew.	Wimbrel.
Purre.	Snipe.	Woodcock.
‡Razorbill.	Solan goose.	Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s., but the Acts do not apply to any person shooting on his own land, or authorising anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, or the Secretary of State in Scotland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary of State in Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

Penalties are imposed on persons setting springs, gins, &c., on poles, trees, mounds, &c., so as to injure wild birds. Persons permitting such acts are equally liable. The use of a hook or like instrument for taking wild birds is forbidden.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. The first Monday in November is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about 12 Aug. to 12 Oct. for stags, and from 20 Nov. to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound.

SALMON AND FRESHWATER FISHERIES.

Salmon and Freshwater Fisheries Act, 1923.—This Act came into force on 1 Jan., 1924. It is "an Act to consolidate and amend the enactments relating to Salmon and Freshwater Fisheries in England and Wales" [18 July, 1923]. By this Act the numerous Acts relating to our inland fisheries have been consolidated and brought up to date with a view to meeting modern requirements.

This Act comprises 94 sections and it should be of considerable benefit to Fishery

Boards, riparian owners, anglers, and to the inland fisheries generally.

"Salmon" are defined as all fish of the salmon species.

"Trout" include any fish of the salmon family commonly known as trout and also "migratory trout" (*i.e.*, sea trout, which under the old Acts were legally "salmon"), meaning trout which migrate to and from the sea.

The so-called "coarse fish" (freshwater fish in the Act) have received additional protection. The important question of pollution is dealt with in three sections :—

Section 8 enables police-court proceedings to be taken where an effluent causes water to be poisonous or injurious to fish or the spawning grounds, spawn or food of fish. The same section provides for notice being given to the Fishery Boards or to the Minister of Agriculture and Fisheries where the construction of new works or the alteration of existing works are contemplated.

Section 55 authorizes a Fishery Board to institute or aid any person or local authority in instituting proceedings under the Rivers Pollution Prevention Acts 1876 to 1893, and, subject to certain safeguards, to extend the scope of those Acts to tidal waters.

Section 59 (1) (p) enables Fishery Boards to regulate by bye-law the discharge of specified effluents. These sections do not interfere with the common law right of procedure by action for injunction and damages. Although the Act provides powers for dealing with pollution, procedure in the nature of peaceful persuasion on the lines adopted by the Standing Committee on Rivers Pollution is likely to have much more comprehensive results than litigation.

Power has been given Fishery Boards to acquire fisheries by purchase or lease and to let the fishing rights, and also to acquire obstructions to the passage of salmon and migratory trout.

Anglers who fish for trout and coarse fish, and pay licence duty for fishing for such fish, are now entitled to representation on the Fishery Boards, the number of such representative members not to exceed one-third of the total number of members of the Fishery Board in the preceding year. These representatives will be appointed under schemes approved by the Minister and pending the constitution of schemes, by the Minister.

The Minister may by Order, on any application he may deem sufficient, require anglers to take out licences to catch freshwater fish, *i.e.*, coarse fish, in a fishery district.

Coarse fish, as well as salmon and trout, illegally bought, sold or exposed for sale or in the possession of any person for sale may be seized by an authorized officer.

Every package containing salmon or trout and consigned by any common or other carrier (*e.g.*, post or rail) must now have the word "salmon" or "trout," as the case may be, conspicuously marked on the outside thereof at all times throughout the year, and not only, as formerly, during the annual close season.

CLOSE SEASONS.

I. SALMON.

Statutory Weekly Close Time.

In England and Wales net-fishing for salmon is prohibited from 6 a.m. Saturday to 6 a.m. Monday.

In Scotland, from 6 p.m. Saturday to 6 a.m. Monday, and rod-fishing on Sundays.

Annual Close Seasons.

ENGLAND AND WALES (including the Esk in Dumfries). The statutory close season for salmon begins, for nets, on 1 Sept., and for rods on 1 Nov. ; for both nets and rods it ends on 31 Jan. For putts and putchers the annual close season is from the commencement of the annual close season to 30 April. By an Act of 1923 the Ministry of Agriculture and Fisheries may make orders varying the law on these and other points. The weekly close-time and annual close season may also be varied by bye-law by local Fishery Boards provided it begins for nets not later than 1 Sept., with a minimum of 153 days, and for rods not later than 1 Nov., with a minimum of 92 days. The statutory dates have been varied as follows (all dates exclusive) :—

Eden.—Rods :—In River Eamont and in River Eden above Irthing Foot : 18 Oct.-19 Jan. Nets, &c. :—In Solway below Old Sandsfield : 9 Sept.-11 Feb. Weekly :—In public or common waters below Old Sandsfield : 6 a.m. Saturday and midnight Sunday. Rest of District : 6 a.m. Saturday and noon Monday.

Derwent.—Rods :—14 Nov.-11 Mar. Nets, &c. :—14 Sept.-11 Mar. Weekly :—Noon Saturday and noon Monday.

West Cumberland.—Rods :—13 Nov.-11 Mar. Nets, &c. :—14 Sept.-1 April. Weekly :—Noon Saturday and noon Monday.

Kent, &c.—Rods :—31 Oct.-1 April. Nets, &c. :—14 Sept.-1 April.

Lune.—Rods :—31 Oct.-2 Mar. Nets, &c. :—31 Aug.-1 April.

Ribble.—Rods :—31 Oct.-2 Mar. Nets, &c. :—31 Aug.-2 Mar.

Dee.—Rods :—13 Oct.-1 April. Nets, &c. :—31 Aug.-1 April. Weekly :—Below Old Dee Bridge : Midnight Friday and midnight Sunday. Above Old Dee Bridge : Noon Saturday and noon Monday.

Elwy and Clwyd.—Rods :—31 Oct.-15 April. Nets, &c. :—31 Aug.-1 May.

Conway.—Rods :—31 Oct.-1 Mar. Nets, &c.:—31 Aug.-1 Mar.

Seiont.—Rods :—31 Oct.-2 Mar. Nets, &c. :—31 Aug.-2 Mar.

Dwyfach.—Rods :—14 Nov.-2 Mar. Nets, &c.:—14 Sept.-2 Mar.

Dovey.—Rods : 31 Oct.-1 April. Nets, &c. :—31 Aug.-1 May.

Ayron.—Rods :—31 Oct.-1 Mar. Nets, &c. :—31 Aug.-1 Mar. Weekly :—Noon Saturday and 6 a.m. Monday.

Teify.—Rods :—15 Oct.-1 Feb. Weekly :—In Teify above Cardigan Bridge : Noon Saturday and noon Monday. Rest of District : Noon Saturday and 6 a.m. Monday.

Cleddy.—Rods :—31 Oct.-2 Feb. Nets, &c. :—14 Sept.-16 Mar.

Towy.—Rods :—14 Oct.-2 April. Nets, &c. :—31 Aug.-2 April. Weekly :—6 a.m. Saturday and noon Monday.

Ogmore.—Rods :—14 Nov.-1 May. Nets, &c. :—14 Sept.-1 May.

Taff and Ely.—Rods :—14 Nov.-1 May. Nets, &c. :—30 Aug.-1 May. Weekly :—Noon Saturday and noon Monday.

Rhymney.—Rods :—1 Nov.-2 April. Nets, &c. —31 Aug.-2 April. Weekly : —6 a.m. Saturday and noon Monday.

Usk.—Rods:—1 Nov.–2 Mar. Nets, &c.:—31 Aug.–2 Mar. Weekly:—6 a.m. Saturday and noon Monday.

Wye.—Rods:—25 Oct.–26 Jan. Nets, &c.:—15 Aug.–2 Feb. Putts and Putchers:—15 Aug.–17 April. Weekly:—Midnight Friday and midnight Sunday.

Severn.—Rods:—1 Oct.–2 Feb. Nets, &c.:—Above Tewkesbury Weir: 31 May–2 Feb. Rest of District: 15 Aug.–1 Feb. Putts and Putchers: 15 Aug.–16 April. Weekly:—Except in Severn and tributaries above Ferry landing at Framilode: Noon Saturday and 6 a.m. Monday.

Taw and Torridge.—Rods:—15 Oct.–18 Mar. Nets, &c.:—13 Sept.–17 April. Weekly:—8 a.m. Saturday and 8 a.m. Monday.

Camel.—Rods:—30 Nov.–3 Mar. Nets, &c.:—20 Sept.–5 April.

Fowey.—Rods:—Between Lostwithiel and St. Winnow Point: 30 Nov.–1 May. Rest of District: 30 Nov.–5 April. Nets, &c.:—Below Lostwithiel Bridge: 31 Oct.–5 April.

Tamar and Plym.—Rods:—1 Nov.–2 Mar. Nets, &c.:—31 Aug.–2 Mar.

Avon (Devon).—Rods:—30 Nov.–1 May. Nets, &c.:—In the Erme: 29 Sept.–5 April. Rest of District: 29 Sept.–2 May.

Dart.—Rods:—30 Sept.–1 Feb. Nets, &c.:—16 Aug.–1 Mar.

Teign.—Rods:—31 Oct.–3 Mar. Nets, &c.:—31 Aug.–3 Mar.

Exe.—Rods:—30 Sept.–16 Feb. Nets, &c.:—Above line drawn from Woodbury Road Station through the Perch at Turf to the west bank of the Exe: 17 Aug.–16 April. Rest of District: 17 Aug.–16 Feb.

Axe.—Rods:—30 Sept.–1 Mar. Nets, &c.:—19 Aug.–1 April. Weekly:—Below Bridge at Seaton: Noon Saturday and 6 a.m. Monday. Rest of District: The first hour after sunset on Friday and the last hour before sunrise on Monday.

Frome.—Rods:—31 July–1 Mar. Nets, &c.:—31 July–1 Mar.

Hampshire Rivers.—Rods:—Westward of a line drawn north and south through the Needles: 1 Oct.–1 Feb. In Manor Beaulieu: 30 Oct.–2 Feb. Rest of District: 15 Oct.–1 April. Nets, &c.:—Westward of a line drawn north and south through the Needles: 30 July–1 Feb. Rest of District: 31 Aug.–1 Feb. Weekly:—Except in Wood Mill Pool: Noon Saturday and noon Monday.

Adur.—Rods:—30 Sept.–3 Feb. Nets, &c.:—31 Aug.–3 Feb.

Ouse (Sussex).—Rods:—31 Oct.–2 April. Nets, &c.:—31 Aug.–2 April.

Stour (Kent).—Rods:—1 Nov.–2 May. Nets, &c.:—31 Aug.–2 May.

Yorkshire.—Rods:—15 Nov.–1 Mar.

Esk (Yorks).—Weekly:—Noon Saturday and 6 a.m. Monday.

Tees.—Rods:—1 Nov.–2 Feb. Nets, &c.:—31 Aug.–2 Feb. Weekly:—9 a.m. Saturday and 9 a.m. Monday.

Wear.—Rods:—In Wear and tributaries above Biddick Ford: 31 Oct.–2 Mar. Nets, &c.:—In Wear and tributaries above Biddick Ford: 31 Aug.–2 Mar.

Tyne.—Weekly:—Noon Saturday and 6 a.m. Monday.

Coquet.—Nets, &c.:—14 Sept.–26 Mar. Weekly:—Noon Saturday and 6 a.m. Monday.

No fresh salmon may be sold between 31 Aug. and 1 Feb., except such as come from parts beyond the seas, or as have been taken. If in the United Kingdom, by legal netting. Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1 Feb. and 31 Aug., may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the Kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1 Feb. and 31 Aug., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 31 Aug. and 1 May, unless caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the *onus probandi* lies on the person exporting. In any case, between the dates specified, no salmon may be exported without having first been entered for that purpose. The capture and sale of "unclean" salmon, *i.e.*, salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

SCOTLAND (exclusive of the Esk in Dumfries). The annual close-time must not be less than 168 days. It is, for nets, 27 Aug. to 10 Feb., and, for rods, 1 Nov. to 10 Feb., except as follows:—

Close-time for	Nets.	Rods.
Tay*	21 Aug. to 4 Feb.	16 Oct. to 14 Jan.*
Add, Aray, Eckaig, N. & S. Esk, Fyne, Ruel, Shira	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
Rivers of Bute	ditto	16 Oct. to 15 Feb.
Conon	—	16 Oct. to 25 Jan.
Awe, Beauly, Spey, Dunbeath, Lossie,	—	16 Oct. to 10 Feb.
Brora, Helmsdale, Kyle of Sutherland	—	1 Oct. to 10 Jan.
Halladale, Strathy, Naver, Borgie, Hope, Polla	—	1 Oct. to 11 Jan.
Forss	—	1 Nov. to 24 Feb.
Forth	—	1 Nov. to 31 Jan.
Bervie, Carradale, Fleet, Garnock, Girvan, Howmore, Inner, Iorsa, Irvine, Luce & rivers of Islay, Orkney, Harris, & Uist	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Ythan	ditto	1 Nov. to 10 Feb.
Stinchar	ditto	15 Nov. to 24 Feb.
Annan, Ugie	ditto	16 Nov. to 24 Feb.
Rivers of Shetland	ditto	16 Nov. to 31 Jan.
Nith	ditto	1 Dec. to 24 Feb.
Urr	ditto	30 Nov. to 24 Feb.
Thurso	—	6 Oct. to 20 Jan.
Findhorn	—	11 Oct. to 20 Feb.
Ness	—	16 Oct. to 1 Feb.
Tweed	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

II. TROUT AND CHAR.

Statutory Weekly Close Time.

In ENGLAND AND WALES there is a statutory weekly close-time for trout and char for all instruments other than rod and line between 6 a.m. Saturday and 6 a.m. Monday.

Annual Close Seasons.

In SCOTLAND there is a close-time for trout from 15 Oct. to 28 Feb. For pollen the close-time is from 14 Nov. to 31 Jan.

In ENGLAND AND WALES the capture of trout and char is prohibited between 31 Aug. and 1 Mar. as regards instruments other than rods, and as regards rods between 30 Sept. and 1 Mar., except (1) in the Thames and Lee, where the close season is from 11 Sept. to 31 Mar.; and (2) in the cases noted below, where the close-time has been varied by bye-law by local Fishery Boards. The sale of trout and char is prohibited throughout England and Wales between 31 Aug. and 1 Mar., unless for fish propagation, stocking or re-stocking of waters, or for some scientific purpose :—

A.—MIGRATORY TROUT.

Eden.—Rods :—Except in River Eden above Irthing Foot : 31 Oct.–3 April. Weekly :—In Solway below Old Sandsfield : 6 a.m. Saturday and midnight Sunday. Rest of District : 6 a.m. Saturday and noon Monday.

Derwent.—Rods and Nets, &c. :—14 Sept.–11 Mar.

West Cumberland.—Rods and Nets, &c. :—1 Sept.–11 Mar.

Kent, &c.—Rods and Nets, &c. :—In River Duddon and tributaries above Foxfield Viaduct : 1 Oct.–2 April. In River Bela and tributaries : 15 Sept.–16 Feb. Rest of District : 1 Oct.–4 Mar.

Lune.—Rods :—31 Oct.–3 April.

Ribble.—Rods :—31 Oct.–3 April. Nets, &c. :—31 Aug.–1 April.

Dee.—Rods and Nets, &c. :—Bala Lake : 13 Sept.–15 Jan. Rest of District : 13 Oct.–15 Feb.

Elwy and Clwyd.—Rods :—31 Oct.–15 April. Nets, &c. :—31 Aug.–1 May.

Conway.—Rods :—30 Oct.–2 April.

Seiont.—Rods and Nets, &c. :—In Co. Carnarvon : 21 Sept.–22 Feb. In Co. Anglesey : 21 Sept.–14 Feb.

Dovey.—Rods :—31 Oct.–1 May. Nets, &c. :—31 Aug.–1 May.

Teify.—Nets, &c. :—30 Sept.–1 Mar. Weekly :—In River Teify, above Cardigan Bridge : Noon Saturday and noon Monday. Rest of District : Noon Saturday and 6 a.m. Monday.

Cleddy.—Rods and Nets, &c. :—28 Sept.–2 Mar.

Towy.—Rods :—14 Oct.–2 April. Nets, &c. :—31 Aug.–2 April. Weekly :—6 a.m. Saturday and noon Monday.

Ogmore.—Rods and Nets, &c. :—29 Sept.–1 Mar.

Taff and Ely.—Rods and Nets, &c. :—19 Sept.–2 Feb.

Rhymney.—Rods and Nets, &c. :—1 Oct.–2 Mar.

Usk.—Rods and Nets, &c. :—In the Cray, Pantyr-eos and Ynis-y-fro Reservoirs and the Glyn Ponds : 1 Oct.–15 Mar. Rest of District : 15 Sept.–15 Feb.

Wye.—Rods and Nets, &c. :—1 Oct.–15 Feb.

Severn.—Rods and Nets, &c. :—In River Severn and tributaries above confluence with Borle Brook and in River Teme and tributaries above Tenbury Wells Bridge : 15 Sept.–2 Mar. Rest of District : 30 Sept.–2 April.

Avon, Brue, &c.—Rods and Nets, &c. :—1 Oct.–1 Mar. or 29 Feb.

Taw and Torridge.—Nets, &c. :—30 Sept.–2 Mar. Weekly :—8 a.m. Saturday and 8 a.m. Monday.

Camel.—Rods :—31 Oct.–3 April. Nets, &c. :—31 Aug.–5 April.

Fowey.—Rods :—Between Lostwithiel Bridge and St. Winnow Point : 31 Oct.–1 May. Rest of District : 31 Oct.–5 April. Nets, &c. :—31 Aug.–5 April.

Tamar and Plym.—Rods :—31 Oct.–3 April. Nets, &c. :—31 Aug.–2 April.

Avon (Devon).—Nets, &c. :—30 Sept.–1 Mar.

Dart.—Nets, &c. :—16 Aug.–1 Mar.

Teign.—Rods :—30 Sept.–3 Mar. Nets, &c. :—31 Aug.–3 Mar.

Exe.—Rods and Nets, &c. :—14 Sept.–1 Mar.

Axe.—Nets, &c. :—19 Aug.–1 April. Weekly :—Below Bridge at Seaton : Noon Saturday and 6 a.m. Monday. Rest of District : The first hour after sunset on Friday and the last hour before sunrise on Monday morning.

Frome.—Rods and Nets, &c. :—30 Sept.–1 April.

Hampshire Rivers.—Rods and Nets, &c. :—In Avon and tributaries above Bickton Mill : 14 Oct.–16 April.

Adur.—Rods and Nets, &c. :—30 Sept.–1 April.

Cuckmere.—Rods and Nets, &c. :—30 Sept.–1 April.

Rother.—Rods :—30 Sept.–1 April.

Suffolk and Essex.—Rods and Nets, &c. :—1 Oct.–11 April.

Norfolk.—Nets, &c. :—30 Sept.–1 Mar.

Ouse and Nene.—Rods :—30 Sept.–1 April. Nets, &c. :—31 Aug.–1 April.

Trent.—Rods and Nets, &c. :—1 Oct.–16 Mar.

Esk (Yorks).—Rods :—31 Oct.–3 April. Nets, &c. :—30 Sept.–16 Mar. Weekly :—Noon Saturday and 6 a.m. Monday.

Tees.—Rods and Nets, &c. :—30 Sept.–16 Mar.

Wear.—Rods :—30 Sept.–2 Mar. Nets, &c. :—31 Aug.–2 Mar.

Tyne.—Rods :—31 Oct.–3 April. Weekly :—Noon Saturday and 6 a.m. Monday.

Coquet.—Rods :—30 Oct.–4 April. Weekly :—Noon Saturday and 6 a.m. Monday.

B.—TROUT (EXCLUSIVE OF MIGRATORY TROUT).

Eden.—Weekly :—In Solway below Old Sandsfield : 6 a.m. Saturday and midnight Sunday. Rest of District : 6 a.m. Saturday and noon Monday.

Derwent.—Rods and Nets, &c. :—14 Sept.–11 Mar.

West Cumberland.—Rods and Nets, &c. :—1 Sept.–11 Mar.

Kent, &c.—Rods and Nets, &c. :—In River Duddon and tributaries above Foxfield Viaduct : 1 Oct.–2 April. In River Bela and tributaries : 15 Sept.–16 Feb. Rest of District : 1 Oct.–4 Mar.

Dee.—Rods and Nets, &c. :—In Bala Lake : 13 Sept.–15 Jan. Rest of District : 13 Oct.–15 Feb.

Seiont.—Rods and Nets, &c. :—In Co. Carnarvon : 21 Sept.–22 Feb. In Co. Anglesey : 21 Sept.–14 Feb.

Dovey.—Rods : 30 Sept.–3 Mar.

Teify.—Nets, &c. :—30 Sept.–1 Mar. Weekly :—In River Tiefy, above Cardigan Bridge : Noon Saturday and noon Monday. Rest of District : Noon Saturday and 6 a.m. Monday.

Cleddy.—Rods and Nets, &c. :—28 Sept.–2 Mar.

Towy.—Weekly :—6 a.m. Saturday and noon Monday.

Ogmore.—Rods and Nets, &c. : 29 Sept.–1 Mar.

Taff and Ely.—Rods and Nets, &c.: 19 Sept.–2 Feb.

Rhymney.—Rods and Nets, &c.:—1 Oct.–2 Mar.

Usk.—Rods and Nets, &c.: In the Cray, Pant-yr-eos and Ynis-y-fro Reservoirs and the Glyn Ponds: 1 Oct.–15 Mar. Rest of District: 15 Sept.–15 Feb.

Wye.—Rods and Nets, &c.:—1 Oct.–15 Feb.

Severn.—Rods and Nets, &c.:—In River Severn and tributaries above confluence with Borle Brook and in River Teme and tributaries above Tenbury Wells Bridge: 15 Sept.–2 Mar. Rest of District: 33 Sept.–2 April.

Avon, Brue, &c.—Rods and Nets, &c.:—1 Oct.–1 Mar. or 29 Feb.

Taw and Torridge.—Nets, &c.:—30 Sept.–1 Mar.

Camel.—Rods and Nets, &c.:—30 Sept.–16 Mar.

Fowey.—Rods and Nets, &c.:—Between Lostwithiel Bridge and St. Winnow Point: 30 Sept.–1 May. Rest of District: 30 Sept.–16 Mar.

Tamar and Plym.—Rods and Nets, &c.:—1 Oct.–2 Mar.

Avon (Devon).—Nets, &c.:—30 Sept.–1 Mar.

Teign.—Rods and Nets, &c.:—30 Sept.–3 Mar.

Exe.—Rods and Nets, &c.:—14 Sept.–1 Mar.

Axe.—Weekly:—Below Bridge at Seaton: Noon Saturday and 6 a.m. Monday. Rest of District: The first hour after sunset on Friday and the last hour before sunrise on Monday morning.

Frome.—Rods and Nets, &c.:—30 Sept.–1 April.

Hampshire Rivers.—Rods and Nets, &c.:—In Avon and tributaries above Bickton Mill: 14 Oct.–16 April.

Adur.—Rods and Nets, &c.:—30 Sept.–1 April.

Cuckmere.—Rods and Nets, &c.:—30 Sept.–1 April.

Rother.—Rods:—30 Sept.–1 April.

Suffolk and Essex.—Rods and Nets, &c.:—1 Oct.–11 April.

Norfolk.—Nets, &c.:—30 Sept.–1 Mar.

Ouse and Nene.—Rods:—30 Sept.–1 April. Nets, &c.:—31 Aug.–1 April.

Trent.—Rods and Nets, &c.:—1 Oct.–16 Mar.

Yorkshire.—Rods:—30 Sept. 15 Mar.

Esk (Yorks).—Rods and Nets, &c.:—30 Sept.–16 Mar. Weekly:—Noon Saturday and 6 a.m. Monday.

Tees.—Rods and Nets, &c.:—30 Sept.–16 Mar.

Wear.—Rods:—30 Sept.–2 Mar. Nets, &c.:—31 Aug.–2 Mar.

Tyne.—Rods and Nets, &c.:—30 Sept.–22 Mar. Weekly:—Noon Saturday and 6 a.m. Monday.

Coquet.—Rods:—31 Oct.–4 Mar. Weekly:—Noon Saturday and 6 a.m. Monday

III. FRESHWATER FISH.

The Salmon and Freshwater Fisheries Act, 1923, imposes a close-time for catching, selling or buying "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than salmon, trout, and char, which live in fresh water, except those kinds which migrate to or from tidal waters and eels and the fry of eels) from 15 March to 15 June, both inclusive, for England and Wales. The close-season, however, does not apply to eels taken otherwise than by angling; or to freshwater fish taken in certain private waters by leave of the owner; or to taking fish in certain cases for bait or for scientific purposes. The Axe, Avon (Devon), Wye, Eden, and Towy districts have been exempted from this close-time; also the Kent and Bela and Severn as regards pike; the Usk as regards eels; and parts of the Severn as regards fish other than grayling. For eels a separate close-time exists (so far as regards fixed engines in salmon rivers) in England from 1 Jan. to 24 June; in Ireland, with one or two exceptions, from 11 Jan. to 30 June. In the Severn, elvers, or eel fry, are protected from 31 Dec. to 1 March and from 25 April to 25 June both inclusive.

IV. CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4½ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye-laws of Sea Fisheries Committees (*vide infra*), the minimum size of lobsters and crabs that may be lawfully taken in different parts of the territorial seas has been increased, and in some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

V. OYSTERS.

There are also local regulations for the protection of oysters; and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close-time for the capture and sale of "Deep-Sea Oysters" is fixed for England and Scotland, from 15 June to 4 Aug.; and for all other kinds of oysters—except oysters taken in the waters of a foreign State—from 14 May to 4 Aug. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from 16 June to 31 Aug. in the English Channel between lines drawn (1) from North Foreland to Dunkirk, and (2) from Land's End to Ushant—the territorial seas of England and France being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1 May to 31 Aug., remains in force so far as French fishermen are concerned. But both Powers agreed by a Declaration signed in 1923 to suspend the close season till 16 June in each year.

FISHING LICENCES.

In all fishery districts in England and Wales, and in Ireland, a licence to fish for salmon is necessary, and in most English and Welsh rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In certain districts (*e.g.*, the Lune, Derwent, Severn, Wye, Trent, Yorkshire, and Norfolk) licences for "freshwater fish" are in force. No licence is required for Thames trout or general fish. In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued. The rates on salmon nets and other like instruments range from £30 downwards in England and Wales. The rate on draft nets in England and Wales varies from £7 10s. to £2. In England and Wales different rates are charged in different districts for a salmon rod and line, and as the rates vary considerably application should be made to the Clerk of the local Fishery Board (for addresses *see* next page) for particulars of the existing rates.

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon, trout, and freshwater fish is placed by the Salmon and Freshwater Fisheries Act, 1923, and the Ministry of Agriculture and Fisheries Acts, 1889 to 1919, in the hands of local boards, with the Ministry of Agriculture and Fisheries as the central authority.

NAME OF DISTRICT.	COAST LIMITS OF DISTRICT.	ADDRESS OF CLERK.
†Eden	Sark Foot to Seaton	F. W. Soal, Carlisle.
*Derwent	Seaton to St. Bees Head	J. E. Musgrave, Cockermouth.
West Cumberland	St. Bees Head to Haverigg Point	J. F. Baxter, Whitehaven.
*Kent and Bela	Haverigg Point to Warton	Messrs. Hart, Jackson & Son, Ulver-
*Lune	Warton to Blackpool	J. T. Sanderson, Lancaster. [ston.
*Ribble	Blackpool to Formby Point	T. Reveley, Preston.
*Dee	New Brighton to near Meliden Church	Henry Jolliffe, Chester.
Elwy and Clwyd	Meliden Church to Rhos Bay	F. W. Grimsley, St. Asaph.
*Conway	Rhos Bay to R. Aber	C. T. Allard, Llanrwst.
†Seiont	(Garth Point to Llanaelhaiarn Point, and to Twyn y Parc Point, in Anglesey...)	O. J. Williams, Caernarvon.
Dwyfach	Llanelhaiarn Point to Criccieth	David Jones, Portmadoc.
Dovey	Criccieth to Cynvelin	J. Jones Williams, Dolgelly.
Ayron	Carreg Tipog to New Quay Head	R. C. Evans, Aberayron.
Teify	New Quay Head to Dinas Head	J. Angus, Ponttwelly, Llandyssul.
†Cleddy	Dinas Head to St. Goven's Head	R. T. P. Williams, Haverfordwest.
*Towy, Loughor, & Taf	St. Goven's Head to Worm's Head	C. H. M. Griffiths, Carmarthen.
Ogmore and Ewenny	Porthcawl to Cold Knap	S. H. Stockwood, Bridgend.
Taff and Ely	Cold Knap to Bute Dock	A. Waldron, Cardiff.
Rhymney	Bute Dock to Ty ton y Pill	Horace Lyne, Newport (Mon.).
*Usk	Ty ton y Pill to Collister Pill	
*Wye	Collister Pill to Cone Pill	Major Phillips, D.S.O., Hereford
*Severn	Cone Pill to Avon Battery	J. Stallard, Worcester
Avon, Brue & Parret	Avon Battery to County Boundary	D. S. Watson, Bridgwater.
*Taw and Torridge	North Coast of Devon	R. E. C. Balsdon, Barnstaple.
Camel	West Boundary of Devon to Peel Point	O. Clayton, Wadebridge.
Fowey	Peel Point to Rame Head	R. Pease, Lostwithiel.
Tamar and Plym	Rame Head to Stoke Point	W. W. Mathews, Tavistock.
Avon (Devon)	Stoke Point to Start Point	W. Beer, Kingsbridge.

Rother	Fairlight to Dungeness	T. L. Smith, Rye.
†Stour (Kent)	North to South Foreland	—
Suffolk and Essex	Dovercourt Light to Covehithe Coastgd. Sn.	B. C. Roe, Ipswich.
†Norfolk	Covehithe to Happisburgh	A. J. Rudd, Norwich.
†Ouse and Nene	W. Boundy. of Norfolk to Lapwater Hall	—
†Welland	Lapwater Hall to Western Point	—
Witham	Western Point to Gibraltar	C. H. Adcock, Boston.
Trent	Ingoldmell's Point to Trent Falls	F. H. Heald, Nottingham.
Yorkshire	Trent Falls to Hayburn Wyke	W. Puckering, Nat. Prov. Bk. Ch'b'rs,
Esk (Yorkshire)	Hayburn Wyke to Skinningrove Beck	C. E. Brown, Whitby. [York.
Tees	Skinningrove Beck to Hardwick Hall	Albert W. Smith, Darlington.
Wear	Hardwick Hall to Souter Point	W. E. Raine, Sunderland.
Tyne	Souter Point to Newbiggin Point	J. A. Williamson, Newc'stle-on-Tyne.
Coquet	Newbiggin Point to Hawick Burn	H. J. Percy, Alnwick.

Districts may be formed or altered and Fishing Boards appointed or abolished, and the following districts have been formed, including generally all rivers running into the sea between the points named. Except in the cases marked † they also include the sea for three miles from the shore, or to the mid-channel in estuaries.

These Fishery Boards consist mainly of three classes of members—those appointed annually by the Councils of the various counties through which the rivers flow; *ex-officio* members qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by persons who have paid licence duty on instruments other than rod and line for salmon fishing in public waters. There are also members representative of anglers for fish other than salmon. Districts where Provisional Orders are in force are marked thus *.

There are also certain bodies created by local statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Port of London Authority, Lee Conservancy Board, and Conservators of the Medway.

The above-mentioned Boards have power to make bye-laws for the regulation of the fisheries for salmon, trout and freshwater fish. They are also empowered to issue licences for fishing for

salmon, trout, and in some cases freshwater fish generally.

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 24 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Acts, 1888 to 1894, the Ministry of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales, and to constitute local Fisheries Committees, either for a single county or borough, or for several jointly. These Committees have power to make bye-laws, to be confirmed by the Ministry of Agriculture and Fisheries, regulating or prohibiting the use of instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the adjoining coast and territorial seas between the points respectively mentioned:—
1. Cumberland (Sark Foot to Haveriggs Point).
2. Lancashire and Western (Haveriggs Point to Cemmaes Head). 3. South Wales (Cemmaes Head to a line drawn through Flatholm). 4. Cornwall (Northern boundary of Cornwall to Rame Head). 5. Devon (Northern Section: Eastern boundary to Western boundary of Devon. Southern Section: Rame Head to Eastern boundary of Devon). 6. Southern (Western boundary of Dorset to Hayling Island). 7. Sussex (Hayling Island to Dungeness). 8. Kent and Essex (Dungeness to Dovercourt). 9. Eastern (Southern boundary of Norfolk to Donna Nook Beacon). 10. North-Eastern (Donna Nook Beacon to River Tyne). 11. Northumberland (the River Tyne to the boundary between England and Scotland).

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

SEASONABLE AND UNSEASONABLE FISH.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *e* signifies that it is "close-time" as fixed by statute.

(*a*) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(*b*) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(*d*) In the close season, salmon from Holland, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(*e*) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

Staghounds:—England, 9 packs (222 couples); Ireland, 1 pack (35 couples).
Foxhounds:—England and Wales, 182 packs (about 5,000 couples); Scotland, 20 packs (343 couples); Ireland, 8 packs (102 couples).
Harriers:—England and Wales, 47 packs (700 couples); Ireland, 7 packs (133 couples).
Beagles:—England and Wales, 60 packs (600 couples); Scotland and Ireland, 5 packs (44 couples).

LETTERPRESS PRINTING.

NO other trade or craft holds so high and honourable a position as that attained by printing in modern times. No other power is comparable to that of the printed word.

And no other name stands for sounder reputation and more solid achievement in the annals of British printing than that of Clowes.

The house of William Clowes & Sons was founded in 1803 by a young man, William Clowes, who was just out of his apprenticeship. He came from Chichester, but decided to make his adventure in London, and accordingly opened up on his own account in Villiers Street, Strand, with a capital of £360.

From the first the business was progressively successful. The just enough of type for one day's work, which compelled him at the beginning to run off on the hand press at night what he had set during the day, so as to release the type for further service, was very speedily multiplied. His single press and one journeyman printer as assistant were soon inadequate to the requirements of a rapidly growing business.

Before very long, larger premises in Northumberland Court, Charing Cross, were taken. The work turned out—small jobbing orders at the outset—came to include the printing of Government papers and of books and periodicals for such publishers as John Murray, Longmans, and the Religious Tract Society, for which the firm still print to this day.

The printing of newspapers by steam presses was introduced into the *Times* office in 1814. William Clowes & Sons were the first to adopt steam-driven machines for book and general printing. This new departure created a sensation, and a succession of distinguished visitors came to Northumberland Court to see the new mechanical wonder.

It was this first steam press that caused William Clowes to move to Blackfriars—for the Duke of Northumberland objected to its proximity—where in Duke Street, Stamford Street, he established himself at an address which is still the headquarters of this firm, though the premises occupied have of course multiplied and extended themselves amazingly since then.

Twenty years after its modest foundation the printing works of William Clowes had become one of the sights of London to all interested in industrial organisation. They even furnished material for a long and laudatory article in the exclusive *Quarterly Review*.

William Clowes & Sons were entrusted with the printing of the famous Mulready envelopes under the strict supervision of the Post Office.

In going through old files of the firm's correspondence there are many letters from Charles Dickens, whose novels were printed for Messrs. Chapman & Hall by Clowes & Sons. When any of his books were in course of publication (and it may be recalled they were issued in fortnightly and monthly parts), Dickens visited and spent long days at the Duke Street printing works correcting his stories in proof.

When the Great Exhibition of 1851 was being organised, Messrs. Clowes were approached by the Commission to undertake the printing of catalogues and all other matter. The task was a tremendous one, involving as it did the printing of volumes of no fewer than 5,000 pages. It was necessary that the whole matter should be standing in type at the same time—a strain on their resources of type which few firms could withstand even to-day.

Besides the Great Exhibition, Messrs. Clowes carried out the printing in connection with all the South Kensington Exhibitions.

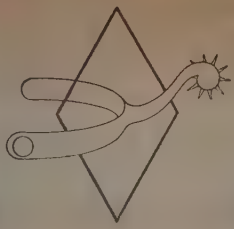
When members of the legal profession—both barristers and solicitors—were extremely dissatisfied with the manner in which proceedings in Court were reported, the lawyers formed a committee with the object of providing their own reports, and Mr. George Clowes, of William Clowes & Sons, was consulted. When the project seemed unable to be carried on through lack of capital, the firm offered to finance the publication to the extent of £10,000. The offer was accepted, and from the issue of the first volume the accuracy of the reports and excellence of printing assured the success of the scheme. Perhaps, however, the largest undertaking of all was the printing of the British Museum Catalogue, which took twenty-seven years to do, and was full of foreign type.

As long ago as 1873 the firm had so outgrown its premises in Duke Street (in spite of the fact that neighbouring warehouses were being rented for storing paper and printed sheets), that a branch works was established at Beccles, Suffolk. Equipped with the latest type of electrically-driven machinery, this now constitutes one of the largest book-printing establishments in Great Britain.

The relief of pressure on the London works was only temporary, and increasing business necessitated, in 1897, the renting of additional land at Duke Street, where another building was erected. On the expiry of the lease of the original premises in Northumberland Court, this branch of the firm was transferred to more commodious premises in Great Windmill Street, Piccadilly Circus, where the smaller orders from West End customers are executed.

In combination with its capacity to print in any language, the firm has proved itself of incalculable advantage to British merchants and manufacturers by enabling them to translate and produce catalogues, labels, price lists, etc., for any country.

Long ago as they were established, Clowes have never allowed themselves to become old-fashioned in ideas or equipment. They have always been among the first to utilise the intermittent stream of new mechanical and other devices that have from time to time revolutionised print-craft on its technical side; and to-day as modern printers their several establishments stand second to none.



North *South* *East* *West*

All the World over—

IN whatever corner of the earth your market may be, whatever may be the language of its people, we can produce effective printing for you in the language of that Country.

There is no language in the entire world in which we have not printed in moveable type.

No organisation in the world can equal our service in this direction.

If you require advice on your printing, write to us about it.

Mr. C. E. Brooks, inventor of the Appliance. Mr. Brooks cured himself of rupture over 30 years ago and patented the Appliance from his personal experience.

Don't Wear a Truss!

After 30 Years' Experience an Appliance has been invented for Men, Women, and Children, that Cures Rupture.

Sent on Trial.

If you have tried almost everything else, come to us. Where others fail is where we have our greatest success. Send attached coupon to-day and we will send you free our illustrated book on Rupture and its Cure, showing the Appliance, giving you prices and names of many people who have tried it and are extremely grateful. It is instant relief where all others fail. Remember, we use no salves, no harness, no lies.

We make it to your measure and send it to you on a strict guarantee of satisfaction or money refunded, and we have put our price so low that anybody, rich or poor, can buy it.

We send it on trial to prove that what we say is true. You are the judge, and once having seen our illustrated book and read it, you will be as enthusiastic as the thousands of patients whose letters are on the file in our office. Fill in the Free Coupon opposite and post to-day.

Free Information Coupon.

CONTENTS:

A Complete Alphabetical List of Towns and Cities with name of School, Etc., Etc.

Fully illustrated announcements by the Schools setting out Special Features, Local Conditions, Curriculum, Fees, Etc., Etc.

From all Booksellers and Newsagents.

Publishers:
J. WHITAKER & SONS, LTD., 12, Warwick Lane, London, E.C.4.

PUBLIC SCHOOLS' SCHOLARSHIPS.

BRADFIELD COLLEGE.

An Examination for Entrance Scholarships and Exhibitions (Three £100, four £50, six £40, one £30), will be held on May 24th and 25th. Particulars can be obtained from the SECRETARY, BRADFIELD COLLEGE, BERKS.

KING'S SCHOOL, CANTERBURY.

Scholarships are offered for competition twice annually, in June and November. A King's Scholarship is tenable with an Entrance Scholarship, so that a boy may at entrance win scholarships to the value of £55 15s. a year for five years. Full information from HEAD MASTER, KING'S SCHOOL, CANTERBURY.

DOVER COLLEGE.

Three Entrance Scholarships for Boarders are awarded in June, value £70, £50, and £30, one of each. Candidates must be under 14 on 1st January preceding. The examination can be taken at the Preparatory School under guarantee. For further particulars apply to the Head Master.

EXETER SCHOOL, EXETER.

Entrance Scholarship Examination June 30th and July 1st, 1927. Four Scholarships, £40-10, may be offered, and one Honour Scholarship of £40 for the Sons of Officers who have fallen in the War. University Endowment, £600 a year. Apply to THE HEAD MASTER, EXETER SCHOOL, EXETER.

UPPINGHAM.

An Examination will be held in May or June, 1927, for about Eight Open Scholarships, varying from £85 to £30 per annum. Allowance is made for age, but a candidate must be under 14 on May 1st, 1927. Apply to THE BURSAR, OLD SCHOOL HOUSE, UPPINGHAM.

KING'S COLLEGE SCHOOL, WIMBLEDON COMMON, S.W.

An Examination is held in June. Candidates for Senior Scholarships must be under 16, and for Junior Scholarships under 14, on May 1st. The value of the Scholarships depends upon the Standard attained, but never exceeds the amount of Tuition Fees (£39 per annum). See "Public Schools' Year Book."

EDUCATION.

MESSRS. GABBITAS, THRING & CO.,

36, Sackville Street, Piccadilly, W., Tel. 5878 Regent (2 lines).

have a department specially organised for **advising** Parents and Guardians as to the best **Educational Establishments** for **Boys** and **Girls** in the United Kingdom or on the Continent. The Firm have had experience as Educational Agents for over fifty years, and during their long career have been instrumental in sending Masters and Tutors to the leading Schools and Tutors' Establishments, and are in the closest touch with all educational matters. They can give, FREE OF CHARGE, to the Parent or Guardian information and advice as to—

SCHOOLS FOR BOYS OR GIRLS. TUTORS' ESTABLISHMENTS. EDUCATIONAL HOMES. DOMESTIC ECONOMY, AGRICULTURAL AND SECRETARIAL COLLEGES.

EITHER AT HOME OR ABROAD.

To enable the Firm to advise efficiently it is necessary that *full particulars should be given*, especially as to the age of the Pupil, previous education, and present standard of attainments, special subjects of study, locality, whether a large or small establishment is preferred, and the fees it is intended to pay.

The Firm also can assist in procuring the services of Private Tutors and Governesses, Resident, Travelling, Non-Resident, or Visiting, of whom they always have a large number on their Lists.

Transfers of and **Partnerships** in **Boys'** and **Girls'** Schools are also negotiated. Masters, Tutors, and Governesses seeking Posts can have a Prospectus on application, free of charge.

WHITAKER'S LIST OF SCHOOLS AND CLIMATES

METROPOLITAN SECTION.

ST. GEORGE'S COLLEGE, Red Lion Square, W.C. 1.

Previously known as—

THE CIVIL SERVICE DEPARTMENT OF KING'S COLLEGE, LONDON.

Founded by the late Mr. W. BRAGINTON, M.A., F.K.C.

A link between the Schools and the Civil Service or Business Life. Day and Evening Classes for Civil Service Examinations and for Secretarial Work for Women and Girls. Correspondence Classes for all Male and Female Civil Service Examinations. Hostels in London available.

For Prospectus and List of Successes, address—

MISS BRAGINTON, M.A., ST. GEORGE'S COLLEGE, RED LION SQUARE, W.C. 1.

DULWICH, S.E.,

Is one of the most attractive residential suburbs of London, for although only 12 miles from the City, it is still an old-world village, with charming walks and drives. Southern Railway.

GIRLS. **BEDFORD COLLEGE**

OF DANCING AND PHYSICAL CULTURE

5, KINGSWOOD ROAD, Dulwich, S.E. 19.

Principal - Miss MILDRED BULT.

Premises.—Detached, in own grounds.

Thorough training for the profession of Teachers of Dancing.

Music, Art, Literature, Gymnastics, Fencing and Dramatic Art.

Entire charge where Parents abroad.

Prospectus and fees on application.

LONDON, W.

London possesses excellent health statistics and has the lowest death-rate of all the great capitals. The public parks rival those of all other cities. *Accessible* to all the national educational institutions.

GIRLS.

QUEEN'S COLLEGE, LONDON.

Patron: HER MAJESTY THE QUEEN.

Visitor: THE LORD BISHOP OF LONDON.

Principal: JOSEPH EDWARDS, M.A.

Courses of Lectures are provided for advanced students and a general education for younger girls. Students are prepared for Public Examinations and for the Pre-Medical Examination of the Conjoint Board in Chemistry and Physics. There is a one year's training in household management and in secretarial work. Particulars of College, Preparatory School and Residence from the Principal, 43-47, Harley Street, W.1.

METROPOLITAN SECTION.

HOLLAND PARK, W.

London possesses excellent health statistics and has the lowest death-rate of all the great capitals. The public parks rival those of all other cities. The educational advantages obtainable are easily accessible from Holland Park.

BOYS.

LINTON HOUSE SCHOOL.

(*Established 1877.*)

Head Master - DIGBY CUTCLIFFE.

Premises.—Head Master's House has accommodation for a limited number of boarders and stands apart from the school.

Small classes. Individual attention.

Preparation for Public School Scholarship and Entrance Examinations and for Royal Naval College, Dartmouth. Many successes.

Cricket, Football, Boxing, Rifle Shooting, Swimming.

Entire charge where Parents are abroad.

Fees.—Boarders, 120 to 135 guineas; Day Pupils, 40 to 45 guineas per annum.

STREATHAM, S.E.

The Medical Officer of Health writes: "Easily reached from London (8 miles), with all characteristics of a large, good-class, healthy residential suburb. The Common affords a grand elevated expanse of open ground."

BOYS.

BELMONT COLLEGE,

STREATHAM HILL, S.W.2.

BOARDING AND DAY SCHOOL FOR BOYS.

Principal - W. ADDISON, M.A., B.Sc.

Aim.—Healthy development of faculties and formation of character, cramming avoided.

Curriculum.—Includes Scripture, usual English subjects, Latin, French, Mathematics, Mechanics, Chemistry and Drawing.

Preparation for London University Matriculation, Oxford and Cambridge Local and similar examinations.

Games carefully supervised.

Entire charge where Parents abroad.

Fees.—£30 per term.

CHARING CROSS HOSPITAL MEDICAL SCHOOL

(UNIVERSITY OF LONDON).

OPEN TO MEN AND WOMEN STUDENTS.

The most central of all the University Schools, immediately accessible by Train, Tram, Tube, and Bus.

Courses of Study arranged to meet the requirements of all the Examining Bodies.

Low Inclusive Fees.

For Prospectus and full information apply personally or by letter to the Dean—

W. J. FENTON, M.D., F.R.C.P.,

Charing Cross Hospital Medical School, London, W.C. 2.

PROVINCIAL SECTION.

ASHBURTON.

The Medical Officer of Health writes:—"Ashburton is 300 feet above sea-level and has an excellent water-supply. The drainage is satisfactory. The climate is healthy, and its proximity to Dartmoor renders it more bracing than most parts of South Devon."

BOYS AND GIRLS.

THE GRAMMAR SCHOOL,

ASHBURTON, SOUTH DEVON.

(Founded 1314.) Close to DARTMOOR.

Head Master: HENRY NAYLOR, M.A.

(Queen's Coll., Camb.)

Premises.—300 feet above sea-level. Chemical and Physical Laboratories, Workshops, Domestic Science Room, Gymnasium. Senior and Junior Boarding Houses. Girls' Boarding House. 8 acres of playing fields.

Preparation for various professions and occupations, Civil Service and Universities. Scholarships and Exhibitions. Organised Games.

Entire charge where Parents abroad.

Fees.—£16 15s. to £18 10s. per term.

ASHTEAD.

A healthy elevated Surrey village and rural residential district between Epsom and Leatherhead, 16 miles from London. Ashtead Woods, once a Saxon forest, are common lands. Surroundings are similar to Leatherhead, 2 miles.

GIRLS.

PARSONS MEAD.

Principal - Miss ELLISTON.

Premises.—Three houses in beautiful grounds with orchard, playing field and tennis courts.

Physical Training and well-being of pupils of primary importance. Over-pressure avoided. Music, Art and Languages special features. Individual character and abilities carefully studied. Illustrated lectures.

Literary and Debating, Choral and Dramatic Societies run by the pupils.

Physical training and games under resident mistress.

Entire charge where Parents abroad.

Fees.—45 guineas per term.

ASHFORD

(Kent). **The Medical Officer of Health writes:**—"A market town with large cattle market, situated in East Kent, on River Stour, 14 miles S.W. of Canterbury and 54 miles from London, Southern Railway. The weekly market for stock and corn dates from Edward I. About 200 feet above sea-level. The subsoil consists of the greensand. The climate is bracing. Drainage modern, water-supply pure and constant. Open-air swimming bath. General and zymotic death-rates low." Golf, 18 holes. To the lover of natural history Ashford offers a rich and varied field. Pop. 14,355.

GIRLS. **HIGH SCHOOL FOR GIRLS.**

Principals { **Mrs. EDWARDS, B.A. (Lond.).**
Miss BRAKE, A.C.P., O.H.L.

Recognised by the Board of Education as an Efficient Private Secondary School.

Buildings.—Spacious Tudor Residences. Modern sanitation. Charming old-world gardens. Lawns and playing fields 24 acres in extent. Gymnasium. *Aim.*—To provide on Public School lines thoroughly efficient education in cultured Christian atmosphere.

School Course includes preparation for University Examinations and Scholarships, Drawing, Class Singing, Drill, Needlework, Organised Games, Dancing, and Singing. Preparatory House for little girls under 11.

Fees.—25 to 31 guineas per term.

GIRLS.

FAIRVIEW.

Principal - Miss BAILEY, L.L.A. (Registered).

(Assisted by certificated English and Foreign Governesses and Visiting Professors.)

Receives a limited number of pupils for thorough instruction in the usual branches of a High-Class Modern Education. Individual Care. Home Comforts. Every effort made to secure religious, mental, and physical well-being of the girls.

Entire charge taken.

Swedish Drill, Hockey, Cricket, Tennis, Riding, Cycling.

Fees Moderate and Inclusive.

BOYS. **OAKWOOD.**

PREPARATORY FOR PUBLIC SCHOOLS AND ROYAL NAVY.

Head Master—

J. BOYD ROBERTSON, B.A. (Hons.) (Oxon.)

Premises situate on outskirts of Ashford on gravel soil 200 feet above sea-level.

Aim.—To prepare boys to hold their own in every way in the larger life of a Public School, and to render them physically fit, morally sound, and intellectually alert.

Domestic arrangements under personal supervision of Mrs. Robertson.

Entire charge where Parents abroad.

Fees.—30 to 33 guineas per term.

BARNSTAPLE.

Barnstaple, situated on the Taw, is noted for its mild and equable climate. It is exposed to the sea breezes from the W. Has a rainfall below the average. There are no fogs, and the winters are particularly mild.

BOYS.

WEST BUCKLAND SCHOOL,

BARNSTAPLE.

Head Master - Rev. E. C. HARRIES, M.A.

A Public School for Professional and Middle-Class People. Fees.—£66 per annum.

Aim.—To prepare Boys for Professional and Commercial careers. Many recent successes for Army entrance. *Situation.*—Entirely rural, elevation 650 feet. Most healthy. *Building.*—Suitably adapted for 180 Boys (Boarders). *Athletics.*—Encouraged. 30 acres. Officers Training Corps. *India and Colonies.*—Boys met. Entire charge undertaken.

Entrance Scholarships awarded for September Term.

BECKENHAM.

Population, 33,350. Southern Rly. One of the select residential and rural suburbs within 8 miles of London. There are excellent social and educational advantages, and the low death-rate testifies to the healthiness of the district.

BOYS. (*Founded* 1866.)

THE ABBEY SCHOOL.

(PREPARATORY.)

C. K. THOMPSON, M.C., M.A.

Winchester and Christ Church, Oxford.

Prepares boys for the leading Public Schools and the Royal Navy.

Premises specially designed for school purposes and constructed in extensive grounds (26 acres). Climate very healthy, especially suited for young boys. Excellent drainage, central heating. The School has a first-class record for conduct, health, work, and games.

Colonial Boys are welcomed and taken entire charge of.

Fees.—40 guineas per term.

BEVERLEY.

The Medical Officer of Health writes:—"Beverley is situated at the foot of the elevated country known as the Wolds of the East Riding. The rainfall is very low, averaging 22 inches per annum. The common of over 600 acres is its greatest asset for healthy recreation." Pop. 13,469.

GIRLS.

BEVERLEY HIGH SCHOOL FOR GIRLS,

BEVERLEY, YORKS.

Head Mistress - Miss G. M. ROSSITER, B.A.

To supply THOROUGH LIBERAL EDUCATION based upon ideals of great Public Schools.

Importance attached formation of character. Equipment for Home life as well as University careers.

Strain avoided. Health encouraged by Physical Exercises and Games.

Modern Premises in 12 acres. Gymnasium. *Boarding House* for 20 pupils in own grounds.

Fees.—Day Pupils, £4 4s., £5 5s. Boarders, £20 extra.

BATH.

The Medical Officer of Health writes:—"Bath City and County Borough, health resort, Somerset. Pop. 68,648. Only Hot Springs in British Isles. Most perfectly equipped modern bathing establishments in Europe.' Extensive Roman remains. Subsoils, freestones, clay, sand and gravel. Elevation, 60 to 750 feet. Climate: where sheltered, similar to southern marine climates; where exposed, good range of temperature and bracing winds. Sunshine (1925), 1,551 hours. Water-supply, pure and abundant springs."

Bath stands alone in Great Britain, as a city of considerable size and much reputation, the beginnings of which have been determined by the existence of thermal springs. Traditions assert that the first discovery of the springs and acquaintance with their healing virtues was made in primitive times before the advent of the Romans.—Vide *Climate and Baths of Great Britain and Ireland.*

[*See* p. cvi for HOLIDAY GUIDE.

BOYS.

ST. CHRISTOPHER'S,

NEAR BATH, SOMERSET.

(BOYS' PREPARATORY SCHOOL.)

Principals—W. VERNON PEEK, M.A. (Oxon.), M.R.A.C. (Ciren.).

H. C. S. PERRY, B.A. (Cantab.).

Entire charge where Parents abroad.

Fees.—£84 per annum, inclusive.

BEXHILL-ON-SEA

(Sussex). The Medical Officer of Health writes :—"The town holds a first place among health resorts owing to the general salubrity of the climate, genial influences of invigorating breezes and brilliant sunshine, perfect drainage, the purity of its water, and its freedom from epidemics. The sea-bathing is excellent. Residence at Bexhill is very beneficial in anæmia, scrofula, and tuberculous complaints, and in diseases of the respiratory organs, which may be sent here with advantage during the greater part of the year. Especially suitable for convalescents and delicate children." Golf links, 18 holes. Pop. 20,363. Sunshine (1925) 1,798 hours. *Means of access:* Southern Rly. *Location:* On coast, 5 m. W. of Hastings, 12 m. E. of Eastbourne. *Neighbourhood:* Inland, hilly pasture-lands, wooded charming country. *Aspects:* South; protected N. and E. *Climate:* Dry, invigorating. *Water-Supply:* Constant, pure, soft, no chalk. *Beach:* Shingle; low water, sand broken by rocks (prawn fishing). *Drainage:* Modern. *Soil:* Sandy. *Front:* Long esplanade (1½ m.). Sheltered seats. Beach huts. Panoramic marine view. *Bathing:* Mixed, safe, no strong currents. *Baths:* Salt-water, swimming. Boys prepared for Preparatory School.

Entire charge taken of Children from abroad.

Fees—From £90 a year.

BOURNEMOUTH.

The Medical Officer of Health writes:—"Bournemouth is built on a sandy subsoil, the dry and porous nature of which makes it an ideal site for a health resort. Whilst the thousands of pine trees constitute a physical feature of great beauty, their effect is hygienic as well as æsthetic, for the emanations from the myriad pine needles have an undoubted purifying effect on the atmosphere."

The town is one of the most beautiful seaside and health resorts in the kingdom. Sunshine (1925), 1,810 hours. Southern Rly. and L.M. & S. Rly. Pop. 91,770.

[*See* p. cvii for HOLIDAY GUIDE.

"FONTAINEBLEAU,"

MANOR ROAD, BOURNEMOUTH.

For daughters of gentlefolk who desire a school strongly recommended by parents for very happy life, individual care and character-training of future home-makers, as well as first-rate teaching in class, gymnasium, and on games ground. Juniors, 8-14; Seniors, 14-19. Successful preparation for Oxford School Certificate, Matriculation, and L.R.A.M. School motto: "For God, Home, and Empire."

Illustrated Prospectus from Principal.

Miss ROWLAND (Hon. Sch. Mod. Hist., Oxford)

SCHOOL FOR DEAF CHILDREN,

Eaton Rise, Branksome Wood Road, Bournemouth.

Principals—Miss HEWETT and Miss PIRRIE.

Children taught to speak. Thorough English education in all subjects given through Speech and Lip-reading. Deaf or partially deaf pupils received from three years of age. Every effort made to conserve and develop any degree of hearing which may exist. Free and happy home life, every care. The house stands in its own grounds of two acres, close to moors and pine-woods, and within easy reach of the sea.

Lip-reading lessons given to adults and children who have become deaf. Ladies received as resident pupils.

BUCKHURST HILL.

The Medical Officer of Health writes:—"Buckhurst Hill, which prides itself upon its local individuality and accessibility to London, is a modern residential district in Essex, 10½ miles from the Metropolis, well situated amidst healthy surroundings on the borders of Epping Forest."

GIRLS.

OAKLEA, BUCKHURST HILL.

Inspected and recognised as efficient by the Board of Education, 1921. The house occupies a high position overlooking miles of open forest land. Carefully graded education for girls 8 to 19. Large and highly qualified Staff. Programmes of the Parents' Union School are followed. Individual time-tables for school work. Preparation for Higher Examinations. Local centre for Senior Oxford. Great attention is paid to health and individual physical development, outdoor life, games, gardening. Grounds nearly 7 acres. Home-like holidays for pupils from abroad.

Principal—Miss BEATRICE GARDNER.

BRIGHTON.

The Medical Officer of Health writes:—"Brighton has the bracing qualities of East Coast resorts, with a larger amount of sunshine and more shelter during unfavourable weather. During 1910 the record of bright sunshine was 48 per cent. in excess of London; in the winter months the excess was even more marked, being 88 per cent. Whilst Brighton has more sunshine than London, at the same time it is cooler in summer. There is an unlimited pure water-supply and perfect sanitary arrangements."

With its two piers, its immense promenade, its pavilion grounds, and numerous parks and recreation grounds, together with a fine municipal orchestra, Brighton offers attractions to meet the requirements of all tastes, and combines with the advantages of the seaside resort the amusements of the town. Sunshine (1925), 1,761 hours. *See* p. cvii for HOLIDAY GUIDE.

GIRLS.

WESTCOMBE,

DYKE ROAD.

Principals - - { **Miss SALMON.** **Miss BLACK.**

Nine resident and numerous visiting Masters and Mistresses.

Premises.—Large detached house in own grounds.

Aim.—To unite the comforts and sympathies of home life with thorough and systematic education of the mental and physical faculties.

Pupils prepared for all public examinations. Art, Handicrafts, Domestic Science (in all branches). Special attention given to Modern Languages and Music. Gymnasium, Remedial Exercises, Riding, Lacrosse, Netball, Tennis, Swimming. *Fees.*—50 guineas per term inclusive.

BOYS.

BRIGHTON COLLEGE PREPARATORY SCHOOL.

16 & 28, Lewes Crescent, and 1, Arundel Terrace.

Principals—

J. H. ARNOLD, M.A. (St. John's Coll., Camb.).
J. M. GAUSSEN, M.A. (St. John's Coll., Camb.).

Premises.—On sea front 100 feet above sea-level.

Aim.—To provide thorough training on the lines of the best Preparatory Schools.

Pupils prepared for Brighton College and other Public Schools and Royal Navy. Individual attention. Backward and delicate boys receive special care. Great attention paid to Physical Training.

Entire charge where Parents abroad.

Fees.—£40 per term.

CLAREMONT,

SECOND AVENUE, HOVE.

PREPARATORY FOR PUBLIC SCHOOLS AND ROYAL NAVY.

Principal - M. O'BYRNE.

Assisted by a Resident and Visiting Staff.

Aim.—To provide a home school where individual attention will be given to the boys, who are helped and encouraged to make the best use of their abilities.

Entire charge where Parents abroad.

Fees.—40 guineas per term.

BRISTOL.

The Medical Officer of Health writes:—"118 miles from London. Pop. 385,700. Area 18,445 acres. The suburb of Clifton affords a favourite place of resort and recreation. Was formerly much resorted to for the waters and fine climate, and is a favourite place of residence. Is a noted educational centre. Clifton stands on the steep bank of the Avon at an elevation of 200 to 300 feet above sea-level. The good air and situation of Clifton are very suitable for young persons and the aged, especially during the spring of the year."

GIRLS. **"MALMAINS,"**

FRENCHAY, NEAR BRISTOL.

GIRLS' HIGH-CLASS PREPARATORY SCHOOL.

Principal - - Mrs. M. GOWAN.

Education on modern lines to Junior Cambridge, Standard Sports, Handwork. Georgian mansion standing in three acres, high elevation and sandy soil; electric light, beautiful gardens, sports field. Intimate home life under a mother's care and supervision.

Fees.—£100–£150.

Entire charge if desired, £150–£200.

Prospectus and references on application.

BOYS. **THE QUANTOCK SCHOOL FOR BOYS,**

FILTON AVENUE, BRISTOL.

Principal - - L. C. E. DURSTON.

Premises.—Occupy an elevated and healthy position on the outskirts of Bristol, one minute walk from open country.

School divided into three sections: Kindergarten, Preparatory, Professional and Commercial. Thorough grounding in all subjects. Usual examinations.

Physical Exercises, Cricket, Football, Swimming, Camping.

Entire charge where Parents abroad.

Fees.—16 guineas per term.

BYFLEET

(Surrey). One of the healthiest residential districts in the pine country, within easy reach of town, with dry, bracing air, gravel and sandy soil. 21¼ miles from London. Southern Rly. Excellent golf links, hunting, boating and fishing.

THE KEIR FINISHING SCHOOL.

GIRLS. **ROYSTON CHASE.**

FOR GIRLS OF GOOD SOCIAL POSITION (AGES 14-19).

Principal - Miss MARY PEACHEY.

Modern Side.—Domestic Science in all its branches at 40 guineas per term.

Afternoons given to Tennis, Riding, Golf, Sight-seeing, etc.

Limited numbers. Entire charge.

Fees.—From 50 guineas per term.

BROADSTAIRS.

The Medical Officer of Health writes:—"Broadstairs is built on the cliffs half-way between Ramsgate and Margate. Aspect, S.E. The town, which is built upon high land on a subsoil of chalk, thus enjoying the advantages special to this geological formation, has no northerly aspect and is sheltered from cold winds. It is peculiarly fortunate in climatic fluctuations. Remarkably free from fogs and mists. Unusually high record of bright sunshine. The climate is equable and dry, bracing in summer and mild in winter, suitable for invalids and delicate children throughout the year. The drainage system is excellent, and the water-supply pure and abundant." Sunshine (1925), 1,732 hours. Pop. 15,465. *See* p. cvii for HOLIDAY GUIDE.

BOYS. **DUMPTON HOUSE.**

FOR PUBLIC SCHOOLS AND ROYAL NAVAL COLLEGE (BOARDERS ONLY).

A. S. ATHAWES, B.A.

(*Late Parker Exhibitioner, Corpus Christi College, Cambridge*), and

R. F. F. TENDALL, B.A. (*Honours*)

(*Clare College, Cambridge*).

Usual Course. Special provision for young and delicate boys. Suitable premises in own grounds. Large Playing Field, Gymnasium, Miniature Rifle Range, Tennis Court, Daily Physical Drill. Domestic arrangements under the personal supervision of Mrs. and Miss ATHAWES.

BOYS. **ST. EDWARDS, BROADSTAIRS.**

PREPARATORY FOR THE PUBLIC SCHOOLS AND NAVY.

Boys received from 7 to 14 years of age.

Pleasantly situated, with pretty grounds attached.

The Curriculum is based on the requirements of the Common Entrance Examination. Boys are also prepared for Public School Scholarships. Close personal and individual attention.

Entire charge taken. The fees are moderate.

For Prospectus, apply Head Master.

BOYS AND GIRLS. **ALEXANDER HOUSE SCHOOL.**

(*Established over 30 years.*)

Good Class Boarding School for Boys and Girls. Beautifully situated on high ground 3 minutes from Sea. Giving a thoroughly Sound Education on Modern lines. Individual attention.

Separate House for Girls. Most careful training. Young, delicate, and backward children receive special attention.

Entire charge taken of Pupils from abroad.

Fees.—From 23 guineas per term.

Prospectus, &c., on application to the Head Master or Head Mistress.

BUXTON.

The Medical Officer of Health writes:—"Buxton is famous for its magnificent scenery, baths, etc.; in centre of Peak district, 1,000 feet above sea-level—the highest in England—and nowhere is the air purer or more bracing. Water-supply exceedingly good and soft. Epidemics are unknown. Prevailing winds, west and south-west. Buxton has a drier atmosphere than the great majority of other resorts; difficult to find a more healthy place or one more suitable for growing boys and girls."

BOYS.

HOLM LEIGH.

PREPARATORY FOR PUBLIC SCHOOLS AND ROYAL NAVY.

For Boarders only.

Principal—A. DUDLEY SMITH, M.A., LL.B. (Scholar of Pembroke College, Camb.).

Cricket and Football Field. Two asphalt playgrounds. Gymnasium, Miniature Rifle Range. 5 mins. Station, 5 mins. Moors.

Fees.—120 guineas per annum.

Prospectus and list of Scholarship Successes on application.

GIRLS.

ST. ANNE'S,

HARTINGTON ROAD, BUXTON.

Principal - - Mrs. ISHERWOOD.

Premises.—Overlooking Winter Gardens. Central heating. Electric light.

Aim.—To turn out God-fearing, sane and healthy women with "fit" bodies and well-equipped minds. Stress laid on cultivation of courteous manners, habits of method and punctuality.

Definite Church training. Health record unbroken. Preparation for usual examinations.

Entire charge where Parents abroad.
Inclusive fees.—£120 *per annum, excepting dancing and medical attendance.*

CANTERBURY.

The Medical Officer of Health writes:—"Canterbury is an exceptionally healthy city. Its equable temperature, sunny aspect, low rainfall, full water-supply, low death-rate, and excellent drainage make it a desirable health resort."

[*See* p. cviii for HOLIDAY GUIDE.

GIRLS.

ST. HELEN'S SCHOOL,

Pinecroft, Barton Fields, Canterbury.

Principals - Miss W. GERMAN, L.T.C.L. (First Class Honours R.U.I.) Miss F. GERMAN. (Inter Honours, R.U.I.)

Preparatory for Boys.

Special terms where entire charge is required.

Fees.—70 guineas per annum.

CHESTER,

Cheshire. City and County Borough. Pop. 40,794. The Medical Officer of Health writes:—"Mild, equable climate—westerly breezes. Hours of bright sunshine well above the average. Rainfall moderate. Water-supply controlled by bacteriological examination."

BOYS.

HAMPTON HOUSE.

PREPARATORY FOR PUBLIC SCHOOLS AND ROYAL NAVY.

Thorough grounding in all subjects. Curriculum arranged to meet the requirements for Entrance and Scholarship Examinations.

Boys whose parents are abroad may be left at the School during the holidays.

Fees.—30 guineas per term.

Head Master:
D. P. SAUNDERS-GRIFFITHS, M.A. (Oxon.).

CHORLEY WOOD

(Herts). Modern residential district, beautifully situated in open country 19½ miles from London. Excellent service of trains, L. N. E. and Metropolitan Railways. Population, 2,439. Climate healthy, plentiful supply of pure water, modern drainage.

HERONSFIELD,

CHORLEY WOOD, HERTFORDSHIRE.

Principals - The Misses RICHARDSON.

Premises.—Recently built for a school, 400 feet above sea-level, 40 minutes' run from London on L. & N.E. and Metropolitan Railways.

Education.—Thorough and modern. Individual attention. Careful supervision exercised over character and manners. Every effort made to ensure happiness.

Well-qualified resident and visiting staff.

Physical exercises and games under competent mistress.

Entire charge where Parents abroad.
Fees.—30–40 guineas per term.

CHICHESTER.

The Medical Officer of Health writes:—"Population 12,410. Possesses high reputation for convenience (London, 1¼ hours), interest (Cathedral City), and healthfulness (death-rate, 12 per 1,000). Gravel soil; excellent water-supply and drainage; climate very mild." This ancient Cathedral City, the See of which was established 1082, is situated 7 m. from Sussex coast 17 m. E.N.E. of Portsmouth. The Campanile at the side of the Cathedral is a 15th-century tower 120ft. in height, the only English Cathedral visible from the sea.

CROWBOROUGH.

The Medical Officer of Health writes:—"Crowborough has an area of 2,597 acres. It is considered to be an ideal health resort, situated among the highlands of Sussex. The district of Crowborough comprises that part of the county of Sussex which is upon and around Crowborough Hill, nearly 800 feet above the mean level of the sea, and commands the most extensive panoramic view in the South of England. Crowborough is situated nearly in the centre of the Weald. The geological formation on which Crowborough rests consists of nearly every variety of soil. The beds consist of the lowest of the series, the Hastings beds. The Weald clay passes beneath the lower greensand. At Crowborough the Ashdown sands are prominent."

BOYS.

THE PREBENDAL SCHOOL.

Founded A.D. 1497.

Master—Rev. Prebendary W. F. PEARCE, M.A.

System of Education.—Prepare Boys for Public Schools, Universities, and every branch of Professional and Commercial Life. Entire charge where Parents abroad.

Fees.—£42 per term.

EASTBOURNE

(Sussex). Municipal Borough. Population 62,030. Southern Railway. 62 miles from London. Elevation, from sea-level to 140 feet above; the districts of Meads and Upperton stand upon very high ground. Climate mild, invigorating; moderate rainfall. Bathing excellent.

The Medical Officer of Health writes:—"Its advantages as a health resort are much sunshine, pure air, absence of fog, clean, quickly-drying roadways, large parks and gardens with many trees, a plentiful and good water-supply from wells sunk in the deep chalk, and the proximity to the breezy, health-giving South Downs. The climate is generally beneficial in anæmia, scrofula, and *early* tubercular disease, and its effects are especially beneficial in the case of convalescent children. Death-rate 1921, inclusive, 10·28 per 1,000. Full benefit of winter sun is secured. Warm, sunny shelter always obtainable in centre of town. Beachy Head breaks S.W. winds and diverts much rain, dryness of soil being promoted by great porosity of chalk. Always at or near the top for sunshine in official records." Sunshine (1925), 1,873 hours.

[*See* p. clx for HOLIDAY GUIDE.

BOYS.

ST. BEDES.

PREPARATORY SCHOOL FOR THE PUBLIC SCHOOLS AND ROYAL NAVY.

FRAMLINGHAM

(Suffolk). The Medical Officer of Health writes:—"The College is well situated, overlooking the town and castle. Good water-supply and system of drainage. Climate is very healthy and bracing." Pop. 2,400. L. & N.E. Rly.

BOYS. (*Founded* 1864.)

FRAMLINGHAM COLLEGE, SUFFOLK.

Head Master - - F. W. STOCKS, M.A.

(*Late House Master Felsted School.*)

A SECONDARY PUBLIC SCHOOL. (Incorporated Royal Charter.) For 250 Boys (9 to 19 years).

Object.—Provide at moderate cost on Public Schools principles an education preparatory for Universities, Professions, Civil Service, and other Competitive Exams., also for Agricultural and Commercial Careers. *Premises.*—Elevated situation, 30 acres, 4 Playing Fields, Rifle Ranges, Gymnasium, Fives Courts, Carpenter's Shop, 2 Laboratories, Swimming Bath, Library, Reading Room, Chapel. Officers Training Corps. Sanitation certified. *Fees.*—£90 to £99.

FOLKESTONE.

The Medical Officer of Health writes:—"Aspect, S. & S.E. The town is one of the best-planned seaside resorts. The comparatively very healthy and dry climate is due to the porous nature of the geological formation, and, in addition, the facilities for drainage make mists, damp and fogs almost unknown. The sanitation of the town is carefully guarded, and precautions taken from time to time to maintain its efficiency. For an educational centre it is particularly adapted. A fashionable holiday resort, residential town, and cross-Channel packet station, close to Shorncliffe Camp, one and a half hours from London, modern Folkestone stands on a lofty cliff on the Kentish coast facing the Straits of Dover." Sunshine (1925), 1,761 hrs. Pop. 37,535. [See p. cxi for HOLIDAY GUIDE.

BOYS.

PENFILLAN HOUSE.

Entire charge where Parents abroad.

Fees.—30-40 guineas per term.

MALVERN

Worcester). **The Medical Officer of Health writes** :—"Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The hills, which rise to an altitude of 1,400 feet, are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. The houses are so placed as to receive more than the ordinary amount of sunshine. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water-supply is bountiful and of great purity, and the sanitary state of the district generally of a high standard. The average annual death-rate is 10·5 per 1,000 of the population. Outbreaks of infectious diseases are few and quickly suppressed, as the Urban Council are provided with every means for promptly dealing with any case that may arise."

Pop. 17,809. Sunshine (1925), 1,668 hours.

[*See* p. cxiii for HOLIDAY GUIDE.

SEAFORD.

The Medical Officer of Health writes:—"Pop. 5,358. On the Sussex coast, 58 miles from London between Brighton and Eastbourne. Southern Railway. Climate of Seaford is equable, but bracing for South Coast health resort. Never very cold in winter, and summer heat always tempered by cool sea breeze, so that hottest days in summer are not relaxing. It is a climate eminently suited to convalescents. The air has a true tonic effect on sick patients and produces a really marvellous improvement in a short time. The climate is dry, rainfall being small and owing to chalky subsoil, quickly absorbed. There is a large amount of sunshine enjoyed, and nothing to intercept it. The prevailing winds are south and west, the Downs affording considerable protection from north and east. A quiet old-fashioned town and select resort. Elevation, 20 feet to 200 feet. Aspect, S.W. Water-supply constant. Drainage modern. Beach pebbly. Bathing. Golf, two clubs, each with gentlemen's links (18 holes) and ladies' course. Tennis, Croquet, Fishing."

BOYS.

NEWLANDS,

SEAFORD, SUSSEX.

Mr. WILLIAM A. WHEELER, B.A.
(Keble College, Oxford),

Particular attention paid to health and formation of character.

Advanced work in Classics, Modern Studies, and Mathematics and Science.

Cadet Corps. Scout Troop. Good playing fields. Open-air Swimming Bath.

Fees.—£28 15*s.* per term.

WESTON-SUPER-MARE.

The Medical Officer of Health writes:- "Lies on the shores of Weston Bay in the Bristol Channel, on the seaward of the Mendips, covering the southern slopes of Worlebury, and the alluvial and sandy plain at its foot. Well protected from the cold northerly winds by the Weston-Worle ridge, and open to pure invigorating breezes direct from the Atlantic Ocean, the town has an equability of climate through all the seasons of the year, difficult to find anywhere else in England. Its climate is equable and dry—bracing in summer, warm in winter, being sheltered against the east wind by the Mendip range. Favoured with a dry subsoil, a high sunshine record, and remarkably free from infectious diseases, the town is admirably suited for invalids and delicate children, and is pre-eminently delightful as a holiday centre, with numerous beauty spots."

A spacious asphalted marine parade and carriage drive extends for over two miles, protected by a sea-wall. The piers of Weston-super-Mare are amongst its chief attractions. Ample opportunities for marine excursions. On Knightstone are swimming baths and a handsome pavilion, capable of seating 2,500 people, used principally for theatricals. Public Library and Museum. Electric tramcars.

Sunshine (1925), 1,570 hours. Water-supply, constant. Drainage, modern. Soil, sandy. Baths, sea-water, swimming, Turkish, etc. Bathing, mixed. Pop. 31,653.

BOYS. (Founded 1877.)

WORTHING.

The Medical Officer of Health writes:—"On South Coast, 10 miles from Brighton. Background of South Downs affords protection from northern winds. Worthing stands high in the opinion of the medical profession for its genial and equable climate. The town is well built and kept very clean. Good drainage system and pure water. The sands are hard, smooth and extensive, and the place generally is well adapted to the requirements of children. The winter temperature compares favourably with Ventnor." Sunshine (1925), 1,955 hours. Pop. 35,224. A select seaside resort, residential town, and winter haven for invalids, Worthing is advantageously placed in the wide bay which sweeps away east of Selsey Bill and terminates, beyond Brighton, in the bold promontory of Beachy Head. The proximity of the sea and the shelter afforded by the South Downs combine to modify the climate and avoid extremes. Divided into two parts, each is served by a railway station, West Worthing being the most modern residential quarter.

See p. cxix for HOLIDAY GUIDE.

BOYS.

SOMPTING ABBOTS.

(Two miles from Worthing.)

Principal - A. C. RUTHERFORD, B.A. (Oxon.).

PREPARATORY (6 to 15) FOR PUBLIC SCHOOLS AND ROYAL NAVY.

BEDFORD,

C.B. Pop. 39,183. 50 miles from London. L.M. & S. Railway. A noted educational centre on the banks of the Great Ouse, with charming riverside promenade. Golf Links (18 holes).

[*See* p. lxxvi for SCHOOLS.

THE PRINCIPAL HOUSE AGENTS FOR BEDFORD AND COUNTY. W. and H. PEACOCK, 10, Lime Street, Bedford. (Telephone, No. 3115.) The Bedford Illustrated Property Register contains Map, school fees, views and photos of Town and Schools. Post free. Weekly Sales. Auction Rooms, Lime Street. Auction Mart, Horne Lane.

BEXHILL,

SUSSEX. M.B. Pop. 20,363. Southern Railway. 71 miles from London, 5 miles from Hastings, 12 miles from Eastbourne. **Aspect**—South. **Climate**—Dry, invigorating. **Water Supply**—Constant. **Soil**—Sandy. A modern select seaside resort, with good educational facilities. 2 Golf Links. Public Park, 12½ acres. **Excursions**—Battle Abbey, 8 miles; Pevensey Castle, 7 miles; Hurstmonceux Castle, 10 miles. Sunshine (1925), 1,798 hours.

The rapid growth of Bexhill is to be attributed to its bracing air and sunny climate, and it has been found that the air possesses recuperative and stimulating qualities in a remarkable degree. It is one of the sunniest spots on the South Coast; fogs are practically unknown, while the soil is for the most part sandy, and dries quickly after rain.

[*See* p. lxxvii for SCHOOLS.

HOUSE AND ESTATE AGENTS. STAINES & CO., 28, Devonshire Road, and Sea Road, Cooden Beach. Agents for all available Furnished and Unfurnished Houses to be Let or Sold. Special Lists, Map, and Guide gratis. Telegrams, "Property, Bexhill." Telephone, 349, and Cooden 15.

BOURNEMOUTH,

HANTS. C.B. Pop. 91,770. 107¼ miles from London. L.M. & S. Railway and Southern Railway. **Aspect**—South. **Climate**—Mild, equable temperature. **Sunshine (1925)**, 1,810 hours. **Soil**—Sand and gravel. **Beach**—Sandy, no currents. A fashionable South Coast health resort extending along a stretch of chine-broken cliffs in the wide-open bay which forms the western extremity of Hampshire. It owes its prosperity to the natural beauty of its situation, its climatic advantages and the purity of its air, laden with the aromatic health-giving exhalations of its innumerable pine trees. 2 Golf links (18 holes). 3 large parks. Good educational facilities. [*See* p. lxxviii for SCHOOLS.

BRIGHTON,

SUSSEX. Pop. 142,427. **Means of access**—Southern Railway. 51 miles from London. **Elevation**, 26 to 462 feet. **Aspect**—South. **Sunshine (1925)**, 1,761 hours. **Soil**—Chalk. **Front**—4½ miles. **Marine drive** with promenade; lawns, ornamental terrace walks.

Society's liveliest seaside rendezvous; favourite resort of Londoners. Development of the town due to salubrious location, accessibility to London and resemblance thereto, excellent train service, and its enormous capacity for accommodating and amusing all tastes and all classes all the year round. Racecourse meetings; 6 golf links (18 holes); harriers, foxhounds, county cricket ground, numerous parks and recreation grounds, boating, fishing. Royal Pavilion, once a Royal residence, now used for public amusements and concerts; public library, museum, art galleries.

[*See* p. lxxviii for SCHOOLS.

BROADSTAIRS,

KENT. U.D.C. Pop. 15,465. Southern Railway. 75 miles from London. **Location**—Between Ramsgate and Margate; connected with both by electric tram service. **Elevation**—About 150 feet. **Neighbourhood**—High cliffs. **Aspect**—South-east. **Climate**—Dry, bracing. **Sunshine (1925)**, 1,732 hours. **Soil**—Chalk. **Front**—Promenade on top of cliff; ornamental gardens. **Beach**—Sands. A quiet, select family resort and exhilarating retreat. Remarkably free from fogs and mists; bracing in summer and mild in winter; suitable for invalids and delicate children throughout the year.

[*See* p. lxxix for SCHOOLS.

LYMINGTON,

HAMPSHIRE. Pop. 4,598. Southern Railway. 97 miles from London. Situation—On the south-west coast of Hampshire, on the edge of the New Forest. Summer and winter resort. Yachting, fishing, boating, tennis.

THE ESTATE AGENTS AND AUCTIONEERS for Lymington, New Forest, and Milford-on-Sea are LEWIS & BADCOCK, 91, 92, High Street, Lymington. Also Removals and Warehousing. Telephone, 93.

MALVERN,

WORCESTERSHIRE. U.D.C. 129 miles from London. Pop. 17,809. Means of Access—G.W. Railway and L.M. & S. Railway. Location—On the slopes of the Malvern Hills, 8 miles from Worcester. Elevation—300 to 900 feet above sea-level. Climate—Dry and bracing. Water Supply—Pure, constant. Drainage—Modern. Soil—Gravel. Season—Summer and winter. Annual Fixtures—Shakespeare Week in May; Croquet and Lawn Tennis tournaments in May and June. Malvern is an inland watering-place, important educational centre, and a pretty residential town, consisting mostly of villas standing in own grounds. The highest point of the Malvern Hills is the Worcestershire Beacon, 1,400 feet high, from the summit of which is obtained one of the most extensive panoramic views in Great Britain, embracing the Severn and Wye Valleys, the Cotswold, Mendip and Welsh hills; and in the plain below can be seen Droitwich, Worcester, Evesham, Cheltenham, Gloucester and the Bristol Channel.

The Malvern Hills being a single chain, there are no lateral intervening valleys in the range. This has much to do with the dryness of the climate. The Malvern district is rich in botanical, geological, entomological and ornithological specimens. Assembly rooms (high-class bands and theatrical companies), public library, three clubs, tennis, bowls, croquet, golf—gentlemen's course (18 holes), ladies' course (9 holes)—hunting, boating, fishing. Places of Interest—Rivers Severn (4 m.), Teme (6 m.), Avon (12 m.); boating, fishing, river scenery. Deerhurst (17 m.)—Saxon church. Tewkesbury Abbey (15 m.). Pershore Abbey (16 m.). Bosbury (8 m.)—Edna Lyall's tomb. Valley of the Wye—by rail to Liss, and boat down river to Chepstow.

[*See* p. xc for SCHOOLS.

TORQUAY,

DEVON. M.B. Pop. 39,432. **Means of Access**—G.W. Railway. 199¾ miles from London. **Location**—S.E. coast of Devon, in the N. recess of Torbay. 25 miles S. of Exeter. **Neighbourhood**—Cliffs and hills. **Sunshine** (1925), 1,822 hours. **Climate**—Mild, soft, equable; luxuriant vegetation. **Water Supply**—From Dartmoor; constant, soft. **Drainage**—Modern. **Soil**—Limestone. **Front**—Ornamental promenades and marine drive. **Pier**—1,500 feet; pavilion, skating rink. **Beach**—Sand and shingle. **Baths**—Corporation (fresh and salt water), Nauheim and Vapour Baths, Radiant Light and Heat, High Frequency and Diathermy Treatments, All Electric Baths, Plombières-Intestinal Douche, Torquay Seaweed Baths, Aix and Vichy Douche Massage, Peat Baths, Turkish Baths. **Excursions**—Rail and river, coaching and marine.

In a curve of Torbay, on a peninsula between the Rivers Dart and Teign, Torquay is built on seven hills, the highest reaching 400 feet, sheltered N. and E.; lower part is built round harbour (enclosed by quay and piers), the houses rising behind in tiers, affording choice of elevation. A fashionable, high-class watering-place, favourite resort for the delicate, and popular winter residence; claims to be warm in winter and cool in summer. Its peculiar charm is the matchless combination of sea coast, wild moorland and beautiful valleys. Good yachting facilities in harbour, and safe anchorage in bay. Convenient centre for excursionists over Dartmoor.

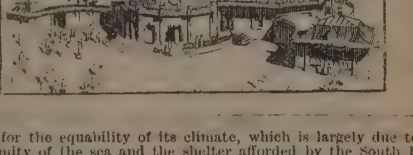
WORTHING,

SUSSEX. M.B. Pop. 35,224. Southern Railway. 61 miles from London. Aspect—South. Climate—Dry, mild, equable. Sunshine (1925), 1,955 hours. Water Supply—Constant, from the hills. Drainage—Modern. Soil—Loam and marl. Beach—Safe level sands with plenty of shingle. A select seaside resort, residential town and winter haven for invalids, protected from the north by the South Downs, which rise in breezy uplands some little distance inland, its great charm being that it has developed into a modern seaside town without losing much of its rural aspect; much foliage and sylvan surroundings. Homefield Park, 16 acres (cricket, tennis, bowls); Steyne Gardens, 3 acres; Broadwater Green; Victoria Recreation Ground; Beach House Park (hard tennis courts and Cumberland turf bowling greens); Denton Gardens (golf putting courses). Golf links (two 18-hole courses). Hunting, boating, fishing. Places of Interest—Arundel (10 m.), Bramber Castle (9 m.), Goring Woods (3 m.), Broadwater (1 m.), 13th Century Church. Chanctonbury (7 m.) (800 ft.), Cissbury, and other remains of Roman encampments.

THE IDEAL RESIDENTIAL TOWN



UNSURPASSED FOR SUNSHINE AND EQUABILITY OF CLIMATE

Worthing is noted for the equability of its climate, which is largely due to its geographical situation. The proximity of the sea and the shelter afforded by the South Downs combine to modify the climate and avoid extremes. The absence of hills enables convalescents to take exercise without exertion, and so derive the greatest benefit from the high percentage of ozone in the air and the large amount of sunshine. A palatial Pavilion at the Pier entrance and a commodious Bandstand Enclosure on the Parade have been added to the town's many attractions. An all-the-year orchestra plays in the Pavilion.

EXPRESS SERVICE (PULLMAN CARS) to LONDON, 76 minutes.

[*See* p. cii for SCHOOLS.

Law Reversionary Interest Society, Ltd.

ESTABLISHED 1853.

MANY persons have interests either for life or in expectation in property arising under Wills or Settlements. The operations of this Society enable such interests to be sold on most favourable terms, or loans to be obtained thereon at moderate rates of interest.

REMOTE interests which may never come into possession at all can be made available for immediate use if supported by Policies to be effected with the **EQUITY & LAW LIFE ASSURANCE SOCIETY**, which is under the same management.

For full information apply personally, or through your Solicitor, to the Secretary at the Society's Offices,

19, LINCOLN'S INN FIELDS, W.C. 2.

AUSTRALIAN MUTUAL PROVIDENT SOCIETY

(A.M.P.) ***ESTD. 1849.*** ***(A.M.P.)***

THE LARGEST BRITISH MUTUAL LIFE OFFICE.

Assets	**£63,000,000**
Annual Income	**£9,000,000**

The A.M.P. Society's premium rates are lower than the average, it distributes its whole divisible surplus annually among its policy-holders, it values its liabilities on the most stringent basis and it possesses in a unique degree the combination of a low expense rate, a high interest return and a favourable mortality experience. Those who desire to obtain their life assurance cover at the lowest net cost, with perfect security, are invited to investigate these claims.

EVERY YEAR A BONUS YEAR.

BROAD ST. CORNER, BIRMINGHAM

DOUBLE YOUR INCOME

ELIMINATE RISK.

Every person whose income is derived from investments knows how harassing is the anxiety entailed by the constant rise and fall in their value.

You can get a guaranteed income for life if you purchase a Canada Life Annuity. It is, humanly speaking, equivalent in safety to a Government pension. It cannot shrink. What you contract to get is paid you punctually. And you get a much larger income.

FOR INSTANCE

A man of 62 who takes out a Canada Life Annuity for £1,000 gets a yearly income of £100 12s. 1d. A woman of 67 gets a yearly income of £101 12s. 6d. for the same investment.

OVER 10% PER ANNUM.

Other ages pro rata, on equally generous terms. You can invest any amount from £100. The Funds of the Canada Life Company are over £23,000,000, and are under direct Government supervision. Write at once for full particulars to the Canada Life—the oldest Colonial Life Assurance Company and the office that gives the best value for Annuities.

Write to-night (stating age) to Annuity Department,

LIVERPOOL: North John St. LONDON: Lombard St.

Enjoy a larger income and live longer!

If you depend on investments for your income you are probably only getting about 5% on your Capital, and you may not be sure of that or of the safety of your money.

Supposing you can get 13% guaranteed for as long as ever you live, then you would be able to indulge in more of the comforts of life and be relieved of all anxiety. Both advantages will tend to lengthen your life.

13% Guaranteed for as long as you live

A man of 70 can obtain from the Sun Life of Canada an Annuity equivalent to 13% on his Capital. **If his health is impaired, a larger Annuity will be granted.** Older and younger ages get proportionately higher and lower rates, and all receive advantages exclusive to Sun of Canada Annuitants.

There are many other forms of Sun of Canada Annuities — Joint Life, **Annuities with guaranteed return of Capital,** Deferred Annuities and Educational Annuities.

Why not let us send you particulars? Remember, the offer is made to you by the *leading* Annuity Co. — a Company with Government-Supervised Assets exceeding £62,000,000.

In confidence, write, giving exact date of birth.

J. WHITAKER & SONS, Ltd., 12, Warwick Lane, London, E.C.4

Principal Charitable Bequests of the Year.

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount for charitable purposes is, in a considerable proportion of the cases, approximate, owing to the bequests including a share of the residuary estate, or consisting wholly or in part of business interests, or of blocks of shares, for which a definite value cannot be given.

The outstanding feature of the year is furnished by the bequests under the will of Mrs. Grove-Grady, the bulk of whose estate is left for animal charities and for the purchase and upkeep of an island refuge or sanctuary for the preservation of all forms of animal life other than human. Another noteworthy feature is the residuary bequest, under the will of Mr. Samuel William Farmer, of approximately £150,000 primarily for the benefit of the upper middle or professional classes. Hospitals, Religious Associations, Orphanages and various educational institutions account for the bulk of the remainder.

The total sums left for charitable purposes show a distinct falling-off as compared with previous years, and in numerous instances the original generous bequests of the testator have been modified and reduced by codicil owing to the heavy demands made on both capital and income in taxation.

Name.	Gross Value of Estate.	Approx. Amount.	Particulars.
	£	£	
Grove-Grady, Mrs. Sarah Martha, of Norfolk Crescent, Hyde Park, W.	607,893	400,000	Bequests include £50,000 to the People's Dispensary for Sick Animals of the Poor, £10,000 to the Royal Society for the Prevention of Cruelty to Animals, £9,000 to the Anti-Vivisection Hospital, £6,000 to the North London Dogs Home, £5,000 to the National Canine Defence League, and the residue for an Institution to be known as the "Beaumont Animals Benevolent Society," the Society to acquire land, either on an island or islands, for providing a refuge for the preservation of all animals, birds or other creatures, not human, to be safe from molestation or destruction by man, and for other purposes.
Bailey, Thomas, of Hessle, Yorks.....	351,337	250,000	Bequests include £10,000 to Hull Royal Infirmary and other large bequests to Hull and District Hospitals and Charitable Institutions, and residue as to one-fifth to Hull Royal Infirmary and one-tenth each to Hull Blind Institution, Victoria Hospital for Sick Children, Hull, Restoration Committee of Holy Trinity Church, Hull, the Royal National Lifeboat Institution, the United Kingdom Beneficent Association, Dr. Barnardo's Homes, the Salvation Army, and the London Hospital.
Bosher, Alfred Barrow, of Tunbridge Wells and Sheffield	273,629	200,000	One-half of residue to Mayor and Corporation of Sheffield for such Hospitals as they may choose, and one-half to the Lord Mayor and Corporation of the City of London for such Hospitals in the County of London and in such proportions as they may select.
Farmer, Samuel William, O.B.E., of Bedwyn, Wilts.	404,730	150,000	Residue of property for a fund for the benefit of persons of either sex particularly, and especially, but not necessarily or exclusively, for the upper middle or professional classes who through ill-health or by reason of adversity and advancing years are incapable of earning their own livelihood, or for such educational purposes or the benefit of such hospitals nursing or convalescent homes as the trustees shall determine.

Name.	Gross Value of Estate.	Approx. Amount.	Objects.
	£	£	
Topham, Mrs. Emily, of Folkestone, Kent	247,750	120,000	On death of residuary legatee £1,000 each to Church Army, Salvation Army, Dr. Barnardo's Homes, and Westminster Hospital, £500 each to Institution of Civil Engineers and Civil Engineers Navvy Mission, and ultimate residue to Westminster Hospital, London Hospital, and St. George's Hospital for diabetic patients.
Joicey, Major James, of Fairford, Glouc.	188,123	100,000	On death of wife left £250 to Fairford Cottage Hospital, and ultimate residue to such charitable objects or charities as she may appoint, or failing appointment, then as the trustees in their absolute discretion may decide.
Williams, Sir John, Bart., of Aberystwyth	123,742	100,000	£2,000 to University College Hospital, London, and residue of property to National Library of Wales and the University College of Wales, Aberystwyth.
Hollams, John, of Victoria Road, Kensington, W.	145,294	90,000	On death of residuary legatee left £10,000 each to the Solicitors Benevolent Association and the Royal Female Orphan Asylum, and the residue to Dr. Barnardo's Homes.
Hornsby, John Henry James, of Cuckfield Park, Sussex	97,761	60,000	Residue of estate "for such charitable purposes and objects as I shall hereafter by codicil direct, and in default of, and subject to any such directions as my trustees in their uncontrolled discretion shall decide." (No such codicil is filed with the Will.)
Ronan, Rt. Hon. Stephen, of Dublin (personal estate)	83,907	55,000	Bequests include £200 to the Irish Bar Benevolent Society, and the residue is to be applied in assisting and promoting scientific research, "but without limiting the discretion of the (Medical Research) Council I would wish that special attention should be given to the relief, cure and prevention of physical pain by physical means."
Morgan, Evan, of Liverpool	58,234	50,000	On death or remarriage of wife left £1,000 to the Cardiganshire Education Committee for Scholarships, £1,000 to the Memorial College, Brecon, for candidates for the Welsh Ministry, and other legacies, and residue for Scholarships for Children attending Welsh County Schools, tenable at University College, Aberystwyth, for proficiency in Welsh, English, Mathematics and Natural Science.
Gilbertson, James, of Heswall, Cheshire	122,691	50,000	Bequests include £10,000 for such charitable objects as executors choose, and one-half of the residue to Dr. Barnardo's Homes, the National Institution for the Blind and the National Lifeboat Institution.
Craston, Charles Edward, of Manchester	79,462	50,000	One-half of residue to Manchester Royal Infirmary and Dispensary, St. Mary's Hospital, Manchester, and Royal Manchester Children's Hospital, and one-half to Ancoats Hospital and Dispensary, Manchester Royal Eye Hospital, and the Hospital for Consumption and Diseases of the Throat, Manchester, the Manchester and Salford Boys' and Girls' Refuges, St. Anne's-on-the-Sea War Memorial Hospital, and the Warehousemen's, Clerks' and Drapers' Schools, London.

Name.	Gross Value of Estate.	Approx. Amount.	Objects.
	£	£

[132

The Empty Chair

means a heartache for the little child who has lost his father. It means much more, however. The training and advice which father would have given to the little chap will be missing; and if mother is to go out to earn her own living and be self-supporting, the little lad would be left alone and unprotected. A happy home awaits such children (boys and girls) at the Alexandra Orphanage at Haverstock Hill, London, N.W.3; and gifts towards the upkeep of this excellent School will be welcomed by the Treasurer,

LORD MARSHALL, at
73, CHEAPSIDE, LONDON, E.C.2

The Cancer Hospital
(FREE)

(FOUNDED 1851. INCORPORATED UNDER ROYAL CHARTER.)

FULHAM ROAD, LONDON, S.W. 3.

The only Special Hospital in London for the treatment of Cancer, Tumours, and Allied Diseases.

NO LETTERS. NO PAYMENTS.

A special refuge for poor persons afflicted with this disease, who are admitted free and without letters of recommendation. A number of beds are provided for the use of Patients who may remain for Life.

Out-patients are seen on their own application each week-day except Saturday at 2 p.m.

Annual Subscriptions, Donations, and Legacies are earnestly solicited. Funds are specially needed for the Research, Electrical, and Radio-Therapeutic Departments.

Bankers: COUTTS & Co. J. COURTNEY BUCHANAN, *Secretary*

FORM OF BEQUEST.

"I give and bequeath unto the Treasurer for the time being of THE CANCER HOSPITAL (FREE) *situate in the Fulham Road, London, the sum of*

(free of Legacy Duty), to be applied towards carrying on the charitable designs of the said Institution." [82]

GUY'S HOSPITAL
LONDON BRIDGE, S.E. 1,
NEEDS HELP.

President: H.R.H. THE PRINCE OF WALES, K.G.

Founded in 1724 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii., and 61st Victoria, ch. vi., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The Hospital is empowered to receive gifts of, and to hold, land up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital), notwithstanding the provisions of the Mortmain Acts.

BEDS	IN-PATIENTS (1925)	OUT-PATIENTS (1925)
618	10,395	121,876

Expenditure: £166,958 :: :: Income from Endowments: £64,358

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is only £5,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of over £100,000 per annum.

To form a permanent Memorial, if desired, a Donation or Bequest should be allocated to the Re-endowment Fund, which is permanently invested and the income only applied for the general purposes of the Hospital.

A Gift of £1,000 to this Fund, or an Annual Subscription of £50, will respectively endow or support a Bed, over which a brass tablet, inscribed in accordance with the wishes of the Benefactor, can be placed.

A copy of the Annual Report of the Hospital can be obtained on application to Mr. W. J. Curry, Clerk to the Governors, Guy's Hospital, S.E. 1. Telephone: Hop 1086.

Bankers: THE BANK OF ENGLAND. Treasurer: F. P. WHITBREAD, Esq.

THE GORDON BOYS' HOME
(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING. *Vice-Patron*—H.M. THE QUEEN.

Chairman Executive Committee—H.R.H. THE DUKE OF YORK, K.G.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.

The Home is constructed to accommodate 250 Boys, chosen from the necessitous classes between the ages of about 14 and 15½, and give them a training, up to the age of 17 or thereabouts, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy, Air-Force or Mercantile Marine.

Conditions of Admission. 1. The age for admission is from about 14 to 15½ years. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £35 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. *Subscriptions and Donations are urgently needed in order that the above number of boys may be maintained.*

Subscriptions are received by THE WESTMINSTER BANK, LIMITED, 1, St. James's Square, S.W., and by the Commandant at the Home, from whom any further information can be obtained. For financial reasons the London Office has been abolished.

COMMANDANT:—MAJOR SIR T. E. S. PASLEY, BART.

THE HOSPITAL FOR DISEASES OF THE SKIN
70-71, BLACKFRIARS ROAD, S.E.

Telephone: Hop. 1021. ESTABLISHED 1841.

Treasurer—THE RT. HON. THE LORD MORRIS, P.C., K.C.M.G.

This hospital, established in 1841 and the oldest Skin Hospital in London, is still unable to reopen its beds for In-patients owing to lack of funds. Donations and subscriptions are urgently desired. Since its foundation no less than 558,000 patients have been treated, and the scientific equipment of the Institution has always been kept thoroughly abreast of modern developments in research and treatment. The Light Department is provided with X-rays, radium and ultra-violet light apparatus. It is a centre both of dermatological therapeutics and education, and welcomes at its clinics medical practitioners and students. Patients should attend daily at 1.30 p.m., or on Fridays at 6 p.m. They are expected to contribute to the funds of the hospital according to their means.

GENERAL LYING-IN HOSPITAL,

York Road, Lambeth, S.E. 1. ESTABLISHED 1765.

Patron—**H.M. The Queen.**

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss LILY HEARN, *the Secretary, at the Hospital.* [146

KING'S COLLEGE HOSPITAL,

Office—65, Southampton Row, London, W.C. 1. [164

¶ Poverty, orphanhood, illness, neglect, and cruelty are some of the perils that endanger the early years of thousands of little children.

¶ It is the work of the Children's Home to discover their need, and to see them safely across life's difficult places.

¶ Already nearly 20,000 boys and girls have been helped to health, home, and happiness, and their number increases every day.

¶ Will you lend a helping hand by sending a practical expression of your sympathy with this work for the children?

THE ROYAL SCHOOL FOR THE BLIND

Leatherhead, Surrey.

(*Registered under the Blind Persons Act*, 1920.)

Patron - - - HIS MAJESTY THE KING.

OBJECT :—To provide food, clothing, education, instruction, and afterwards employment in a trade, to blind young men and women, free of all cost for a period of six years, so that they ultimately may become self-supporting.

£5,000 annually is required from voluntary sources if the School is to maintain its present level of usefulness.

All pupils admitted to this School are at the end of their training offered (a) Work in one of our Factories, or (b) Residence in the Hostel for those incapable of earning their living.

The Rev. E. H. GRIFFITHS, R.N., Principal.

Bankers: Lloyds Bank, Ltd., 16, St. James' Street, London, S.W.1.

SOUTH LONDON INSTITUTE FOR THE BLIND

83, Borough Road, London, S.E. 1.

(*Registered under the Blind Persons Act*, 1920.)

This Institute was founded in Southwark in 1870, and was, until his death, under the patronage of that well-known philanthropist, the 7th Earl of Shaftesbury.

The object of the Charity is, by means of voluntary helpers, to organize work among the poor blind in the following directions :—(1) a Bureau for those seeking employment ; (2) a Polytechnic in which religious services are conducted and educational classes carried on ; and (3) a home for unmarried blind women.

This Society relies *solely* upon voluntary contributions. Nearly all the workers are honorary.

Bankers: Barclays Bank, Ltd., 1 & 2, St. George's Circus, London, S.E. 1.

Maintains 240 Inmates and 650 Pensioners for life at cost of £50,000 per annum, of which only £9,000 are guaranteed.

CHARLES CUTTING, *Secretary.*

1856 saw the establishment of the Reformatory and Refuge Union, with the Earl of Shaftesbury as President. Its chief aim was "To reclaim and elevate the neglected and criminal classes, by educating them in the fear of God and in the knowledge of the Holy Scriptures."

The Union's many activities necessitated devolution as follows:—

CHILDREN'S AID SOCIETY. Its Rescue Officers seek out children living in want, misery, crime or moral danger. 76,000 children have been helped. 4,000 were dealt with last year. It also maintains:

BLUNHAM BABIES' HOME for little children needing a mothers' care.
BRIGHTON HOME FOR LITTLE BOYS, for those under 10 years of age.
GIRLS' PROTECTIVE HOME, HASTINGS, for young girls.
FOTHERBY HOUSE for poor girls going out to work daily.
GROTTO HOME FOR WORKING BOYS.

The Society needs ***£8,000*** *per annum.*

WOMAN'S MISSION TO WOMEN, with a staff of lady missionaries who scour the streets, open spaces, lodging houses, etc., for girls and women needing help and advice. For their accommodation it provides
ANCHORAGE & HAVEN for unmarried mothers with the first child.
EL NATHAN MISSION HOUSE.
MOORE HOUSE, EAST SHEEN.
BISHOP BILLING MEMORIAL MISSION HOUSE.
MADDISON MEMORIAL HOSTEL FOR MOTHERS & BABIES, to avoid separation of mother and child.

The work cannot be maintained at less than ***£7,500*** *per annum.*

PROVIDENT & BENEVOLENT FUND which helps those engaged in philanthropic work in times of illness, old age, and distress.
INEBRIATES REFORMATION & AFTERCARE ASSOCIATION, for befriending men and women after leaving Homes.
INSPECTION OF HOMES ASSOCIATION, for the inspection of Orphanages, Homes, etc., not subject to Government inspection.
NATIONAL ASSOCIATION of Certified Schools for the furtherance of their work by means of Conferences, etc.
"SEEKING & SAVING" (established 1861), the Monthly Journal devoted to child-saving, reformatory, and preventive work generally.

Society for the Assistance of

Ladies in Reduced Circumstances

Under Royal Patronage.

THIS Society is solely engaged in tending for the needs of ladies who, through the ill-timed blows of "outrageous misfortune," are dependent on voluntary contributions and gifts.

Those who are helped in this way do not come within the orbit of other great charity organisations, and therefore the Society, in carrying on a *specialised* charity, appeals directly and strongly to your generosity.

The Society needs money for essential reasons—for rents—to buy coal—to relieve weak and frail ladies—to procure necessaries for those capable of home employment—and to ensure an element of comfort for those who otherwise could not obtain it. **Will you help in this very human cause? Every donation, large or small, is very gratefully accepted.**

If you cannot give a substantial amount now, will you kindly think of the Society when you make your will? Legacies help to lay a firm foundation, and an amount of £50, £100 or £500 would give very definite help in the future and do much for the benefit of the Society.

Hon. Secretary:

EDITH SMALLWOOD, Lancaster House, Malvern.

Bankers: Lloyds Bank, Malvern.

ANNUAL VOLUNTARY SUPPORT REQUIRED	£64,000

The Work of the National Institute for the Blind.

(Registered under the Blind Persons Act, 1920.)

Headquarters: 224 Great Portland St., London, W. 1.

Patrons: HIS MAJESTY THE KING; HER MAJESTY THE QUEEN.

A MAGNIFICENT RECORD.

Below are given a few figures which illustrate, perhaps better than anything else, the magnitude and extent of the work of the National Institute for the Blind:—

Number of Braille books, periodicals, music, etc., published ...	2,515,343	since 1915
Number of Moon books, periodicals, etc., published	285,736	,, 1915
Number of hand-made Braille books prepared for Students' Library	6,865	,, 1919
Amount paid in Salaries, Wages, etc., to blind Employees	£279,551	,, 1921
Amount of Financial Assignments and Allocations to Local Institutions for the Blind	£292,532	,, 1915
Amount distributed by the Greater London Fund to Metropolitan Institutions for the Blind...	£62,118	,, 1921
Number of After-Care cases dealt with	9,507	,, 1916
Amount paid in Relief to Blind Poor, etc.	£136,799	,, 1915
Value of Gifts made to the Blind, including Value of Reductions in prices to the Blind throughout the British Empire	£52,648	,, 1918
Amount paid in Training Fees	£27,022	,, 1918
Amount expended on Care and Training of Blind Babies (not including Capital Expenditure)...	£27,322	,, 1917
Amount spent in Training and After-Care, etc., of Blind Masseurs...	£14,647	,, 1916

The principle on which the Institute acts is to devote 75% of the net amount of money collected to local work, and 25% to national work (its own particular interest).

FUNDS ARE URGENTLY NEEDED. Will you please send a donation to the Hon. Treasurers, National Institute for the Blind, 224 Great Portland St., W.1.

THE proprietors of "Whitaker" desire earnestly to support the many appeals for immediate financial assistance made in this volume by Hospitals and Charitable Institutions all over the country.

The Voluntary System under which these Institutions are carried on requires unremitting effort on the part of those responsible for their finances, and subscribers, donors and testators are adequately rewarded by the progress in scientific research and in the alleviation of suffering and distress which their contributions enable the Institutions to achieve.

These Hospitals and Institutions deserve the heartiest and most generous support it is possible to give.
